

## Acerca de este libro

Esta es una copia digital de un libro que, durante generaciones, se ha conservado en las estanterías de una biblioteca, hasta que Google ha decidido escanearlo como parte de un proyecto que pretende que sea posible descubrir en línea libros de todo el mundo.

Ha sobrevivido tantos años como para que los derechos de autor hayan expirado y el libro pase a ser de dominio público. El que un libro sea de dominio público significa que nunca ha estado protegido por derechos de autor, o bien que el período legal de estos derechos ya ha expirado. Es posible que una misma obra sea de dominio público en unos países y, sin embargo, no lo sea en otros. Los libros de dominio público son nuestras puertas hacia el pasado, suponen un patrimonio histórico, cultural y de conocimientos que, a menudo, resulta difícil de descubrir.

Todas las anotaciones, marcas y otras señales en los márgenes que estén presentes en el volumen original aparecerán también en este archivo como testimonio del largo viaje que el libro ha recorrido desde el editor hasta la biblioteca y, finalmente, hasta usted.

## Normas de uso

Google se enorgullece de poder colaborar con distintas bibliotecas para digitalizar los materiales de dominio público a fin de hacerlos accesibles a todo el mundo. Los libros de dominio público son patrimonio de todos, nosotros somos sus humildes guardianes. No obstante, se trata de un trabajo caro. Por este motivo, y para poder ofrecer este recurso, hemos tomado medidas para evitar que se produzca un abuso por parte de terceros con fines comerciales, y hemos incluido restricciones técnicas sobre las solicitudes automatizadas.

Asimismo, le pedimos que:

- + *Haga un uso exclusivamente no comercial de estos archivos* Hemos diseñado la Búsqueda de libros de Google para el uso de particulares; como tal, le pedimos que utilice estos archivos con fines personales, y no comerciales.
- + *No envíe solicitudes automatizadas* Por favor, no envíe solicitudes automatizadas de ningún tipo al sistema de Google. Si está llevando a cabo una investigación sobre traducción automática, reconocimiento óptico de caracteres u otros campos para los que resulte útil disfrutar de acceso a una gran cantidad de texto, por favor, envíenos un mensaje. Fomentamos el uso de materiales de dominio público con estos propósitos y seguro que podremos ayudarle.
- + *Conserve la atribución* La filigrana de Google que verá en todos los archivos es fundamental para informar a los usuarios sobre este proyecto y ayudarles a encontrar materiales adicionales en la Búsqueda de libros de Google. Por favor, no la elimine.
- + *Manténgase siempre dentro de la legalidad* Sea cual sea el uso que haga de estos materiales, recuerde que es responsable de asegurarse de que todo lo que hace es legal. No dé por sentado que, por el hecho de que una obra se considere de dominio público para los usuarios de los Estados Unidos, lo será también para los usuarios de otros países. La legislación sobre derechos de autor varía de un país a otro, y no podemos facilitar información sobre si está permitido un uso específico de algún libro. Por favor, no suponga que la aparición de un libro en nuestro programa significa que se puede utilizar de igual manera en todo el mundo. La responsabilidad ante la infracción de los derechos de autor puede ser muy grave.

## Acerca de la Búsqueda de libros de Google

El objetivo de Google consiste en organizar información procedente de todo el mundo y hacerla accesible y útil de forma universal. El programa de Búsqueda de libros de Google ayuda a los lectores a descubrir los libros de todo el mundo a la vez que ayuda a autores y editores a llegar a nuevas audiencias. Podrá realizar búsquedas en el texto completo de este libro en la web, en la página <http://books.google.com>

---

This is a reproduction of a library book that was digitized by Google as part of an ongoing effort to preserve the information in books and make it universally accessible.

**THE TORBAY and DART PAINT COMPANY, Ltd.****Meetings.****PUERTO CABELLO AND VALENCIA RAILWAY.**

The annual general meeting was held on Monday, at the offices, 60, New Broad-street, E.C.; Mr. WILLIAM NEWBOLD presiding.

The SECRETARY (Mr. Lee Pilditch) read the notice convening the meeting.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, all the reports from our manager in Valencia which had come to hand up to the date of our last meeting respecting the state of business in the district served by our railway were, as I informed you, very unfavourable; the merchants were complaining that no purchases were being made for the interior, and everything indicated that the traffic of the line for 1897 would be poor; this has, unfortunately, turned out to be the case. The gross receipts show a falling-off of nearly 14,000*l.* compared with those of the preceding year, and were only 6,000*l.* more than was earned in that year of disaster 1892, when, in consequence of a severe revolutionary struggle and a succession of storms and floods, the line was closed for nearly six months. Last year the rains did not injure the railway to any great extent. The River Agua Caliente, which we follow for about 15 miles from Las Trincheras to El Palito, where it runs into the sea, was several times in high flood, but never touched the extreme height at which it has caused such serious damage in the past. A landslip occurred in July, about a mile from Las Trincheras, which necessitated the transfer of passengers for one day; and in December, within a short distance of the same place, the floods carried away the masonry of a 12ft. open culvert, leaving a gap of some 25ft. wide in the bank, and causing an interruption of three days. This gap was temporarily filled with earth, and the culvert will be replaced by an opening of 20ft. with iron girders. The filling in behind the new masonry wall at Limoncito was completed in September, and the temporary timber bridge erected in 1894 was removed. The state of political disquietude, which preceded the election for the new President, and which was very pronounced as early as August last, in the district traversed by our railway, did not come to an end when the election was over, and after the inauguration of General Andrade on February 28th last, a revolution broke out, headed by General Hernandez, a defeated candidate for the Presidency; on March 10th General Crespo left Valencia with an army to march against him, and about the middle of April it was reported that a battle had taken place some 75 miles south of Valencia, in which General Crespo was killed. We have received no direct news of further movements, though a telegram has been published in the newspapers stating that the Government forces had taken General Hernandez prisoner, and that the revolution was suppressed. In addition to the political disquietude there were other circumstances which seriously affected the traffic of our railway; in the latter part of the year an epidemic of malarial fever broke out in Valencia and in the villages round about; as there was much distress and hunger amongst the poorer classes at the time the disease spread with great rapidity, and carried off numerous victims. Notwithstanding the exertions of the authorities to stamp it out, it extended to Cambur and Puerto Cabello, where the distress was so great that a public health committee was formed to assist the sufferers with food and medicine, the doctors giving their services gratuitously, and receiving free passes on the railway; we also offered to carry free any food stuffs or medicine which the health committee might wish to send. The result of this epidemic was that merchants from the interior were afraid to go to Valencia to transact business. In March of the present year smallpox appeared in Valencia, and orders were given by the authorities that no passenger tickets were to be sold unless the persons buying them had a doctor's certificate that they were not suffering from the complaint, and also a passport from the Government of Carobobo giving them permission to go to the station to which they desired to travel. In consequence of these restrictions our passenger traffic has been reduced to a considerable extent, and the decrease has also been augmented by the general poverty of the district; to this latter cause our manager attributes the great falling off in the number of passengers last year. The disease was also prevalent in Puerto Cabello, and at the end of March the National Government placed the port of Puerto Cabello under quarantine, so that no vessel could enter if she had to call at any other port in the Republic. In a recent letter our manager states that he fears there is no chance of the port being open for some time. A considerable reduction has been effected in the working expenses; the judicious expenditure of previous years in improving the line has rendered it less liable to damage from floods, and our manager was able to make an economy in maintenance charges of 2,174*l.* He reduced the number of men per mile to two instead of two and a half and the average wage per head per day to 3*s.* 2*d.* instead of 3*s.* 6*d.*; he had less masonry to build, which helped him greatly in this reduction, but he was also able to reduce the wages of most of the permanent way gang from 7 to 6 reals (from 2*s.* 9*d.* to 2*s.* 4*d.*) per head per day. There was a saving in the locomotive department of 1,009*l.* in traffic expenses of 684*l.*, and in telegraph expenses of 42*l.*, the total decrease in expenditure amounting to 4,376*l.* The line itself is in excellent order, the engines, rolling stock, shops, and machinery are being well maintained, and the stations and buildings, as well as all bridges, walls, and culverts, are in good repair. In July of last year the new wharf at Puerto Cabello, a great and long-wanted improvement, was completed and declared open for public use. The total amount of the net revenue for 1897, 20,432*l.* 18*s.* 6*d.*, was short of the amount required for the payment of the year's debenture interest by a sum of 3,307*l.*

1s. 6d., of which part was provided by the cash portion of the balance brought forward from 1896, and the remainder was taken from the reserves. As may be supposed from the general state of depression in Venezuela, and especially from the sickness in the district served by our railway, together with the quarantine imposed upon vessels entering the port of Puerto Cabello, the traffic of the line has suffered a further considerable decrease; the telegraphed receipts of the first four months to the end of April last are given in the report; those of May were 2,250*l.*, exactly half of the sum received in May, 1897, and if we estimate the receipts for June at a similar amount we shall have 19,250*l.* from traffic in the first half of the current year, from which must be deducted the working expenses in Venezuela as telegraphed for the five months, and an estimated expenditure for June, which, with the London office expenses for the first six months of 1898, will amount to some 11,800*l.*, leaving a net amount of 7,450*l.* The sum required for the payment in full of the coupon due July 1st next is 11,900*l.* (3½ per cent. on 340,000*l.*). As prudent men of business, we do not consider it expedient to intrench further on our very small reserves, which are the only cash amounts we have to meet requirements or provide for any contingency, nor do we think it advisable, under existing circumstances, to borrow; we, therefore, propose to pay, on that date, an instalment of 2½ per cent., which will require 7,650*l.*, a little over the amount of the estimated net receipts to the end of June, and the balance of 1½ per cent. as soon as circumstances will permit. We feel sure that this is the best course we can adopt for the interest of the debenture-holders; a large amount of debentures is represented on this side of the table, and we think that all the other holders will agree that we are exercising a wise discretion. The cause of all our trouble and anxiety, and the reason why the shareholders have received no dividend for so many years, is the non-payment of the guarantee due to the company by the Venezuelan Government. There has been, as you are aware, no settlement since that effected to the end of 1890; the accounts have been regularly presented to the Government in the early part of each year, and were up to 1895 examined by auditors appointed by the Government for that object. A notice signed by the Ministers of Finance and Public Works was published in the *Official Gazette* of July 4th, 1895, stating the amount which was then owing by the Government to this company. I have told you at previous meetings how a loan of 50,000,000 bolivares (2,000,000*l.* sterling) was sanctioned by Congress for payment of the claims of the various railway companies and extinction of the guarantees for the future, and that, until the claims of the Puerto Cabello and Valencia Railway are settled, it is impossible to conceive that the conditions on which Congress sanctioned this loan have been complied with. The sum of 105,306*l.* 8s. 5d., which the Government owed to the company at the end of December last, was calculated not at the rate of 7 per cent. granted by the concession, but at the reduced rate of 5 per cent., which reduction, when the settlement to the end of 1890 was effected, the Venezuelan Government demanded, and the company assented to in the expectation of punctual payments in the future. At the concession rate of 7 per cent., this sum would be increased by 16,400*l.* per annum (the difference between 41,000*l.* and 57,400*l.*) for the seven years 1891 to 1897 inclusive, and the amount of guarantee due at this rate would be 220,006*l.*; as the Government of Venezuela has not fulfilled its obligations, we have represented to the Minister that this circumstance should be taken into consideration, especially as the claims of another company have been settled on the 7 per cent. basis; we trust that the influence of her Majesty's representative may procure a prompt arrangement of this debt, as it is very discouraging to English shareholders, who subscribed their money on the faith of the guarantee, to find their just claims disregarded whilst similar claims of shareholders of another nationality have been settled by the energetic action of their accredited Minister, supported by his Government. I will now move—"That the report and accounts for the year ended December 31st, 1897, submitted to this meeting, be, and the same are hereby, received and adopted."

Sir CUTHBERT QUILTER, Bart., M.P., seconded the motion, which was carried unanimously.

The CHAIRMAN then moved that Mr. N. G. Birch be re-elected a director of the company.

Sir CUTHBERT QUILTER, in seconding the motion, said that he would like to remind the shareholders that Mr. Burch had rendered very great service to the company for a long time past, and that he was the representative of the Government of Venezuela in the City of London. He did not know that in one respect it had been of much advantage to the company to have a representative of the Government of Venezuela on the board, for his presence had not enabled them to obtain the payment of the large amount that was due to the company. However, Mr. Burch's knowledge of Venezuelan affairs, and the fact that he had been over to Venezuela several times since he had been on the board rendered him a very valuable colleague. He (Sir Cuthbert) could only say that her Majesty's Government had been placed in a very difficult position during the last few years with reference to Venezuela. As they were all well aware, there had been big questions pending between this country and that Republic, in which some friends of theirs across the Atlantic very much, at one time, interested themselves, and it must be evident to any one who had for a moment considered the position of affairs that the suspension of diplomatic intercourse between this country and Venezuela, made it extremely difficult, if not impossible, for the English Government to put any pressure upon Venezuela for the settlement of private claims. He was glad to see that diplomatic relations had been resumed, and that a gentleman of experience in the diplomatic service had been sent out to represent this country. He could personally say that they had the goodwill and the active desire of

the Foreign-office of the English Government, who were ready to give the company all the assistance they properly could do. However, they must not build too much on the amount of assistance that could be given them. The policy of this country was not now to send ironclads to enforce the demands of bondholders, however just they might be; still, he thought there was a feeling abroad in the country that English interests were not to be treated so lightly by Spanish-American and other Governments as had been the case during the last quarter of a century, and he hoped that that feeling would lead her Majesty's Ministers to put a little extra strength into their instructions to this company's representative in Venezuela. If that were done, he had no doubt the same settlement of the debt might be arrived at as had occurred in connection with another company. It really was a monstrous thing that shareholders who had subscribed their money for the construction of works of so much importance and use to the public interest in that country, should be left in the position in which they were. They had made the line in the best possible way, and had worked it to the greatest possible advantage to the public, and yet their just demands had not been met, as had been stated by the chairman. The chairman had also stated that a company belonging to another nationality—he did not know there was any harm in mentioning it: it was their friends the Germans, whose arm, or at any rate their fist, was supposed to reach a long way now—at any rate, it had reached Venezuela—had got payment of the 7 per cent. guarantee due to the German company. Why, therefore, an English company, which had been the pioneer and had done its work as well, and had behaved as loyally, to the Venezuelan Government, should not receive its just rights passed the bounds of comprehension.

Mr. ELLIS said that he thought the reason of this was plain enough. It might be said that they did these things better in Germany than in England; but the German Emperor did not go in for negotiation, he went in for threats, and his message to them was, it would be remembered, that this amount was due in respect of guarantees, and that if it were not paid he would resort to force to compel them to pay. The Venezuelan Government paid down at once. That was really the history of the matter.

The resolution for the re-election of Mr. Burch was then agreed to.

Mr. BURCH, in returning thanks for his re-election, said that Venezuela no doubt did afford a very large field for development, but, unfortunately, during recent times circumstances had imperilled the progress of enterprise in that country. However, he was perfectly satisfied, from an extensive knowledge of the country and its officials, that they knew how to value at its true worth the identification of people of wealth and influence with the development of the country. He knew also that the people of Venezuela were sufficiently observant of the condition of affairs to recognise the value of the interests which the board of the Puerto Cabello Company represented, and he ventured to say that Venezuela would desire to encourage and foster any efforts made to develop the resources of the country. He was sure that, considering the interests which Sir Cuthbert Quilter represented, Venezuela would recognise the desirability not only of meeting its obligations to the company, but that they would go far to foster the enterprise of shareholders such as those Sir Cuthbert Quilter represented.

Mr. J. MILEY then proposed the reappointment of Mr. T. A. Welton (Welton, Jones, and Co.) as auditor of the company at a fee of twenty guineas.

Mr. D. AMEY seconded the motion, which was agreed to.

A vote of thanks to the chairman and directors brought the proceedings to a close.

### LA GUAIRA AND CARACAS RAILWAY.

The annual general meeting was held on Monday, at the offices, No. 60, New Broad-street, E.C.; Mr. WILLIAM NEWBOLD presiding.

The SECRETARY (Mr. Lee Pidditch) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN—Gentlemen, when I had the pleasure of addressing you last year I stated that, owing to the then-approaching Presidential election in Venezuela, mercantile operations were becoming restricted, and that our traffics were in consequence decreasing. This state of commercial depression, I regret to say, continued for the remainder of the year, and became more acute towards its close. The falling off in our goods traffic, which had amounted to some 3,000 tons at the end of June, was augmented by a further decrease of more than 5,000 tons in the last six months, and the company's receipts from this source were nearly 11,000*l.* less than those of the preceding year. There was a considerable period of political unrest prior to the Presidential election in November, and this state of disquietude continued until the revolutionary movement, headed by General Hernandez, one of the disappointed candidates for the Presidency, broke out in the State of Carabobo in March last. The political position naturally reacts upon the trade of the country, merchants decline to commit themselves to orders for future consumption, and are unwilling to increase their stocks, hence the decline in the tonnage of the various articles of consumption enumerated in the report. The important decrease of some 5,000 tons in the chief item of our down traffic, coffee, arose from the causes to which I alluded at our last meeting, the lateness of the crop in consequence of the heavy rainfall, and the abnormally low prices obtainable; Venezuelan coffee which had been quoted at 75 to 100 bolivares per quintal in 1896, fell in 1897 to 40 to 44 bolivares, owing to the enormous quantities shipped from Brazil; many planters, unwilling to sell at these low quotations, kept back their produce, and although it should go forward later on, the lower prices at which it will have to be sold will, by diminishing the purchasing power of the

country, reduce the quantity of foreign goods imported, thus possibly leading to a further decrease in the up traffics of the railway. The passenger traffic, which had been well maintained in the first half of the year, fell off considerably in the last six months, and brought us 1,569*l.* less revenue than in 1896. The decrease in receipts from all sources amounted to 12,690*l.* Against this loss of revenue there was a saving in expenditure, compared with that of the preceding year, of 1,935*l.* Our general manager is responding to the instructions of the board in making all possible economies, but I should point out to you that a large proportion of the charges must always remain to a great extent stationary, salaries go on the same, be the year a good or bad one, and maintenance charges, the wages of the men employed in the repairing of the line, removing landslips, &c., bear little relation to the amount of current traffic, the expenditure under this head, however, on a line like ours, exposed to frequent landslips, tends to diminish charges in the future; there can be no doubt that the many improvements which have been effected during past years have rendered the railway much less liable to damage from the consequences of the heavy rainfall of the country. A considerable amount of work of this nature, for safeguarding the line, was carried out in 1897; at the beginning of the year our manager, finding that from the effect on the slopes caused by the rains at the close of 1896 he might expect serious slips at many different places, and possibly wash-outs, fetched down by degrees the threatening rocks and earth, erected some new retaining walls, and rebuilt others that had been washed away; at Canoitás, for example, heavy rains in the early part of the year having washed away the road-bed to such a dangerous extent that one rail was in the air for a space of 20ft.; he had to build a concrete retaining wall about 6 metres in height, as it was necessary to go to some depth to find solid rock; at Vuelitas Blancas, a very troublesome place, several slips took place during the year, one of them carrying away the retaining wall, which has been more solidly rebuilt, some new culverts have been constructed, and in others the decaying wooden beams have been replaced by iron girders, which naturally involved the rebuilding of part of the side walls; all this kind of work costs money, but it is money well spent, as it prevents a larger expenditure later on. Mr. Almond fears that more slips will occur at Vuelitas Blancas during the current year, but as he has widened the road-bed with the earth already fallen, he does not anticipate anything like the trouble he had there in 1896 and 1897. The stations and buildings have been kept in good order; a long corrugated iron shed for oil, cotton waste, iron, &c., was built in the store yard at Caracas, a considerable amount of repairing work was done to the Caracas station, and the ground on the side of the station between the goods shed and the River Coroata was raised to allow the rain to run off. The late President, General Crespo, had ordered the expropriation of a part of our station ground, to enable the German railway company to put up another station of their own there. We, of course, made energetic protests and enlisted the support of the British Minister, with the result that we have lately been assured that the German company will not move further in the matter. When we build a new station, we shall probably have to put it on the site which had been chosen by the Germans, as the ground is firm there. That on which our present station stands is all "made" ground, which has been sinking for some years past, and requires occasional refilling. The lines in this station were relaid last year, the webs of the old rails having been eaten through in many places, and much worn in all. In the La Guaira Station the ravages of white ants have necessitated renewals of woodwork, this has been coated with a mixture which, the manager believes, will prevent the attacks of these destructive pests in the future. All the woodwork on the Rincon bridge has been changed, and hardwood sleepers substituted for those of pitch pine at seven crossing places on the line. A question, which has been pending for some years, respecting the amount of rental to be paid by this company for the ground recovered from the sea, and belonging to the harbour corporation, on which our goods station at La Guaira stands, has been amicably settled in the present year, and the amount (1,200*l.*) due to the corporation for the past six years paid. The company is now prosecuting with considerable activity the work of moving the line seawards, the preliminaries of which had occupied much time—a long stretch of sea wall, which had to be built, is nearing completion—the alteration will be one of such great advantage to the town of La Guaira that we thought the municipality should have shared the expense, or at least granted the necessary land free of cost; the company, however, has had to pay 28,000 bolivares for ground belonging to the town, besides other sums to private owners. Compared with the preceding year the number of traffic miles run showed a decrease of 4,737 miles, and the consumption of coal per mile was 49·33lb., against 52·64lb. in 1896, an economy of 3·31lb. per mile, there was also a reduction of 1·85lb. in the oil, tallow, and waste per 100 miles run. Three new first-class carriages, and two brake vans, were shipped in the current half-year, and it will be necessary, before next February, to send out some special rolling stock for the accommodation of the pilgrims who travel to Maiquetia in that month, and whose number is increasing—this rolling stock will be adapted for the ordinary goods traffic when not required for the pilgrimage. The Government account, which is a constant source of anxiety, from the difficulty of obtaining cash payments, amounted on March 31st last to 8,700*l.* You may remember that when the company had to take National internal bonds (which were sold at a loss of 12,891*l.*) in exchange for the certificates of indebtedness for the settlement of the Government debt to March 31st, 1895, a promise was made by the Minister that all future accounts should be paid regularly each month in cash, but I regret to say that this promise has not been kept, and the urgent representations of our manager have only succeeded in obtaining a small partial payment; as the Government freight is carried at a reduction of 50 per cent., which barely covers the out-of-pocket expenses, it is very unjust that the company should have to wait so long for its

money. I trust that as soon as the financial difficulty caused by the revolution has passed away, the new President, General Andrade, will pay the Government's indebtedness to this company. Though the La Guaira and Caracas railway, owing to its position, has been more fortunate than other railways in Venezuela during the past twelve months, yet the continued commercial depression, due to a want of confidence in the position of affairs, combined with the low price of the chief article of export, coffee, is causing a further decrease in the company's receipts. The telegraphed traffics of last month amounted to 8,500*l.*, against 9,750*l.* in May, 1897, making a falling off in receipts of 5,750*l.* for the first five months of the current year. Under these circumstances, and with the experience of the past before us, we cannot recommend a distribution of more than 5 per cent. per annum, while adding a substantial amount to the reserve fund, thus assuring the position of the debenture stock, and improving the credit and standing of the company. I will now move:—"That the report and accounts for the year ended December 31st, 1897, submitted to this meeting be, and the same are, hereby received and adopted."

Sir CUTHBERT QUILTER, Bart., M.P., seconded the motion, which was carried unanimously.

Mr. W. A. SOAMES asked whether the chairman could give the shareholders any further information with regard to the steel cable or aerial line that was referred to last year.

The CHAIRMAN replied that it had not yet been commenced. Though he did not wish to speak with certainty, he believed that the concessionaire had recently returned to Venezuela without having obtained the means to build that line. The board, however, were still watching with regard to any steps that might be taken.

The motion was put to the meeting and agreed to.

It was next resolved:—"That a dividend of 5s. per share, free of income-tax, making, with the interim dividend already paid, 5 per cent. per annum for the year 1897, be and the same is hereby declared on the shares of the company."

The CHAIRMAN then proposed the re-election as a director of Sir Cuthbert Quilter, who, he said, had rendered very great service to the company, and he had no doubt that the shareholders would unanimously re-elect him.

Mr. H. W. SMITHERS seconded the motion, which was carried unanimously.

Sir CUTHBERT QUILTER, in returning thanks for his re-election, said that he was glad to think that in a time of so much trouble and disturbance, and with so much falling off of trade in the Republic of Venezuela, this railway had been able to hold its own so well. He felt very grateful to the shareholders not only for his re-election, but for the fact that they had unanimously endorsed the conservative policy of the board, which he believed was the true policy to be pursued in the interest of the shareholders. He was sure that the shareholders would leave the meeting feeling that their interests were much better looked after than if the board had determined to pay the highest dividend that the amount at their disposal would have allowed. He only hoped that things had reached their worst in Venezuela, and that they might look forward to the time when there might be some improvement in the position of their affairs. If the news which had appeared in the newspapers that the insurrection was at an end was true it was only reasonable to hope that the unfortunate state of things which had continued for so long and been such a disadvantage to the company had likewise terminated.

The reappointment of Mr. T. A. Welton as auditor, at the remuneration of fifty guineas, was then agreed to.

On the motion of Mr. J. MILEY, seconded by Mr. J. H. WHITTLE, a vote of thanks was passed to the directors.

### EAST INDIAN RAILWAY.

The half-yearly general meeting was held at the Cannon-street Hotel, on Wednesday; Mr. B. W. COLVIN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, in the temporary absence of Sir B. Strachey, who went abroad for change of air about a month ago, and has unfortunately been prevented from returning in time to take his usual place at to-day's meeting, it becomes my duty to place before you the accounts and a summary of the results of the working of the undertaking during the half-year which ended on December 31st, 1897. In doing so I will deal with them in the order which it has been customary to observe. The gross receipts, which were estimated at Rs.2,96,18,000, have closely approached that estimate, amounting actually, in round figures, to Rs.2,94,61,000. This total exceeds the corresponding receipts of the latter half of the previous year, which was then the highest on record, by about 23 lakhs of rupees, and has only twice been exceeded even in the first, which is usually the better, half-year during the eighteen years of the company's management under the present contract. Such a result in a year which was by no means favourable to Indian railways generally cannot but be regarded as extremely satisfactory. From the gross earnings which I have just mentioned we must deduct the working expenses. These expenses, which were estimated at Rs.85,89,000, have not in fact exceeded Rs.83,64,000, disregarding fractions of a thousand. The result is that the net earnings, which were anticipated to be Rs.2,10,29,000, stand actually at a little over Rs.2,10,96,000. Making the necessary deductions from this net total on account of the annuity and interest charges, and on account of Indian income-tax, the company's share of the surplus amounts to Rs.11,85,137, which differs by only Rs.12,000, and that to our advantage, from the sum estimated on this account at our last meeting.

The share of the profits so received by the company has admitted of a dividend on the deferred annuity capital for the half-year at the rate of 17. 4s. 6d. or, including the interest guaranteed by the Secretary of State, at the rate of 37. 4s. 6d. for the half-year. A comparison with previous figures will show that the dividend for the half-year under consideration is the highest that has ever been earned in the second, or later, half of any year since the company was intrusted with the management of the undertaking; and that the amount of its surplus profits for the whole twelve months of 1897 exceeds that of any year, with the single exception of 1891, since the date of our contract. I may add that the rise in exchange has helped to make the dividend now to be recommended somewhat better than was anticipated, our money having been brought home from India at the rate of 1s. 4d. per rupee, instead of 1s. 3½d., which was the best forecast that could be made six months ago. You will be pleased to hear that the prosperous results which have been shown for the latter half-year of 1897 have been satisfactorily maintained during the present half-year, which will close on the 30th of the current month. For the gross receipts of the half-year ending on the 30th of the present month are estimated to amount to Rs. 3,25,61,000, a sum which is more by Rs. 13,08,000 than the receipts of the corresponding half of 1897. This increase is divided between coaching and goods, in the proportion of 10 per cent. to the former and 18 per cent. to the latter. The total weight of coal carried has been 1,830,000 tons, an increase of 150,000 tons on the figures of last year, and the receipts from this branch of the traffic have increased by about 16½ lakhs. The working expenses are estimated at 3 lakhs more than those of 1897, and amount to Rs. 97,25,000, showing a percentage of not more than 29.86 to the gross receipts, and leaving a sum of Rs. 2,23,59,700 as the net earnings, after deducting what is due to the Delhi-Umballa-Kalka Railway Company. The higher receipts of the current half-year will, like those of the six months that preceded it, be further augmented by the improved rate of exchange which has been fixed for our transactions with the Secretary of State from July 1st, 1897. Calculating the charges to be met from the net receipts at this more favourable rate of exchange, their cost will be Rs. 1,44,33,161, leaving a surplus of Rs. 77,02,923 after providing a contribution to the provident fund of Rs. 2,23,596. The company's share of the surplus, after paying Indian income-tax, will be Rs. 15,08,964, and this if brought home at the rate of exchange, say 1s. 3½d., will admit of a dividend of 17. 9s. 9d. per cent. for the half-year on the deferred annuity capital, in addition to the guaranteed interest of 2 per cent., making together 37. 9s. 9d. for the half-year. I have taken the rate of exchange at 1s. 3½d. for the sake of making an approximate calculation; but, of course, it is impossible now to foretell precisely what the rate of exchange in December next may be, and our actual dividend must necessarily vary somewhat with any rise or fall in the value of the rupee. Returning now to the figures for the last half-year of 1897, to which the report before you relates, it will be seen that in coaching traffic there has been an increase, as compared with the latter half-year of 1896, of nearly 6 lakhs of rupees, the figures being approximately 94½ lakhs in the second half of 1897, as against 88½ lakhs in the corresponding period of 1896. This gain of a sum close on 6 lakhs of rupees is almost entirely attributable to the military operations on the frontier, and represents increased receipts from passengers, horses, and, especially, from parcels sent to the front. If it had not been for these extraordinary receipts there would have been a slight falling off in the coaching receipts. But this falling off, even if it had not been otherwise made good, would have been quite trifling; and it is remarkable that this should have been the case in a year when, partly on account of famine, partly on account of plague precautions, a very considerable decrease in the number of passengers travelling might have been reasonably looked for. The goods traffic, exclusive of coal, and military, and revenue stores, during the period under review, when compared with the corresponding period in 1896, shows an advance, in round figures, of a little over 7½ lakhs of rupees. The chief items that went to make up this advance were piece-goods, railway material, oil-seeds, sugar, and, especially, rice and wheat. The rice came from Burmah to the famine tracts; the wheat, though it may seem strange, mostly from the famine districts. The explanation of this probably is that wheat, which is much too expensive a grain for the poorer classes of Indian population to buy, remained in store during the famine, and was brought out for sale by the holders when prices at the sea-ports rose high enough to induce them to part with it. The grain traffic generally, however, excluding these two items of wheat and rice, has been less by some 9 lakhs of rupees than in the latter half of 1896. This diminution was to be expected, as happily the famine needs of the earlier period no longer existed. The coal traffic continues to grow in a very satisfactory manner. The increase in receipts from it, excluding the coal carried for our own purposes, amounts to about 6 lakhs of rupees. Of the total coal lifted, the quantity sent to Calcutta for export was 575,000 tons against 324,000 in 1896, making a rise of 251,000 tons, or 77 per cent. You will understand that I am comparing the latter halves only of the two years mentioned. Of the additional 251,000 tons so exported during the period under review, about 112,000 tons were sent to Bombay, 40,000 tons to Madras, 27,000 tons to Rangoon, and 37,000 tons to Singapore, and for the first time, so far as I have been able to ascertain, a small shipment of 2,000 tons has been made to Aden. I mention these particulars in order to show how rapidly the Bengal coal supply is increasing, and how the area over which it may hope to find a market seems likely to extend. Some idea of its increase may be formed if I mention that the number of ton miles for coal shown by the returns of our line had risen from 300 millions in 1891 to 575 millions in 1897. Such has been the growth of the last six years, and there are indications of a still greater expansion of this trade in the near future. It is, of

course, our interest, as well as our duty, to do everything that lies in our power towards furthering its development. Important reductions in freight and large rebates on quantity were conceded, as you may remember, in 1891. Branch lines to Jherriah and Toposi were opened in 1894 and 1895. And further facilities for shipping, which will have the effect of reducing its cost, are in contemplation. The next and most pressing need in the interest of the whole traffic, both in goods and minerals, is to increase the carrying power of the lower section of the main line. The stream of coal consignments from the new branch, which is constantly increasing in volume, is poured into the channel of the main traffic at Ondal and Sitarampore, two points between 110 and 140 miles above Calcutta. The consequence is that between those points and Howrah the press of traffic is becoming so great that it already taxes our resources to carry it, and early relief is absolutely necessary. With this object it is in contemplation to connect the coalfields with Howrah by one or more additional lines of way, so as to increase the existing means of communication. The surveys and estimates for carrying out this improvement are now in the hands of our consulting engineers at home, and as speedily as possible after sanction has been given by Government to the project, construction will be commenced in India. A matter hardly less urgent is that of the provision of more rolling stock in order to keep pace with the rapid development of the traffic. You will have seen in paragraph 63 of the report how much has been done in this respect during the current half-year, and it appears probable that during the approaching half-year even further additions will be necessary to our rolling stock. These purchases will, of course, entail a large capital outlay, but the outlay, which will obviously be remunerative, is imperatively required. The reconstruction of our Howrah station is another important improvement which can no longer be deferred. The accommodation at that terminus has ceased to be sufficient for our own requirements, and since it is proposed, as you know, to make our Howrah station the terminus for the passenger traffic of the Bengal-Nagpur Railway, a complete rearrangement of its buildings will be necessary. The designs for these are now under consideration, and as soon as they have been approved this important work will also be begun. The two new lines of railway that are in course of construction are advancing towards completion. On the Moghalsrai extension more than four-fifths of the earthwork have now been finished, and good progress has been made with the Sone-bridge. On the South Behar line the works were begun somewhat earlier, and, consequently, nearly the whole of the earthwork is completed. The bridges also are well in hand, including that over the Phalgu at Gya, although this will not be ready so soon as the rest of the line; the sleepers and permanent way material are on the ground, and the electric telegraph is finished. There is one subject of which you may wish to hear something before I conclude, although it does not fall within the events of the half-year which we have just been considering, and that is the effect upon our business of the plague, which appeared for the first time in Calcutta during last month. Undoubted cases of this formidable disease have occurred in the town, as you know, and are, probably still occurring there; but, up to the present time, there are no signs of its having established itself in an epidemic form. Nevertheless, there has been, as you will have seen, a great panic among the native population of the city and its suburbs—a panic not caused so much by fear of the disease as of the sanitary precautions which it renders necessary. These precautions necessarily entail much that is repugnant to the habits and feelings of the people of India. But the extreme terror which fell upon the lower classes of the native community in Calcutta appears to have been due to exaggerated and absurd rumours about the nature and stringency of the precautionary measures to be taken—rumours originating partly in ignorance and partly, perhaps, in malice. Of the reality of the terror, however, there can be no doubt, and 40,000 persons were said to have left Calcutta by our line alone under its influence within a few days. The effect of this alarm and the exodus caused by it naturally was to derange all the ordinary organisation of labour. No boatmen, carters, or coolies were procurable when wanted; merchants could not remove their consignments; and our wagons, as they arrived from up-country, could not be unloaded. At the date of the latest advice, 9th instant, there were over 1,100 wagons under detention at Howrah from this cause. Every possible effort was made by our representatives in India to meet the difficulties which had befallen them in common with all others who were concerned with the employment of labour in Calcutta. But until consignees can remove their consignments our yard cannot be cleared or our wagons released. In the absence of labour, it has been impossible for merchants to take prompt delivery of their goods, and it may be that, owing to the state of the market, some buyers of up-country produce have not been very eager, even under pressure, to do so. Pressure, however, is being applied, and efforts of every kind are being made to relieve the block of traffic. Meanwhile, it is a remarkable fact, and one which deserves mention, that, in spite of these great impediments to our business in Calcutta, our traffic returns for the last four or five weeks, so far from indicating any falling off, show receipts even larger than those for the corresponding weeks of 1897. It is to be hoped, however, that before long the present state of affairs may come to an end. If it should fortunately so happen that the plague fails to take root and spread as an epidemic through Calcutta, the present troubles will in all probability soon pass away and our yards will be cleared. But if, with the change of the seasons, the disease should reappear, now or later, and establish itself as it did in Bombay and Poona, we cannot expect to escape the same embarrassments and obstructions that impeded traffic in those places. Even if that should be the case—and I trust that it may not be—we feel confident that nothing which energy and skill can accomplish to remedy and mitigate the effects of such a calamity will be left undone by

the company's staff and servants in India. If any shareholder has any remark to make I shall be glad to hear him, and to answer any questions that may be asked.

Sir D. M. BARBOUR seconded the motion, which was carried unanimously.

It was next resolved:—"That a dividend at the rate of 1*l.* 4*s.* 6*d.*, less income-tax, be paid to the deferred annuity-holders and deferred annuity-holders class D registered in the books of the company on June 1st, 1898, out of the surplus profits for the half-year ended December 31st, 1897."

### CENTRAL PACIFIC RAILROAD.

A general meeting of the holders of the certificates issued by the "London Committee" of the shareholders of the Central Pacific Railroad Company was held on Tuesday at Winchester-house, E.C.; Mr. F. G. BANBURY, M.P., presiding.

The CHAIRMAN explained that the meeting had been convened in order that the committee might inform those gentlemen who had deposited their shares with them, and had received in exchange the committee's certificates, of the result of their labours since they invited the deposit of the shares. In October, 1894, in response to a numerous signed requisition, a meeting was held, and the committee was formed with the object, primarily, of sending out Sir Charles Rivers Wilson to New York, in order to endeavour to secure some advantages for the shareholders. Sir Charles went out, and the report he presented on his return was adopted. At that time the Central Pacific Railroad was leased to the Southern Pacific; but the committee was in no way responsible for those leases. According to the leases, the whole management of the Central Pacific line was in the hands of the directors of the Southern Pacific, the company being leased to them for a fixed charge of \$10,000 a year, and also for any surplus of the net profits up to 6 per cent. which might be earned by them. Sir Rivers Wilson, in his report, said he considered the first duty of the shareholders was to register the shares in their own names, and thus obtain the control of the railway. He also stated that, as far as he could see, the natural ally for the Central Pacific was the Southern Pacific, provided proper relations could be maintained between them. No steps were taken by the committee after the adoption of that report until the commencement of the year 1897, there really being nothing for the committee to do. It was for the shareholders themselves to carry out the recommendation of Sir Rivers Wilson. In the year 1897 it became evident to the committee that the shareholders had no intention of registering their shares and obtaining the control of their property, and in view of the fact that on January 1st, 1898, the debts to the United States Government would mature, and that it was vital to the interests of the shareholders that they should be actually represented in New York, the committee, recognising the advisability of steps being taken to call in the shares issued, in the summer of 1897, a notice to the shareholders that they would call them in. The object of the committee was threefold—(1) to obtain the control of the property for the shareholders; (2) to make terms with the Government; and (3) to settle, after those two conditions had been carried out, what form, if any, the future relations of the company should take with the Southern Pacific. To obtain control of the property it was, of course, necessary to register the shares in the name of either a company or of individuals, and it was thereupon decided to form a company for the purpose. There were difficulties in the way; but these were overcome, Messrs. Speyer offering to pay the expenses connected with the registration and formation of the company. This was regarded for several reasons as being preferable to making an assessment on the shares for this purpose. Mr. Morshead had stated that the committee had been paid by Messrs. Speyer, but the committee had not received a single farthing since 1894, and up to the present the secretary had received nothing either. Messrs. Speyer's offer was accepted, and, of course, the money would be repaid at the first opportunity. The company was called the Central Pacific Railroad and Shareholding Company, and for a total expenditure of 5*d.* per share the shareholders had obtained, for the first time in the history of the Central Pacific Railroad Company, the control of the property in their own hands. Out of a total issue of 672,756 shares they held 338,500, which gave them a clear majority. Moreover, this figure did not include the shares held by the Amsterdam committee, who were working in accord with the London committee, nor had they included the shares held in New York by the three members of this committee over there. Not only had they registered those shares in the name of the new company, but although only a fortnight elapsed between such registration and the election of directors in April last, they had voted at that election. As to the course they adopted on that occasion, the time for action was short, and they felt that until the debt was settled with the Government it would be inadvisable to make a radical change, it being prudent to endeavour to come to an arrangement with the present directors for the time being. They thereupon communicated with the board, and had received their written pledge that they would take no step whatever of any importance without first consulting the committee. One of the first results of the intervention of the committee had been that Mr. Huntington had resigned the general power of attorney which he had received from the directors of the Central Pacific Company. The directors were honourably maintaining the undertaking they had given the committee. It would be obvious to all present that until they had settled with the Government it was absolutely impossible to know actually what they had got. It did not appear to the committee to be a very friendly act to the Central Pacific shareholders for Mr. Morshead and the gentlemen acting with him to go to the Government and offer to pay that debt in full—"Hear, hear"—a debt which, if paid in full, must be very onerous upon the shareholders and the finances of the company in the future. It was hoped

that when the war terminated negotiations with the Government might be resumed and a satisfactory result arrived at. The Chairman then referred to the vague nature of the attacks which had been made upon the committee by Mr. Morshead, and which had never been substantiated by that gentleman. He also alluded to the charges made by Sir William Marriott in his letter to the press, which he said were fully answered by the remarks he had already made as to the steps taken by the London committee.

Mr. MORSHEAD followed with some criticism of the committee's proceedings, and complained that they had throughout shown too much consideration for Mr. Huntington.

After further discussion the proceedings terminated with a vote of thanks to the committee, no other resolution being put to the meeting.

### WEST OF INDIA PORTUGUESE GUARANTEED RAILWAY.

The annual general meeting was held on Thursday, at the offices, 4, Coleman-street, E.C.; Major-General Sir HENRY GREEN, K.C.S.I., C.B., presiding.

The SECRETARY (Mr. H. Ringler-Thomson) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN then said—Gentlemen, although most of you must be aware in a general way of what has passed during the last two years relating to the affairs of the West of India Portuguese Railway, I will nevertheless recapitulate the circumstances in as few words as possible. In July, 1885, the Great Indian Peninsula Railway and the Southern Mahratta Railway came to an agreement with regard to such rates as were governed by distance on the two lines. This agreement was subsequently developed, without consultation with this company, and without adequate notice, into a system which can best be described as "boycotting" the West of India Railway. By the arrangements brought into force in March, 1896, the traffic was entirely diverted from the West of India Railway, and the port of Mormugao was practically closed as an open port for the purposes of traffic between the sea and British India. Your directors brought the whole subject before the Government of Portugal, pointing out that the West of India Railway had been constructed under the sanction of a treaty between Portugal and Great Britain, with the promise from the Secretary of State for India of every facility for the construction and working of the line. The prospectus subsequently issued by the Southern Mahratta Company, with the sanction of the Secretary of State for India, distinctly stated that "the main line commencing on the frontier of the Portuguese territory of Goa, was to be a continuation of the West of India Portuguese Railway and was to be in connection with the seaport of Mormugao," thus implying that it was not to be considered as a competing line by the British Indian railways. In forwarding all the documents to the Government of Portugal, it was urged by your directors that the whole matter should be brought to the notice of her Majesty's Foreign-office. The Government of Portugal, who have continued meanwhile to act with their accustomed loyalty towards the company, and who have met all their engagements with punctuality, at once took the subject in hand, and through their Minister, M. de Soveral, made representations to her Majesty's Secretary of State for Foreign Affairs. It is mainly due to the energetic action of M. de Soveral, ably assisted by our colleague, Señor Abilio Lobo, that we have at length been able, after a delay of two years and a loss of at least 40,000*l.*, to elicit an expression of the opinion of the Secretary of State for India that the Southern Mahratta Railway should afford facilities for through traffic to Mormugao equal to those that are afforded by that company in conjunction with the Great Indian Peninsula Railway for through traffic to Bombay. The Secretary of State for India has also stated in Parliament that he has for some time been endeavouring to effect an agreement in the matter in dispute; and your directors hope that a settlement, which will meet the approval of the Government of Portugal, will before long be arrived at, under which the West of India Railway will be restored as nearly as possible to the position existing prior to March, 1896, with a distinct understanding as to our right to be considered as a railway forming part of the system of railways in British India. It was suggested by the India-office that this should be done by July 1st, and our meeting was put off to the latest date in order that we might afford you full information; but it was perhaps too much to expect that the events of over two years should be readjusted so expeditiously. There has never been any complaint raised against this company with regard to their working of the line in connection with the railways of British India, and the arrangement contemplated by the Secretary of State for India when carried out by the railways under his control in the spirit in which they have been expressed, the board have no doubt will be advantageous to all concerned. Communications on the subject for settling details have already been commenced with the Southern Mahratta Railway. I have now to move:—"That the report and accounts to December 31st, 1897, be received and adopted."

Mr. F. YOULE seconded the resolution, which was carried without discussion.

Mr. E. E. SAWYER, in proposing the re-election of General Sir Henry Green and Sir E. S. Dawes as directors of the company, said that Sir Henry had devoted two years of his time to getting the wrongs of the company righted. He had also displayed great tact and indefatigable energy in his efforts to obtain a settlement of the question at issue with the Government of India and the Southern Mahratta Railway Company. That question of rates was not yet settled, as they all knew, but they might feel confident that it would soon be brought to a close. What had

happened was this: the Southern Mahratta, acting up to what they considered were their rights, and accepting the route to Bombay as a competitive route, had raised the rates in the direction of this company's line, and reduced them in the direction of Poona. At the instance of the India-office, he believed this injustice to the West of India Portuguese line would be put right, and the rates restored to what they originally were.

Major-General Sir F. R. POLLOCK seconded the resolution, which was carried unanimously, and the CHAIRMAN briefly acknowledged the compliment on behalf of himself and colleague.

On the motion of the CHAIRMAN, seconded by General TUPPER, the auditors, Messrs. H. Wright and L. Micklem, were reappointed.

Mr. E. P. S. REED proposed a vote of thanks to the chairman and directors for the able way in which they had administered the affairs of the company during the past year, and remarked that through their efforts there was a reasonable prospect in the immediate future of a happy settlement of the long outstanding dispute with the Southern Mahratta Railway Company, who appeared to have done their best during the last five or six years to strangle the West of India Portuguese line.

The resolution was unanimously agreed to.

### CORDOBA CENTRAL RAILWAY.

The annual general meeting was held on Tuesday, at Winchester-house, E.C.; Mr. WALTER J. STRIDE presiding.

The SECRETARY (Mr. C. E. Scruby) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) was taken as read.

The CHAIRMAN said—Gentlemen, my first duty to-day is to attempt, as well as I can, to add to or enlarge on the paragraph in the report in which the directors express their extreme regret at the death of their late chairman, Sir George Russell. All who have had the privilege of an acquaintance with Sir George Russell must have known that he was a unique chairman of a company of this kind. His quick perception and the keen grasp of details, coupled with his great courtesy and tact, were of inestimable benefit to his colleagues on the board, and I am sure that those who have heard him speak at the meetings of this company will know how clearly and excellently he laid the details of the company's business before you all. You can, I am sure, agree with us that it is a matter of extreme regret, and one which should be recorded, that Sir George Russell is no longer here to take the chair. The board has done me the honour to elect me as chairman in the place of Sir George Russell, and, although I cannot expect to be able to fill his place efficiently, I shall certainly do my best for the benefit of the company. To fill the vacancy which occurred on the board we have appointed Mr. Hoghton, whom you all know. Mr. Hoghton, who has been the secretary of the company from its incorporation, has shown over and over again his grasp of the whole of the company's business, and I am sure when you have the opportunity, which you will have presently, of approving of his appointment as a director of the company, you will do so in the most cordial manner. The board have also appointed Mr. Hoghton managing director, but this will not entail additional expense to the company. Turning more particularly to the report, it is not pleasant reading, but one proprietor has written to us stating that he considers it entirely lugubrious and pessimistic. Well, facts are stubborn things, and I think you would much prefer that we should place before you unvarnished facts than that we should attempt to dress them up and make them look pleasant. ("Hear, hear.") The cause is perfectly patent to any one who looks at the figures, which show that the large fallings off on the original line and on the Central Northern section are due to the decrease in the traffic in sugar and sugar-cane. The gross falling off in the traffic has been \$572,000, whereas the fall in sugar and sugar-cane has been \$647,368, showing that the traffic other than sugar has increased \$75,000. It must be borne in mind that in all foreign railways such as this there must be a liability to the ups and downs of the main crop, whether it is sugar or tobacco or wheat, or anything else, and comparing one year with another, the seasons or the circumstances which may have affected the crop must of necessity largely affect the traffic of the railways. For myself, I did not consider last year it was a matter of congratulation that we had advanced by such enormous leaps and bounds. I felt throughout that there must be a reaction sooner or later, and although it is not wise to be too sanguine, it is equally unwise to take a too despondent view of the case in consequence of one or two years' set-back. If you look at the statement on page 30 you will see that the history of the line shows that the traffics from the commencement to 1897 have been undoubtedly progressive, but 1896 was far and above anything we ever had before, and that very abundance has been the cause of our trouble this year. The over-production of sugar in 1896, and the collapse of the syndicate formed to keep up prices, caused a serious fall in values. We are advised the sugar crop for this year will be smaller than that of last year owing to bad weather, and until the market rights itself we must continue to suffer, as you see by the figures for the last five months we are suffering. As against this, our manager hopes that we shall have other sources of traffic from which he will get increases, but so far as sugar is concerned, we must look for still further reductions. The other side of the question is the election of General Roca as President. He has a very high reputation both in the Argentine and in Europe, and there seems to be, I think, very little doubt that his installation as President, which takes place in October next, will bring about not, I hope, a boom, but a forward commercial movement which will create stability in the country. Undoubtedly, the commercial position in the Argentine has suffered much during the last two or three years; but the wheat crop which the country is receiving this year will considerably benefit the position; and if the weather will only allow them to have another bumper wheat crop the country

itself will very soon improve. As soon as that takes place we shall, I have no doubt, see that sugar will take its turn, and that we shall come back nearer to the position that we were in before. You will see on page 30 that for the original line the sterling figures in 1895 were 50,539*l.*, whereas in 1897 they were 49,288*l.* There is nothing very much to quarrel about in that, although, of course, 1896 showed the large sum of 72,000*l.* Again, as regards the Central Northern section, in 1894 the figure was as low as 32,000*l.*, in 1895 it was 89,000*l.*, and this year it is 77,000*l.*—better than 1894, but rather worse than 1895, and considerably worse than 1896. I do not think, although we have given you a plain statement of facts in the report, that this ought to be considered either lugubrious or pessimistic. However, it is no use trying to bolster up the thing and say that there is traffic when there is no traffic—that statement you will never, I think, get from anyone on this side of the table. The details of the traffic are so fully set forth in the accounts and the manager's report that I do not think I need allude to them more in detail, but you will naturally see that the principal point in the report, which certainly is not lugubrious, is the settlement with the Government for which we have been negotiating so long. The work this has entailed upon our friends on the other side in particular has been enormous, and the anxieties necessarily have been equally heavy, but the board feel that this settlement is undoubtedly a favourable one, if it is confirmed by Congress. The settlement is only at present represented by a contract between the company and the Executive, and it has to be confirmed by both Houses of Congress. Up to now we have had no reason to believe that there will be any question raised in either of those Houses, but we have received from the Government a payment on account of the arrears equivalent to nearly 400,000*l.*, in 4 per cent. rescission bonds, and whether the contract as a whole is confirmed by Congress or not, that is to be treated as a payment on account of arrears. Therefore, we are in a position to deal with that payment as soon as we get the rescission bonds from Messrs. Barings, and we have reason to believe, from information we have received, that that distribution will take place in about six or seven weeks. You will naturally wonder what will take place with regard to the balance of the rescission bonds, but we think that it is inopportune to say much about this contract until it is completed, and I think you will agree with us on that point. As soon as we have arrived at a final settlement with the Government, and we get the definitive bonds, we shall be in a position to make a further payment to the income debenture stockholders. I will now turn to the accounts. You will notice that the capital account shows considerable changes from what appeared in the report of 1896. That, of course, is consequent on the change made in the preferred shares by the Act of Parliament, which was sanctioned and which is referred to in the report. In our last year's statement of capital we had 7 per cent. preferred shares standing at 400,000*l.*, whereas to-day we have 5 per cent. first preference stock (cumulative) standing at 600,000*l.* and 5 per cent. non-cumulative preference stock standing at 200,000*l.* The exchange was as follows:—20*l.* was the exchange for the 20*l.* at par, and 8*l.* was the commuted difference between 5 per cent. and 7 per cent. upon the old preference shares, and the 6*l.* second preference stock represents the accumulated arrears of dividend on the preferred shares, which stood at 145,000*l.* That is now entirely wiped off. The capital account, which in 1896 stood to debit 28,595*l.*, this year stands to credit 6,892*l.* That, I think, entirely accounts for the change. Having created an even amount of stock, it leaves us 40,000*l.* first preference stock and 80,000*l.* second preference stock, which we can hereafter use for the benefit of the company. With regard to the traffic accounts and the net revenue accounts, the original line shows a balance of 34,572*l.* From that has to be deducted the 7,000*l.* which under the scheme has to be transferred to the net revenue account of the Central Northern section, and that leaves a balance of 27,572*l.*, which, with 427*l.* drawn from the reserve fund—which is a very small sum—will enable us to pay the full 5 per cent. dividend on the cumulative first preference stock. The resolution for that will be proposed presently. The Central Northern net revenue account shows a balance of 6,453*l.*, to which has to be added, after the resolutions are passed, the 7,000*l.* which is transferred from the original line under the agreement, making 13,453*l.*, which will be carried forward to the credit of the holders of the income debenture stock. I do not think there are many items in the balance-sheet that call for any particular remark. The sundry credit balances of 39,000*l.* represent one month's wages to December 31st in the Argentine, and not paid over until after January 1st, and a traffic balance which is in dispute with one of our neighbouring lines. Sundry debit balances—128,000*l.*—represent traffic accounts which are due to the company and are in course of collection. The expenses, you will notice, are increased, and this is explained by the fact that there was a strike amongst the employes of all the railways in the Argentine, particularly in the workshops and amongst the drivers, which finally had to be settled by the payment of higher wages. The increase in carriage and wagon repairs and repairs generally is accounted for by the fact that in the previous year every wheel that could run had to be run to carry the large traffic of that year, and the proper repairs to keep the rolling stock in order had to be postponed until a more convenient season. That our manager has taken advantage of this year, and the certificate shows that the rolling stock is now in excellent order. That is all I can usefully say, with the exception of referring to the great zeal and energy which have been displayed by our friend Mr. Munro and his colleagues of the local board in the matter of the guarantee settlement and in the management of the railway. To have dealt with so large a loss of traffic as \$572,000 and to bring the result out as favourably as he has done is no mean feature. I will conclude by moving:—"That the report of the directors and the statement of accounts now presented be and they are hereby received and adopted."

Sir GABRIEL GOLDNEY, Bart., seconded the resolution, which was agreed to without discussion.

It was next resolved:—"That a dividend of 5 per cent., less income-tax, be paid to the holders of the 5 per cent. cumulative preference stock whose names appear upon the register this day."

On the motion of the CHAIRMAN, seconded by Sir GABRIEL GOLDNEY, Mr. Hoghton was unanimously elected a director of the company.

Sir Gabriel Goldney and Mr. Jacques Van Raalte were re-elected directors of the company, and the auditors, Messrs. Turquand, Youngs, and Co., were reappointed at a remuneration of fifty guineas.

Mr. POSNO, in proposing a vote of thanks to the chairman and directors, said he thought that those interested could have little doubt that the debentures were well secured. Previous to the issue of the report, seeing that the traffics had fallen continually week after week, it had occurred to some shareholders that the profits might be wiped out altogether, but the printed report and the chairman's lucid explanation had shown that there was a net revenue which, even after the bad year the company had passed through, was amply sufficient to pay the interest on the bonded debt and leave a balance. They had a bumper year in 1896, and there was no doubt that it would be repeated.

A SHAREHOLDER, in seconding the motion, suggested that the manager, Mr. Munro, should be included in the vote.

The resolution as amended was agreed to.

### ASSAM-BENGAL RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices of the company; Lieut.-General C. H. DICKENS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the traffic for the half-year ended December 31st last had not been unsatisfactory on the whole, when compared with previous half-years. As regarded passenger receipts, the increase was almost exactly proportional to the additional mileage, and did not represent any increase in the receipts per mile from this source of revenue, which had averaged in each half-year about Rs.38 a mile a week. The board would not, however, have been greatly surprised if the loss occasioned by the earthquake in Assam and Bengal had caused some diminution in the passenger receipts, and the fact that it had not done so might be regarded as an encouraging sign, and as indicating that but for this disaster there might even have been some increase. In the case of the goods traffic, the board were glad to observe that, although its volume was still very small, there was nevertheless a substantial increase as compared with that of the corresponding period of the previous year. A large proportion of the receipts from goods traffic was, of course, at the present stage of the undertaking, derived from the carriage of their own stores, more especially construction material, which, however, was conveyed at a very low rate. If the railway stores were omitted, the total receipts for the half-year were Rs.1,19,000, against Rs.46,000 in the corresponding period of the previous year. Had the increase been merely proportional to the additional mileage, the amount would have been only Rs.71,000 instead of Rs.1,19,000. The increase from Rs.71,000 to Rs.1,19,000 was largely owing to receipts derived from the tea and coal traffic. During the current half-year good progress had been made on all parts of the line under construction, and assuming, as was not unreasonable, that the expenditure during the six months had been about the same as it was in the same period of last year, the expenditure to the present date, exclusive of suspense account, would be about 666 lakhs. But, as the shareholders were aware, a considerable time must elapse and a large further expenditure must be incurred before the whole line was completed. As regarded the expenditure, the money for which was provided by the Government of India, the board would not be in a position to speak definitely until the revised estimates for the third section, which were now nearly completed, were in their hands; but, as stated by the chairman last February, it was hardly possible that the total cost could fall short of 1,000 lakhs, or, say, 6,750,000. It had at first been apprehended that the damage done by the earthquake might still further postpone the completion of the work, and the negotiations with the Secretary of State as to the date which should be named for its completion, in place of that contemplated by the contract, were postponed until it should be seen how far the question had been affected by the disaster. They had now received from Mr. Way (agent and chief engineer of the company in India) a report on the subject, the conclusion which that gentleman came to being that, after making due allowance for the damage done by the earthquake—which Mr. Way did not think had affected the question—he did not consider it likely that the third section could be finished before the end of 1901 or that the second (or hill) section could be finished before the end of the following year. It was very possible, indeed, having regard to the extraordinary difficulty of the tunnelling on the second section, that a still longer time might be ultimately required, and the board would accordingly address the Secretary of State in this sense at an early date. The damage done by the earthquake had now been in a great measure repaired, and the final estimate of cost was a little under 14 lakhs.

Mr. WILLIAM L. WATSON seconded the motion, and

In answer to a question,

The CHAIRMAN stated that the present would be the last occasion under the existing arrangements on which they would receive 3½ per cent. out of guaranteed interest; in the future the rate would only be 3 per cent.

The motion was adopted.

### EAST ARGENTINE RAILWAY.

A meeting of the debenture stockholders of the East Argentine Railway Company, Limited, was held on Monday at Winchester-house, to consider

a scheme of arrangement proposed to be made between the company and the debenture-holders; Sir G. B. BRUCE presided.

The CHAIRMAN explained that the proposals made by the Government and also the arrangements between the debenture and share holders had been a long time before them. The last time they met was in November, 1897, when the shareholders accepted the proposed arrangement, and went into liquidation in order to carry it out. It was also, in the main, provisionally agreed to by the debenture-holders themselves, and he had reason to believe there would be little or no opposition to the agreement, there being now a general consensus of opinion that it was a good one. If the scheme were carried out the debenture-holders would receive 5 per cent. for fifty-six years, subject to drawings, and 125l. for every 100l. which they now held, instead of getting 6 per cent. for seventeen years and ultimately possibly not obtaining their capital back. The trustees were Lord Hillingdon, Mr. Wilson Noble, and Mr. William Wilson.

A resolution approving of the proposed agreement was carried, and a meeting of the contributories was afterwards held, at which the proposed scheme was also approved.

A meeting of the contributories (ordinary stockholders) was afterwards held. Sir GEORGE BRUCE, who again presided, stated that proxies had been received in favour of the scheme representing 263,020l., and none against it, so that they might reasonably conclude that the contributories, or shareholders, considered it satisfactory. He remarked that an ordinary meeting of the company would shortly be held, when he hoped to be able to say something explicit with regard to some money which was being sent home with a view to the payment of dividends. A resolution approving the scheme was carried.

### SHEFFIELD DISTRICT RAILWAY.

A special general meeting was held on Thursday, at Westminster Palace Hotel, to consider the Bill before Parliament, and proposed to be introduced into the House of Lords, intitled "An Act to transfer to, and vest in, the Sheffield District Railway the Treeton and Brightside Railway of the Midland Railway Company; to abandon certain authorised railways of the company; to confirm agreements between the company, the Midland Railway Company, and the Lancashire Derbyshire and East Coast Railway; and for other purposes," including the power to raise further capital by preference shares or otherwise, inserted by way of additional provision in the first House. Mr. BROMLEY DAVENPORT, M.P. (deputy-chairman), presided.

The CHAIRMAN said that at the meeting held in February last the chairman of the company (Mr. Emerson Bainbridge, M.P.) stated that the directors had been approached by the owners of various mines and industries in the district, asking them to make connections not contemplated in the original plans, and that to make these connections would necessarily mean some extra outlay on the works. Naturally, as time had advanced, owing to the great activity of trade, especially Sheffield trade, the demand for additional works had rather increased than otherwise. A large colliery, the Tinsley Park Colliery, had been further opened up and extended; Messrs. Hadfield, who were opening new works, and Messrs. T. Jessop and Sons, W. Cooke and Co., and the High Hazels Colliery had all asked for sidings or short extensions to be made, and negotiations in reference to similar matters were proceeding with several other firms; also, the necessity for an extra station at Tinsley-road had shown itself. He might likewise mention that the cost of the land on the Treeton and Brightside Railway had proved to be considerably in excess of the Midland Company's own estimates, owing, no doubt, in some measure, to the improvement of trade in Sheffield. All these matters combined to necessitate an increase in the capital of the company, and the directors had every confidence in recommending the proposed addition in order that the line might be properly and efficiently equipped at the outset to cope with the traffic that might be expected. The board were quite satisfied that the increased earnings that would be obtained would fully justify the additional expense to be incurred. It would certainly be impolitic not to encourage all possible feeders of their line that they could find. He concluded by moving a resolution approving the Bill.

Mr. POLLOCK, M.P., seconded the resolution.

Replying to Mr. WHATTON,

The CHAIRMAN said that the amount of fresh capital which they sought powers to create was 100,000l. in 5 per cent. preference stock, which would first of all be offered *pro rata* to the existing shareholders.

The resolution was carried.

## Directors' Reports.

### ASSAM RAILWAYS AND TRADING COMPANY, LIMITED.

#### CAPITAL.

The capital account shows a total expenditure to December 31st, 1897, of 932,457l., whilst the receipts had been 1,036,214l., as follows:—Deferred B shares, 1l. each (43,750 issued), 8,750l.; cumulative 8 per cent. preferred A shares of 10l. each, 420,000l.; cumulative new 6 per cent. preference shares, of 10l. each, 150,000l.; cumulative 8 per cent. preference shares of 10l. each, 80,000l.; redeemable mortgage debentures, 5 per cent., 118,000l.; mortgage debentures, 5 per cent., 250,000l.; premiums, 9,464l.

#### REVENUE.

The accounts for the year ending December 31st, 1897, show a gross revenue from the railways of 55,771l. (against 45,854l.), and an expenditure of 38,293l. (against 23,734l.), leaving a profit of 17,478l. Adding the subsidy of 7,053l., profit on general trading account 29,031l. (against

31,785*l.*), transfer fees 76*l.* (against 129*l.*), dividend on shares held in River Steam Navigation Company 4,897*l.* (against 4,897*l.*), and dividend on shares held in the Makum Tea Company nil (against 400*l.*), and interest received 96*l.*, the total net revenue is 58,652*l.* (against 66,415*l.* in 1896 and 70,934*l.* in 1895). Interest on loans absorbed 1,187*l.*, commission to management in India, 1,580*l.*, amount applied towards premium on redeemable debentures, &c., 395*l.*, exchange suspense written off 477*l.*, loss on exchange 2,486*l.*, railway capital exchange adjustment 262*l.*, office furniture depreciation 56*l.*, and Indian income-tax 889*l.*, leaving a surplus on the year's working of 51,320*l.* The balance brought forward from previous year was 996*l.*, which, added to the net profit of 1897, made a total of 52,316*l.* Debenture interest absorbed 18,228*l.*, interim dividend at the rate of 4 per cent. per annum on the pre-preference "A" shares paid in July, 1897, 3,200*l.*; interim dividend on the new 6 per cent. preference shares paid in July, 1897, 3,750*l.*; and 5*s.* per share on account of arrears on the preferred "A" shares paid December, 1897, 10,500*l.*; leaving a balance of net revenue on December 31st, 1897, of 16,638*l.* In January, 1898, a half-year's dividend was paid on the 8,000 pre-preference shares, amounting to 3,200*l.*; as also a half-year's dividend on 15,000 new 6 per cent. shares, amounting to 4,500*l.* These sums, deducted from 16,638*l.* as above, leave an available balance of 8,938*l.*, out of which the directors recommend that a dividend of 4*s.* per share be paid on the 42,000 preference "A" shares, amounting to 8,400*l.*, which, with the previous payment of 5*s.* per share in December last, makes 4½ per cent. for the year, leaving a balance to be carried forward of 538*l.* The report states:—

The principal features calling for remark are a decrease in the profits of the railways of 4,642*l.*, as also a decrease in the profits of general trading of 2,754*l.*, and the absence of a dividend on the company's Makum Tea shares, as against 400*l.* received in 1896, while on the other side of the account there is a saving of 600*l.* on loss of exchange. In its general trading the company has had to contend with many difficulties during the year. There has been a great dearth of effective labour, owing to much sickness prevailing among the coolies. In addition to these drawbacks, the company has had to contend against the famine. According to contract it had to provide rice at a fixed price for its labourers, while it had to go into the market and obtain the rice at any price it could. When it is considered that the number of coolies in the company's employ last year was over 6,000, and that they had to be fed at any cost, shareholders may congratulate themselves that, through the forethought of their agents and general manager, who made large early purchases of food, the loss on this account was kept within moderate bounds.

#### RAILWAYS.

The total length of the main and branch lines open for public traffic up to December 31st, 1896, was 78 miles, with 9 miles of sidings. On January 1st, 1897, the portion of the colliery line running from Dehing-bridge to Ledo, consisting of 7 miles, was opened for public traffic in goods, and thereupon came under Government supervision. The capital expenditure during the year on the main and branch lines was 2,042*l.*, making a total of 514,464*l.* The gross earnings, compared with those of 1896, show an increase in the general traffic of Rs.27,084 and an increase in the coal traffic of Rs.1,12,915, in all Rs.1,39,999:—

For the Year.	General.	Coal.	Total.
1895 .....	Rs.4,04,680	Rs.1,96,462	Rs.6,01,142
1896 .....	4,46,485	2,00,873	6,47,358
1897 .....	4,73,569	3,13,788	7,87,357

The considerable increase in the coal traffic arises from the rate having been raised, with the consent of the Government, from a figure which barely covered cost of carriage to one fairly remunerative. The net earnings were 24,561*l.*, as against 29,203*l.* in 1896, a decrease of 4,642*l.* This decrease was caused almost entirely through the expenditure of 11,681*l.* in substituting cast-iron sleepers for wooden ones, as ordered by Government. As a set-off, however, the company was in consequence, able to claim and receive from the Government the full amount of the annual subsidy (7,083*l.*), which otherwise would have lapsed owing to the net earnings exceeding 5 per cent. on the capital outlay, the subsidy ceasing when that rate of profit is reached.

#### COLLIERIES.

The capital expenditure during the year was 32,253*l.*, of which 2,021*l.* was on the old mines, 8,814*l.* on the new Namdang Mine and Railway, and 21,417*l.* on the new Dehing Bridge. The total expenditure amounted to 292,432*l.* The output and sales for the last three years were as follows:—

Years.	Output, tons.	Sales.
1895 .....	172,624	182,084
1896 .....	177,829	167,425
1897 .....	186,603	191,684

The five years' agreement between the company and the Rivers Steam Navigation Company and the India General Steam Navigation Company as to the sale and transport of coal, expired on December 31st, 1897. The new agreement for ten years came into operation on January 1st, 1898.

#### PETROLEUM CONCESSIONS.

The capital expenditure during the year was 14,066*l.*, making a total of 94,897*l.* As stated in the last annual report, the directors were advised in order to deal with the large output of crude oil already obtained it would be necessary to provide, at considerable outlay, refining plant far more complete and of far greater capacity than that which the company already possessed, and that with this view a survey had been made of the whole of the company's territory, and that Mr. Rosenlaenter, their departmental manager, had just arrived in London for the purpose of conferring with the directors and with Mr. Boverton Redwood, the company's consulting adviser. Since that time this important matter has engaged the anxious attention of the board.

In the opinion of Mr. Redwood, the successful results of the drilling operations afford conclusive evidence that the company possesses petroleum territory capable of yielding for many years to come at least 500,000 or 600,000 gallons a month of petroleum of excellent quality, and the directors have come to the conclusion that the profitable development of the oil-fields can best be secured by a separate organisation, and they have accordingly taken steps to form a new and independent company. Before, however, the company can transfer its concession, it is necessary, under its terms, to obtain the written consent of the Indian Government. This was applied for in January last, and it was only on the 9th inst. that the agent and general manager telegraphed to the board that consent had been granted, but subject to several conditions, one of which was that the Government should approve the prospectus before issue. The prospectus will accordingly be submitted to the Indian Government, and, as this will necessarily delay matters, it will be some little time before the directors will be in a position to start the new company.

#### GENERAL.

On the timber concession, the capital expenditure during the year was 2,238*l.*, making in all 13,817*l.* The completion of the new saw-mills has been delayed, owing to the advisability of not entirely closing the old mills during their construction. On the brick and pottery works, the capital expenditure during the year was 2,215*l.*, making a total of 16,277*l.* The reconstruction of the works should be completed during the present year and become a source of profit to the company. The company holds 4,081 shares of 20*l.* each, 15*l.* paid, in the River Steam Navigation Company. During the year dividends at the rate of 8 per cent. per annum, amounting to 4,897*l.* 4*s.*, were received. The company holds 20,000 shares of 1*l.* each, in the Makum (Assam) Tea Company. In 1896 the yield of tea amounted to 216,080*lb.*, and in 1897 to 380,842*lb.* The yield for 1898 is estimated at 480,000*lb.* The Brahmaputra-Sultanpur Branch Railway Company was formed to construct a line of metre gauge from Sultanpur Station on the Eastern Bengal Railway eastward through Bogra to Kaliganj on the Brahmaputra, a distance of about 60 miles. The capital was fixed at Rs.36,00,000, in shares of Rs.100 each, and the issue was made in Calcutta in January, 1897, the Assam Railways Company participating to the extent of 5,000 shares. It is expected that the portion of the line which runs from Sultanpur to Bogra, a distance of 24½ miles, will be opened in June, 1899, and that the entire railway will be completed during the summer of 1900. Calls amounting to Rs.40 per share were made in 1897, involving an expenditure on the part of the company of 14,166*l.* 13*s.* 4*d.*, on which outlay 86*l.* 9*s.* 1*d.* has been received by way of dividend, as guaranteed by the Secretary of State for India. Another call of Rs.20 per share has been made.

#### FINANCE.

During the years 1895, 1896, and 1897 the company incurred a large expenditure under the following heads:—The new Dehing bridge, the petroleum works, the Namdang Colliery and Railway, the reconstruction of the sawmills, and the brick-works, the subscription for the 5,000 Brahmaputra-Sultanpur shares, and the final payment of 13,000*l.* due to the contractor's estate. The total of these disbursements was 138,000*l.*, and has been partially met by the issue in 1897 of 5,000 new 6 per cent. 10*l.* preference shares, 18,000*l.* 5 per cent. redeemable debentures, and an overdraft at the bankers' of 21,379*l.* Much of this outlay, in addition to what had been previously spent under the various heads, has hitherto been unproductive; and as the interest on the shares and debentures issued, and on the loans from the bankers, is all charged to revenue, the result has been to affect unfavourably the profits of the year.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months ..... £0 7 0

Six Months ..... 0 13 0

Twelve Months ..... 1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

July 5—Great Eastern Railway (Holders of Laing's Mortgages), Liverpool-street Station, at 12.

July 6—Assam Railways and Trading (Annual), Winchester House, at 2.30.

July 7—Metropolitan District Railway (Adjourned Special), Westminster Palace Hotel.

July 11—Ottoman Railway of Anatolia (Annual), Berlin.

July 11—Royal Portuguese Railway (Annual), Lisbon.

July 25—Royal Portuguese Railway (Annual), Paris.

July 27—Great Central Railway (Half-yearly), Manchester, at 12.

July 27—London Brighton and South Coast Railway (Half-yearly), London-bridge Terminus, at 1.

The Egyptian Railway Board has decided to open the new railway line between Luxor and Assoan as soon as possible. For the present there will be only one train per day, but additional trains will be put on as the expected development of traffic justifies the provision of additional facilities. The carrying forward of the railway to the Soudan has been delayed by the temporary removal of the labour employed to other duties, but the men have now resumed work on the line, which has reached a point 7 miles beyond Berber. It is to be extended to Fort Atbara. Mr. F. E. Robertson, president of the council of administration of the Egyptian State Railways, has resigned, and has been succeeded by Captain Girouard, director of the Soudan Railway.

## A GOLDEN OPPORTUNITY.

It is somewhat remarkable that more attention has not been paid to the proposal for a Board of Trade inquiry into American railway practice, hinted at by Mr. Ritchie in his official reply to a question asked by Mr. Maddison, M.P., just prior to the Whitsun adjournment. That gentleman was anxious to know if it was a fact, as alleged, that the compulsory adoption of automatic couplers on American railways had resulted in a decrease of the casualty list among employes engaged in shunting operations by a proportion which was quoted at 45 per cent. of deaths and 28 per cent. of injuries. Mr. Ritchie was unable to corroborate the figures, which is not surprising, as we know of no reliable returns from which they could be verified. The President, however, made the occasion one for the unexpected announcement that the matter referred to in the question, and one or two others connected with the railway administration in the States, seemed to him to be of so much interest that he was considering whether it might not be desirable to make some arrangements for a special investigation of them during the autumn recess. With the object of this inquiry, carried out in the right way, and by the right men, we have every sympathy. The acquisition of accumulated and adjusted experience, which goes to make up true information, can never be without value; and, *facile princeps* as we believe our English railways to be in appliances both of safety and comfort as designed to meet our own conditions, we are not so blind as to refuse to admit that on many points there is something to learn and something to apply for the provisions made to meet a different environment. Looking, however, to the authority which the recommendations of such a committee should carry, and to the far reaching effect which any compulsory action must have upon the public in its dual capacity as traveller and shareholder, it is of the utmost consequence that the inquiry should be conducted, at least in part, by men having practical experience of railway management. A Government department should concern itself with principle rather than with detail, should suggest rather than command, should rely upon public opinion rather than usurp the responsibility of the manager. It is to the credit of the Board of Trade that the promulgation of principles and the reconciliation of detail, have been maintained with the fullest recognition of the importance of avoiding any weakening of properly constituted authority, and have thus inspired the feeling of mutual confidence which obtains alike in Whitehall and the Clearing-house conference room. It is with regard to this very conference, the embodiment of the Railway Companies Association, that we would direct attention to a promising field for the proposed inquiry. The American Railway Association is a body practically without a counterpart on this side. The way in which it has fulfilled its object—"the development and solution of problems connected with railroad management in the mutual interest"—has made it the recognised means of communication between the American railway system as a whole and the American people. The Association has devoted itself strictly to the technical consideration of railway subjects apart from the immediate effect of these upon the revenue of the individual companies represented; yet it is probable that its action in the standardising of such details as the

location of hand-hold and grab irons, the height of draw-bars and couplings, and of constructional design generally, to say nothing of the standard codes of train rules and regulations generally, have not been without their effect upon the purely financial prosperity of the railways. The associations of master mechanics, roadmasters, and car-builders, or, as we should style them, of locomotive, permanent way, and rolling stock superintendents, are children of the general association, and are charged with the investigation of their special interests. It is impossible not to admire the impartial and even coldly scientific way in which these subjects are approached. The reports are published for the general benefit; the action of the association is recommendatory only, but its advice is rarely disregarded and is eagerly sought. It is only necessary to instance the aid given to the Congressional committee intrusted with the drafting of the Safety Appliances Act—that referred to by Mr. Maddison—ten years ago. Voluntary committees of State railroad commissioners and of labour organisations came to their assistance. "Inventors, cranks, promoters, and "lobbyists," to quote the late Colonel H. S. Haines, president of the association, played a part as well. At last the time came for the Railway Association to appear before the committee. The latter saw that these men were thoughtful and well informed; that they were experienced in the matter of which they spoke; that they were influenced by no unworthy motives, represented no cliques, no combinations, but the American railway system as a whole. The committee saw the way to relieve themselves of deciding upon matters of technical detail, of which they were ignorant, by referring them to a body of acknowledged experts, the choice of the men who manage the practical affairs of the railways of the country. And the American Railway Association did not betray its trust. Have we in this country a railway organisation which can claim such a share of public confidence? The Clearing-house is inextricably mixed up in the public mind with details of rates and fares; the very existence of the Railway Association, an inchoate body at the best, is unknown to ninety-nine out of every hundred. Its deliberations are private, of course, but the results of them are generally private also. Yet we believe that our railway managers, as a body, do not yield in public spirit of the best kind to any class of business men in this or in any country. An investigation of the methods which have led to such happy results among our American kinsmen would not unfitly form the very groundwork of the labours of the Board of Trade Committee.

## THE CHATHAM AND SOUTH EASTERN FUSION.

On Saturday last the *Times* announced that the proposal to establish a working arrangement between the Chatham and South Eastern companies was received with so much favour by the two boards that a joint committee of three directors from each company had been appointed to settle details prior to an application being made for Parliamentary powers to sanction the agreement. This did not carry us much "forrader," and in effect only confirmed what we were able to say regarding the matter in our issue of the 18th ult. The *Times* in suggesting that a Bill would be necessary was probably misinformed, for, as we pointed out in our article referred to, it was desirable to avoid at any cost an application to Parliament, and this is one reason why amalgamation has not been discussed. The objections to a Parliamentary measure to attain the end in view are—firstly, the curious and involved position of the Chatham capital account, and, secondly, the loophole which such a course would give for reducing maximum rates and fares on these two lines

"in the interests of the public" and as present powers enjoyed—and also, it may be said, exercised—by the Chatham and South Eastern rank among the very highest in the country the objection is a very real one. The semi-official announcement made since to the effect that the joint committee have agreed upon the principles of a draft agreement for the "united working of the two systems and for a joint "committee of the companies to be nominated by their respective boards," practically confirms our previous view that the arrangement will proceed upon the lines of a joint purse applied to all branches of traffic. The details have yet to be settled and submitted to the boards and shareholders of both companies. It thus appears that the real business has yet to be completed. Amalgamation or working union as an abstract idea has been generally regarded as desirable for many years, and no one has attempted to deny the advantages which would result from such a consummation. But it is the settling of the "details" which has on previous occasions brought negotiations to nought, and until the formal agreement is signed, sealed, and delivered we decline to pin much faith upon it—though we sincerely trust that something will result from the present discussion between the two boards, which, by the way, has assumed a more business-like appearance than characterised previous negotiations of this kind. In spite of the somewhat belated official confirmation of the rumours regarding the proposal for closer relations, prices—with the exception of Chatham seconds—are still under the best touched during this latest "bull" campaign, and we are not surprised that such is the case. The rise in the market value of Chatham ordinary alone represents over twelve years' purchase of its share in the estimated benefit from the arrangements, which has been put at 40,000*l.* a year, and much remains to be done before such a result can be achieved. Absurd estimates of the future are being indulged in. One evening contemporary actually hints that the revenue of the two companies can be doubled, and that we may see "Little Chathams" at 70 in the course of a few years. We may add that if the revenue trebled Chatham ordinary might be worth par—and so on, *ad inf.* But it has got to treble first.

## CANADIAN RAILS.

A remarkable feature of the fortnightly account, which closed on Wednesday, was the severe depreciation in the leading Canadian railway issues. The magnitude of the decline in values of the leading stocks in this group will be seen from the subjoined comparison of the "making-up" prices on the 8th and 27th June:—

Stock.	Making-up Prices on	
	June 8th.	June 27th.
Canadian Pacific.....	89	86½
Grand Trunk ordinary .....	9½	8½
Grand Trunk first preference .....	76½	72
Grand Trunk second preference .....	58	51½
Grand Trunk third preference.....	26½	23
Grand Trunk guaranteed .....	79½	77½

The prices of Grand Trunk issues on the 8th ult. represented very nearly the highest prices of the year—in fact, the highest for many years. Canadian Pacifics have, however, been quoted as high as 93 during the present year. During the nineteen-day account just ended the above table shows that a very serious tumble has occurred in these stocks, and no wonder. The advance in all the above issues had been enormous during the preceding twelve months or so, and even after the serious reaction indicated above the prices of these securities still stand high and dry above the best figures recorded during 1897. No doubt the intrinsic improvement in the position of the two lines has to a large extent justified the phenomenal upward movement that

occurred, and our readers may recall that as long ago as December last we dwelt upon the good prospects of the Grand Trunk Company, and remarked that "we expect to see much higher prices for all the junior stocks in the course of the next twelve months." A glance at the prices then current, and the difference as compared with the highest recorded this year, shows that our forecast has been fully borne out. This will be realised from the following:—

Stock.	Price on December 24th, 1897.	Highest since.
Grand Trunk ordinary .....	7½	9½
Grand Trunk guaranteed .....	69½	79½
Grand Trunk first preference .....	56	76½
Grand Trunk second preference .....	36½	58½
Grand Trunk third preference .....	19½	26½

The rise shown above, after the lapse of only a few months, is very remarkable; and even after the reaction of last account it remains large on balance, contrasting current quotations with those of December last. There has been a great deal of speculation in these issues on the "bull" side, and the result is the Trunk market became distinctly "top-heavy." Thus it became peculiarly liable to suffer from any adverse feature in the situation, and this has been forthcoming in recent traffic returns. For the last four weeks the figures published by the Grand Trunk Company—for its entire system—have shown the following results:—

	Increase or Decrease.
Ten days ended May 31st .....	+ £710
Week ended June 7th .....	+ 383
Week ended June 14th .....	+ 553
Week ended June 21st .....	— 7,821

It is a remarkable fact that during the period preceding the above returns the increase published weekly ranged from 2,733*l.* to 17,264*l.*—the latter figure, however, covering ten days' increase. As "bulls" of these stocks—especially of the second preference—were building their hopes of dividend on a continuance of these bumper traffics, it is not difficult to realise that on the actual announcements as given above depreciation in values has occurred. We showed in our issue of April 2nd that the second preference on the results then disclosed was in the "running" for a dividend, but of course a series of bad or indifferent traffics would soon wipe away its hopes of appearing in the dividend list at an early date. And as the second preference stock had been put up to 58½ on the prospect of a dividend which certainly cannot be paid before April next, and which will depend upon the course of revenue during the remainder of this year, it is not at all surprising that such a figure was found to be extravagant, and has been replaced by a much lower one, in view of recent poor traffics. The theory advanced in explanation of the poor results lately announced is that, now the rush of Klondike business is over, the effects of the rate-war have been seen more clearly; and, as a natural sequence to this, the "impending settlement" of the rate dispute between the Canadian Pacific Railway on the one hand and the Grand Trunk and the American roads on the other has been again trotted out. This "bull" point has faithfully done duty many times already, and seems to show a curious predilection for making its appearance with the advent of each new account. Some day we suppose it will come true, and then, probably, little notice will be taken of it; but it does not appear to be "impending" after all. Anyway, there is one little matter it would be well to bear in mind in this connection. It is this. As a "quid pro quo" for its loyalty in fighting the Canadian Pacific Railway, the American roads have handed over to the Grand Trunk a good deal of traffic which might have gone eastward *via* Chicago by other routes, and thus that line has not been without compensating advantages for its sacrifices in the rate

war. Evidence of this is afforded by the last traffic return published, for whilst the entire system showed a loss of 7,821*l.*, the Chicago and Grand Trunk yielded an increase for the week of 3,529*l.* Net results are published at present only to the end of April. They were highly satisfactory, the net improvement for the four months having been 110,429*l.* The working statement for May will be published shortly, and the course of the market will, no doubt, be to a considerable extent governed by the character of that return. During that month the gross increase published was about 34,000*l.*, and it will be interesting to note how much of it is retained in the net. The next traffic return will also cover nine days to June 30th, and it may be that the "sweepings" will providentially yield something for the "bulls." Under the most favourable circumstances it should be remembered that Grand Trunk traffics will not look so good as they have been during the first five months of 1898, owing to the fact that from June onwards the current year's results contrast with increases in 1897. This is in part the explanation of recent poor returns. Canadian Pacific traffics, though not so poor as those of its rival, have been comparatively light recently, and this feature, combined with the renewed rumours of more preference capital being raised, has accounted for the reaction in "Canpacs." The last report stated definitely that the directors had "contracted for the issue of one million pounds 4 per cent. preference stocks," and as only 375,000*l.* came into last year's accounts, the balance will probably be disposed of this year to meet the large needs of the company on capital account. The preference stock of the Canadian Pacific stands at the record price of 102, and it is certainly wiser for the company to raise money by the issue of this stock than to increase its prior charges. As we have before had occasion to point out, the proportion of prior charges to total net revenue is so large as to render the financial position of the company rather dangerous should it encounter another series of poor years. To the end of April the improvement in the Canadian Pacific net revenue was 505,000*l.* This is a good enough result; but it would be well to await further returns before anticipating that any additional dividend will be paid this year, especially in view of rapidly growing capital charges.

## WESTERN RAILWAY OF SANTA FE.

The circular which we reproduce in another column is a curious document. It is addressed "to the holders of consolidated scrip" of the Western of Santa Fé Railway and presumably emanates from Messrs. Baring Brothers, Limited, although it is not actually signed by them. It contains some bewildering references to a committee or committees. For example, we are told that a certain resolution has been passed by "the Scripholders' committee," whoever they may be, for this is the first time we have ever heard of such a committee, and the writer of these lines has the misfortune to be a scripholder. Then we are told that the resolution was passed with the approval of "the following members of the committee"—and here a few names are disclosed. Next we are informed that "the sub-committee" has decided upon a certain line of action. The sum and substance of the "sub-committee's" decision appears to be that, in their opinion, an English company should be formed—with a capital of 500,000*l.* of 4 per cent. debenture stock, 400,000*l.* of 5 per cent. preference shares, and 500,000*l.* of ordinary shares—to acquire the bonds and consolidated scrip of the railway amounting to 1,225,576*l.*, to receive the income arising out of the investment, and to distribute it amongst its own proprietors, first the debenture stockholders, and then the preference shareholders as far as it would go. For the life of us we cannot see what practical object is aimed at.

This will not be a railway company in the proper sense of the term, formed, as in the case of the Entre Rios, the Leopoldina, and one or two other instances, to take over, work, and manage a railway. It will merely acquire certain bonds of a railway corporation domiciled in Argentina, where the share capital of the company is exclusively held, and where the concern will continue to be administered. We are told that "there is now reason to believe that, if an English company were once formed, Mr. Cassado, who owns most of the shares of the Argentine Company, might [*sic*] join in an arrangement which would give the English company the entire control of the railway." Here we have an admission that the English company will not control the railway unless Mr. Cassado "might" be pleased to do this and to do that. And supposing Mr. Cassado does not choose to "join in arrangement"—what then? But the whole argument is childish. There is nothing whatever that Mr. Cassado can do with a board of directors which he cannot do equally well, and much more expeditiously, if he be so minded, direct with the present bondholders, through their agents, Messrs. Baring Brothers. There are a thousand and one cogent reasons which could be advanced against the unbusinesslike proposal now before us, and these reasons will be advanced in the proper quarter in due course. Instead of being bondholders in a railway company, the holders of consolidated scrip of the Western of Santa Fé Railway are asked to become stockholders in a trust company, and to saddle themselves with a costly and superfluous and ministration of nonentities and mock railway experts.

### PASSING NOTES.

The traffic receipts for the week ending June 26th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,703,631*l.*, which was earned on 19,163½ miles. For the corresponding week in 1897, the receipts of the same lines amounted to 1,633,874*l.*, with 18,951½ miles open. There was thus an increase of 69,757*l.* in the receipts, and an increase of 212½ in the mileage. The aggregate receipts for twenty-six weeks to date amounted on the same thirty-three lines to 41,451,149*l.*, in comparison with 40,663,214*l.* for the corresponding period last year; increase, 787,935*l.*

The half-yearly report of the Paisley and Barrhead District Railway states that the share capital has been wholly subscribed, and that contract No. 1, which embraces that portion of railway No. 1, extending from St. James's Station, Paisley, to Glenfield Works, has been let to Mr. John Watt, contractor, and that work upon the contract let will be commenced immediately; also that the plans for the remaining portion of railway No. 1 and railways No. 2, 3, and 4 have now almost reached completion, and the directors hope to be in a position to let the remaining contracts within a short period. The directors further report that they have resolved to pay interest to the shareholders at 3 per cent., as authorised by the company's Act of Parliament.

The report of Colonel Addison, of the Board of Trade, on the railway accident at Ashford on April 8th, was issued on Saturday. Twenty-six persons were injured in the collision. There were, the report says, two precisely similar accidents, engines in each case which had been brought out from a siding running into standing trains. Colonel Addison considers that the signalmen were responsible for both collisions. All the circumstances, he adds, go to show that the instructions for station yard workers at Ashford require reconsideration to prevent such a series of misunderstandings as occurred, and that the station arrangements generally need revision.

Glasgow locomotive builders, a correspondent states, are rapidly making up the leeway of the protracted lock-out, and lost markets are being won back. Day and night shifts are being run at the principal establishments. Messrs. Nelson, Reid, and Co., Hyde Park Works, report a big accession of work for India, which, in the aggregate, totals up to 137 locomotives.

These embrace 90 passenger and goods engines for the East India Railway, 30 for the Nizam's State Railway, 10 for the Indian State Railway, and 2 for Calcutta Port Commissioners. However, the 77 locomotives for China and 17 for Russia have gone to America.

The London Road-Car Company have placed upon the route from Hammersmith to King's-cross a new omnibus with wheels which have been fitted with roller bearings, as supplied by the Roller-Bearings Company, of Westminster. The hubs are of iron, into the sockets of which wooden spokes are driven, and the bearings, consisting of a series of steel rollers controlled and prevented from cross winding by a bronze cage, enable the car to be moved easily by one man. It is hoped that the same excellent results will be obtained in omnibus work as have been realised in horse-drawn tramway cars with similar bearings.

The Light Railway Commissioners held an inquiry at Andover last week relative to an application by the Midland and South Western Junction Railway Company to construct a light railway to the Military Camp on Salisbury Plain. The scheme was opposed by all the landowners, local railway authorities, and railway companies, and in the absence of evidence that the inhabitants of the localities affected desired the railway the Commissioners said they could not recommend the Board of Trade to sanction it.

The Southampton Corporation yesterday took over the whole tram and bus system in the borough. The cost has yet to be fixed, and arbitration to this end is going on between the company and the corporation. An Act of Parliament has been provided for the transfer. The whole of the employés will remain in their positions for the present. In six months' time it is proposed to abolish horse traction and use only electricity. The corporation have their own electric works.

Excellent traffic returns have been issued this week by the leading Scotch railways. Comparison was with the Jubilee week a year ago, and, therefore, the passenger earnings show a falling off, but the losses there have been more than made up for by the large takes from goods and minerals. Under that head the Caledonian has gained 7,499*l.*, the North British 7,274*l.*, and the Glasgow and South Western 1,747*l.*, or an aggregate for the three systems of 16,520*l.*

The terms of the railway coal contracts for the ensuing year are now known. For best qualities of Barnsley thick seam steam coal the price will be 7*s.* 10*d.*, and for Parkgate 7*s.* 4*d.* per ton of 20*cwt.* at the pits. This is an advance of from 6*d.* to 8*d.* on the prices of last year. In 1893 prices ranged from 7*s.* 9*d.* to 8*s.*, in 1891 from 8*s.* 9*d.* to 9*s.*, in 1890 10*s.* 6*d.*, in 1889 from 8*s.* to 8*s.* 6*d.*, and in 1888 from 6*s.* to 6*s.* 6*d.*

The ballot of members of the three mutual insurance societies of the employees of the London and North Western Railway Company, between forty and fifty thousand men, has now been completed, and a great majority of the members are favourable to the continuance of the societies on amended lines without any financial assistance from the company. The company has decided to contract out of the Act.

The contract for the construction of the new loop line, which is to connect the Looe Railway with the Great Western Railway Company's main line station at Liskeard, was signed on Monday. The gentleman principally interested in the undertaking is Captain Evan Spiers, who has acquired a preponderating financial interest in the old company.

The accounts of the Dover Harbour Board for the past year show that the receipts for the passenger poll-tax of 1*s.* per head were 17,373*l.* This tax was granted by a special Act of Parliament in connection with the construction of the new commercial harbour. The shipping returns showed an increase of over 450 vessels on the year.

The Light Railway Commissioners on Wednesday decided to recommend the Board of Trade to grant an order for the construction of the London United Tramways Company's electric tramway from Hanwell to Uxbridge.

The report of the committee appointed to inquire into the question of railway passenger communication was issued yesterday. The substance of the report has already been given in THE RAILWAY TIMES.

A petition bearing 1,200 signatures was presented to Mr. Ritchie on Thursday, asking him to secure a workmen's cheap train service for the Bromley district to Central London.

An interesting paper on "The Influence of Railways upon Fortress Warfare," by Lieutenant E. H. M. Leggett, R.E., appears in the July issue of the *United Service Magazine*.

The new Palace steamer *La Marguerite* on Tuesday made her first trip from Tilbury to Margate, Ramsgate, and Ostend, and back in a day.

The new ordinary stock of the Metropolitan Railway Company ranks as from yesterday (July 1st) with the old ordinary stock.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 12th inst.

### CITY, FRIDAY EVENING.

The feature of the week in the MONEY MARKET has of course been the reduction of the Bank Rate from 3 per cent. to 2½ per cent., a step quite in accordance with the general expectation. Following upon this the London banks announced that their rate of interest allowed on deposits at short notice was reduced to 1 per cent. until further notice. The Scotch bank managers decided to reduce rates all round ½ per cent. The deposit rate has been cut down to the minimum of 1 per cent., and short dated local Bills to 3 per cent. The cash accounts have fallen from 5 to 4½ per cent., and over-drafts from 5½ to 5 per cent. In London to-day there was a fair demand for money at 1 per cent., whilst short bills were done at 1½ per cent., and three months' paper at 1 3-16. The Bank Return issued yesterday shows that, thanks to a decline of 1,975,000*l.* in "Public" or Government Deposits, which are now down to 10,080,000*l.*, the "other" deposits have risen 809,000*l.* to 45,405,000*l.*, in spite of the decrease of 888,000*l.* in the Banking Reserve, now 27,071,000*l.*, and the reduction of 281,000*l.* in "other" securities, whose total now amounts to 32,782,000*l.* The note circulation has gone up 933,000*l.* Since the Return was issued 30,000*l.* in gold has been withdrawn for the Continent.

Silver bars are now quoted at 27½*d.* per oz., being ½*d.* lower on the week. A year ago the price was 27 9-16*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 11-16*d.*; Calcutta, 1*s.* 3 31-32*d.*; Hong Kong, 1*s.* 11*d.*; Shanghai, 2*s.* 6½*d.*; Singapore, 1*s.* 11 9-16*d.*

The premium on gold at Buenos Ayres has risen during the week 176-20 to 177-50 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 5-15*d.* A year ago the premium was 183 per cent., and the value of the paper dollar 1*s.* 4-83*d.*

The Valparaiso exchange comes over to-day at 17*d.*, being unaltered on the week. A year ago it was 17½*d.*

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£38,534,607	£36,880,503
Total Reserve .....	£27,071,277	£25,195,273
Proportion of Reserve to Liabilities...	48½ per cent.	44½ per cent.
Notes in Circulation .....	£28,263,330	£28,485,230
Bank Rate of Discount .....	2½ per cent.	2 per cent.
Open Market ditto .....	1½ per cent.	½ per cent.
Consols (account) .....	112	112½
French Rentes (account) .....	102 <i>f.</i> 92 <i>c.</i>	104 <i>f.</i> 02 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 22 <i>c.</i>	25 <i>f.</i> 10 <i>c.</i>
New York 60 days ditto .....	\$4 84½	\$4 85½

The Rio de Janeiro exchange on London is 7 9-16*d.*, being ½*d.* higher on the week. A year ago it was 7½*d.*

The Banks of Bombay and Bengal have reduced their minimum rate of discount from 9 to 8 per cent.

The Bankers' Clearing-house return for the week ending June 29th, 1898, shows a total of 159,861,000*l.*, as compared with 165,902,000*l.* for the corresponding period last year.

The feature of the week on the STOCK MARKETS has been the enormous business in Chatham second preference, the whole amount of which during the last two or three days must have been bought and sold many times over. It was only yesterday that the movement became anything like sensational, 5½ points representing the day's addition to the price. To-day another 4 points was put on, and the rise on the week is no less than 12. The ordinary, however, is only up ½, and this is not to be wondered at, for either the seconds were too cheap or the ordinary too dear at last week's prices. Another feature has been the substantial rise of from 3 to 6 points in Barry stocks, this being due to an expected issue of new ordinary at 150 premium, or possibly even a lower price than that. Taff Vale, on the other hand, has lost 3, and no matter what happens between this company and its rivals it always seems to come off second-best. Great Centrals continue their downward course. The Scotch deferred stocks have been in demand, Waterloo and City has recovered 4, and the stocks of the "heavy" lines—notably North Western and Midland—are appreciably higher. American and Canadian rails are more or less demoralised, and the latter in particular show material declines on the week, closing to-day about at their worst. Indian Rails show considerable fluctuations, South Indian leading the downward movements with a drop of 4. The rise in Great Indian Peninsula has come to stop. Foreign Rails are, in a good many cases, marked lower, but this in many cases is owing to the knocking off of the July dividends. Brazilian issues continue flat Central Bahia 6 per cent. debenture stock leading the way with a fall of 3½. Nitrate Rails are again lower, and the concern under its patch-up board is becoming more and more discredited. The deferred 10*l.* shares, though nominally 10*s.* to 15*s.*, are virtually unsaleable at the lower figure, and the same may be said of the preferreds at 3¼ 3¼. In Argentine Rails the feature is the further fall in Cordoba Central and Cordoba and Rosario issues. Amongst Miscellaneous securities a feature is the weakness of dock companies' stocks on uneasy views as to the working of the Workmen's Compensation Act. Sheffield and South Yorkshire Navigation is down 5 on the week. Anglo-Argentine Tramway debenture stock has risen 8.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Application has been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Colorado Midland Railway Company—\$6,250,000 first mortgage 2, 3, 4 per cent. 50-year gold bonds of 1947, Nos. 1 to 6,250; \$861,000 first mortgage 4 per cent. 50-year gold bonds of 1947, Nos. 6,251 to 7,111; \$4,644,800 4 per cent. non-cumulative preferred stock, and \$3,420,200 common stock, in lieu of the first mortgage 6 per cent. bonds and consolidated mortgage 4 per cent. 50-year gold bonds now quoted; New York Central and Hudson River Railroad Company—\$18,535,000 3½ per cent. gold mortgage coupon bonds of 1997, Nos. 1 to 18,535; Northern Pacific Railway Company—\$263,000 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M75,064 to M75,326, of \$1,000 each; Southern Railway Company—\$897,000 additional first consolidated mortgage 5 per cent. gold coupon bonds of 1994, Nos. 26,963 to 27,859.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Atchison Topeka and Santa Fé Railway Company—\$6,459,500 additional general mortgage 4 per cent. 100-year gold bonds of 1995, Nos. M85,421 to M91,792 and D49,076 to D49,250; Buenos Ayres Western Railway Company, Limited—further issue of 100,000l. 4 per cent. debenture stock; Erie Railroad Company—\$3,498,000 additional voting trust certificates for 4 per cent. non-cumulative first preferred stock, and \$2,111,200 additional voting trust certificates for common stock; Lynton and Barnstaple Railway Company—7,000 shares of 10l. each, fully paid, Nos. 1 to 7,000; Mexican Central Railway Company, Limited—\$108,000 additional consolidated mortgage 4 per cent. bonds, Nos. 59,051 to 59,158; Northern Pacific Railway Company—\$889,500 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M74,199 to M75,063 and D20,002 to D20,050; Union Pacific Railroad Company—\$5,765,000 additional first mortgage railroad and land grant 4 per cent. gold coupon bonds, Nos. M74,736 to M80,000 and D19,001 to D20,000.

The directors of the Patent Victoria Stone Company, Limited, have declared an interim dividend at the rate of 10 per cent. per annum, being 5 per cent. for the half-year ended June 30th.

Messrs. Thackeray and Co., of Cardiff, under date June 30th, report as follows:—Barry undivided, 280½ (a rise of 2½); ditto preferred, 126 (unchanged); ditto deferred, 156 (a rise of 4); Cardiff preferred, 114½ (unchanged); Port Talbot, 9½ (a fall of ½); Rhondda and Swansea Bay, 4½ (a fall of ½); Rhymney undivided, 265½ (unchanged); ditto preferred, 123 (unchanged); ditto deferred, 145 (unchanged); Taff Vale, 76 (a fall of 2½); Vale of Glamorgan, 125 (a fall of 1). A little more activity has been displayed in the local rail market, although business is still very small. A rumour that the Barry Company intended issuing new stock on more advantageous terms than before, had the effect of enhancing the price somewhat.

**Opening of the Waterloo and City Railway.**—The Duke of Cambridge will formally open the Waterloo and City Railway on Monday, July 11th. His Royal Highness will be received about noon at Waterloo by Mr. Wyndham Portal, the chairman of the Waterloo and City Railway Company, accompanied by the rest of the directors of that company, and the directors of the London and South Western Railway Company, as also by Mr. Charles J. Owens, the general manager, engineers, and other officials of the two lines. The Duke will be conducted down one of the inclines which lead from the terminus of the South Western Railway to the platforms of the Waterloo and City line, where one of the new electric trains will be in readiness to convey the party to the City station, which is situated underground immediately opposite the Mansion-house. His Royal Highness will alight to inspect the station arrangements, and, having declared the line open, will return to Waterloo, where he will lunch with the directors of the two companies. It is hoped that the line will be available for traffic on the day following the opening ceremony.

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Third Readings, House of Lords.—Charing-cross Euston and Hampstead Railway Bill.

Second Readings, House of Lords.—Bristol Tramways (Electrical Power, &c.) Bill; Bristol Tramways (Extensions) Bill; Norwich Electric Tramways Bill; Blackburn Corporation (Tramways, &c.) Bill; Windsor Dock (Cardiff) Bill; Burnley Corporation (Tramways, &c.) Bill; Easton and Church Hope Railway (Extension of Time) Bill; London United Tramways Bill.

Third Readings, House of Commons.—Lancashire Derbyshire and East Coast Railway Bill; London United Tramways Bill; Sheffield District Railway Bill; Blackpool and Fleetwood Tramroad (Tramway Extensions) Bill; Hull Barnsley and West Riding Junction Railway and Dock Bill; Lincoln and East Coast Railway and Dock Bill.

Second Readings, House of Commons.—Buenos Ayres Northern Railway Bill; Exeter Teign Valley and Chagford Railway Bill; Glasgow and South Western Railway Bill.

The South Wales freighters have decided to oppose the Windsor Dock Bill when it comes before the House of Lords.

An official notice has been delivered by the representatives of the South Eastern Railway Company in the Private Bill-office of the House of Commons, intimating the withdrawal of that company's threatened opposition to the London Chatham and Dover Railway Bill of the present session. This Bill is now unopposed.

The Great Northern and City Railway Company have officially notified that they do not intend to proceed any further with their Bill to extend their authorised electrical railway to Finsbury-park. The withdrawal of this Bill in no way affects the original scheme, but is merely an abandonment of a proposed extension of 1 mile 13 chains.

The Unopposed Bill Committee of the House of Commons has passed the Bill under which a new company is incorporated with powers to construct a railway 10 miles in length, commencing with the authorised Bideford Westward Ho! and Appledore Railway at Abbotsham, and terminating at Clovelly. This scheme has now been sanctioned by both Houses.

A committee of the House of Commons has passed the Bill promoted by the Lincoln and East Coast Railway and Dock Company for powers to acquire the undertakings of the Louth and East Coast and the Sutton and Willoughby railway companies. The Bill also confirms an agreement with the Great Northern Railway Company, and authorises the construction of certain new works in lieu of the authorised harbour works. No new capital is authorised by the Bill.

Lord Morley's Committee of the House of Lords has passed the Bill promoted by the Charing-cross Euston and Hampstead Railway Company for power to alter their authorised terminus by the construction of a line from Charing-cross-road to a point under Craven-street, Strand. The Bill also grants an extension of time until August, 1902, within which to construct the scheme as sanctioned in 1893, between Hampstead and Charing-cross. This Bill has now been sanctioned by both Houses.

A Select Committee of the House of Lords has decided that the Andoversford and Stratford-upon-Avon Railway Bill "ought not to be allowed to proceed." This Bill, which had received the sanction of the House of Commons, proposed the incorporation of a company for the purpose of constructing over 26 miles of railway from a junction with the Midland and South Western Junction Railway at Andoversford to Stratford-upon-Avon, with junctions with other railways.

### PRIVATE BILL PROCEDURE (SCOTLAND) BILL.

The Select Committee of the House of Commons appointed to consider this Bill met again on Wednesday, Mr. Stuart Wortley in the chair.

LORD BALFOUR OF BURLEIGH (Secretary for Scotland) continued his evidence. In addition to the various methods of obtaining Parliamentary powers to which he had previously referred, there was, he said, the procedure under the Light Railways Act. He had heard of the question how far promoters had control of proposals after they had passed into the hands of a department for provisional order purposes, but he had no knowledge of any real difficulty arising. Certainly if a promoter came to him and said he did not wish to proceed he should not insist on the scheme's going forward. There would not be any obligation to proceed to Royal Assent, but a promoter could hardly expect to be allowed to appear and try to persuade the Secretary for Scotland not to give effect to the conditions attached to a proposal by the tribunal appointed. He might state his objections to certain provisions, and these would be

put before the chairman and the Treasury. Promoters should have the option of taking the order with the amendments or letting it alone. He had no intention of introducing a penalty clause beyond that which operated after Royal Assent. Various Acts of Parliament passed since 1888 had given very considerable powers to departments in respect to provisional orders, and smaller enterprises had been retarded owing to the expense of procedure, relatively much greater in smaller than in larger proposals. There was nothing in the Bill to prevent the division of a proposal into parts—one to proceed as provisional order, the other by private Bill—and such division might be an advantage, especially to the promoters. To the unopposed portion there would be no inquiry, and the risk of losing the whole proposal would be lessened. He could not conceive the Secretary for Scotland insisting that promoters should acquiesce in such a division. There would be no objection to opponents being heard before making the division, but there would be the disadvantage that it might be held to create an additional stage in procedure; but if there should be any strong feeling in favour of this he would give way. Questions of *locus standi* would be regulated by general orders, each particular case being decided by the tribunal set up by the Bill. Whether there was any constitutional objection to the commission of inquiry being composed of members of Parliament he could not say. If any member found his constituents object to his so acting he would not accept the office, but among the many members of the House of Commons possibly no difficulty would arise. If this committee made such a recommendation, he would be prepared to take the risk of the difficulty arising. In some subjects of local inquiry, as, for instance, whether the maintenance of tramways should be thrown upon the rates, the decision might have a reflex effect on other Bills, but questions of that kind were in the hands of Parliament. He was anxious to carry the Chairman of Committees with him, and he could not conceive a proposal carried in a provisional order against the opinion of the chairman supported by Parliament. The chairman of committees in either House had sufficient means for ascertaining the tendency of public opinion and where the points of impact were likely to be in any private Bill. A Bill dealt with by a joint committee of both Houses would mean one inquiry, and to one inquiry only he was strongly opposed. That promoters were in favour of one inquiry did not surprise him, but opponents were to be considered, and he would be reluctant to yield the advantage of a second inquiry. What weighed with him when considering the question of providing a Commission of inquiry composed of members of Parliament was the increasing difficulty of manning existing committees, and he thought that he would fail in one of his objects, that of relieving the House of Commons from duty felt to be irksome, if he constituted a commission of members. If the procedure were to be applied to the three kingdoms, obviously there would not be any relief except under some such scheme of devolution, but, if the committee decided that the difficulties were not of sufficient weight to prevent the adoption of the proposal, then he confessed the suggestion of a panel of two members of either House would get over many of the difficulties incident to any form of devolution. Of course, it would be necessary to have a panel of a certain number of members available from which members would be selected to serve from time to time. The Bill proposed an experiment, and as every preceding attempt to effect some devolution of private Bill legislation had broken down chiefly in the constitution of the panel, and as this was the chief point of criticism, he would rather accept the proposal for an inquiry by members, with all that could be alleged against it, than incur the risk of loss of the Bill from refusal to accept the suggestion. The circumstances of Ireland were largely parallel to those in Scotland, and the success of the experiment in Scotland would justify the extension of the application of the procedure. In the working out of the scheme he could not conceive circumstances in which a department would proceed in opposition to the Chairman of Committees and Parliament. Powers given under Bills would be on the lines of those already granted by Parliament. Novel proposals, and such as were contrary to the practice of Parliament, would not proceed by Provisional Orders. If a landowner had any objection he could get the judgment of Parliament upon his protest. Of course, such a thing as the Forth-bridge would never be the subject of a provisional order. It would be expedient to insert a provision in relation to division of proposals in a private Bill in order to prevent possible abuses of the system by the introduction of what were termed "omnibus" Bills.

Mr. CHANDOS LEIGH, Q.C., the Speaker's counsel, gave evidence in relation to the present procedure on private Bills, and, while agreeing in the main with the Chairman of Committees as to the practicability of selecting from proposals those which should proceed by way of Provisional Order, took exception to his view on various points of detail. He was not in favour of the delega-

tion of powers to the local tribunal proposed in the Bill, and did not think it would be expedient for Parliament to relax its control over private Bill legislation.

The Committee again adjourned.

### CHINESE RAILWAY CONCESSIONS.

In the House of Commons on Thursday,

Mr. YERBURGH asked the Under-Secretary for Foreign Affairs whether, in view of the keen international competition in the construction of railways in China, the Government were prepared to give the financial support to a well-considered scheme of railway construction in that region which they were prepared to give to a State loan to the Chinese Government.

Mr. CURZON—The attitude adopted by her Majesty's Government towards railway construction in China is that of giving the support of her Majesty's Government's Minister at Peking to any legitimate and *bona fide* proposals in which British capital is concerned; but if the hon. member means to suggest that the Government should themselves provide the money out of public funds for railway construction in a foreign country by a Government loan or otherwise, I have to reply that the practice would involve a complete departure from the policy invariably pursued by successive British Governments and British Parliaments.

Mr. J. WALTON asked the First Lord of the Treasury whether the Government would take the report stage of the Foreign-office vote to-morrow; and whether, having regard to the grave developments of the situation in China since the question was last discussed in the House, and also having regard to the suggestion of Lord Salisbury, in reply to the deputation from the Associated Chambers of Commerce, that the question of the Government taking a new departure in the policy to be pursued in China was a matter to be considered by the House of Commons, and that it was a question which it was quite right to bring before the House and to submit to such an investigation as might be necessary, the report would be taken at such an hour as would allow of adequate debate.

Sir C. DILKE—Before the right hon. gentleman answers that question, may I ask whether he will consider the alternative plan of taking the Diplomatic and Consular vote?

Mr. BALFOUR—As the right hon. baronet is aware, the next three or four Fridays are already mortgaged to other questions of Supply. That answer does not, of course, deal with the report of Supply, which can be taken any night after twelve o'clock. The hon. gentleman desires, as I understand, to discuss on the report of Supply, not merely the negotiations in China in regard to concessions of railways, but also the general question as to whether Parliament should itself incur pecuniary liability in regard to railways not in British territory, for it is only in regard to that question that Lord Salisbury referred to the House of Commons. I do not think that discussion would be in order either on the Consular and Diplomatic Vote, or on the report of the Foreign-office Vote. No doubt the other question—namely, the present position of the negotiations in regard to concessions in China—would be in order on the report of Supply; and if a demand is made on the Government on behalf of any large section of the House, I shall be ready to deal with that vote before twelve o'clock. But I am bound to express my strong opinion that it is most inexpedient in the interests of the negotiations themselves that anything should be said in this House on the subject. ("Hear, hear.")

### RAILWAYS IN NICARAGUA.

In the House of Commons on Thursday,

Mr. DAVITT asked the Under-Secretary for Foreign Affairs whether he had received any information relating to negotiations between a firm of Liverpool shipowners and the Government of Nicaragua for the purchase by the firm in question of railways in that country and of steamers on Lake Managua, with the object of competing with the proposed American canal across the isthmus; whether this firm had communicated its intention or plans to her Majesty's Government; and whether any protest against this rival British project had been made by the United States Government.

Mr. CURZON said the Government had heard nothing of the negotiations alluded to in the first paragraph other than the report that such negotiations had been commenced. The answer to the second and third questions is in the negative.

### ACCIDENTS TO RAILWAY SERVANTS.

A return has been ordered by the House of Commons, at the instance of Mr. Maddison, "of the number of accidents which have occurred during shunting operations to employés on the railways of the United Kingdom during the ten years ending 1897, setting forth in separate columns the fatal and non-fatal accidents on each line, and distinguishing those resulting from coupling and uncoupling from other causes;" also a "statement

showing the numbers of goods guards, brakemen, and shunters killed and injured in the ten years ending 1897, showing the proportion of killed and injured to the numbers employed."

### FREE TRAVEL FOR MEMBERS OF PARLIAMENT

In the House of Commons on Thursday, Mr. CARVILL asked the First Lord of the Treasury if he was aware that members of Parliament of the Australasian colonies had the right to travel free on the railways there, and if he would subsidise the railway companies of the United Kingdom to the extent of 50*l.* per annum in respect of each member of either House, so as to secure a similar advantage for members of Parliament in this country.

Mr. BALFOUR said it would be extremely agreeable if they all had free travelling. (Laughter.) He was afraid he could only repeat the statement made on previous occasions that this general boon to members could not be given by the present Government.

### RAILWAY LINES FOR NATIONAL PURPOSES.

In the House of Commons yesterday,

Sir HOWARD VINCENT asked the Under-Secretary of State for War if, in the event of invasion, or imminent national danger, the Government had statutory power to take possession of railway lines for national purposes; and, in the contrary case, if the Secretary of State would consider the advisability of asking Parliament for such power, having regard to the warning recently conveyed to the War-office concerning the transport of Volunteers.

Mr. POWELL WILLIAMS—I must refer my hon. friend to section 16 of the Regulations of the Forces Act, 1871, which gives full powers.

### TRANSPORT OF VOLUNTEERS.

In the House of Commons yesterday,

Sir H. VINCENT asked the Under-Secretary for War if the South Eastern Railway Company still stood alone in its refusal to convey Volunteer soldiers proceeding to drill or musketry practice in the service of the country on Saturdays; and, in such case, if he would consider the position of this company at Aldershot, Dover, Gravesend, Shorncliffe, and Woolwich, and the desirability of national funds being used for the encouragement of those lines serving the country to the best of their power.

Mr. POWELL WILLIAMS said that an understanding had been arrived at with all the railway companies which, it was hoped, would prove satisfactory.

### EGYPTIAN RAILWAYS.

In the House of Commons yesterday,

Mr. KIMBER asked whether, in remitting the loan of 798,802*l.* made by Great Britain to the Egyptian Government and people, it will be an understanding or condition that the railways which have been constructed by the aid of the money will become or remain the property of Great Britain; or whether any other, and what, consideration will be obtained for this country for the sacrifice.

The CHANCELLOR OF THE EXCHEQUER—The fact that this loan included the sum of 270,000*l.* which was advanced for the purchase of material for the railway between Wady Halfa and Abu Hamed will not be overlooked in the settlement of accounts after the capture of Khartoum. The railways in question, of course, cost the Egyptian Government far more than that sum.

## American & Canadian Railways.

### CENTRAL PACIFIC.

Mr. C. E. Bretherton, a director of the company, has issued a circular to the shareholders of the Central Pacific Railroad Company. He says that the Banbury Committee has now registered so many shares that it can oust Mr. Huntington from control, but unless the lease under which the line is now operated is cancelled that will do small good. A surplus is anticipated on the current year's operations, but the present board has no control over the money, and payments are made by the lessee company, the Southern Pacific of Kentucky, on behalf of the Central Pacific Company, which never appear in the latter's books. "Large disbursements to Central Pacific stockholders have been made by the Southern Pacific Company under the agreement made by Sir Rivers Wilson with Mr. Huntington, but the agreement itself has never been officially communicated to, much less acted on, by the Central Pacific board, and the legal and financial position of the company, as a very cursory examination of the reports and accounts will show, has been absolutely unaffected by Sir Rivers Wilson's mission."

Sir W. T. Marriott, chairman of the Shareholders' Protection Committee, writes under date June 25th:—

"On Tuesday, the 7th of this month, I presided over a meeting of the Shareholders' Protection Committee of the above mentioned railway and a further general meeting was to have been held on Monday next, the 27th inst. Unfortunately there are two committees acting on behalf of the shareholders—the one I have mentioned, which is known as the Morshead Committee, and another which was appointed in the year 1894 and is known as the Banbury Committee. This latter committee has advertised a meeting for Tuesday next, the 28th inst., and the meeting of the Morshead Committee of the 27th has consequently been postponed, and I am in hopes that on the 28th such explanations may perhaps be given as will render the existence of two committees unnecessary. It is clearly in the interests of the shareholders on this side of the Atlantic that there should be no division of opinion, and consequently of forces, among them. I think you will be rendering public service if you will allow me a short space in your columns to state the points of difference between the two committees, as the questions at issue affect not merely the stockholders of the Central Pacific Railway, but all those in Great Britain who invest in American securities and all those in America who wish for the assistance of British capital in the development of the vast resources of their country. Both committees allege that they are acting for the best interests of the shareholders, and both have common ground in ascribing the unfortunate position of the British shareholders to the action of Mr. Huntington and his associates. Between the years 1880 and 1883 they unloaded their own Central Pacific shares on the European market, and obtained, chiefly from this country, a sum of nearly 10,000,000*l.* sterling, and when they had obtained it they used it in starting and supporting other rival railway schemes which up to now have rendered the stock of the Central Pacific holders comparatively valueless. To restore the value of these shares should be the object of both committees, but the Morshead Committee have grounds for suspecting that the Banbury Committee are acting really, though doubtless unwittingly, in the interests of Mr. Huntington, and, therefore, against those of the shareholders whose proxies they may hold. I will state plainly the grounds of their suspicions, and it is for others to judge how far they justify the action of the Morshead Committee. Messrs. Speyer, who, as is well known, carry on a large financial business both in London and New York, have since the year 1880 acted on behalf of Mr. Huntington, bringing out many of his vast financial schemes, and they were acting for him between the years 1880 and 1883, when he was unloading his Central Pacific shares upon the British market. It was in their office in the year 1894 that the Banbury Committee was formed. The fact that in times past Messrs. Speyer have acted for Mr. Huntington is not necessarily conclusive that they are acting in that capacity now, but it naturally provokes comment and calls for explanation. The difficulty, if not impossibility, of serving faithfully two masters with divergent interests is proverbial, and the supporters of the Morshead Committee are of opinion that there should be solid proof that Messrs. Speyer are off with their old love (Mr. Huntington) before they should be taken on by their new one (the stockholders of the Central Pacific Railway). These opinions are strengthened by what has happened since the Banbury Committee was appointed. In 1896 and 1897 Mr. Huntington endeavoured to pass through Congress a Bill which, if it had become law, would have confiscated for ever the property of the Central Pacific shareholders. The Banbury Committee offered no opposition to this Bill, and it would have become law had it not been for the action of some of the members of the Morshead Committee co-operating with others interested in America. The Banbury Committee have during the last year obtained the voting power of a large majority of the British shareholders, and with these votes in April last they have secured a board of directors, who have acted with Mr. Huntington in former times, and who are alleged to be his friends at the present time. Many of the American papers style them 'Mr. Huntington's dummies,' and state that their respective interests in Central Pacific are merely nominal. It is difficult here to appreciate how far these statements of American journalists are accurate or the contrary, but they are given with much detail and they certainly call for explanation. At the coming meeting the relationship of these directors with Mr. Huntington should be fully gone into. The Banbury Committee claim credit for having secured a dividend of 1 per cent. to the Central Pacific shareholders, and an announcement is made in yesterday's papers that the Southern Pacific Company will pay it after July 1st. There are many reasons for supposing this is merely a bogus dividend authorised on the other side of the Atlantic to appease the appetite of shareholders in England. The Southern Pacific Company has been and is the enemy of the Central Pacific Railway, and, wrongly and, according to Sir Rivers Wilson's report, illegally got possession of valuable property belonging to the Central Pacific, and Mr. Huntington, who is the ruling spirit, has already claimed that any moneys paid in dividends to the Central Pacific shareholders are debts due to him or to the Southern Pacific holders. With regard to the members of the Banbury Committee, I should be sorry to say a word against any of them. They are all men of high standing and character, but my point is that even these credentials may not prevent them from playing unknowingly into Mr. Huntington's hands. Are they acting with him or against him? Our American cousins pride themselves upon being more acute than we are, and Mr. Huntington is said to be the acutest man in all America, and his past conduct shows that he has a wonderful knack of utilising other people for his own advantage without their being aware of it."

The Senate has adopted an amendment to the Deficiency Bill, providing for the settlement of the Central Pacific Railroad Company's indebtedness to the Government. It provides that

the Secretary to the Treasury, the Secretary of the Interior, and the Attorney-General shall form a commission, with full power to settle the question of the indebtedness to the Government growing out of the issue of bonds in aid of the construction of the Central Pacific and the Western Pacific bond-aided railroads, upon such terms and in such a manner as may be agreed upon by them, or a majority of them, and the owners of the said railroads, provided the settlements thus made be submitted in writing to the President, and unless approved by him shall not be binding. The Commission shall not agree to accept a less sum in settlement of the amount due to the United States than the full amount of the principal and all amounts necessary to reimburse the United States for the moneys paid for interest or otherwise. It is also provided that the Commission be empowered to grant such time or times for payment by instalments, and at such rates of interest, not less than 3 per cent., payable semi-annually, and with such security as the Commission may deem expedient, provided that in any settlement that shall be made the final payment shall not be postponed for a period exceeding ten years, and that the whole amount of principal and interest shall be paid in equal semi-annual instalments within the period so limited, and that in any settlement made it shall be provided that if default be made of either principal or interest, or any part thereof, then the whole sum and all the instalments of principal and interest shall immediately become due and payable notwithstanding any other stipulation of the said settlement. The Bill now goes to the House of Representatives.

### CANADA SOUTHERN.

The report for the year ending December 31st shows the following results:—

	1896.	1897.
Net earnings .....	\$296,474	\$232,402
Other income .....	1,381	1,645
Total net .....	\$297,855	\$234,047
Dividends .....	337,500	300,000
Balance .....	Dr. \$39,645	Dr. \$15,953
Surplus January 1st .....	59,193	19,553

Surplus December 31st \$19,553 \$3,600

The dividend for 1897 was 2 per cent., as against 2½ per cent. for 1896. The balance-sheet shows a share capital of \$15,000,000, and a bonded debt of \$19,577,131.

### GRAND TRUNK OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement of revenue receipts and expenditure for the month of May:—

Grand Trunk Railway Company of Canada.			
Month of May.	Inc.	Jan. 1 to May 31.	Inc.
1898.	1897.	1898.	1897.
Gross receipts .....	\$322,032	\$303,205	+ \$19,727
Working expenses .....	197,744	189,757	+ 7,987
Net earnings .....	\$125,188	\$113,448	+ \$11,740

Chicago and Grand Trunk Railway Company.			
Month of May.	Inc.	Jan. 1 to May 31.	Inc.
1898.	1897.	1898.	1897.
Gross receipts .....	\$61,679	\$46,617	+ \$15,062
Working expenses .....	40,089	37,954	+ 2,135
Net earnings .....	\$15,010	\$8,663	+ \$6,347

Detroit Grand Haven and Milwaukee Railway Company.			
Month of May.	Inc.	Jan. 1 to May 31.	Inc.
1898.	1897.	1898.	1897.
Gross receipts .....	\$14,219	\$15,115	- \$896
Working expenses .....	10,753	11,023	- 270
Net earnings .....	\$3,466	\$4,092	- \$626

### LATEST EARNINGS.

Third week of June.—Baltimore and Ohio South Western, \$113,000—decrease, \$10,000; Chesapeake and Ohio, \$219,000—decrease, \$20,000; Denver and Rio Grande, \$159,000—decrease, \$13,000; Mexican Central, \$255,000—decrease, \$2,000; Missouri Pacific, \$387,000—decrease, \$27,000; New York Ontario and Western, \$74,000—decrease, \$3,000; Wabash, \$251,000—decrease, \$38,000; Texas and Pacific, \$100,000—decrease, \$3,000; Louisville and Nashville, \$400,000—decrease, \$22,000; Missouri Kansas and Texas, \$142,000—decrease, \$2,000; St. Louis South Western, \$113,000—decrease, \$3,000; Southern Railway, \$356,000—decrease, \$27,000; Cleveland Cincinnati Chicago and St. Louis, \$270,000—decrease, \$12,000; Norfolk and Western, \$168,000—decrease, \$13,000; Northern Pacific, \$369,000—decrease, \$43,000; Oregon Railroad and Navigation, \$147,000—decrease, \$39,000.

The gross earnings of 76 roads in the second week of June show an increase of 4.92 per cent.

Month of May.—Mexican National, gross, \$506,000—same as last year; net, \$93,000—decrease, \$36,000. Chicago Milwaukee and St.

Paul, gross, \$2,755,000—decrease, \$395,000; net, \$966,000—decrease, \$176,000. Southern Railway, gross, \$1,746,000—decrease, \$271,000; net, \$461,000—decrease, \$147,000. Northern Central, gross, \$492,000 (same as last year); net, \$97,000—decrease, \$19,000. Atchison Topeka and Santa Fé, gross, \$3,289,000—decrease, \$486,000; net, \$789,000—decrease, \$233,000; net income from operating, \$644,000—decrease, \$294,000. Chicago St. Paul Minneapolis and Omaha, gross, \$659,000—decrease, \$6,000. St. Louis and San Francisco, gross, \$577,000—decrease, \$66,000; net, \$230,000—decrease, \$37,000. Chesapeake and Ohio, gross, \$956,000—decrease, \$102,000; net, \$275,000—decrease, \$20,000. Chicago Burlington and Quincy, gross, \$3,551,000—decrease, \$745,000; net, \$1,055,000—decrease, \$216,000. Northern Pacific, gross, \$1,918,000—decrease, \$448,000; net, \$793,000—decrease, \$368,000; net operating income, \$745,000—decrease, \$332,000. Wabash, gross, \$1,142,000—decrease, \$210,000; net, \$277,000—decrease, \$17,000. The May statement of the Reading Company shows the following railway earnings:—Gross, \$1,698,000—decrease, \$84,000; net, \$631,000—decrease, \$43,000; and for the Coal and Iron Company, gross, \$803,000—decrease, \$165,000; and net loss, \$47,000—decrease, \$43,000. Central of New Jersey, gross, \$955,000—decrease, \$21,000; net, \$356,000—decrease, \$15,000. Erie, gross, \$2,826,000—decrease, \$109,000; net, \$721,000—decrease, \$11,000. Lehigh Valley Railroad, gross, \$1,399,000—decrease, \$263,000; net, \$263,000—decrease, \$52,000. Lehigh Valley Coal Company, gross, \$1,059,000—decrease, \$152,000; deficit, \$66,000—decrease, \$30,000. New York Ontario and Western, gross, \$276,000—decrease, \$33,000; net, \$49,000—decrease, \$16,000.

On 134 lines reporting earnings for the month of May, the total receipts were \$46,547,000 (on 101,500 miles), whilst for the same month in 1897 the receipts were \$40,803,000 (on 100,400 miles). Increase in receipts, \$5,744,000; increase in mileage, 1,100. On 132 lines reporting earnings from January 1st to May 31st, 1898, the aggregate receipts were \$224,761,000, as compared with \$194,858,000 for the corresponding period in 1897—decrease, \$29,903,000.

### RAILROAD NOTES.

A despatch from Baltimore says that Mrs. Mary Garrett has recently sold her entire holding of 60,000 shares of Baltimore and Ohio stock owing to the assessment imposed under the reorganisation plan. The holders of Baltimore and Ohio preferred stock threaten to oppose the reorganisation plan actively, but the reorganisation committee say that this does not give them any concern. As a matter of fact the opposition mention 75 as the price at which they are willing to sell out, either to the reorganisation committee or to others. The Baltimore Syndicate will take the new 3½ per cent. bonds at 92½, the fours at 85, and the new preferred shares at 50, the bonds being plus interest. The parts of participation in the underwriting syndicate are bid for at 103.

A New York correspondent telegraphs:—"A committee of western freight men is trying to draft a new freight agreement. It is expected it will complete its work this week. A proposition to enter into a pool of traffic or of earnings is being considered. Most of the agents claim that the western lines can maintain rates in no other way, and there is a strong probability that the Supreme Court will not decide that such a pool, like the Joint Traffic Association, is illegal. Others are opposed to anything savouring of law-breaking, and it is not considered probable that an arrangement containing a pool agreement will be adopted."

The collateral trust 4 per cent. gold bonds of the Great Northern Railway Company of Minnesota have been called for redemption on September 1st next, and Baring Brothers and Co., Limited, have been instructed to pay on that date bonds presented to them for encashment, which can be deposited with them on and after August 15th. Holders of the above company's preferred stock are reminded that the amount of subscription for the new issue of preferred stock can be paid in the above-mentioned bonds at par.

Another Vanderbilt consolidation scheme is said to be in prospect, the properties which are selected as the objects of such an alliance being the Chesapeake and Ohio and the Cleveland Cincinnati Chicago and St. Louis railways, the latter more familiarly known as the "Big Four." The advantages of a close union of the two companies is obvious, but it must be also considered that they are to a large extent already under one management and are operated in entire harmony.

The directors of the Minneapolis and St. Louis have declared the usual semi-annual dividend of 2½ per cent. on the first preferred stock and a semi-annual dividend of 2 per cent. on the

second preferred stock. For two years and a half the second preferred has been receiving 3 per cent. per annum. The yearly rate is now increased to 4 per cent.

The Governor of Newfoundland intends to publish the entire correspondence which has passed between the Colonial and Imperial Cabinets respecting the Reid railway contract, though the Newfoundland Government protests that the publication will seriously interfere with the colony's prospects.

A St. Paul correspondent says that he has absolute authority for stating that no settlement of the transcontinental rate war is probable. The differentials claimed by the Canadian Pacific are still a stumbling block in the way of an arrangement, and the roads are as far apart as ever on this question.

The Louisville and Nashville Railroad management have issued a circular which announces the restoration of wages reduced in 1893, half of it to take effect from July 1st and half from January 1st. The sum involved is about \$500,000 per annum.

The Interstate Commerce Commission has relieved the American transcontinental lines from the operation of the long and short haul clause during the duration of the present fight with the Canadian roads.

The officials of the Cleveland Cincinnati Chicago and St. Louis have issued a denial of the report circulated that the company had prepared a plan to purchase the Chicago Indianapolis and Louisville.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 56,000 tons, the Fort Wayne road leading with 8,000 tons. In the corresponding week last year 51,000 tons went forward.

The adjourned meeting of the Central Pacific Railroad Shareholders' Protection, or Morshead Committee, will be held at Winchester-house, Old Broad-street, E.C., on July 5th.

It is understood that the Union Pacific will pay a dividend of 1½ per cent. on its preferred stock next October. Mr. Cornish has been appointed vice-president of the company.

It is rumoured that the Pullman Palace Car Company will make an early distribution of \$10,000,000 amongst its stockholders out of the income account surplus.

It is stated that \$44,883,712 of Lake Shore and Michigan Southern stock has so far been exchanged for New York Central 3½ per cent. debentures.

The statement of the Reading Company for the fiscal year provides for the fixed charges and sinking fund and 3¼ per cent. on the preferred.

The Southern Railway has completed the acquisition of the Virginia Midland.

A street railway for Dawson City, Klondyke, has been authorised by Parliament.

## General News.

### WESTERN OF SANTA FE RAILWAY.

The following circular (upon which we have something to say in our leader columns) has been addressed from "8, Bishopsgate-street, E.C.," to the holders of consolidated scrip of the Western of Santa Fé Railway:—

Most matters of importance as to this railway have to be dealt with by or on behalf of the bondholders, and it has therefore been plain for some time that they require a formal and legal organisation for dealing with such questions as arise, and with the general interests of the railway. It is now necessary that such an organisation should be created as soon as possible, as Mr. Reade, who has for some years acted in the Argentine for the protection of the bondholders, has returned to England, while important questions with the municipality and with Mr. Casado referred to below have to be dealt with. The most satisfactory and probably the only way of arriving at this is by the formation of an English company, which would take over the present bonds or consolidated scrip. Such a company would form the organisation which is essential for the full protection of the scrip-holders' interests, and could represent them effectively in all matters requiring attention in connection with the railway.

All the rights of the bonds against the railway company will under this arrangement be fully preserved, as all such rights now held by the scrip-holders will be acquired by the English company, and the English company will be owned by the present scrip-holders.

Besides dealing with the interests of the bondholders and the management of the railway, the formation of such a company would have other important advantages. By dividing the present charge into first, second, and third charges the new securities should be much more easily dealt in and command a better price than the present scrip. This has proved to be the case with other Argentine railways. Provision might further be made, if thought advisable, for any additions or betterments that may be found necessary, enabling a larger distribution to be made out of the earnings of the line. At present the expenditure on capital account of only a few thousand pounds, which in a new line is often unavoidable, is a very heavy burden on the scrip-holders.

There are also some pressing and important matters for the English company to deal with, e.g.:—

To arrange for the construction, if necessary, of the new entrance into Rosario required by the Municipality, including the purchase of the necessary land.

To take any action that may be advisable to enforce Mr. Casado's guarantee, under which, in consequence of the failure of the last harvest, there is a considerable sum to be claimed.

To take any steps that may be advisable with a view to obtaining actual possession of the railway. It has long been desired by many of the large holders to turn the railway into an English company, and by the wish of the bondholders' committee negotiations on this point were opened with Mr. Casado some time ago. There is now reason to believe that, if an English company were once formed, Mr. Casado, who owns most of the shares of the Argentine Company, might join in an arrangement which would give the English company the entire control of the railway. The terms on which this might be done would be entirely in the hands of the scrip-holders, acting through their own company. Under all circumstances the control of the English company should of course be kept in the hands of the English members—i.e., of the scrip-holders.

The object of this scheme is not in any way to impair the rights of the bondholders against the railway or Mr. Casado, but to enable them to protect their own interests and to deal more effectively with all matters which affect them.

The following resolution having been passed by the Scrip-holders' Committee:—

"This committee is of opinion that a formal organisation is required to represent and act for the consolidated scrip-holders, and that with that object it is desirable to form an English company to take over the consolidated scrip; and that a sub-committee be appointed to consider what is the best form for the company to take, and when the same shall be incorporated."

With the approval of the following members of the committee:—

Colonel Atkinson.	Mr. C. M. Rose.
Baring Brothers and Co.	Mr. Walter Scrimgeour.
Mr. Frederick Chalmers.	Mr. G. A. Touch.
Mr. C. C. Macrae.	Mr. Alexander Young.
Mr. F. B. Praed.	

The sub-committee have decided that the following will be the most suitable form for an English company, to be incorporated forthwith:—

Capital of the company:—

500,000l. 4 per cent. debenture stock.
400,000l. 5 per cent. preference shares.
500,000l. ordinary shares.

Each 100l. of the present consolidated scrip, which, with some outstanding bonds, amounts to 1,225,576l., to receive:—

£30 in 4 p.c. debenture stock ...	total £367,673,	annual charge £14,707
£30 in 5 " preference shares ...	" £367,673,	" £18,383
		£33,090

£40 in ordinary shares .....	" £490,230
------------------------------	------------

£100	£1,225,576
------	------------

The remaining debenture stock and preference shares (except a small amount required to pay preliminary expenses) would form a reserve.

Under this arrangement the debentures, preference, and ordinary stock of the company will be entitled to all the income to which the consolidated scrip taken over is now entitled, as the company will acquire the whole interest of such scrip in the railway.

It is proposed that the first directors of the company should be—

The Hon. F. H. Baring.	Mr. Walter J. Stride.
Mr. F. B. Praed.	Mr. G. P. Torrens.
	Mr. Essex E. Reade.

Scripsholders are invited to deposit their consolidated scrip under the scheme at once with Baring Brothers and Co., Limited, where drafts of the memorandum and articles of association of the company and of the deed to secure the debenture stock may be inspected and deposit lists obtained.

June 10th, 1898.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### LONDON CHATHAM AND DOVER RAILWAY COMPANY.

Tenders were opened on Wednesday, at the office of the Secretary of the London Chatham and Dover Railway Company, Victoria Station, for the new issue by that company of 300,000l. 3 per cent. debenture stock. The stock was offered at a minimum of 103l. per cent. The aggregate tenders amounted to 167,780l., or 132,220l. less than the sum required. Applicants will, therefore, receive allotments in full. The highest price offered was 106l.

#### MERTHYR ELECTRIC TRACTION AND LIGHTING COMPANY, LIMITED.

This is the title of a company which has been formed, with a capital of 1,000l. in 5l. shares. The objects of the company are indicated by the title. It was registered on the 23rd ult., by Mr. S. Morse, 4, Fenchurch-street, E.C.

#### BROMPTON AND PICCADILLY-CIRCUS RAILWAY COMPANY.

The underwriting arrangements being now completed, the capital of this company—600,000l. in 10l. shares—will be offered to the public at once. This line will run from South Kensington Station to Piccadilly-circus, with five intermediate stations. The tunnels are to be 11½ ft. in diameter, and the line will be worked by electricity generated at a station on the Thames at Chelsea. The directors will, we understand, be Mr. Charles Grey Mott (director, Great Western Railway), Mr. Henry Lambert (late general manager Great Western Railway), Mr. G. P. Neale (late superintendent London and North Western Railway), Sir Joseph Dimsdale, and a director of the Waterloo and City Railway.

#### YORKSHIRE DALES RAILWAY (SKIPTON TO GRASSINGTON) COMPANY.

Subscriptions are invited for the share capital of this company, amounting to 45,000l. in 10l. shares. The Midland Railway Company have undertaken to work the line for 60 per cent. of the receipts, and also (provided the balance shall be insufficient in any year to pay 4 per cent. on the share capital of the company, after allowing for interest on the loan capital not exceeding the same rate) to make an allowance to the company of 5 per cent. on the Midland Railway Company's proportion of the receipts on their own railway in respect of through traffic arising or terminating on the line of the company and carried by the Midland Railway Company 10 miles or more on their own railway. Such allowance is, however, not to exceed the amount requisite to make the dividend on the share capital 4 per cent. The company have power to borrow sums not exceeding 15,000l. in the aggregate so soon as the amount of the share capital prescribed by the Act has been paid up. They have also power, out of any money by the Act authorised to be raised, for any agreed period during the time limited for the completion of the works five years from the passing of the Act, to pay to any shareholder interest at a rate not exceeding 3 per cent. per annum upon the amount from time to time paid up on his shares. The directors are Sir Mathew Wharton Wilson, Bart., Mr. James Lambert, Lieutenant-Colonel Maude, Mr. William Atkinson Procter, and Mr. John Scott. The Act provides for a short single line about 8½ miles in length, beginning at Skipton and terminating at a point less than half-a-mile from Grassington. Although no formal agreement has been entered into with any contractor, the line has been staked out, the necessary levels taken, and the contract drawings for the use of the contractor prepared.

#### GWELO RAILWAY SYNDICATE, LIMITED.

This is the title of a company which has been formed, with a capital of 25,000l. in 1l. shares, to enter into an agreement with Sir John Willoughby, Bart., and to construct, complete, and make ready for traffic a railway from Bulawayo to Gwelo, in Matabeleland. Registered by Ashurst and Co.

### THE DUTIES OF RAILWAY PORTERS.

In the Queen's Bench Division on Saturday, Mr. Justice Day and Mr. Justice Ridley, sitting as a Divisional Court, heard an appeal by the defendants in the action *Henson v. the Manchester South Junction and Altrincham Railway Company*. Mr. RUSSELL, Q.C., in support of the appeal, said on the evening of November 10th last a lady, who proposed to travel by the defendants' railway, went to Stretford Station and asked a porter to fetch her box from a house in the neighbourhood. The porter took a barrow to the lady's house and left it on the pavement while he went inside to fetch the box. The plaintiff was walking

along the pavement, when he stumbled over the barrow and received personal injuries. The question was whether the defendants were liable for the act of the porter. He submitted that at the time of the accident the porter was not acting within the scope of his authority, and that, therefore the defendants were not liable. The porter had not received permission to fetch the lady's box, and he did not even use one of the defendants' barrows. As a matter of fact, he was performing an independent job for which he was paid sixpence by the person who employed him. Mr. Justice DAY asked whether that part of the notice of the appeal was correct that alleged that the county court Judge stated that the rate of wages paid by the defendants presupposed an intention on their part that the porter should supplement his wages by doing such work. Mr. RUSSELL said that represented what the county court Judge stated. Mr. Justice DAY inquired whether it was the custom of the company to job out their servants in this way. Mr. RUSSELL replied in the negative. There was, however, some evidence that on certain occasions the station-master had given the porter in question and others permission to accommodate passengers by carrying their luggage. Mr. Justice DAY said he should like to hear what the learned counsel for the plaintiff had to say. Mr. WILKINSON said when an injury occurred through the negligence of a particular person who was the servant of another person, the presumption was that the servant at the time of the accident was acting within the scope of his duty, and the burden of proof rested with the defendants. Mr. Justice DAY observed that plaintiff must show that the porter was doing his duty at the time of the accident. Mr. WILKINSON pointed out that the county court Judge had found that as a fact. Mr. Justice DAY said the county court Judge had no evidence before him upon which he could come to that conclusion. He was of opinion that the appeal must be allowed, and judgment entered for the defendants, with costs.

### NITRATE ITEMS.

*A propos* of Mr. Hooley's charges against a certain section of the press, it would be interesting to know what Mr. James Head (a director of the Nitrate Railways Company) has to say in reply to the statements made by the *Critic* of June 18th and June 25th in reference to the *Financial News*, over which Mr. Head is the presiding genius. There is no mincing of phrases and no mistaking the meaning of the *Critic's* language, and we have yet to learn that any director of a respectable public company can afford to leave unnoticed such grave charges as are levelled against Mr. Head's organ, by a widely read, influential, and responsible journal like the *Critic*.

The Iquique journal, *El Nacional*, of May 17th, has the following reference to North's two old tubs, which have often figured so prominently in the controversy over the Nitrate Railways Company and its water supply:—"The small steamers *Juanita* and *Maria Luisa*, that were formerly used in carrying water from Arica and were supplying the inhabitants of Nisagua and Iquique, and also the engines of the Nitrate Railways, and which for more than a year have been kept anchored in our way (as the company to which they belong has given up bringing water from that port) are going shortly to be taken to Valparaiso to be there disposed of. The *Juanita* has had the necessary crew assigned to her to make the voyage, and the *Maria Luisa* will be tugged by the *Copiapo*, belonging to the South American Company of Steamships, which will come here on purpose for that reason."

The *South American Journal* having alluded to the management of the Julia Nitrate Company as having been "somewhat peculiar," a shareholder of the company writes to that journal as follows:—"You are quite right, it has been peculiar. What can we think of a board of directors who contracted with the Taltal Railway Company to send down 20,000 quintals of nitrate per month, or pay for the carriage of same if not sent, and almost at the same time made an agreement with the Nitrate combination not to produce more than 6,000 quintals a month?" Can this be true? If so, what sort of business men were the directors?

The board of the Lautaro Nitrate Company, Limited, will recommend a final dividend for the year of 3s. per share, payable July 13th.

Messrs. Lockett's action against the Lagunas Nitrate Company, Limited, for damages in lieu of commissions to which they might have been entitled under the contract which the new board of the Lagunas Company somewhat hastily abrogated, is expected on or before the long vacation. By the way, we hear that the Lagunas board have resolved (somewhat foolishly, we think) to appeal against Mr. Justice Romer's judgment delivered last month.

The action commenced by Mr. Welbore S. Ellis against the directors and representatives of deceased directors of the Lagunas Syndicate, Limited, has been dismissed with costs for want of prosecution.

#### THE SOUTH EASTERN—CHATHAM ALLIANCE.

The following letter was sent on Wednesday to the Stock Exchange Committee by the Secretary of the London Chatham and Dover Railway Company:—"London, Chatham, and Dover Railway.—Dear Sir—I am instructed to inform you that the Joint Committee of the South Eastern Railway and London Chatham and Dover Railway companies at their meeting to-day, agreed upon the principles contained in a draft agreement submitted to them for the united working of the two companies by a joint committee to be nominated by their respective boards, the details of the arrangements being settled forthwith by the boards and shareholders of each company.—J. Morgan, secretary." Mr. Morgan subsequently stated to a press representative that the principal points of the working arrangement having now been agreed upon, no time would be lost in settling the details and placing them before the shareholders of both companies. The advantages of this united working, he added, would not be confined to the railway companies by any means. There would be a very great saving in working expenses, but the public would derive the advantage of greater and better travelling facilities.

According to one of the morning papers, "Mr. Cosmo Bonsor will be elected to the chairmanship under the new conditions, and Mr. Forbes will act as adviser to the boards of the two companies." The net saving which will accrue to the two companies as the direct outcome of the fusion is calculated as 100,000*l.* per annum. At present there are over a dozen trains daily running to Dover and Folkestone for the Continental services, a multiplication which causes unnecessary waste. Under the new régime the individualities of the two companies remain undisturbed, but the working staffs will be fused, and every degree of competition abolished. Negotiations have already been opened with the Northern Railway of France, and the fares to the Continent will be greatly reduced. The union will have the advantage of the two fleets, and a uniform service from London over both systems will be the salient feature of the proposed alteration in this direction. At the present moment passengers anxious to travel to Margate by the South Eastern are taken an unnecessary circuit of 30 miles round Kent, but with the new arrangement this will be abandoned, and trains for Folkestone and Margate will switch off from either line at Ashford, and run over the lines of the union direct to their destinations. A local service will join Ashford to Margate and Folkestone, and, as in every instance, here again the public reaps the benefit by more constant trains and the diminution of fares. Mr. Cosmo Bonsor is reported as having said to a *Daily Mail* representative—"As soon as possible, which, unfortunately, cannot be before the end of the year, the season and ordinary tickets of the two companies will be available over the competing lines. The race of trains for the Continent, and in every other direction, will cease, and a regular service will be maintained throughout the two systems. Let me explain. In seven instances the Continental trains of the two railways at present start at what is practically the same hour. This will be altered to what in all probability will be a tri-hourly service. We intend to induce the Northern Railway of France to enter into our schemes, and if the proposed meeting with them should eventuate successfully, an enormous reduction and a more rapid journey will be the result. As to Kent, all the important centres will be provided with direct communication, and passengers by either company will be able to book to or from any of our stations to any point on either line. Passengers will be able to start a journey on one system, complete it on the other, with the same ticket for the journey. It means a tremendous saving to the public, and I am very sorry that it will not be in active effect for the approaching summer. But all the guide-books are printed and plans made which it is impossible to contravene."

#### AN IMPORTANT CASE OF CARRIERS' LAW.

An important judgment as to the liability of carrying companies has been delivered in the Court of Appeal, Dublin, by Lord Justices Fitzgibbon, Walker, and Holmes in the case of "Tuohy v. the Great Southern and Western Railway Company." The action was brought by a furniture dealer in Limerick to recover damages in respect of injury done to furniture consigned to him from Manchester. The furniture was carried by the Lancashire and Yorkshire Railway to Liverpool, thence it was brought to Dublin by the City of Dublin Steam Packet Company, and from Dublin it was conveyed to Limerick by the defendant company. At the hearing of a civil bill appeal at the

last spring assizes in Limerick, the Lord Chief Baron held that if the evidence showed the existence of a contract by the Great Southern and Western Company for the carriage of the goods from Manchester, he would give a decree against them. He stated a case on this point for the opinion of the Queen's Bench, and set out that the evidence showed, (1) that an arrangement existed between the three companies for the through carriage of goods; (2) that the through rate was collected in Limerick by the Great Southern Company and divided according to the mileage which the goods were carried by the three companies, and (3) that it could not be shown where the damage occurred. He left it for the opinion of the court to decide whether these facts constituted the existence of such a contract as would render the Great Southern Company liable. The Queen's Bench held that the Great Southern Company was not liable, and that in a case of the kind the only company that could be sued was the company with which the goods were originally booked. The Court of Appeal now upheld that decision, stating that the evidence showed a contract by the Great Southern Company for the safe carriage of the goods over their portion of the joint route, and that, therefore, if it appeared that the goods were damaged on their line, the defendant company would properly be made liable, either in contract or tort, but there being no evidence of the Great Southern Company having contracted for the safe carriage of the goods over the entire route they could not now be sued.

#### RAILWAY CONCESSIONS IN CHINA.

According to telegraphic advices received from China during the past week, the Tsung-li-Yamen has authorised the construction of a railroad 15 miles long to the coalfields west of Peking, and grants the sum of 2,500,000 taels for the purpose. M. Pavloff is urging the high Chinese officials to employ Russian engineers instead of Mr. Kinder's staff to make the survey of the projected railway. The United States Consul at Chefoo has advised the State Department that the German Minister has protested against the passage of the railway through the province of Shan-tung, the concession for which has been granted to Americans, and which will be constructed by American labour and with materials from this country. The German Minister claims for Germany the exclusive rights over Shan-tung, and demands that the plans for the line which is to connect Tien-tsin and Shanghai be changed so as to make a detour round Shan-tung. The French Minister of Foreign Affairs has received a telegram from Shanghai announcing the signature of a document granting to the Franco-Belgian syndicate the right of constructing a railway between Peking and Hankow. The negotiations for the concession have been in progress for more than a year. The line will be over 1,800 miles in length, and will, it is expected, pay handsomely, as it is to pass through a thickly populated region. All material required will be either of French or Belgian manufacture. The concession covers a period of twenty-six years. The financial arrangements are to be under Belgian control. Work will be begun simultaneously at the termini of the road, Peking and Hankow. The syndicate have secured the mining rights along the line. The Chinese Government is aware that the Russians and French are financing the Belgian undertaking. In an Imperial edict published on Monday, the Emperor of China severely blames Sheng, director of railways, for the delay incurred in connection with the construction of the Peking-Hankow line. It is thought probable that in consequence of this edict Sheng will be obliged to consent to the condition demanded by the Belgian Minister, that the French Minister shall be arbitrator in case of dispute between the contracting parties, which condition has so far been strenuously opposed by the Tsung-li-Yamen. According to the third clause of the Russo-Chinese Convention for the lease of Port Arthur and Ta-lien-wan, Russia agreed to China obtaining a loan on the cheapest possible terms for the extension of the Peking Kin-chen Railway. On hearing of the Chinese agreement with the Hong Kong and Shanghai Bank, M. Pavloff, the Russian Chargé d'Affaires, objected to it, but the Tsung-li-Yamen informed him that by the terms of the lease Russia had relinquished the right of interference. (Russian engineers are engaged in survey work in the vicinity of Niu-chwang. The intention is to make a short branch line in a north-easterly direction for the purpose of transporting the material required for the construction of the main line between Ta-lien-wan and Kirin, and Niu-chwang is the most convenient port for landing under present conditions. The proposed branch line will probably be only temporary. Chinese officials and British merchants are alike keenly alive to the importance of preserving a share of the Manchurian trade by the extension of the Chinese railway system from Shan-hai-kwan to Niu-chwang and Mukden. This, however (says the Shanghai correspondent of the *Times*), is impossible for China to effect unsupported in the face of Russian opposition to the Hong Kong and Shanghai Bank loan contract. Sheng, the Director-General

of Railways, signed the revised Belgian contract for the Luhan Railway on Monday.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Monday, are shown hereunder:—

Making-up Price.	Stock.	Continuation rate.
May 24. June 8. June 27.

### NEW RAILWAYS IN THE EASTERN COUNTIES.

The new branch line from North Walsham to Mundesley (the new sea-side resort on the Norfolk coast) was opened for traffic yesterday, thus giving Mundesley direct railway access to and from London, the midland counties, Yorkshire, and Lancashire by the direct Great Northern route. This is one of a series of extensions which will be carried out by a joint committee of the Great Eastern, the Great Northern, and the Midland railway companies. The line from North Walsham forms a junction with the Great Eastern Company's Norwich and Cromer line and the Midland and Great Northern joint committee's Lynn and Yarmouth line, and extends a distance of 5½ miles to Mundesley-on-Sea. The line will be a single one, with only one intermediate station, to be known as Paston and Knapton. The second section, yet to be constructed, will be a new line between Mundesley and Cromer, a distance of 8 miles along the coast, and passing *en route* Trimmingham, Sidestrand, and Overstrand, each of which villages will be supplied with a

railway station. The third section will proceed in the opposite direction from Mundesley to Happisburgh, or Hazeboro, serving also the villages of Bacton and Walcott. A further important section of the same scheme is a new direct line, 10 miles in length, between Lowestoft and Yarmouth, which will also serve the intermediate villages of Gorleston, Hopton, and Corton. According to the train service which has been arranged, Mundesley, the terminus of the first section, will be about three hours from London. The arrangements made will include the provision of through carriages.

### THE SUMMER TRAIN SERVICES.

#### LONDON AND NORTH WESTERN.

A new and important service to Dublin by the North Wall route of the London and North Western Railway Company came into operation yesterday (Friday). It will reduce the time of the journey between London and the Irish capital by ninety minutes, and it will enable passengers to leave Euston as late as eleven o'clock in the morning, and yet to arrive in Dublin for dinner at half-past eight. The actual time-table of the new service will be—Depart Euston, 11 a.m., and Birmingham 12.30 noon; arrive Holyhead 4.35 p.m.; depart (steamer) 5 p.m., arrive North Wall 8.30 p.m. On the day journey from Dublin to London there is to be an acceleration of the existing service by one hour. Instead of starting from North Wall at 9.15 a.m., the steamer will leave at 10.15 a.m., and, the passage being quickened and the train departure from Holyhead timed at 3 p.m. instead of 2.35 p.m., the passenger will reach Euston at 8.45 p.m., as at present. The public will also be enabled to leave Dublin a quarter of an hour later than at present, the express steamer leaving for Holyhead at 9.10 p.m. instead of 8.50 p.m., arriving in London at 7.45 a.m. Additional corridor trains, with luncheon and refreshment cars, will be run between Euston and Edinburgh and Glasgow, in both directions, and breakfast and luncheon cars will be run between Liverpool and Manchester and London by the morning express trains, and also on the 5.45 a.m. boat express from Fleetwood to London. New express trains for tourists and families will be run from London, Liverpool, Manchester, Birmingham, to North Wales, the English lake district, Morecambe, and also to Llandrindod, and other watering-places in central Wales.

#### MIDLAND.

The Midland Railway Company announce the full service of trains for the summer season, to come into force on July 1st. The service with Scotland will be improved by the addition of a new express to Edinburgh and the north (with third-class dining accommodation), leaving London (St. Pancras) at 10.35 a.m., and serving Nottingham, Sheffield, Leeds, Bradford, Manchester, Liverpool, and other points. A "daylight" service throughout will be given to Rothsay during July and August, whereby passengers may leave St. Pancras at 10.30 a.m., and Nottingham, Bristol, Birmingham, Sheffield, Leeds, Bradford, Manchester and Liverpool at corresponding times, and reach Rothsay at 9.45 the same evening. A through carriage will be attached to the 10 p.m. express from St. Pancras for Greenock (Princes' Pier) for the convenience of tourists wishing to join the steamers for the Firth of Clyde, and the Western Highlands and islands of Scotland. Sleeping saloon cars will be attached to the night expresses between London (St. Pancras) and Glasgow and Edinburgh in each direction. The improved services to Ireland, inaugurated in June, *via* Barrow-in-Furness (the picturesque route *via* the borders of the Lake district), and *via* Stranraer and Larne (the short sea route) will be continued. The new fast steamer, *Duchess of Devonshire*, will be placed on the Isle of Man service *via* Barrow, and an additional service will be given each Saturday, from July 9th to September 3rd inclusive, in connection with the train leaving London (St. Pancras) at 10.30 a.m. New through express trains will be run to and from Sheringham, Cromer, Yarmouth, and the Norfolk Broads.

#### GREAT NORTHERN.

The Great Northern Railway Company announce numerous important alterations in their train service to begin on July 1st. An additional dining-car express train will run between London and Edinburgh, leaving King's-cross (Great Northern) at 11.20 a.m. A special express for Scarborough, Whitby, Filey, and Bridlington will leave King's-cross on week-days at 11.30 a.m., and for Sheringham, Cromer (Beach), Mundesley, and Yarmouth (Beach) at 1.10 p.m. The 8.15 p.m. special Scotch express will run on Sundays as well as week-days. For the convenience of tourists to Norway, an express train, with third-class luncheon car attached, leaves King's-cross at 10.55 a.m. on Tuesdays, Thursdays, Fridays, and Saturdays. The company also announce the issue of week-end tickets to certain places in Scotland, commencing on July 1st.

## NORTH EASTERN.

The North Eastern Railway Company announce a new departure in the shape of weekly or fortnightly holiday tickets, which can be obtained during the months of July, August, and September from a number of tourist stations on their system. Holders of these tickets, which will be issued at a low rate, will be entitled to travel as often as they please between any of the stations in the district for which the ticket is available.

## FOREIGN AND COLONIAL ITEMS.

A telegram from St. Petersburg states that the Moscow Windau and Rybinsk Railway Company have received the Imperial permission to construct a railway from St. Petersburg to the south of Russia, via Witebsk.

At meetings of the debenture stock and ordinary stock holders of the East Argentine Railway Company, Limited, held on Monday, the scheme of arrangement between the company and the debenture stockholders was approved.

The Korean Government notifies its intention of constructing a railway from Seoul to Mokpo, the newly opened port 200 miles to the south. A desire to forestall foreign demands for concessions is supposed to be the motive of this step.

The Argentine Government has authorised Engineer Schneidewind, Inspector-General of the National Railway Board, who is at present in Europe, to spend 10,000*l.* on the purchase of block signalling apparatus for the Andine Railway.

The Argentine Government has ordered payment to the East Argentine Railway Company of a bond to the value of \$3,780,000 gold in guarantee rescission bonds, and of a bond of \$2,000,000 gold to the Cordoba Central Railway Company.

The Swiss Federal Assembly has, in accordance with a proposal of the Federal Council, approved a grant to the canton of Grisons of 8,000,000*f.* for the construction of a narrow-gauge railway to join the Engadine with the other valleys of that canton.

There were 16,345 locomotives in working order on the various German lines last year. Of these engines 15,715 were made in Germany and 430 were imported from other countries. Of the imported engines, 234 came from Austria, 154 from Great Britain, and 42 from Belgium.

In the West Australian Legislative Council an amendment to the address in reply has been carried condemning the Government railway proposals. The debate on the Address is proceeding in the Legislative Assembly, where the Government are assured of a large majority.

The numbers are announced of three bonds of 100*l.* each, series A, and twenty bonds of 20*l.* each, series B, of the issue of 1,890,000*l.* 5 per cent. first mortgage debentures of the Royal Trans-African Railway Company drawn for redemption. Particulars will be found in our advertisement columns.

In the Cape of Good Hope House of Assembly on the 24th ult., Sir J. Sivewright stated that the traffic sent from the whole of the railways on to the Bechuanaland line for the period ending April 30th was 312,073*l.* From the Bechuanaland Railway 28,464*l.* was received. The Cape share of the total traffic of the railways is 151,353*l.*

Sir Charles Turner, K.C.I.E., has been elected chairman of the Rohilkund and Kumaon Railway Company, in the place of the late General Alexander Fraser, C.B., R.E., Sir George Allen, K.C.I.E., having declined the office. It is also announced that Colonel T. Gracey, C.S.I., R.E., late Director-General of Railways and Secretary of the Railway Department of the Government of India, has joined the board.

Excellent results are apparently being achieved by Mr. Cyril Smith, the new general manager of the Paraguay Central Railway. For years past we have been accustomed to see the monthly receipts barely covering the expenses, but now each return seems to give an increasing balance on the right side, that for April—just to hand—showing receipts of \$79,897, with an expenditure of only \$63,256.

The Puerto Cabello and Valencia Railway Company, Limited, notifies that Messrs. Glyn, Mills, Currie, and Co. will pay 2*l.* 5*s.* on account of coupon No. 22, due July 1st, 1898, of the first mortgage debentures of the company, on and after that date, less income-tax, and the balance of 1*l.* 5*s.* will be paid as circum-

stances permit. The amount paid on July 1st will be stamped upon the coupon.

The work of fitting all the goods trucks on the Victorian railways with the Westinghouse brake is being rapidly proceeded with, and by June next it is expected that they will all be supplied with the necessary appliances. Already 30,000*l.* has been devoted to this purpose, and a further sum of 15,000*l.*, making 45,000*l.* in all, will be spent within the next two months, thus securing the greater safety of the travelling public and of the rolling stock of the Department.

The non-paying railway lines in Victoria are fifty-six in number, and they have a total mileage of 1,454½ miles. In 1896 the net loss on these lines approximately was 318,793*l.*; in 1897, as a result of an improved traffic, combined with more efficient management, the loss has been reduced to 299,985*l.*, or an improvement of 18,808*l.* The totals quoted include the loss in interest as well as in working expenses. The revenue of these particular lines has gone up within the twelve months from 285,958*l.* to 313,828*l.*, and the local working expenses from 266,450*l.* to 274,971*l.* though the mileage run is not so large by 7,574 miles.

**The New By-Laws.**—It does not seem to be generally known that the North Eastern Company, in submitting the new code of by-laws to the Board of Trade for confirmation, did so with the concurrence and practically on behalf of the railway companies generally. Many years ago the companies, satisfied that their existing by-laws did not sufficiently meet all requirements, appointed a sub-committee to draw up a new code, and this has been under their consideration from time to time at meetings held at the Railway Clearing-house. It is this code which, by arrangement with the other companies, the North Eastern Company have just submitted to the Board of Trade, and the object of their doing so was to avoid the cumbersome procedure which would otherwise have been necessary of each company's submitting a separate copy of the draft code to the department. It was felt that, if the Board of Trade gave their consent to the code in one case, the matter would be greatly simplified, and all that would be necessary afterwards would be for the department to sign and seal copies of the by-laws submitted by other companies which corresponded with those forwarded by the North Eastern Company.

**Cardiff Railway Assessment.**—A communication was read at the meeting of the Finance Committee of the Cardiff Corporation on Monday from the valuer of the Cardiff Railway Company objecting to the increase of 2,334*l.* in the assessment of the company's property, and asking for the restoration of the 1891 valuation. The Chairman and other members of the committee pointed out that since the date named the company had erected the palatial offices on the pier head as well as other buildings. Councillor Evans directed attention to the fact that the committee had already passed a resolution to abide by the decision of Mr. Hedley. The Chairman assumed the communication meant that the company would appeal in the event of the committee refusing to accede. It was remarked that it was no use asking a valuer to make the apportionments unless the committee abided by his decision. The Chairman remarked that he personally would not object to going back to the old valuation, provided the new buildings of the company and pumping engines, &c., were separately assessed. Councillor Evans proposed, and Councillor Courtis seconded, that the application of the company be not acceded to, and this was carried.

**Railways in Nicaragua.**—A despatch from Managua, Nicaragua, states that Mr. Lewis Wiseman, the representative of the Atlas Steamship Company of Liverpool, is about to confer with President Zelaya, with a view to arranging for the purchase of the Government railways and line of steamers on Lake Managua, with the object of working them as the Caribbean Pacific Transit Company, and thus completing the transport route across Nicaragua. The success of these negotiations, says the *New York Herald*, would give this company a route across Nicaragua running practically parallel with that conceded to the Maritime Canal Company, thus directly competing with the proposed Nicaragua Canal, and seriously interfering with its construction. It is, therefore, considered in New York to be unlikely that since the United States Congress decided in favour of the construction of the Nicaraguan Canal President Zelaya will effect a sale to the Atlas Company.

**Stock Exchange Values.**—According to the *Bankers' Magazine* the Stock Exchange value of 325 representative securities on June 18th was 3,215,414,000*l.*, an increase of 42,325,000*l.* since May 20th. Our contemporary remarks:—"Cheapness of money has been the main factor in the stock markets during the past

month. Business itself has been slack in almost all departments of the Stock Exchange, but owing to the decline in the value of money all first-class investment stocks have tended to advance, and this has had a favourable effect generally. Small investment orders and the cheapness of money may be given as the explanation for the advance in Consols and kindred securities. Home railway preference and debenture stocks have improved for the same reason; while the recent speculation in Chatham and South Eastern ordinary stocks on rumours of fresh working arrangements between the two companies, has acted as a general stimulus to business in the market for railway ordinary stocks."

**Railway Benevolent Institution.**—Sir Henry Oakley presided at the annual meeting of the Railway Benevolent Institution, held at the Cannon-street Hotel. In moving the adoption of the report, he stated that the total receipts for the past year amounted to 108,000*l.*, including a handsome legacy of 52,000*l.*, to be devoted to the founding of perpetual annuities of 30*l.* per annum, left by the Rev. Francis Jacox. There were now 126,000 members. The number in receipt of annuities was 1,038, and the institution was also responsible for the education and maintenance of 334 children. Out of 115,000 members of the Casualty Fund, 5,000 had been relieved, making an average of ninety-eight claims per week. Upwards of 8,000*l.* had been paid in distress money during the year. The motion, seconded by Mr. Stevenson, having been adopted, pensions were granted to thirty-one widows and eleven members, and contingent annuities voted to sixty-two widows and one member.

**Epps's COCOALINE.**—Cocoa-Nib Extract. (Tea-like.)—The choicest roasted nibs (broken up beans) of the natural Cocoa, on being subjected to powerful hydraulic pressure, give forth their excess of oil, leaving for use a finely flavoured powder—"Cocoline," a product which, when prepared with boiling water, has the consistency of tea, of which it is now, with many, beneficially taking the place. Its active principle being a gentle nerve stimulant, supplies the needed energy without unduly exciting the system. Sold only in labelled tins. If unable to obtain it of your tradesman, a tin will be sent post-free for 9 stamps.—James Epps and Co., Ltd., Homoeopathic Chemists, London.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

**No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.

**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

**No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.

**No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1886.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	7.140	23,267	7,102	91,061
Average of 5 samples of Blaenavon only...	7.175	25,688	7,488	108,381

Prices and any further information as to quality suitable for special purposes may be obtained from

**Meetings.****ASSAM RAILWAYS AND TRADING.**The eighteenth ordinary general meeting was held on Wednesday, at  
Winchester-house, Old Broad-street, E.C.; Mr. GEORGE WEBB MEDLEY  
presiding.The SECRETARY (Mr. Evan A. Jack) read the notice convening the  
meeting, and the report and accounts (of which a full analysis has  
appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN then said—Ladies and gentlemen, there is much interest-  
ing matter before us to-day, and I propose that we proceed to discuss the  
report under its various headings. The first of these to which I have to  
draw your attention is the railways. You will see that on January 1st  
last year the portion of the colliery line running from Dehing Bridge to  
Leds, 7 miles in length, was opened for public traffic in goods, and there-  
upon came under Government supervision. You will also see that during  
the year 2,042 $\frac{1}{2}$  was spent on capital account for permanent way, stations  
and buildings, bridge work, and rolling stock; 1,000 $\frac{1}{2}$  of which was for  
rolling stock alone. The general traffic shows an increase of Rs.27,084,  
equal to 6 per cent. The coal traffic shows an increase of Rs.1,12,715,  
equal to 106 $\frac{1}{2}$  per cent. This considerable increase arises from the rate  
having been raised with the consent of the Government from a figure  
which barely covered cost of carriage to one fairly remunerative. As I  
explained at the last general meeting, this was done in view of the fact  
that the railway may some day be bought by the State, when it would be of  
prime importance to the company for the purpose of obtaining an  
adequate price. The net earnings were 24,561 $\frac{1}{2}$ l., as against 29,203 $\frac{1}{2}$ l., a  
decrease of 4,642 $\frac{1}{2}$ l. This decrease, as the report states, was almost entirely  
caused by the expenditure of 11,681 $\frac{1}{2}$ l. in substituting cast-iron sleepers  
for wooden ones, an operation ordered by the Government. As a  
set-off, however, the company received the annual subsidy, 7,083 $\frac{1}{2}$ l., which  
otherwise would have lapsed, the subsidy ceasing when 5 per cent. is  
earned on the capital outlay. The following are the facts which led up to  
all this:—The company has been accustomed to buy its sleepers from  
native contractors, who procure the necessary hard wood from distant  
parts of the country. Owing to causes, among which, it is said, were  
difficulties with the Government Forest Department, our contractors  
failed to supply what had been agreed upon. There was no redress, and  
the company had to go into the adjacent forest and get some sort of  
timber. What they obtained was shortlived, lasting only three years  
instead of five. In 1896, owing to this failure, the road became unsafe,  
and there were accidents, which brought the Government on the scene.  
Their consulting engineer, in a report, went so far as to say: "It is  
difficult to conceive of any cause for such gross neglect of the road other  
than a deliberate intention to save the cost of proper maintenance in  
view of the probability of Government taking over the line in the near  
future." This groundless imputation had afterwards to be withdrawn.  
Its effect, however, was to induce the Government to threaten that, unless  
some remedial step was at once taken, the line would be closed, and  
it was ordered that the cost of what was done should be charged to  
revenue. The net result for the year is that the company has put into  
the line 11,681 $\frac{1}{2}$ l. worth of cast-iron sleepers, at a cost of 4,598 $\frac{1}{2}$ l., and  
has to submit to a diminution of the year's profits to that extent. It  
is difficult to say whether this will eventually prove a loss or a profit to  
the company. Should the Government not purchase the line in 1900, the  
company will, for obvious reasons, reap an advantage during the period  
intervening between the present time and 1905 which will outweigh the  
temporary loss it has incurred. The next heading, that of the collieries,  
the capital expenditure was 32,253 $\frac{1}{2}$ l., of which 2,021 $\frac{1}{2}$ l. was on the old  
mines; 8,814 $\frac{1}{2}$ l. on the new Namdang mine and railway, and 21,417 $\frac{1}{2}$ l. on  
the new Dehing bridge. The total expenditure amounted to 292,432 $\frac{1}{2}$ l.  
The output was 186,603 tons, against 177,829 tons in 1896, a gain of  
8,774 tons; and the sales were 191,685 tons, against 187,425 tons in 1896,  
a gain of 4,260 tons. It will, I think, be of interest to shareholders to  
be reminded of the nature and extent of their coal property as it stands  
at the present moment. For this purpose I would draw their attention  
to the map which has been distributed with the report. It consists of  
the coalfield originally granted to the company together with the conces-  
sion known as Haly's Grants, which were situated within our area, and  
which were subsequently purchased by us. These grants at Namdang  
and Tirah are held in perpetuity, and are for ever free of royalty. The  
company has six mines in operation, including Namdang, lately opened.  
The area is served by a railway 16 miles in length, including sidings, and there  
is the wooden bridge across the Dehing River, which connects it with the  
main line. Another bridge, however, is under construction close by, and its  
completion is expected before the advent of the rains in 1899. This will  
be a very fine structure, consisting of six spans of 100ft. each, built of  
steel girders on brick piers, and will supersede for heavy coal traffic the  
present wooden one, and avoid the disabilities and risks to which the latter  
is subject. These disabilities arise from its comparative weakness, it not  
being strong enough to bear the weight of the engines in a running train,  
and in consequence the coal trucks have to be moved across the bridge by  
hand labour, causing expense and delay. There is also the danger which  
the present bridge incurs every year from floods, such as the one which in  
1893 caused serious loss to the company. The present bridge, however,  
will be retained, but only for passengers. The mines are worked by more  
than 2,000 adult labourers, who have to be housed, and fed, and ministered  
to in a variety of ways. There are workshops of all sorts, bungalows for  
the officials, large storage tanks for water, and extensive pumping  
arrangements. You will also be interested to know something concerning  
the quantity of coal which our company has at command. On this point

Mr. Jack has brought back with him a rough estimate by Mr. Harris, the colliery manager. He estimates that, taking an average thickness of 40ft., which is about half the full thickness, and allowing for faults, barren ground, loss in working, &c., there are in our original concession 123,000,000 tons, and in Haly's Grants 45,000,000 tons, in all 168,000,000 tons, of which about 50,000,000 tons lie above the water level, and can be won without shafts or expensive pumping. At the present moment we are mining, say, at the rate of 200,000 tons per annum. If this figure were raised to 500,000 tons, it would take us 100 years to exhaust the coal above water level alone. (Applause.) I now come to the petroleum concessions. With regard to our petroleum property, you will have seen from the report that in the opinion of the board, in order to deal profitably with it, it is necessary to set up refining plant far more complete and of much greater capacity than that which the company now possesses, and that for this purpose they have taken steps to form a new and independent company. Before, however, the company can transfer its concession, it is necessary, under its terms, to obtain the written consent of the Indian Government. This was applied for in January last, and it was only on June 9th that the agent and general manager telegraphed to the board that consent had been granted, but subject to several conditions, one of which was that the Government should approve the prospectus before issue. The prospectus will accordingly be submitted to the Indian Government, and as this will necessarily delay matters, it will be some little time before the directors will be in a position to start the new company. In the meantime boring operations are continued, and large flows of oil are reported. On this important matter I shall call upon Mr. Boonton Wood, presently, to make a few observations. I now pass to the timber concession. The capital expenditure during the year was 2,237l., making in all 13,817l. The completion of the new saw-mills has been delayed owing to the old mills not being entirely closed during their construction. The company now owns a new and permanent iron structure 240ft. long and 120ft. broad, furnished with modern machinery and labour-saving appliances. The next item is the brick and pottery works. The capital expenditure during the year was 2,215l., making in all 16,276l. The reconstruction of the works should be completed during the present year and become a source of profit to the company. I now come to our investments. In the Rivers Steam Navigation Company we hold 4,081 shares of 20l. each (15l. paid), and during the year we have received dividends, at the rate of 8 per cent. per annum, amounting to 4,897l. 4s. Sir Charles Tennant represents the interests of the company on the Rivers Company's board. In the Makum (Assam) Tea Company, Limited, we hold 20,000 shares of 1l. each (fully paid). In 1896 the yield of tea amounted to 216,080lb., and in 1897 to 380,842lb., and the estimate for 1898 is 480,000lb., the outturn up to the end of June being 93,600lb., against 51,200lb. last year. The report for 1897 has just been issued, from which we learn that a dividend of 3 per cent. is recommended, carrying forward a balance of 1,920l. In the Brahmaputra-Sultanpur Branch Railway Company, Limited, we held on December 31st last 5,000 shares of Rs.100 each (Rs.60 paid), but since that time we have sold 449 shares. During construction we receive interest on our outlay at the rate of 3 per cent. Afterwards the Secretary of State in Council guarantees during the continuance of a contract which, among other things, confers on him powers of purchase, which, however, cannot be exercised until 1919, interest at the rate of 3 per cent. per annum, the surplus net earnings over 3 per cent. being divisible in equal shares between the Secretary of State and the company. I now come to the item of finance. During the years 1895, 1896, and 1897 the company incurred a large expenditure under the following heads:—The new Dehing Bridge, the Petroleum Works, the Namdang Colliery and Railway, the reconstruction of the saw-mills and the brickworks, the subscription for the 5,000 Brahmaputra-Sultanpur shares, and the final payment of 13,000l. due to the contractor's estate. I would now take the opportunity of supplementing what is stated in the report. The company is in a peculiar position as regards the management of its finances, a position which prevents it from raising the capital it requires from time to time on terms somewhat in accordance with the intrinsic merits of the concern. I allude to the uncertainty which arises every five years as to whether the Government will, or will not, purchase our railway. This uncertainty hampers the directors in the issue of fresh capital, and is a source of considerable loss to the company. I do not hesitate to say that if this uncertainty did not exist, the company, in addition to what it might have saved in the past, could save at least 1 per cent. by way of interest on any debentures or shares it might issue. For example, when one of these quinquennial periods approaches, say within two years, and the board wishes to issue 6 per cent. shares we are met by the fact that these shares are redeemable at par, and that if the railway is bought they would be paid off at that figure, and that holders would lose all the premium they had given. The consequence is that a 6 per cent. stock which would, in ordinary circumstances, realise 120 to 125 or more, has, under the circumstances, to be sold at from 105 to 110, to the loss of the company. It is obvious, therefore, that while all this is favourable to those who subscribe for our 6 per cent. shares, it bears heavily on the holders of the shares which rank under them. The next quinquennial period expires on February 5th, 1899, seven months hence, and as there is great uncertainty as to our railway being taken over, the board have had to consider how they should act in the meantime as regards any capital issue which might be required. But in addition to this permanent uncertainty, there is another, and a temporary one, in connection with the sale of the company's petroleum concession and works to a new company, which may involve the receipt of a considerable sum of money by us. After due deliberation the board have resolved to await events during the next seven months, and then to act

according to circumstances. They are in possession of ample means for this purpose, the company having in its treasury debentures more than sufficient to meet all liabilities. The next item relates to our revenue. The general revenue account (No. 9) shows a profit for the year of 51,319l., as against 55,407l. in 1896, a decrease of 4,087l. This decrease, as an inspection of the account shows, is made up of a number of items, some of which are adverted to in the report. I may supplement what is therein said concerning the difficulties with which we had to contend, that what with war, famine, pestilence, and earthquakes, India had a very sad year in 1897, and that our company had some share of these troubles. For instance, the loss on rice for our 6,000 coolies amounted to 1,416l., and in addition there was our contribution of 105l. to the Mansion House Fund. As regards the sickness among our labourers, I shall call on Surgeon-General De Renzy to say a few words. I now come to the heading of dividends. The result of the company's operations, coupled with the increased interest charges, is that only 4½ per cent. has been earned on the "A" preferred shares, as against 6 per cent. in 1896. This, although disappointing, will, I trust, under the circumstances, be deemed satisfactory. With regard to the current year's business, I am glad to say that our prospects are fair. We have, however, to face certain difficulties. The Brahmaputra plays its accustomed tricks with us, and taxes the energies of the companies to get our coal on board and convey it down the river to market. Sickness among our coolies is but too prevalent, while at Calcutta Messrs. Macneill and Co., our agents, advise us under date June 15th that the plague is affecting all kinds of business, and that labour is scarce, the last to get the scare being the boatmen. Out of 100 tons of coal for the s.s. *Logician* our agents were only able to supply 18 tons by boats, and other means had to be adopted. On the other hand, as you will have gathered, several heavy items on the wrong side in 1897 will not recur in 1898. Our agent and general manager looks for an output of 215,000 tons as against the 186,600 mined last year, and it is hoped that certain reforms initiated by him and our secretary will result in that increased quantity of coal being extracted at a less cost per ton. The output of the mines for the first six months of this year is 108,660 tons, as against 90,168 last year. As regards the railway, the gross receipts for the same period amount to Rs.401,230, as against Rs.393,704 last year. It is true that the general traffic shows a decrease of Rs.23,000; but while, as Mr. Hawkins advises us, a portion is due to the general bad state of affairs in India, the rest is owing to changes in the method of book-keeping. On the whole, there is every reason to believe that at this time next year there will be a substantial increase in the divisible balance of cash. (Applause.) Mr. Jack, our secretary, went out to Assam in October last for the purpose of inspecting the company's property, and inquiring into and reporting on its affairs generally. While out there he went into matters thoroughly with the general manager, with the result that, as we hope, greater efficiency and economy will be secured in various ways. As to the management in Assam, the thanks of the shareholders are due to Mr. Sydney Sanderson Hawkins, the agent and general manager, and to the other officers of the company, for the able and zealous performance of the duties entrusted to them. As regards your direction, the directors have invited Mr. Walter Butler, M.I.C.E., to a seat at the board, and they recommend that you will now confirm the appointment. Mr. Butler is a railway engineer, a member of the firm of Ford and MacDonald, contractors, and has been connected with India for more than thirty years.

Mr. BOVERTON REDWOOD—I may remark very briefly, Mr. Chairman and gentlemen, that from my knowledge of the work which has been done in connection with the petroleum interests in this company—a knowledge extending over the whole period of the active operations—I am satisfied that the foundation has been laid of a large and profitable business. I, therefore, consider that the directors are fully justified in the course which they propose, of transferring these interests to a separate company, and I confidently anticipate for that separate company a highly successful career. ("Hear, hear.")

Surgeon-General DE RENZY, C.B., next addressed the meeting on the subject of the sickness and mortality amongst the company's native employes, and said the sickness and consequent inefficiency of the coolies were due to three causes—widespread sickness in the province, the famine in Bengal, and the insanitary state of the town of Margahita. He thought the Indian Government ought to do something to improve the sanitary condition of so promising a settlement. ("Hear, hear.")

Mr. MOORE intimated that he had travelled all over the company's lines and properties, and was of opinion that before February next the Government will exercise their option of taking over the company's railways.

In reply to questions and observations by General STANSFIELD, Mr. THOMSON, Mr. WHITMAN, Mr. MITCHELL, and Mr. DAVIS,

The CHAIRMAN said the board had no information as to when the line would be taken over by the Government; in fact, they were completely in the dark on the subject. It was possible that some more cast-iron sleepers would be laid on the lines during the current year, and he could not say when the work would be completed. The delay in completing the new Dehing-bridge had been caused by an insufficient supply of bricks. He could not account for the Indian press being in possession of details respecting the company's operations which had not been made known to the English shareholders.

General STANSFIELD said such details appeared in the *Pioneer* and *Mail* of February 25th last.

Mr. TURNER, late general manager, replied that possibly the information was obtained from statistics which were called for yearly by the Government and published by them in an official "Blue-book."

The CHAIRMAN, continuing his reply to questions, said that if the petroleum business were sold to a subsidiary company this company would no doubt reap considerable benefit by being recouped a considerable

portion of the money they had spent by having shares in the new company and by having the carriage of materials and products when they were taken to the markets. The gardens of the Makum (Assam) Tea Company were considered to be amongst the best in India, and he and his fellow-directors looked upon this company's contribution of 20,000*l.* to the capital as a good investment. It took five years for a tea company's gardens to get into full bearing. With regard to issuing a half-yearly report to the shareholders, the board would take the suggestion into consideration, but it would be very difficult to give trustworthy information, except in very general terms. The directors could not undertake to call the shareholders together and consult them if they determined to part with the petroleum interest to a subsidiary company; but the shareholders would no doubt have an opportunity of taking shares in the new undertaking if they so desired.

On the motion of the CHAIRMAN, seconded by Mr. CHAS. SANDESON, the report and accounts were then unanimously adopted.

The retiring directors, Messrs. P. C. Leckie and H. de Courcy Agnew, were re-elected, and the appointment by the directors of Mr. Walter Butler to a seat at the board was confirmed.

On the proposition of the CHAIRMAN, seconded by Surgeon-General Dr. BENZY, the dividends recommended in the report were approved and sanctioned.

The auditors, Messrs. Price, Waterhouse and Co., were reappointed, and the proceedings terminated with a vote of thanks to the chairman and directors for their past services.

### METROPOLITAN DISTRICT RAILWAY.

The adjourned Wharfedale meeting of shareholders in the Metropolitan District Railway Company was held on Thursday, at the Westminster Palace Hotel, S.W.; Mr. J. S. FORBES presiding.

The CHAIRMAN said that they were now in a position to place the Bill before the meeting. The object of it was to construct a railway to connect the District with the London Tilbury and Southend Railway between Whitechapel and Bow. The capital was to be 660,000*l.*, in shares, with 220,000*l.* borrowing powers, giving a total of 880,000*l.* The line would be 2 miles and 5 chains long, and, therefore, in comparison with any other line in London, would be a very cheap line. The District and the Tilbury proposed to assume the control of the construction of the railway, and each company was to take half of the capital burden, and the arrangements to be made would not throw upon them the onus of paying full interest on the capital in the first and second years of the working. During construction interest would be paid out of capital at the rate of 3 per cent., but after the opening of the railway 2 per cent. would be paid in the first year and 3 per cent. at the end of the second year, and afterwards a sum not exceeding 4 per cent. There was provision for the appointment of a joint committee of the two companies and the appointment of an arbitrator. The principle of the making of the railway was approved in a Bill last session. He concluded by moving a resolution approving of the Bill enabling the two companies to subscribe towards the capital of the new railway.

Viscount GORT seconded the motion, which was agreed to.

### ARGENTINE NORTH EASTERN RAILWAY.

#### CAPITAL.

The capital account shows a total expenditure of 5,394,951*l.*, whilst the receipts have been 5,785,266*l.*—viz., ordinary shares, 350,000*l.*; cumulative 6 per cent. preference shares, 1,500,000*l.*; 5 per cent. debenture stock, 2,988,342*l.*; prior lien debenture stock, 246,400*l.*; value of construction, material, stores, &c., taken over from the contractors upon rescission of the contract, and brought into the accounts to date, 700,524*l.*

#### REVENUE.

The accounts for the year ending December 31st, 1897, show a gross revenue of 20,802*l.* (against 22,809*l.*), and an expenditure of 28,738*l.* (against 30,079*l.*), leaving a loss of 7,936*l.* (against 7,270*l.*). Adding income-tax, 1,608*l.*; one year's interest on 246,400*l.* 4 per cent. prior lien debenture stock, 9,856*l.*; and interest on 5 per cent. debenture stock in accordance with scheme of arrangement, viz.:—(Distribution to debenture-holders—3 per cent. in Argentine Government bonds, 89,650*l.*; distribution to 6 per cent. cumulative preferred stockholders—1 per cent. in Argentine Government bonds, 15,000*l.*), 104,650*l.*; the total sum required was 124,050*l.* This was balanced by the following entries:—interest, 480*l.*; transfer fees, 233*l.*; interest on Government bonds—Suspense account (to provide in terms of scheme of arrangement—Interest on prior lien debenture stock 9,856*l.*; deficiency on working for the year to December 31st, 1897, 8,831*l.*), 18,686*l.*; commuted Government guarantee suspense account—For distributions to 5 per cent. debenture stockholders and 6 per cent. cumulative preferred stockholders, as per contra, 104,650*l.*

#### TRAFFIC.

The number of passengers carried during the year was 27,858 (against 29,713); the quantity of goods carried, 51,910 tons (against 60,374 tons); the train mileage, 74,724 (against 80,528); the receipts per train mile, 5*s.* 6*d.* (against 5*s.* 7*d.*); the expenses per train mile, 7*s.* 8*d.* (against 7*s.* 9*d.*); the average length of line worked, 207 miles (in each year); length of line in operation at the close of the year, 207 miles (against 207 miles). The report states:—

"The year was, from a variety of causes, not a prosperous one for Argentine railways generally, and this company has, to a certain extent,

suffered in common with its neighbours; but an improvement in business is anticipated in the course of the present year. The loss in working shows, when converted into sterling, a slight decrease as compared with the corresponding figures in 1896, the diminished receipts in 1897 having been more than compensated by the reduction in working expenditure.

#### GENERAL.

"In accordance with the intimation given in the report of last year, Mr. Harrison Hodgson has inspected the lines of the company, and has submitted to the board an exhaustive report on the condition of the works and the system on which they can be completed with the best regard to economy and efficiency. It is satisfactory to learn that Mr. Harrison Hodgson has expressed his entire approval of the action of the officers of the company in Argentina, and has confirmed their estimates. A brief abstract of Mr. Hodgson's report will be found herewith, and will, no doubt, be read with much interest by the proprietors.

"The work of connecting the two sections of the western branch has been carried on without intermission up to the present, and early in June of this year through communication, with temporary bridges, was made, so that the opening to public traffic may now be expected at an early date. Measures have been taken for proceeding with the construction of the eastern branch from Paso de los Libres, its present terminus, to Santo Tomé.

"Mr. G. Pietsch having, to the regret of his colleagues, been compelled by ill health to retire, Mr. G. Zwilmeyer has been appointed to fill the vacant seat at the board. Mr. Harrison Hodgson, on his return from Argentina was, in accordance with the arrangement referred to in last year's report, appointed a director of the company."

#### MR. HARRISON HODGSON'S REPORT.

Mr. Harrison Hodgson, in a letter to the board dated April 13th, 1898, says:—

"In accordance with your request, I beg to forward you a brief summary of my report upon the general condition and prospects of the various lines belonging to the Argentine North Eastern Railway Company, Limited. The Argentine North Eastern Railway Company, and its southern neighbour the East Argentine Railway, occupy together a rather isolated position, in the sense that apart from the connection between the two, they are not joined to any other Railway. Concordia is the southern terminus of the East Argentine Railway, Monte Caseros is the junction of the Argentine North Eastern Railway with the East Argentine Railway, and to Corrientes and Santo Tomé will, when the railway is completed, form the respective northern termini of the western and eastern branches of the Argentine North Eastern Railway. The land through which the Argentine North Eastern Railway passes is for the most part grazing or pasture, with occasional patches of land under cultivation, particularly in the proximity of the towns. A fair amount of trade was formerly done in hardwood sleepers and posts, which were carried over the open sections of the railway and shipped to Buenos Ayres for use on railways in that province. This traffic has greatly declined, but when the line is connected between Mercedes and Saladas it will open up a district which is rich in suitable timber for sleepers, fence posts, firewood, &c. The effect of completing the railway between Mercedes and Saladas will most probably be to divert a quantity of the traffic which now goes through Monte Caseros, Mercedes, and intermediate points, to Empedrado by steamer, and from thence to San Roque, Mercedes and Curuzú Cuatía. The reason for assuming this change in transit is because the Parana River is much more reliable for navigation than the Uruguay. Steamers drawing 8ft. of water can reach Empedrado all the year round, and when this river is high, as it generally is during the greater part of the year, steamers of much greater capacity and deeper draught are employed, whilst the Uruguay steamers, drawing considerably less than 8ft. of water, cannot get up beyond Paysandú where goods and passengers have to be transhipped to places further up the river. The completion of this line should also have a good effect upon the passenger traffic, and it is fully anticipated that there will be a fair increase in through passenger travel between Corrientes and the coast via the Argentine North Eastern Railway. The construction work between Mercedes and Saladas is being carried out in a satisfactory manner; particular attention is given to the construction of the embankments, and to seeing that they are formed of good material, having in view the future maintenance of the line. Stone of excellent quality is found at various points on or near the line. The masonry work is being carried out in a substantial manner by the company's employes, under the superintendence of the company's staff, the work being let to small contractors, and, considering the drought, &c., at fairly reasonable and satisfactory prices. The three large viaducts or bridges over the respective rivers Corrientes, Batel, and Santa Lucia will not be commenced until the rails between Mercedes and Saladas have been laid and connected with the open section. This will enable the construction materials to be got right to the place, and the building of the bridges will then at once be proceeded with, the erection of the temporary bridges being now in progress. Some seven or eight hundred men are employed on construction work, and, so far as can be seen at present, trains will be able to run through to Corrientes by August of the present year. This is by means of temporary bridges over the rivers Corrientes, Batel, and Santa Lucia, and if the permanent bridges at these places are actively taken in hand by June next, there seems no reason why everything on the western branch should not be permanently completed by December of 1899. The work on the eastern section between Libres and Santo Tomé will probably be commenced by the end of the present year. Although there is one large bridge to construct over the Rio Aguapey, the rest of the work is extremely light, and neither on the western or eastern branches are there any serious engineering difficulties, although

great care will require to be taken in the erection of the four large bridges. The total estimated cost to complete the western and eastern branches, as will be seen from my general report, should not exceed the estimate of the officers of the company. The question of letting all construction work to one or two contractors has been fully discussed and carefully considered, but it is not thought advisable (considering that the company have their own staff, who are competent to do the work, and also have nearly all the plant and tools necessary) to do so at the present time. The line when completed will be cheaply maintained, and, considering the easy gradients and curves, the working expenses should be very light. The maintenance of the open sections of the line is being done in a satisfactory manner. The material, plant, stores, &c., are being well looked after, and everything maintained in good order. The future prospects of the line depend to a very great extent on the introduction of immigration into this part of the country, owing to the very few inhabitants found along the route of the railway, and to the indolence of many of these, living as they do in a district where the nature of the soil and climate renders such peculiar advantages to agriculture. The time will doubtless come when, as the southern part of the Argentine near the coast becomes more thickly populated, some of the large numbers of immigrants constantly arriving will make their way further inland, and there is no reason why it should not be assumed that in the course of time much of the fertile land served by the railway will come under cultivation and yield fruitful crops, in which case the revenue of the railway will be greatly improved. If some scheme for the introduction of immigrants into this district could be devised, either by arrangements with the individual landowners or by purchase of various blocks of land by the railway company, it would considerably improve the future prospects of the line."

## General News.

### TAFF VALE PREFERENCE DIVIDENDS POSTPONED.

The secretary to the Taff Vale Railway Company has issued the following circular to preference shareholders:—"I am directed to inform you that notwithstanding the serious loss of traffic caused by the stoppage through the strike of most of the collieries on the line since April 1st, the board have reason to believe that the proportion to June 30th of the year's dividend on the preference stock has been earned, but that owing to the uncertainty which exists as to the duration of the strike, and having regard to the fact that the dividend on the preference stock is contingent on the profits of the whole year, they regret that they do not feel justified in at present distributing the amount which, under other circumstances, would be applied in payment of the preference dividend for the past half-year. The directors expect that, even if the strike continues for some weeks longer, the full year's dividend on the preference stock will be earned before the close of the year, and should the ordinary traffic of the line be resumed at an early date the altered conditions will be taken into consideration, 'with a view to issuing the usual warrants for the dividends hitherto paid in July, on account of the first half of the year.'"

The *South Wales Daily News* remarks:—"There has been quite a flutter in regard to Taff stocks consequent on the issue of the circular to preference shareholders which appears below. On the face of it the circular is by no means of a reassuring character. Nevertheless, the market has taken a sanguine view of the outlook on the belief that there is 'something' in the background, and as a result there have been dealings in the ordinary at 76½ and 76½, the quotation showing an improvement at the close of 1 at the latter level. The preference stock is also about 1½ better, at 139. It had been assumed when the company closed their books for the preparation of the dividend warrants on May 30th that the dividend would be paid in the ordinary course, and accordingly the stock has been quoted *ex div.* on the Stock Exchanges. Now, however, the stock will have to be quoted *cum div.* The position is certainly an unusual one. According to such information as is obtainable the company are in a position to pay the dividend as usual and leave something for the ordinary shares; but if the strike were to continue for, say, two or three months longer—and this is a possibility the directors have to take into consideration—the position of affairs at the end of the year might be a very awkward one, inasmuch as the loss would be greater than the ordinary revenue resources could stand. It is assumed therefore that the directors have taken the precautionary step of keeping the dividend now due in hand to meet possible contingencies. Of course, if the strike terminates shortly the full dividends will be paid on the preference stock at the end of the year, and naturally the extra dividend will be added to the quotation. Interest will now centre on the amount of distribution on the ordinary stock at the end of the year, because unless the dividend be at the rate of at least 3 per cent. on the old undivided security the stock will disappear from the list of trustee securities, on which it has had a place for a long term of years, and it cannot reappear until a period of ten years has elapsed. As a matter of course the directors will strain every nerve to pay this dividend by drawing

on the reserve and in other ways, but even if the strike does come to a speedy termination it may be a matter of difficulty whether they will be able to do this."

### GREAT WESTERN RAILWAY.

A special general meeting of the proprietors of this company will be held at the Paddington Station on Monday, the 18th inst., when the Fishguard and Rosslare Railways and Harbours Bill will be submitted for consideration. It is also proposed to submit for the consideration, and, if thought fit, the approval of the meeting, clauses which have been introduced into the Bill giving power to the Company to subscribe a sum not exceeding 250,000*l.* for the purposes of the Bill, and to apply their capital to such subscription. It is explained:—"The circumstances necessitating the submission of this Bill to the proprietors arise out of the Bills that were submitted to them at the special general meeting held on February 10th last, one of which provided for the transfer to and vesting in this company and the Great Southern and Western Railway Company of the undertakings of the Waterford Dungarvan and Lismore and Fermoy and Lismore railway companies, and the other for a subscription by this company to a bridge over the river Suir, authorised by the Dublin Wicklow and Wexford Railway Company's Act of 1897. These Bills were withdrawn owing to the Treasury being at the time unwilling to give the support to the first-mentioned Bill which had been previously promised. Simultaneously an opportunity occurred of putting an end to the hostile action of the Fishguard and Rosslare Company, and of making arrangements with them on friendly terms for carrying out in a more complete manner than could have been effected under the original Bills a new through route for cross-Channel traffic between the systems of the Great Western Company on the one hand and of the Great Southern and Western Company on the other hand, by the construction by the Fishguard and Rosslare Company of a railway from Rosslare to Waterford, with the additional advantage of the short sea passage between Fishguard and Rosslare. It is also proposed, as appears by the notice, to submit for the approval of the meeting clauses which have been introduced into the Bill giving power to the company to subscribe a sum not exceeding 25,000*l.* for the purpose of the Bill in substitution for the moneys proposed to be raised under the Bills which have been withdrawn."

**EPPS'S COCOA.—GRATEFUL AND COMFORTING.**—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected COCOA, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft keeping by ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- July 11—Ottoman Railway of Anatolia (Annual), Berlin.
- July 14—Central Pacific Railroad (Shareholders), Winchester House, at 2.
- July 14—Fermoy and Lismore Railway (Wharnccliffe), 14, Great George-street, S.W., at 12.
- July 14—London Tilbury and Southend Railway (Wharnccliffe), Fenchurch-street Station, at 12.
- July 15—Argentine North Eastern Railway (Half-yearly), Winchester House, at 2.30.
- July 18—Great Southern and Western Railway (Wharnccliffe), Dublin.
- July 18—Great Western Railway (Wharnccliffe), Paddington Station, at 12.
- July 26—Great Eastern Railway (Half-yearly and Special), City Terminus Hotel, at 12.
- July 26—London and Blackwall Railway (Half-yearly), Fenchurch-street Station, at 1.
- July 27—Great Central Railway (Half-yearly), Manchester, at 12.
- July 27—London Brighton and South Coast Railway (Half-yearly), London-bridge Terminus, at 1.
- Aug. 2—East and West India Dock (Half-yearly), Winchester House at 2.

The *Monte Video Times* learns that "news has been received from London to the effect that Señor Manuel Lessa has at last succeeded in forming a joint-stock company to take over the Western Railway and Rosario and Sauce Ports, of which J. B. Medici and Co. are concessionnaires. The new company will be called the Western Railway and Port Company."

JULY 9, 1898.

## THE EGYPTIAN AND SOUDAN RAILWAYS.

The Soudan military railways, which have been pushed across the desert with a celerity commanding the greatest admiration, are now understood to be nearing, if indeed they have not already reached the natural terminus at the mouth of the Atbara. It may not be unreasonable to assume a certain feeling of satisfaction at the accuracy of our forecast of January 30th, 1897. As then anticipated the Wady Halfa-Dongola line, some 250 miles in length, constructed during the campaign of last year, which resulted in the recovery of the Dongola province and the first shaking of the Khalifa's power, has become a branch of the main system worked for the trade of the fertile province and of Debbeh. At present two trains weekly are run in each direction on this branch, the down traffic being as yet principally concerned with Government stores, while the up trade already shows signs of the almost unlimited expansion to be expected when the advantages of settled rule tempt the original occupiers back to their date trees or to enlarge the area of their productive activity. What may be called the trunk line of the Soudan—a link, as many hope, in the transcontinental route of Mr. Cecil Rhodes—was commenced from Wady Halfa a year ago, and strikes directly across the Nubian desert to meet the Nile again at Abu Hamed, a distance of 203 miles, and following the river thence for another 178 miles to the mouth of the Atbara, a total length of 381 miles from terminus to terminus, or only 19 miles less than the west coast route from Euston to Edinburgh. Thus all the cataracts are bridged by rail, and a navigable waterway is brought within reach of Anglo-Egyptian enterprise, extending over 1,400 miles of the Blue and White Niles to the Foulah rapids just above the Great Lakes, or within hand-shaking distance of the Uganda end of the Mombasa Railway. Of course, in this scheme we are reckoning upon the fall of Khartoum, but no disappointment is to be feared on that score when the time is ripe. At a cost of a round million, or less than 2,000*l.* per mile, in itself less than one-quarter of the estimate of 1871 when Ismail's plans to effect the same object were expected to cost over four millions, the Soudan has been provided with a comprehensive system of railways of greater capacity and immeasurably superior efficiency than would have resulted from the efforts of the corrupt and moribund administration of twenty-five years ago. A population of 12,000,000, with a trade estimated at 2,000,000*l.* sterling—and who can say with what further possibilities?—are set free and connected with civilisation. Truly this is empire-making by railway; and though all honour is due to Sir Herbert Kitchener for his practical appreciation of what has been called the "fourth arm" in military operations, no less are congratulations and praise owing to Girouard Bey, D.S.O., R.E., and his band of Royal Engineer officers who have translated theory into practice. What, then, is to be the future of the Soudan railways, this system of nearly 700 miles of line? We are assured that in the settling of accounts, after Khartoum has fallen, the British free gift to Egypt of nearly 800,000*l.*, expended, as this has been, on the railways and telegraphs, will be specially considered in relation to the railway question. Experience in the Far East is already showing that mere territorial pos-

session is unimportant beside the ownership of the railways on which the life of the country depends. Between China and the Soudan there is only the difference due to a comparison between concessions and open lines already at work. The Soudan system must never pass out of British control and British technical management. For some years, at any rate, the exigencies of military occupation of the recovered provinces must exercise an important effect upon the continuance of the existing quasi-military administration of the railways; but with the growth of trade military reasons will give place automatically to those commercial principles for which the way has been prepared. A Suakin-Berber line must follow, if only to shorten the distance to the sea-board and to meet the well-known conservatism of trade routes. It may be that the time will then come for a consideration of the advantages to be derived from the leasing of the working of the lines to a private corporation. But these things lie in the lap of the gods. One thing, however, is certain. The recent promotion of Lieutenant Girouard to the presidency of the Egyptian State Railways Administration is not to be taken as portending the inclusion of the Soudan railways within the functions of that body. The State Railways of Lower Egypt are a Khedivial appanage, one of the few valuable assets of the bankrupt estate now administered under international control. They are mortgaged to the Commission of the Public Debt, and, starved though they are by the limitation of their expenditure to 43 per cent. of the gross receipts, they form one of the most valuable sources of the hypothecated revenue. Lieutenant Girouard may be trusted to carry out with success his difficult task of reconciling a growing demand for facilities with the grotesque condition referred to. But as we have said above, the Soudan railways must never become subject to international control, a synonym for the sport of international jealousy. Nor do we think that they ever will.

### HOME RAILWAY DIVIDEND PROSPECTS.

The traffic results for the period to June 30th are now complete, and it is possible to forecast with some approach to precision the forthcoming dividends. Only one announcement has yet appeared—namely, that of the City and South London Railway, which continues to show progress, and for the past half-year announces a distribution at the rate of  $2\frac{1}{2}$  per cent. per annum against 2 per cent. per annum for the first half of 1897. We are afraid, however, that this cannot be taken as an indication of the general character of the forthcoming distributions, in spite of the large additions to gross receipts. Further, we may add that the general expectations now prevailing regarding the approaching distributions will probably have to be very much modified, just as they were for the second half of 1897. This is in part due to the ill-informed literature on the subject which is to be found in abundance just now. As an example of the kind of estimates recently indulged in we may point to the *Statist*, which prides itself upon its "accurate forecasts." A fortnight ago that journal published estimates of railway dividends based on the traffics for only *twenty-four weeks*, and made no allowance for the fact that the passenger lines benefited very much by the Jubilee last year, whilst goods lines lost thereby. Two examples may be quoted to show the outcome of this method. According to the *Statist* the South Western would have an increase of 50,000*l.* in gross receipts, and the District an increase of 3,000*l.* As a matter of fact the close of the half-year saw the South Western increase reduced to 15,094*l.*, and the District increase turned into a

decrease of 2,355*l.* Under-publication, as we pointed out in our issue of 18th ult., is likely to be very much to the fore, especially with the "heavy" lines, and this will help them to partially meet the large additions to expenses and capital charges. Taking the "heavy" lines first, the Midland with an exceptionally large addition to gross receipts which, allowing for under-publication, will probably approach a quarter of a million, will in all probability be able to maintain its dividend. Here, as in the case of the Great Northern, however, the policy is likely to be followed of conserving resources until, with the opening of the Great Central new line next half-year, some idea of their consequent loss is ascertained. In the case of the Great Northern this is peculiarly the case, for though in ordinary circumstances the dividend on the 4 per cent. preferred ordinary would be assured in the second half-year, the loss of revenue from competition may place it to some extent in jeopardy during the current period. Under these conditions it is more than possible that nothing more than the preferred dividend will be paid, which is equal to 3 per cent. on the original ordinary stock, against  $3\frac{1}{4}$  paid for the first half of 1897. The North Western has a substantial increase in gross receipts, about 200,000*l.*, allowing for under-publication. The balance brought in and the extra capital charges account for about 30,000*l.* however, and with the large growth in expenses we anticipate a decline of  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent. in the coming dividend. The North Eastern, by reason of a considerable under-publication, may also escape with a decline of only  $\frac{1}{4}$  per cent. The Great Western has, of course, suffered largely from the South Wales dispute, and though its gross decline may shrink in the accounts to only 60,000*l.*, against a published decline of 79,770*l.*, yet we fear a loss in dividend of about  $1\frac{1}{2}$  per cent. must be looked for, as there is quite a combination of adverse circumstances to be faced. The balance brought in was 11,500*l.* lower, mileage worked has increased, and the addition to capital charges may be anything up to 25,000*l.* Great Eastern gross traffic results have been very satisfactory, but we imagine that the growth of expenses has by this time overtaken the increase in receipts. For the second half of 1897 the margin was very small, for only 26,600*l.* of net profit was secured from a gross increase of 115,000*l.*, and the dividend was in consequence  $\frac{1}{2}$  less than had been generally looked for. Turning to the southern lines, only the Chatham has the prospect of increasing its dividend, and even there the outcome will depend upon the view the directors take as to the outlay on the road and rolling stock. As the second preference only amounts to 869,000*l.*, a very small amount of available profits makes a vast difference in the dividend. Our view is that if the directors choose they may be in a position to distribute about 3 per cent., for at 31st December last the position was that  $2\frac{1}{4}$  per cent. was earned on this stock, allowing for the augmented balance carried forward after meeting the dividend on the arbitration preference stock to that date. But if the directors were to really take into account the crying needs of the system that 3 per cent. might very well be spent on the line and rolling stock without rendering the latter very much less antediluvian than before. The Brighton Company had from the beginning of the year to meet the full dividend on 660,000*l.* of new ordinary capital. But for the past half-year this entails only a very small extra charge as compared with the interest paid on instalments a year ago—the bulk of the extra charge falling upon the present half-year, when the rate of dividend is very much larger. The probability is that it will be able to maintain its dividend, especially as the large balance of over 16,000*l.* was carried forward at June 30th, 1897, and it may not be regarded as necessary to do this for last half-year. Having regard to

the warnings of the late Sir George Russell at the last South Eastern meeting over which he presided, we do not look for any increase in the South Eastern dividend. The South Western has made a poor showing as regards gross receipts, because it has lost probably 20,000*l.* by comparison with the extra revenue from the Naval Review last year, and further, has lost traffic owing to the temporary withdrawal of the New York liners from Southampton. As its dividend for the first half of 1897 was a record performance, a decline of  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent. cannot, under the circumstances, be regarded as particularly disappointing, though after the long period of advancing dividends it may come with less grace. Among provincial railways the Great Central keeps up its reputation by giving splendid promise of paying nothing on its ordinary stock against  $\frac{1}{2}$  per cent. a year ago. This time it will in all probability surpass itself by partially defaulting on its 1895 preference stock as well. Our readers will be quite prepared for these achievements, though we may assure them that they are as nothing compared with what may occur as the outcome of the present half-year, when new capital charges fall upon revenue instead of capital. The Taff Vale will pay nothing on its ordinary stock, against  $3\frac{1}{2}$  per cent. a year ago. This result was foreshadowed by us as an outcome of the loss of traffic in our issue of June 4th last. A circular has actually been issued postponing the preference dividend until it is seen how long the strike continues, though the remark is made that, even if it continue for several weeks longer, "the full year's dividend on the preference stock will be earned before the close of the year." If, however, the strike lasts more than a few weeks, even the preference dividend cannot be paid in full for the year. The Lancashire and Yorkshire may pay the same dividend as a year ago, as it has had good traffics to help it, but the North Staffordshire may be  $\frac{1}{2}$  per cent. lower. The Hull and Barnsley will probably, as was the case a year ago, pay nothing on its ordinary stock, and it will be interesting to note if it earns the full dividend on the new preference stock for the half-year. At the best, the forecasting of railway dividends is a thankless task, much on a par with turf "tipping" and almost as uncertain, and our vaticinations are offered for what they are worth. Probably, the best we can say of them is that they will be nearer the mark than those of our contemporaries.

### THE GRAND TRUNK POSITION.

Last week, when dealing with the Grand Trunk, we said, "The next traffic return will cover nine days to June 30th, and it may be that the 'sweepings' will providentially 'yield something for the bulls.'" This has turned out to be the case, for whereas the market, in view of recent poor results, was "going for" a decrease of about 8,000*l.*, the actual figures published early this week showed an increase of 358*l.* The May working statement was also satisfactory enough, for a gross increase of 33,893*l.* yielded an addition to the net profit of 15,832*l.* for that month. Thus the total increase in net receipts for the first five months of 1898 amounted to 128,490*l.*, a very satisfactory result, though it should not be overlooked that the poor traffics have come upon the scene since May, and it is highly improbable that for the entire half-year the result will be any better than that indicated above, and it may even be rather less satisfactory. It is now possible to survey with some approach to accuracy the outcome of the six months to June 30th, for we have the working statements to the end of May and gross traffic results to the 30th ult. For the first half of 1897 the final results of working were as follows:—

Grand Trunk proper.....	surplus	£72,007
Chicago and Grand Trunk .....	deficit	50,074
Detroit Grand Haven and Milwaukee .....	deficit	20,084

Entire system..... surplus £2,709

At the end of 1897, after wiping away the deficiency standing on the net revenue account, there remained a balance to carry forward to the credit of 1898 of 10,289*l.* Adding to this the 2,709*l.* of profit in the first half of 1897, and the increase of 128,490*l.* shown this year to the end of May, there should be available for distribution after meeting all fixed charges about 140,000*l.* This is liable to reduction to the extent of the increase in fixed charges, and on account of the poor traffics during June, but, on the other hand, net revenue account will receive something under the new arrangement with the Wabash, and it is clear that a substantial surplus should be available. To pay the 4 per cent. on the guaranteed stocks for the half-year will require a sum of 104,000*l.*, and after meeting that charge there should be 30,000*l.* to 40,000*l.* left for the first preference. This would be equal to 2 to 2½ per cent. on the first preference as well. Whether the surplus will be all divided depends very much on the outlook; for, of course, the guaranteed stock has a first charge upon the profits for the whole year in priority to the first preference. But the second half-year of the Grand Trunk is generally much the better one in regard to net results, and unless the position were to completely change during the next six months, there is very little likelihood of the guaranteed being in any danger on account of profits being divided up to the hilt. Taking the year 1898 as a whole, and proceeding on the assumption that the results for the second six months will be maintained at the 1897 level, the outcome would be as follows:—

Balance brought forward from 1897 .....	£10,289
Net profit for first half of 1898 (estimated) .....	130,000
Ditto for second half of 1898, same as 1897.....	275,263
	£415,553

To pay the full dividends of 4 per cent. on the guaranteed stock and 5 per cent. on the first preference together requires 379,790*l.*, so that there would still remain a substantial balance for the second preference, each 1 per cent. on which would require 25,300*l.* for the year. Of course, the result for 1898 sketched out above depends upon the course of traffic results during the current half-year, and if the rate war continues there may be declines, though as we pointed out last week the struggle is not without its compensating advantages so far as the Grand Trunk is concerned, as the American roads have handed to it a larger share of their east-bound traffic than they would otherwise have done. Then there will be the Wabash adjustment again at the end of the December half-year, and this should represent a sum of between 25,000*l.* and 30,000*l.* But altogether the prospects for the current half-year are very difficult to diagnose.

### CALEDONIAN CAPITAL.

Large issues of capital by our leading railways have been very much in evidence this year, and considering the heavy outlays being incurred for new works, this can hardly be wondered at. It is only a few weeks ago since the Great Western flung a nice little issue of 2½ millions into the market with unpleasant consequences as regards the quotation of its ordinary stock. This week the Caledonian Company has taken the opportunity presented by an accession of comparative activity in the Scotch railway market to launch an issue of 1,237,000*l.* of ordinary stock. This is to be allotted *pro rata* to existing shareholders in the proportion of 8*l.* for each 125*l.* of stock held. It is to carry dividend as from August 1st next, and the price of issue is 145*l.* The old stock is quoted at 156, including 2*l.* of

accrued dividend, so that the bonus presented by the new issue is quite insignificant. The issue came apparently as a surprise, for the deferred stock promptly shed 2 points on Tuesday, and fell as low as  $56\frac{1}{2}$  on Wednesday. On March 12th last we pointed out that with the authority then being sought for, an additional sum of 1,296,500*l.* of share capital, the company would be "in a position to issue in all" a sum of 2,684,000*l.* of share capital and 750,000*l.* of loan "capital." We added the following remarks:—"Whether this will be all issued at once, or whether only part of it, is not stated in the report; but more money will be shortly needed, for at January 31st last the overdraft on capital account amounted to 708,729*l.*, and capital expenditure is "proceeding on a liberal scale." The capital now to be issued represents apparently the bulk of the amount authorised to be issued by the shareholders in September, 1896, and it will be observed that the company, after the present issue is made, will still be in a position to launch another for about 1,450,000*l.* As the forthcoming issue will yield the company the large sum of 1,900,000*l.*, it should suffice to restore the equilibrium of the capital account and provide for current needs as well for at least a year; though it is disturbing to the market to know that a further large issue is hanging over it. For the year 1897-8 the Caledonian Company paid a dividend of  $5\frac{1}{8}$  per cent. Thus from August 1st next the new issue will add 63,400*l.* per annum to the revenue charges of the company. This half-year the Caledonian has been doing fairly well, for with four more weeks to run it has an addition to gross receipts of nearly 46,000*l.* But there is little chance of any addition to the dividend for the period ending on 31st instant, owing to advancing expenditure, and next half-year it will be still further handicapped by the dividend requirements of this new capital.

### PASSING NOTES.

The traffic receipts for the week ending July 2nd, on thirty-three of the principal lines of the United Kingdom, amounted to 1,731,556*l.*, which was earned on 19,253 $\frac{1}{4}$  miles. For the corresponding week in 1897, the receipts of the same lines amounted to 1,703,081*l.*, with 19,034 $\frac{1}{4}$  miles open. There was thus an increase of 28,475*l.* in the receipts, and an increase of 219 in the mileage.

As the result of representations made from time to time to the directors and officers on behalf of a large number of persons engaged in hotels, restaurants, and similar places, who cannot leave until after the statutory hours of closing, and to whom a "last train" at 12.20 a.m. is useless, the London and South Western Railway Company has added two later trains from Waterloo—one at 12.40 a.m. and one at 1 a.m., for Vauxhall, Queen's-road, and Clapham-junction. These trains will not run on Monday mornings. In the contrary direction it has been arranged that the up-mail shall cease to call at Clapham-junction at 3.22 a.m., but that a train shall run specially from the Junction to Waterloo at 3.25 a.m.

The Trade and Navigation Returns for June show exports amounting to 19,413,696*l.*, an increase of 328,699*l.*, or 1.6 per cent., on the corresponding month of 1897, the imports amounting to 39,032,305*l.*, an increase of 2,710,496*l.*, or 7.4 per cent. The value of the iron and steel exports was 1,898,265*l.*, against 2,029,363*l.*, a decrease of 6.4 per cent.; and of coal and coke exports 1,470,079*l.*, against 1,388,840*l.*, an increase of 5.8 per cent. Imports for six months ended June 30th amounted to 235,995,751*l.*, an increase of 10,750,505*l.*, or 4.5 per cent.; exports to 112,508,179*l.*, a decrease of 4,902,273*l.*, or 4.3 per cent., and re-exports to 31,973,562*l.*, a decrease of 391,076*l.*, or 1.2 per cent.

The Light Railway Commissioners have decided to recommend the Board of Trade to grant powers for a light railway near Portsmouth, to be worked on the overhead electric system. The line is promoted by the Hampshire Light Railway Company,

and will join the existing Portsmouth Tramways (which are about to be acquired by the corporation, and electrically equipped) at Cosham, will cross the London and South Western Railway on the level, and run over Portsdown-hill. It will be 6 miles in length, and will run for about a mile and a half on private land, and for the rest of the way on the road or the road-side waste.

A deputation consisting of Lord E. Talbot, M.P., Lord Leconfield, Hon. and Rev. G. Bourke, Sir Walter Barttelot, Bart., Rev. John Goring, Captain Austin (Storrington), and others last week waited upon the directors of the London Brighton and South Coast Railway Company to urge the making of a railway between Pulborough and Steyning. Lord Cottesloe (chairman of the company) promised that the representations made should be carefully considered, but did not hold out much hope of their being acted upon.

A special general meeting of the Great Eastern Railway Company is called for the 26th inst., to authorise the creation and issue, under the powers of the Company's General Powers Act of 1898, 517,844*l.* new 4 per cent. debenture stock for the purpose of acquiring the undertakings of the Ely and St. Ives, and the Colchester Stour Valley Sudbury and Halstead railway companies, and 15,000*l.* new ordinary stock for the purpose of acquiring the undertaking of the Mellis and Eye Railway Company.

The Light Railway Commissioners held an inquiry at Bournemouth on Thursday respecting the proposals for the construction of tramways through the borough and into the districts of Christchurch and Poole. They rejected the proposals so far as the borough of Bournemouth was concerned, and after a long hearing granted the application of the British Electric Traction Company to run a tramway to the borough boundary from Poole and Parkstone. There was strenuous opposition to the scheme.

The Great Western Railway Company announce that a new direct service has been established, *via* Reading and Folkestone, between Liverpool, Chester, Shrewsbury, Wolverhampton, Birmingham, Leamington, Oxford, &c., and Paris, Brussels, and other places on the Continent, and through carriages are run in each direction between Liverpool and Folkestone. Passengers travelling by this route can leave Liverpool at 7.57 a.m., and reach Paris at 10.50 p.m., or Brussels at 11.59 p.m. the same day.

The Marlborough and Grafton Railway was opened on Saturday. Affording many additional trains between Birmingham and the North and Southampton, by the Midland and South Western Junction Railway Company's route, who work the line, great advantages will result to the general public and the War Department in the movement of troops from and to the North, for Salisbury Plain and Southampton, the port of embarkation and disembarkation.

The accounts of the City and South London Railway Company for the half-year ended June 30th show a balance sufficient to allow the payment of a dividend on the consolidated ordinary stock at the rate of  $2\frac{1}{2}$  per cent. per annum, carrying forward a balance of 1,005*l.* The dividend for the corresponding period last year was at the rate of 2 per cent. per annum, the balance carried forward being 1,035*l.*

The preliminary arrangements in connection with the proposed Wick and Lybster Railway are nearly completed. Of the required capital, 43,000*l.* have been subscribed, of which the Duke of Portland contributes 20,000*l.*; Caithness County Council, 15,000*l.*; Wick and Pulteneytown, 1,500*l.* and 1,000*l.* respectively. A Government grant is expected to make up the balance.

The Great Eastern Railway Company has opened a new station at Felixstowe which will, to a great extent, supersede the old station, although the latter will not be entirely abandoned. The new station, which has cost about 33,000*l.*, has been erected much nearer to the town than the old one, and is situated in the locality where developments are likely to take place.

It is amusing to observe the attempts of the *Financial News* to

boom the securities of the Delagoa Bay and East African Railway Company. Almost every day they are referred to in the column devoted to "Industrial Securities" with such persistency as to suggest that the writer has got a "call" of stock which he is anxious to exercise.

Mr. Grierson, late locomotive superintendent of the Dublin Wicklow and Wexford Railway, and who is about to take up an important position as chief engineer and locomotive superintendent on the Lancashire Derbyshire and East Coast Railway, was on Saturday presented with an illuminated address and a cheque for 200*l*.

With reference to rumours as to the adoption of electrical working on the Metropolitan and District railways, it is said that those companies have decided to devote 10,000*l*. each to the cost of making preliminary experiments as to the new form of traction.

Mr. Godfrey Smith, late district superintendent of the North Eastern Railway at Newcastle, has been presented by the staff employed in the passenger department of the company with a silver tea and coffee service as a token of respect on his retirement.

Fourteen thousand servants of the London and South Western Railway Company have subscribed to a presentation portrait, which Mr. H. T. Wells, R.A., is painting of Sir Charles Scotter, the late general manager of the line.

The directors of the Great Northern Railway Company are prepared to receive application for the appointment of stores superintendent. Particulars will be found in our advertisement columns.

The Metropolitan Railway Company has made a trial of liquid fuel for locomotives, having fitted an engine specially for the purpose on the system adopted on the Great Eastern Railway.

It is stated that the Government are resolved, unless unforeseen circumstances should arise, to bring the session to a close not later than the week ending August 13th.

The death is announced of Mr. William Green Skipworth, the Irish manager of the London and North Western Railway Company.

The death is announced of Mr. C. T. Murdoch, M.P., a director of the Great Western Railway Company.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 12th inst.

### CITY, FRIDAY EVENING.

The position of the MONEY MARKET has undergone no change during the past week, three months' paper being still done at  $1\frac{1}{8}$  per cent., short loans at  $\frac{3}{4}$  per cent., and call money at  $\frac{1}{2}$ . The Bank directors made no change in the official minimum at their meeting on Wednesday, but the discount houses have reduced their allowance on deposits to  $\frac{1}{2}$  per cent. at call and  $\frac{3}{4}$  per cent. at notice. The Bank Return issued yesterday shows large changes in the items. Over a million of notes and coin has been taken out in addition to the withdrawals of gold for export; the reserve is now 25,305,000*l*., a decrease of 1,766,000*l*., but its proportion to liabilities has only fallen  $2\frac{3}{8}$  to  $4\frac{6}{8}$  per cent., owing to the deposits being much reduced. The public deposits are less by 1,946,000*l*., the dividend payments being partly balanced by revenue received. The private deposits show an increase of 867,000*l*. and the "other" securities an increase of 659,000*l*. Since the Return was issued 104,000*l*. in gold has left the Bank.

Silver bars are now quoted at 27 1-16*d*. per oz., being 1-16*d*. lower on the week. A year ago the price was 27 11-16*d*.

Eastern exchanges are telegraphed as follows:—Bombay,

1*s*. 3 23-32*d*.; Calcutta, 1*s*. 3 23-32*d*.; Hong Kong, 1*s*. 11*d*.; Shanghai, 2*s*. 6*d*.; Singapore, 1*s*. 11 1-16*d*.

The premium on gold at Buenos Ayres has fallen during the week 177.50 to 175.50 per cent., making the paper dollar (nominally worth 4*s*. 2*d*.) now actually worth 1*s*. 5-28*d*. A year ago the premium was 183 per cent., and the value of the paper dollar 1*s*. 4-83*d*.

The Valparaiso exchange comes over to-day at 17*d*., being  $\frac{1}{4}$ *d*. higher on the week. A year ago it was 17*d*.

The Rio de Janeiro exchange on London is 7 3-16*d*., being  $\frac{1}{4}$ *d*. lower on the week. A year ago it was 7 19-32*d*.

The Bank of Bengal has reduced its minimum rate of discount from 8 to 7 per cent.

The Bankers' Clearing-house return for the week ending July 6th, 1898, shows a total of 194,743,000*l*., as compared with 166,112,000*l*. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£37,103,052	£36,719,752
Total Reserve .....	£25,304,817	£25,259,517
Proportion of Reserve to Liabilities...	46 <i>½</i> per cent.	49 <i>½</i> per cent.
Notes in Circulation .....	£28,598,235	£28,260,235
Bank Rate of Discount .....	2 <i>½</i> per cent.	2 per cent.
Open Market ditto .....	1 <i>½</i> per cent.	$\frac{1}{2}$ per cent.
Consols (account) .....	111 <i>½</i>	112 <i>½</i>
French Rentes (account) .....	103 <i>f</i> . 25 <i>c</i> .	104 <i>f</i> . 25 <i>c</i> .
Paris Cheque Exchange .....	25 <i>f</i> . 22 <i>½</i> <i>c</i> .	25 <i>f</i> . 10 <i>½</i> <i>c</i> .
New York 60 days ditto .....	\$48 <i>½</i>	\$48 <i>½</i>

The STOCK MARKETS during the past week, although by no means active, have displayed a good deal of irregularity. Consols, notwithstanding the prevalence of cheap money, are down  $\frac{3}{8}$ , and British railway stocks do not look particularly healthy. Caledonians have had a nasty jar on the unexpected announcement of a further heavy issue of stock, and South Eastern have been sold in anticipation of a similar experience. The rise in Chathams seems to have come to an end, and certainly it had gone quite as far as prudence dictated. No doubt those behind the scenes have had a real good innings, à la Hull and Barnsley and Metropolitan District, on one or two occasions in recent years. Barry ordinary is up 3, and the deferred 6 on talk of an allotment of new capital on terms which will give existing holders a substantial bonus. In another column we refer at some length to the dividend prospects for the past half-year. Yankee rails, after hanging fire, have shown a better front to-day, and prices in nearly every instance compare well with those of a week ago. Canadian Rails also have a more healthy appearance. The prospects of the Grand Trunk are dealt with at some length in our leader columns. Indian Rails show an all-round rise on better traffics and the improvement in silver. Foreign Rails are decidedly off colour, and with few exceptions they show substantial declines. Amongst the more notable movements beyond those recorded in tabular form below are a fall of 3 in Central Bahia debenture stock, 5 in Cordoba and Rosario 6 per cent. debenture stock, 3 in Santa Fé and Cordoba, 3 in ditto debenture stock, 3 in Natal and Nova Cruz debentures, and  $1\frac{1}{2}$  to  $2\frac{1}{2}$  in several other Brazilian issues. Manila securities are all better—the original 6 per cent. debentures 1, the A prior lien bonds 2, and the B prior liens 3. Costa Rica shares are steady. Amongst Miscellaneous descriptions, the feature is the rise in the stocks of London dock companies ranging from  $1\frac{1}{2}$  to  $3\frac{1}{2}$  points. Railway Investment deferred is up  $\frac{1}{2}$ .

Colonel Richard Arthur Sargeant, R.E., has been elected a director of the Bengal Central Railway, in place of Mr. D. T. Robertson, deceased.

Messrs. Thackeray and Co., of Cardiff, under date July 7th, report as follows:—Barry undivided, 286½ (a rise of 6); ditto preferred, 125½ (a fall of ½); ditto deferred, 164 (a rise of 8); Cardiff preferred, 114½ (unchanged); Port Talbot, 9½ (a rise of ½); Rhonda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 265½ (unchanged); ditto preferred, 123 (unchanged); ditto deferred, 145 (unchanged); Taff Vale, 76½ (a rise of ½); Vale of Glamorgan, 126 (a rise of 1). Rather more activity has prevailed in this market during the past week. The non-payment of Taff Vale preference has been the chief subject of comment. On the anticipated new issue Barry deferred have had an important rise.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—New York Central and Hudson River Railroad Company—\$18,535,000 3½ per cent. gold mortgage coupon bonds of 1897, Nos. 1 to 18535. Northern Pacific Railway Company—\$263,000 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M 75964 to M 75966, of \$1,000 each. Southern Railway Company—\$897,000 additional first consolidated mortgage 5 per cent. gold coupon bonds of 1894, Nos. 26,963 to 27,859.

Application has been made to the Stock Exchange Committee to appoint a special settling day in and to grant a quotation to Leopoldina Railway Company, Limited—1,300,000l. 4 per cent. debenture stock.

It is officially announced that Mr. Charles Ketchlee has been declared a defaulter upon the Stock Exchange.

**A Smart Run to Birmingham.**—The Great Western Railway Company on the 1st inst. commenced their new express service through Birmingham. One of the new trains—that which leaves Paddington at 9.30 a.m.—runs to Birmingham without a stop, being due at Snow-hill Station at 11.57. On the occasion referred to the train consisted of six coaches of the largest and newest pattern, partly on the corridor system, their average length being about 59ft., and their average weight about twenty-eight tons, exclusive of passengers and luggage. The whole distance (129½ miles) was done at an average speed of 52½ miles per hour. The train was timed to pass through Oxford (63½ miles from Paddington) at 10.41, giving a speed of 60 miles an hour; and though a minute was lost between London and Maidenhead, time was kept for the longer distance, the speed between Maidenhead and Oxford running at times as high as 65 miles per hour. Banbury (86½ miles) was passed at 11.6, and Leamington (106 miles) at 11.29, the average speed from Oxford to Leamington being a little over 54½ miles per hour. From Leamington to Birmingham the run was made in a little over twenty-eight minutes, the average speed being just under 50 miles per hour.

## RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents may be had gratuitously.]

17,809. Smith and Pollard—Railway chair, and means for attaching the same to railway sleepers.

13,854. Milford Clayton and Joseph William Allison, Commercial-street, Halifax—Improvements in railway signalling.

13,857. Robert Thomas Gillibrand, 70, Dean's-gate, Manchester—Improved ventilator for railway or other carriages.

13,873. William Bewick Quelch, 4, South-street, Finsbury, London—Improvements in railway signalling apparatus.

13,885. Arthur George Evans, 70, Palace-chambers, Westminster, London—An improved crank for use in railway signalling.

13,898. Thomas Crooke, 5, Hilldrop-crescent, Camden-road, London—Improved revolving, endless, travelling, or self-acting railway.

## SPECIFICATIONS (1897).

24,830. Hill and Hill—Railway-carriage and other sash-windows.

## SPECIFICATIONS (1898).

4,207. Näkel—Tipping mechanism or plant for railroad-trucks or the like.

## PRIVATE-OWNED ROLLING STOCK.

The seventh annual general meeting of the Association of Private Owners of Railway Rolling Stock was held at Derby last week, under the presidency of Mr. W. F. Butler, of Wrexham, the chairman. The CHAIRMAN, in moving the adoption of the report and balance-sheet, remarked that the policy of the committee during the past year had, fortunately, been able to be one of peace, though many matters had been brought before their solicitors by members of the association, and dealt with by him either alone or with the assistance of the committee. The position of the committee was one of constant watchfulness to prevent aggression on the part of railway companies, but without any display of either arrogance or avoidable hostility. He then alluded to matters advised upon in the report, and expressed his sense of the value of the report to members generally, and colliery-owners in particular. With regard to the balance-sheet he called attention to the modest expense at which the association was worked, and the amount which had been accumulated for use when necessary, and expressed the hope of the committee that the subscription might be reduced during the current year. After remarks by other members the report and balance-sheet were unanimously adopted.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

**Workmen's Compensation Act.**—The general manager of the North Eastern Railway Company has addressed a circular letter to the heads of the several departments in which he says:—"The directors have decided that all payments to workmen in respect of personal injury by accident arising out of or in course of their employment shall be made in accordance with the provisions of the Act. The Act does not provide for any payment being paid to an injured workman unless or until he has been laid off work for two weeks, but in the event of a sufficient number of workmen desiring it the directors will be prepared to take into consideration a scheme under which workmen in the company's service could, by weekly contribution, secure for themselves a payment in case of injury from accident during the first two weeks of incapacity, the company contributing to such payment."

**Harbour Improvements at Holyhead.**—The Government and the London and North Western Railway Company are about to commence new works of an extensive nature at Holyhead, with a view of improving and extending their North Wall (Dublin) and Greenore traffic. The railway company are about to build new offices and other premises, and intend to purchase several streets in the vicinity of the harbour to accomplish this object. It is estimated that at least half a million or more of money will be spent on new works. Messrs. W. Hill and Co., London and Plymouth, have just completed the removal of a projection of rock at the entrance of the north-western harbour for the Board of Trade, at a cost of several thousands of pounds. Ten thousand pounds is to be spent at once in deepening the north-western harbour, opposite the Fish Jetty, and dredging operations on an extensive scale are now being carried on in the north-western harbour, which will be of great value to the express and cargo boats arriving and departing to North Wall and Greenore.

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Third Readings, House of Lords—Manchester Carriage and Tramways Company Bill; Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Bill; Great Eastern Railway (Pensions) Bill; North British Railway Bill; Rhondda and Swansea Bay Railway Bill.

Second Readings, House of Lords—Lincoln and East Coast Railway and Dock Bill; Lancashire Derbyshire and East Coast Railway Bill; Sheffield District Railway Bill.

Third Readings, House of Commons—Belfast Harbour Bill; Whitechapel and Bow Railway Bill; London Brighton and South Coast Railway Bill; Bideford and Clovelly Railway Bill; Devon Plymouth and Stoke Tramways Bill; Cardiff Railway Bill.

Second Readings, House of Commons—Newhaven Harbour Bill.

The North Eastern Railway Bill, which has already been sanctioned by the House of Lords, will pass as an unopposed measure through the House of Commons, no petitions having been lodged against it within the time allowed by the Standing Orders. By this Bill numerous new powers are given to the company with reference to new dock works at Hull and the construction of over five miles of new railways and 5 miles of widenings. The new capital powers conferred on the company amount to upwards of 2,800,000*l.*, of which 700,000*l.* may be raised as debenture stock. The Bill also vests in the company the undertaking of the Scarborough and Whitby Railway Company.

A Select Committee of the House of Commons presided over by the Hon. A. T. Egerton, on Wednesday passed the preamble of the Midland Railway (West Riding Lines) Bill. The new railways authorised by this Bill will be of an aggregate length of 30 miles 15 chains, comprising together an extension of their existing system from Royston to Bradford. The capital authorised for these lines is 2,700,000*l.*, with power to borrow a further sum of 700,000*l.* These extensions have now been sanctioned by both Houses.

On Thursday a Lords' Committee rejected the Llanelly and Pontardulais Bill, which had previously received the approval of a Commons' Committee.

The opposition to the Usk Valley Railway Bill having been withdrawn, it has been referred to the consideration of the Committee on Unopposed Measures in the House of Lords.

Lord Morley's Committee of the House of Lords on Wednesday passed the Bill promoted by the Rhondda and Swansea Bay Railway Company, under which an extension of time is granted until August, 1901, within which to complete their railways authorised in 1890. This Bill has already passed the House of Commons.

The Sheffield District Railway Company have inserted an "additional provision" in their Bill for this session, to enable them to raise 100,000*l.*, which will be expended upon branch lines connecting with collieries along their line of railway. It is understood that this new capital will be issued as soon as practicable as a 5 per cent. preference stock, although the issue will, it is expected, be preceded by the further issue of debenture stock, which the company already have powers to raise.

The Unopposed Bill Committee of the House of Commons on Wednesday passed the Omnibus Bill of the Glasgow and South Western Railway, under which the company are empowered to construct 3 miles of new railways from Paisley to Barrhead, and at Paisley and Ayr. The Bill also authorises the enlargement of St. Enoch station, including the widening of lines forming the access to that station. The new share and loan capital authorised is 480,000*l.* This Bill has now been passed by both Houses.

The Lancashire Derbyshire and East Coast Railway Company has inserted additional clauses in the Bill now passing through Parliament, under which sanction is sought for the creation of 100,000*l.* additional debenture stock. When this Bill was deposited it contained no powers for the raising of new capital, as it was not thought that any further capital would be immediately required. It is understood that the new capital is required for purchasing further rolling stock and completing some new branch lines.

A Committee of the House of Commons on Wednesday passed the Buenos Ayres Northern Railway Bill, which has already been sanctioned by the House of Lords, empowering the Buenos Ayres Northern Railway Company, Limited, to sell its undertaking to the Central Argentine Railway Company, Limited, which now leases the Northern Company at an increasing rental which for the present year amounts to 49,207*l.* The Bill enacts that the proceeds arising from the sale are to be distributed upon the same basis as the dividends are now payable, and upon the footing that the amount to be distributed in dividends is 49,207*l.*

A committee of the House of Commons, presided over by Mr. James Stuart, on Monday gave its decision in the case of the Cardiff Railway Bill, which proposes the construction of a railway up the Aberdare and Merthyr valleys, the closing of certain canals, and the construction of lines upon portions of the sites. Last year powers were obtained for the construction of railways up to Treforest. It was now sought to abandon these, and to obtain others up to the same point. Running powers were also asked for over several lines. The proposed capital was 600,000*l.*, with the usual borrowing powers, and the length of the new railways was about 40 miles. The committee decided, in effect, to sanction the new railways, but refused to give the running powers sought.

### HARBOUR ACCOMMODATION IN THE CLYDE.

A Select Committee of the House of Commons, of which Mr. Baldwin is chairman, on Wednesday gave their decision with regard to a Bill which has occupied attention for three Parliamentary weeks. The Bill had two objects—first, the extension of the boundaries of the burgh of Renfrew, and next the extension of the existing harbour with an enlarged approach from the Clyde, and a dredging and deepening of the harbour and approaches thereto, the building of a dock, &c. The scheme has been keenly contested by the Clyde trustees, who object to any competing dock coming within their jurisdiction, and state that they have spent something over 20 millions in the construction of Glasgow Harbour and in the improvement of the Clyde, which in the course of the present century has been converted from something like a fishing stream into the present great river. The measure was also opposed by the corporation of Glasgow and the Greenock Harbour trustees. The committee found the preamble of the Bill proved so far as it relates to the extensions and improvements of the harbour, and also passed that part of the preamble which relates to the extension of the burgh in so far as this extension is necessary for the carrying out of the harbour extension and subsidiary works.

### LONDON AND SOUTH WESTERN RAILWAY BILL.

The Omnibus Bill of the London and South Western Railway Company came, on Monday, before the Select Committee of the House of Commons, presided over by Mr. A. de Tatton Egerton. The principal provision of the measure, which had already passed the House of Lords, consisted of a scheme for the enlargement of Waterloo station, but Lord ROBERT CECIL, in opening the case for the promoters, explained that since the measure was approved by the Upper House it had been found necessary, at all events for the present, considerably to diminish the area of the enlargement originally contemplated, and in accordance with which the station would have been extended to Waterloo-road on the west side, and as far as Lower Marsh on the north side. It had been found on investigation that the acquisition of the necessary land and property for the full execution of that project would involve such an enormous expense that it had been decided to apply at present for compulsory powers for a more limited area stopping considerably short of Waterloo-road and Lower Marsh, so that they might come for further extensions from time to time as the works progressed.—Mr. POPE, Q.C., for the London County Council, protested against the alteration of the original scheme. They quite acknowledged the public necessity for an enlargement of Waterloo station, and therefore had not opposed the Bill as it was brought into the other House, because it would, if carried out as then designed, have brought about several public improvements in the neighbourhood of Lower Marsh. They could not assent, however, to this emasculated scheme, and he suggested that it would be in every way better that the South Western Company should wait till next session, and then bring forward, after mature deliberation, a Bill more worthy of the object sought to be obtained. After the committee had deliberated in private, the CHAIRMAN announced that they considered the preamble of the Bill, so far as it referred to the enlargement of Waterloo station, was not proved. It was not only not the same scheme that had been sent down from the other House, but it was in itself, as now presented, an ill-considered scheme. Of course, the unopposed portions of the Bill relating to new lines in Devonshire and elsewhere would be allowed to proceed.

### PRIVATE BILL PROCEDURE (SCOTLAND) BILL.

The Select Committee of the House of Commons appointed to consider this subject sat again on the 1st inst. Mr. Stuart Wortley in the chair. Mr. CHANDOS LEIGH, Q.C., the Speaker's counsel, resumed his evidence, and criticised the various proposals of the Government Bill. Their adoption would, he feared, involve loss of Parliamentary control over such legislation, and he doubted the suitability of the tribunal proposed to be set up. In questions of *locus standi* there would be want of uniformity of practice. The proposed division of schemes into classes by the chairmen of committees of both Houses was quite feasible, no doubt, and comparing the two Bills now before the House, he had less objection to Bill No. 2 than to that of the Government. Sir

J. MOWBRAY, member for Oxford University and Chairman of the Committee of Selection, explained the methods by which the committee appointed the committees for private Bills. Increasing difficulty was experienced in manning these committees, and members generally showed an indisposition to take part in the work. It had been matter of complaint in the House that, while practising barristers were excused from the service, other members of the legal profession were required to take their share of it. He mentioned some of the devices resorted to by members to avoid service, and said he had heard of a member who, on receiving the usual circular, replied that he was in Paris, and consequently beyond the jurisdiction of the House. He did not suppose that the House would think it worth while to send a messenger to Paris to compel the attendance of a member for such a purpose. It was difficult for him to express an opinion as to the capabilities of members for the discharge of the duties of a committee on a private Bill. In his younger days he was in the habit of going round the committee-rooms to note how the work was being done, and generally his opinion, founded on his experience, was that the fact of a man being elected to serve in Parliament was a guarantee of his capability and fitness for the work of examining the details of a private Bill. Having regard to his experience of the present system, he did not think that members would show any readiness to proceed to Aberdeen or Stornoway, or a remote part of Scotland, to conduct an inquiry locally. He was not prepared to advocate any alternative scheme, but he had long looked for some proposal embodying some of the recommendations of the committee of 1888. The committee adjourned.

#### FISHGUARD AND ROSSLARE RAILWAYS AND HARBOURS BILL.

The hybrid committee of the House of Commons, presided over by Sir U. Kay-Shuttleworth, which has had under its consideration for fifteen days the merits of the Fishguard and Rosslare Railways and Harbours Bill, concluded its labours on the 1st inst. At the sitting of the committee, Mr. BALFOUR BROWNE asked to have a provision inserted in the measure to the effect that "the Great Western Railway Company shall, unless and until Parliament shall otherwise determine, continue to provide a daily service between Waterford and New Milford or Fishguard." This suggestion was adopted, and it was also agreed that the access of the Dublin Wicklow and Wexford Railway Company to Rosslare Pier should be in the hands of one company only, the Dublin Wicklow and Wexford Company's carriages and wagons being drawn by engines of the Rosslare Company. The CHAIRMAN suggested that Earl Cawdor, chairman of the Great Western Railway Company, and Mr. J. J. Pim, chairman of the Great Southern and Western Company, should meet Mr. Hanbury, Secretary to the Treasury, immediately in private conference on the point which had been raised during the consideration of the Bill in reference to the position of the Treasury in the matter. It was proposed on behalf of the promoters that the Cork and Fermoy direct line should be 17 miles in length, terminating at the one end at the Dunkettle Station of the Great Southern and Western Railway Company, and at a point 2 miles from the railway at Fermoy. Mr. BALFOUR BROWNE, however, said that it was not proposed to make these portions of the line till deviation powers had been obtained. Mr. HEALY said that they could make the 500,000*l.* which the combined companies were to raise for the purposes of the Rosslare scheme apply to the Cork and Fermoy direct line as well as to the other railways. To this proposal Mr. BALFOUR BROWNE objected, and Mr. HEALY went on to point out that under the Bill as originally submitted to Parliament there was an application on the part of the two companies to proceed with the construction of the Cork and Fermoy line, and, in addition, there was an agreement. That differentiated the Bill from an ordinary railway Bill. Was there, he inquired, anything in the Bill to compel the companies to make either the Cork and Fermoy or the Waterford and Rosslare lines? Mr. BALFOUR BROWNE said that there clearly was, inasmuch as the money which had been deposited was locked up. After some further conversation, the committee deliberated in private, and on the readmission of the public it was announced that the Bill would be reported to the House as amended. This decision implied that the preamble of the Bill was considered by the committee to be proved.

In their report, which was subsequently presented, the committee state that in the form in which the Bill leaves them they believe that its proposals will not "prevent or prejudice adequate competition in the railway system in the south of Ireland, and in the system of communication between that country and England and Wales. It will also offer a better route for some of the existing cross-channel traffic to and from certain parts of England and Wales. But the whole scheme appears well calculated to accomplish an object of far greater importance—namely, the development of a large and entirely new traffic, especially of passengers (including tourists to the south of Ireland), of fish

from the southern coasts of that country, and of goods of a perishable nature, such as certain kinds of agricultural produce." The committee add that they have passed the Bill as amended with a strong conviction that it may thus have far-reaching effect on the prosperity of industries in the south of Ireland.

In the House of Commons on Thursday, on the motion for the third reading of the Bill, Mr. P. O'BRIEN rose to move that the Bill be recommitted to the former committee, and "that it be an instruction to the committee that they do insert in the Bill a clause or clauses providing that members of the House of Commons may travel free of charge over the various systems of railway and steamer services affected by this Bill, when said members are going to or returning from attendance on their Parliamentary duties." The SPEAKER said that the object of the hon. member was one which made the motion out of order. Such a matter could not be dealt with by a private, but only by a public, Bill. Mr. P. O'BRIEN observed that the original promoter of the Bill undertook, if it passed the House of Commons, to insert such a provision, and he assumed that the companies concerned were bound by this condition. Another reason for the recommitment of the Bill was that the British Treasury was investing 93,000*l.* of public money in the undertaking, and it was only right, therefore, that members of the House of Commons, who attended the House in the performance of a public duty, and of whose time a considerable amount was devoted to railway work, should be enabled to have these facilities of travelling over what might be called a public railway. The SPEAKER (interposing) said this was not relative to the instruction. What the views of the original promoters were did not make any difference, nor did the fact that the Treasury might invest money in the undertaking. The motion of the hon. member was clearly out of order. Mr. P. O'BRIEN intimated that he should endeavour to raise the question when the Treasury introduced a Bill proposing to allocate the money. Mr. T. M. HEALY said it was only right when a great public service had been rendered by the Government that there should be a fair acknowledgment of it, and there never was an occasion in which an official of the Treasury had come forward and rendered so signal a service to Ireland as had been done by the Secretary to the Treasury in regard to this Bill. The right hon. gentleman had taken up all through an Irish line, and he hoped the Secretary to the Treasury and the Chairman of the Committee (Sir U. Kay-Shuttleworth) would see that a Bill which was freighted with the fortunes of the South of Ireland would successfully pass through the House of Lords. Mr. POWER testified to the care which had been devoted to the question by the Committee before whom the inquiry relative to the Bill was conducted. The Bill was read a third time.

#### LONDON TILBURY AND SOUTHEAST RAILWAY BILL.

The Select Committee of the House of Lords, presided over by Lord Clinton, on Thursday resumed the consideration of the London Tilbury and Southend Railway Bill, the promoters of which seek powers to enable them to construct works and purchase additional lands for the improvement of their undertaking; to subscribe towards the undertaking of the Whitechapel and Bow Railway Company or to guarantee interest on the capital of that company; and to make other provisions with respect to the use by the Tilbury Company of the London and Blackwall Railways and stations thereon; and also for other purposes. After a private consultation the committee passed the preamble with the following addition:—"Provided that the company shall form a means of access to the sea wall from the said new road on the east and west sides of the Tilbury Station." The other clauses were then gone through and passed, and the Bill was reported, as amended, to the House.

#### COMPANIES (VOLUNTARY LIQUIDATION) ACTS.

Copies of a Bill have been distributed to amend the Companies (Voluntary Liquidation) Acts. The Bill contains only one operative clause, which proposes to enact that—"In the event of the voluntary liquidation of any company no redeemable debenture or preference stock or shares shall be paid off before the due date, or at less than the agreed price of the redemption, without the consent of the holder, and no irredeemable debenture or preference stocks or shares shall be paid off without the consent of the holder." This Bill is brought in by Mr. Banbury, Mr. Johnson-Ferguson, Lord Alwyne Compton, and Mr. Maurice Healy.

## American & Canadian Railways.

#### CHICAGO AND WESTERN INDIANA.

This company is known in the English markets by an issue of 6 per cent. general mortgage bonds. The length of line operated is 150½ miles, of which 66 miles are leased to the Belt Railway

Company. The report for the year ending December 31st gives the following particulars of income:—

	1896.	1897.
Rentals from lessees.....	\$952,409 ...	\$912,240
Rentals from houses and land .....	21,935 ...	20,169
Discount, interest, and exchange .....	29,087 ...	6,459
Miscellaneous earnings .....	9,363 ...	8,635
<b>Total income .....</b>	<b>\$1,012,794 ...</b>	<b>\$947,503</b>
Interest charges .....	\$658,880 ...	\$648,930
Dividends .....	300,000 ...	300,000
Sundries.....	8,238 ...	8,896
<b>Total disbursements .....</b>	<b>\$967,118 ...</b>	<b>\$957,826</b>

Balance ..... Cr. \$45,676 ... Dr. \$10,323

The total nominal surplus, December 31st, 1897, was \$704,198. The balance-sheet shows a share capital of \$5,000,000, and a bonded debt of \$10,714,677. The company owns roads and terminals at Chicago, which are leased under perpetual contracts to the Wabash, the Chicago and Grand Trunk, the Chicago and Eastern Illinois, the Chicago and Erie, and the Louisville New Albany and Chicago, each of which five companies owns \$1,000,000 of the Chicago and Western Indiana's \$5,000,000 capital stock. The Atchison and the Belt Railways are also its tenants. The annual rentals provided by the leases must always exceed by at least 20 per cent. the interest on the bonds at any time outstanding. Mr. B. Thomas, the president, in his report states:—"For over four years the city of Chicago urged the elevation and depression of tracks at Sixteenth-street, so as to eliminate the dangerous crossing at that point. Various plans were considered, and the roads in interest finally adopted a plan which provides for the Atchison and Western Indiana companies to pass through a tunnel under the street and under all the other roads; and the St. Charles Air Line to pass over Clark-street, crossing the Lake Shore and Rock Island roads at grade at an elevation of 12'6ft. above the present level of tracks. We shall by this arrangement be relieved of all street and grade-crossing expenses, amounting on an average to \$10,000 per annum, and shall avoid delays to trains that are unavoidable under present conditions. The work has been commenced, and will probably be completed by December 1st, 1898. The number of cars handled in 1897 by the Switching Association was 128,527, against 144,906 in 1898. Decrease, 11·30 per cent.; average cost per car in 1897, 29·92 cents, against 30·15 cents in 1897. The total mileage over the Chicago and Western Indiana Railroad was in 1897 11,562,135 miles, against 11,323,293 miles in 1896, an increase of 238,842 miles, or 2·11 per cent.

#### ALLEGHANY VALLEY.

The report for the year ending December 31st shows:—

	1896.	1897.
Total earnings .....	\$2,341,612 ...	\$2,553,134
Total expenses .....	1,509,104 ...	1,478,267
<b>Net earnings .....</b>	<b>\$832,508 ...</b>	<b>\$1,074,867</b>
Interest on bonds .....	\$988,948 ...	\$978,758
State taxes .....	55,070 ...	55,331
Miscellaneous .....	6,879 ...	40,208
<b>Total .....</b>	<b>\$1,050,897 ...</b>	<b>\$1,074,297</b>
Balance.....	Def. \$213,389 ...	Surp. \$570

The balance-sheet, December 31st, 1897, shows a share capital of \$27,269,281, and a bonded debt of \$16,698,109. President W. H. Barnes says:—"The year's business, for the first time in the history of the company, shows a surplus over all fixed charges. This very favourable result is mainly due to the improved physical condition of your property and to able management by the general superintendent and his staff. The business in the first half of the year was not encouraging, but the last half showed a marked increase. Important additions and extraordinary repairs were made during the year, including a new steel bridge 260ft. in length (two spans) at East Sandy River, costing \$14,044; a new freight station at New Bethlehem costing \$1,966, the entire renewal of the roof of the car shop at 'Verona Shops' costing \$6,614, all of which have been charged to expenses. About 2 miles of additional sidings have been put in. The motive power and car equipment have received all needed repairs and renewals. Of the \$4,000,000 first mortgage 7·3-10 per cent. bonds of the River Division, due March 1st, 1896, \$3,994,000 have been paid, leaving \$6,000 outstanding at the close of the year.

#### LATEST EARNINGS.

Fourth Week of June.—Baltimore and Ohio South Western, \$150,000—decrease, \$17,000; Mexican Central, \$299,000—decrease, \$10,000; New York Ontario and Western, \$106,000—decrease, \$10,000; Oregon Railroad and Navigation, \$127,000—increase, \$23,000; Southern Railway, \$490,000—increase, \$74,000; Texas and Pacific, \$133,000—increase, \$9,000; Wabash, \$334,000—increase, \$46,000; Chicago Milwaukee and St. Paul, \$848,000—

decrease, \$11,000; Denver and Rio Grande, \$220,000—increase, \$37,000; Louisville and Nashville, \$692,000—increase, \$85,000; Missouri Kansas and Texas, \$204,000—increase, \$5,000; Chesapeake and Ohio, \$329,000—increase, \$64,000; Missouri Pacific, \$667,000—increase, \$99,000; Norfolk and Western, \$188,000—decrease, \$1,000; St. Louis and San Francisco, \$165,000—increase, \$19,000; St. Louis South Western, \$114,000—increase, \$21,000.

Month of June.—Chicago Rock Island and Pacific, \$1,445,000—increase, \$212,000.

Third Week of June.—St. Louis and San Francisco, \$107,000—increase, \$7,000. The gross earnings of seventy-six roads in the third week of June show an increase of 4·72 per cent.

Month of May.—Northern Pacific, gross, \$4,747,000—increase, \$1,152,000; net, \$1,780,000—increase, \$590,000. Chicago Rock Island and Pacific, gross, \$1,698,000—increase, \$379,000; net, \$535,000—increase, \$181,000. Louisville and Nashville, gross, \$1,852,000—increase, \$168,000; net, \$523,000—decrease, \$8,000. Mexican Central, gross, \$1,166,000—increase, \$76,000; net, \$467,000—increase, \$125,000. Cleveland Cincinnati Chicago and St. Louis, gross, \$1,173,000—increase, \$106,000; net, \$258,000—increase, \$12,000. Denver and Rio Grande, gross, \$658,000—increase, \$100,000; net, \$259,000—increase, \$25,000. Oregon Railroad and Navigation, gross, \$581,000—increase, \$201,000; net, \$217,000—increase, \$79,000. Southern Pacific, gross, \$4,956,000—increase, \$1,148,000; net, \$1,800,000—increase, \$604,000. Union Pacific Denver and Gulf, gross, \$279,000—decrease, \$16,000; net, \$73,000—increase, \$11,000. Norfolk and Western, gross, \$919,000—increase, \$21,000; net, \$201,000—decrease, \$9,000. Oregon Short-Line, gross, \$554,000—increase, \$60,000; net, \$274,000—increase, \$8,000. Union Pacific, gross, \$1,365,000—increase, \$122,000; net, \$590,000—increase, \$234,000.

#### RAILROAD NOTES.

The recent decision of the Supreme Court of Illinois prohibiting Illinois Central from making land on the lake front at Chicago affects several miles of property which the railroad company had hoped to acquire for side tracks. The railroad claimed these lands under an early charter, but the court holds that the right to their title has lapsed. The decision is of importance owing to its bearing upon the right of other corporations to fill in submerged banks along the lake shore for their own use. The court decided that the State holds in trust for the people the title to land beneath the waters of Lake Michigan lying within the State's boundaries, and that the State has no power to dispose of such lands.

The United States House of Representatives has agreed to the Senate's amendment to the Deficiency Appropriation Bill, authorising a commission, composed of the President, Secretaries of the Treasury and Interior and the Attorney-General, to settle the Pacific Railroad debt. The duration of the commission is limited to one year, the President to act in foreclosure if a settlement is not then made. The power of the commission is restricted to the receipt of the principal and interest in full, but payment may be partly in an issue of bonds at not less than 3 per cent. interest.

The rate situation on the Western lines is becoming aggravated; there is active cutting of the rates for all live stock and packing-house products at all points, and passenger rates also are demoralised. The efforts to form a new Western Traffic Association have been unsuccessful.

The restoration of wages by the Louisville and Nashville means an annual addition to the pay-bills of nearly \$1,000,000. It is believed that this action of the directors will postpone the distribution of a dividend for some time to come.

The adjourned meeting of the Central Pacific Railroad Shareholders' Combined Protection Committees of 1894 and 1898 will be held at Winchester-house, E.C., on the 14th inst., at 2 p.m., instead of on the day previously advertised.

Last week's east-bound all-rail tonnage from Chicago amounted to 37,000 tons, the Wabash road leading with 6,000. In the corresponding week last year the figure was 44,000.

The board of the Northern Pacific has restored the wages of the trainmen to the basis current until 1894. This will involve an aggregate increase in wages of about \$500,000 a year.

The managers of the Western trunk lines have agreed to form a freight pool. It is expected consequently that there will shortly be a general advance in rates.

The business of the Western roads for the six months ends

June show that, while the gross receipts were unprecedented, the net receipts were unsatisfactory.

The Central of New Jersey Railroad Company has declared its usual quarterly dividend of 1 per cent.

The Canadian Pacific is making a \$25 rate between New York and Seattle.

## General News.

### SAMBRE AND MEUSE RAILWAY.

The liquidators have issued a circular to the shareholders in which they state:—"At the extraordinary general meeting, held at the offices of the company, in Brussels, on June 18th, 1898, it was unanimously resolved that the meeting recognises that the company has been legally dissolved, and confirmed its dissolution and its passing into liquidation. The meeting also unanimously conferred full powers on the liquidators to proceed with the reimbursement of the bonds of the company, and to act in this matter with dispatch. The question was then discussed as to the mode of division of the assets of the company between the ordinary and the preference shareholders. The president stated that the directors did not consider it their duty to decide this question, but that they had consulted the legal adviser of the company, and, in accordance with his opinion, it was unanimously voted that, unless it should be judicially decided otherwise, the liquidators should treat the two categories of shares as having rights of the same nature on the assets of the company, and that, in consequence, these assets should be divided amongst all the shares, ordinary or preference; but taking into account the difference in par value of the respective classes of shares, in such manner that each of the ordinary shares should receive a portion of the assets double in amount of each of the preference. The meeting also unanimously decided that the coupons of the preference shares falling due on July 1st, 1898, shall not be paid, and that, when the first division of assets shall be made on these shares, the holders will have to account for the difference between the interest which has been paid to them since January 1st, 1896, the date of the dissolution of the company, and that which has been voted to the ordinary shares during the same period, the first having received  $\frac{5}{2}$  per cent., and the latter  $\frac{2}{3}$  per cent. The meeting then unanimously decided that the division of assets to be made on the shares can be paid wholly or in part in Belgian 3 per cent. Government bonds, with interest from January 1st, 1898, or in cash. It was unanimously decided that the then existing directors be appointed the liquidators, and the fullest powers for the liquidation of the company were given them. The liquidators think it right to remind the shareholders that, by article 47 of the statutes of the company, all disputes between the shareholders in connection with the affairs of the company shall be decided by arbitration. The same article provides for the mode of carrying out the arbitration, and that the decision thus arrived at is final."

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### BRITISH ELECTRIC TRACTION COMPANY, LIMITED.

The Electric and General Investment Company, on behalf of the British Electric Traction Company, Limited, announce a first issue by the latter, at the price of 116l. per cent., of 100,000l. 5 per cent. perpetual debenture stock. The British Company, which has a capital of 600,000l., in equal proportions of 6 per cent. cumulative preference and ordinary 10l. shares (of which all the latter and 10,000 of the former have been subscribed), was formed in November, 1896, to acquire the business of the British Electric Traction (Pioneer) Company and to develop electric traction. It is now engaged in carrying out electric traction in various parts of the United Kingdom, and has, according to the prospectus, assets totalling 374,160l., and its investments in other companies are estimated for the current year to be about 11,000l. Further profits will, it is said, be derived from contracts in course of execution, and that the present issue will correspondingly increase the company's assets.

#### POTTERIES ELECTRIC TRACTION COMPANY, LIMITED.

This is the title of a company which has been registered with a capital of 400,000l. in 10l. shares, to carry on in all or any of their respective branches the businesses of electricians, electrical engineers, manufacturers of and dealers in every description of electrical plant, apparatus, and machinery; as carriers of passengers goods and merchandise; to acquire and turn to account any patents, patent rights, and inventions; to construct and maintain rail and tram roads; as boat and barge proprietors,

printers and publishers, newspaper proprietors, company promoters, financiers, &c.; as distillers, wine and spirit merchants, licensed victuallers, coopers, bottlers, bottle and bottle-stopper manufacturers, manufacturers of and dealers in aerated and mineral waters; as hotel and restaurant keepers, farmers, dairy-men, ice merchants, tobacconists, builders, &c. Capital 400,000l. in 10l. shares. The first directors—of whom there shall be not less than three nor more than seven—are to be elected by the signatories. Qualification, 250l. Remuneration, 500l. per annum and a per-centage of the profits, divisible. Registered by S. Morse, 4, Fenchurch-avenue, E.C.

#### LONDON STEAM OMNIBUS COMPANY, LIMITED.

This is the title of a company which has just been formed, with a capital of 420,000l. in 10l. shares, to adopt and carry into effect an agreement, expressed to be made between the British Motor Company, Limited, of the first part and this company of the other part, and to construct, maintain, and work omnibuses, vans, carriages, launches, steamboats, and other vehicles or means of conveyance, whether for use by land or water and the like, appropriate for the carriage and transport of passengers and goods, whether propelled by animal traction or by steam, oil, electricity, or any other motive power, and to obtain any necessary licences for the same, whether under the Hackney Carriage Act or otherwise; also to act as commission agents, manufacturers of and dealers in apparatus, machinery, materials, and articles of all kinds capable of being used for the purposes of the company or otherwise. The first directors—of whom there shall be not less than three nor more than eight—are to be elected by the signatories. Qualification, 200l. Remuneration, 300 guineas each—chairman 400 guineas, deputy-chairman 350 guineas—and a per-centage of the profits to be divided among them as they themselves shall determine. Registered by Ashurst and Co., 17, Throgmorton-avenue, E.C.

#### BROMPTON AND PICCADILLY-CIRCUS RAILWAY COMPANY.

The directors of this company invite subscriptions for the share capital of 600,000l., divided into 60,000 of 10l. each, payable 10s. per share on application, 30s. on allotment, 2l. on November 1st, 1898, 2l. on May 1st, 1899, 2l. on November 1st, 1899, and 2l. on July 1st, 1900. Subscribers paying in advance of calls will be entitled to interest at the rate of  $2\frac{1}{2}$  per cent. per annum upon the amount paid in advance. The prospectus states:—"The company was incorporated by special Act of Parliament in 1897 for the construction of an underground electric railway from South Kensington Station of the Metropolitan and Metropolitan District railways to Piccadilly-circus. The line will be 2 miles in length, and will be laid in the London clay in two separate iron tunnels, each of 11½ ft. diameter. The western terminus of the line will be immediately adjoining the South Kensington station, with which power has been taken to connect it, by agreement with the District Railway Company, by means of their existing subway. It is proposed to seek power for an interchange of traffic at Piccadilly-circus by a subway with the electric railway from Baker-street to Waterloo, now in course of construction, which will also have a station at Piccadilly-circus. Intermediate stations are proposed at the following points:—(1) Brompton-road, near Brompton-square; (2) Knightsbridge, at the junction of Kensington and Brompton-roads; (3) St. George's-place, Hyde Park-corner; (4) Down-street, for Park-lane and Mayfair; (5) Dover-street for Bond-street. Electricity will be generated at a station on the river Thames at Chelsea, very favourably situated for obtaining fuel and water, and will be conveyed to the railway by means of armoured cables laid underground. It is proposed to run a three-minute service of trains each way along the whole route during twelve hours of the day, and a five-minute service during the remaining six working hours. The time occupied in running the total length of 2 miles, including stoppages at the five intermediate stations, will not exceed ten minutes. A provisional contract has been entered into with Mr. George Talbot (the contractor for the City portion of the Central London Railway), undertaking to complete the line within two and a half years from the commencement of the works for the sum of 385,174l. This covers the tunnels, shafts for lifts and stairs, subways, and all underground construction. Estimates have been obtained of the cost of the electrical equipment and generating station, rolling stock, lifts, permanent way, and signalling, amounting to about 144,000l. The value of the land required has been carefully estimated by eminent surveyors, and, after fully providing for their estimates, there is (including the company's borrowing powers) an ample margin of capital for all other incidental expenses. Interest at the rate of 3 per cent. per annum, not exceeding in the whole 30,000l., will be payable out of capital within the period for completion limited by the Act upon the amount from time to time called and paid up during construction." The directors, basing their estimates on the experience of the City and South London Railway, anticipate a net revenue available for dividend of 36,500l. per annum, equal

to 6 per cent. on the share capital. The board consists of Mr. Charles Grey Mott (chairman); Sir J. C. Dimsdale, 50, Cornhill, E.C.; Mr. Henry Lambert, 67, Belsize-park-gardens, N.W.; Mr. Percy Mortimer, Ashe Park, Overton, Hants; Mr. George P. Neele, Watford; Mr. Steuart A. Sillem, 11, Stone-buildings, Lincoln's-inn, W.C. The offices of the company are at 46, King William-street, E.C.

#### INDIAN RAILWAY IN 1897-8.

According to the administration report on the railways in India for 1897-98, which was laid on the table of the House of Commons on Friday, the total length of railways opened and sanctioned on March 31st in the present year was 25,454½ miles, being a net increase of 926 miles during the year. The total length of railways open for traffic on the same date was 21,156½ miles, being a net increase of 766 miles, leaving 4,298 miles still under construction or sanctioned. The mean mileage worked during the year was 20,531 miles, being an increase of 748 miles over the figures of the previous year. The gross earnings in 1897 amounted to Rs.25,59,51,692, which meant Rs.22,91,267 more than in the previous year. In the same period the working expenses amounted to Rs.12,51,11,631, and absorbed 48·88 per cent. of the gross earnings, against 48·09 per cent. in 1896. The net earnings amounted to Rs.13,08,40,061, being a decrease of Rs.8,43,489. Of the total gross earnings here mentioned 73·87 per cent. was earned by the standard gauge lines, 25·52 per cent. by the metre gauge, and the balance, 0·61 per cent., by the special gauge lines. Dealing with the passenger traffic, the report shows that the total number of passengers booked during the year under review showed a decrease of 5·94 per cent. as compared with the number booked in 1896. The passenger earnings decreased by 7·31 per cent. Under what is described as "other coaching traffic" there was, however, an increase of Rs.25,53,843, or 26·01 per cent. The report explains that the decrease under the head of passenger traffic in 1897 was chiefly due to the prevalence of the plague and the famine, while the increase under "other coaching traffic" was mainly due to the abnormal receipts on account of the North-West Frontier expedition.

#### CHINESE RAILWAY CONCESSIONS.

Yung Wing, who holds the concession for a railway from Tientsin to Shanghai, has been ordered by the Government to produce the capital immediately or renounce the concession. This action is believed to be due to German pressure.

Mr. Joseph Walton, M.P., writes:—"The question may be asked, what are the railway concessions which ought to be secured in the trade interests of this country? They may be summarised as follows:—(1) Railways connecting treaty ports with their hinterland. (2) Railways connecting the Yang-tse-Kiang river with the interior of the provinces adjacent to it. (3) A railway from the mainland obtained opposite Hong Kong through Canton to Hankow. (4) Lastly, there is the question of joining India and China by a railway from British Burmah to the navigable limits of the Yang-tse-Kiang river at Sui-fu with a branch from Yunan-fu down to Nanning, and possibly with an extension from Nanning to Canton. These, with a little linking up, will give us a continuous metre-gauge railway from Kurra-chee, in the West of India, to Canton, in China. There can surely be no question as to the desirability of bringing the huge populations of China and India into commercial relations by the construction of a railway. And, as a matter of high Imperial policy, such a railway should be undertaken without hesitation, by her Majesty's Government. No one can deny that the question of upholding intact British commercial interests throughout the Chinese Empire is of vital importance to the future prosperity of the trade of Great Britain. It is not a question of what our trade with China is to-day, but we must have regard to the almost unlimited possibilities of development of trade by the opening up and civilising of that great empire, containing as it does nearly a quarter of the world's population. In view of our enormous commercial interests there, and having regard to the altered circumstances and conditions under which we now have to compete with other nations for the trade of China, it is essential that British policy should be reconsidered. The Government, I trust, are not really so blind to the changed conditions under which markets have to be maintained as to refuse to do for a railway concession what it would have done for a Chinese loan. If, however, the Government take the initiative, and are willing to join in the most beneficial work of opening up China by the construction of railways to an extent proportionate to our trade with that empire, they will thus give British capitalists the confidence required to cause capital to be forthcoming in abundance. The responsibility clearly rests with the Government to give the House of Commons the opportunity of considering the question. Should, however, the Government neglect to seek the authority of Parliament for adopting the same policy of upholding British

political and commercial interests in China, and the same means which are being employed by foreign Powers, a heavy responsibility indeed will rest upon their shoulders; for an enormous sacrifice of British commercial interests in the Far East cannot fail to follow, if the Government do not adapt their policy to the altered circumstances and the changed conditions which they have to face."

Sir Edward Clarke mentioned, in the Chancery Division on Thursday, before Mr. Justice North, the case of "*Laganas and others v. the Pekin Syndicate*," which was an action to restrain the defendant syndicate from dealing with certain concessions in China. Sir Edward said the plaintiffs now wished to abandon the motion. It was agreed that the action should be dismissed without costs.

M. Pavloff, the Russian *Chargé d'Affaires*, has informed the Tsung-li-Yamen that if the Northern Extension Railway is persisted with, the Russian Government may be obliged to seize the Province of Ili or Kuldja as compensation.

#### ARGENTINE RAILWAY ITEMS.

Mr. Budge, general manager of the East Argentine Railway, and Mr. P. W. Cook, of the Engineers' Department of the Buenos Ayres Great Southern Railway, arrived in England last week.

According to advices received from Buenos Ayres by mail on Monday, an idea has gained currency there that considerable friction exists between the staff of the Central Argentine Railway and the newly appointed manager. It is alleged on the other side that this may result in an entire change of the company's Argentine staff.

The work on the Neuquen Extension of the Buenos Ayres Great Southern Railway is going ahead rapidly, the rails already reaching the valley of the Rio Negro at kilometre 355, about one league farther south than the station of Choele-Choele which is now being built. The earthworks reach to kilometre 422, near Chilforo, and have now arrived at the most difficult section, where the line runs along the cliffs overlooking the river. It is hoped to open the line to public service as far as kilometre 350 by the 15th of the current month. The construction works on the Saavedra to 25 de Mayo branch now reach kilometre 30 with earthworks and kilometre 7 with line, starting from Saavedra; at the other end the earthworks reach kilometre 190 and the rails kilometre 176.—*Review of the River Plate*.

#### GOLDEN VALLEY RAILWAY.

At a special meeting of the Hay Urban Council, held last week, the following letter from the general manager of the Great Western Railway Company was read by the clerk, Mr. R. T. Griffiths:—"General Manager's Office, Paddington Station, London, W., June 15th, 1898.—Dear Sir—I have received the letter which you addressed to me on the 10th inst. on behalf of the Hay Urban District Council in regard to the Golden Valley Railway. The council will be aware that this company, in their Bill of the present session, sought to obtain Parliamentary powers for the acquisition of the undertaking, and that the application was successfully opposed by interested parties, with the result that the line has since been closed for traffic. I may state that it was solely for the purpose of keeping the line open as a convenience that steps were taken, upon the invitation of the directors of the Golden Valley Railway, for this company to take over the line; and it is to be regretted that the proposal was defeated, as it was in the interests of the locality, and would have been a substantial public benefit. The company will, in due course, have under consideration the matters for which it will be necessary to apply for Parliamentary powers next year, when this subject will again receive careful attention; and if it seems possible to secure to the district the facilities they have hitherto enjoyed, the council may rely upon our doing everything in our power to bring about that result.—I remain, dear Sir, yours faithfully, (Signed) J. WILKINSON."

#### FOREIGN AND COLONIAL ITEMS.

The Anglo-Chilian Nitrate Railway gross traffic receipts during June, 1898, were 9,500*l.*, and for the corresponding period in 1897, 7,500*l.*

The aggregate revenue of the Northern Railway of Spain for the first half of 1898 was 941,800*l.*, as compared with 844,000*l.* in the corresponding period of 1897, showing an increase of 97,700*l.*

The Pretoria-Pietersburg Railway Company, Limited, gives notice of the opening for public traffic of the first section of the railway from Pretoria to Nylstroom, 81 miles, which took place on the 1st inst.

A telegram from St. Petersburg states that the Moscow Windan and Rybinsk Railway Company have received the Imperial permission to construct a railway from St. Petersburg to the south of Russia, via Witebsk.

The preliminary report of the New South Wales Railway Commissioners shows that during the past financial year there has been in the railway returns of New South Wales a net increase of 1,363, instead of a loss of 60,000, as was anticipated.

The Agent-General for Victoria, Sir Andrew Clarke, has received a despatch from the Government of the colony, enclosing a comparative return of the railway traffic for the month of April, 1896-7-8, as under:—1896, 203,868; 1897, 293,201; 1898, 228,518.

The Secretary of State for Foreign Affairs has been informed by her Majesty's Consul-General at Christiania that the Norwegian State Railways Administration invite tenders for the delivery of the following:—840 axles with wheels, ten axles, twenty-four tyres, forty wheel centres. Further particulars may be obtained on application at the Commercial Department of the Foreign-office, between the hours of 11 a.m. and 5 p.m.

The annual report of the Minister of Railways upon the Austrian State Railways states that the working lines were extended by 4½ per cent. in the year 1897, and at present they cover 9,613 kilometres. Over these lines 863,000 railway trains passed in 1897, the whole returns amounting to 112,000,000fl., of which not quite a quarter arose from the passenger traffic. The working expenses were 70,000,000fl.; the working profit amounted to 33,000,000fl., which represents an interest on the capital of 2·87 per cent., whereas the interest was 3·03 per cent. last year.

The trustees of the first mortgage bonds of the Jamaica Railway Company have been informed by Messrs. Antony Gibbs and Sons that sufficient funds to pay the coupon due on the 1st inst. have not been remitted to them. They have accordingly telegraphed to their agents in Jamaica, the Colonial Bank, instructing them to present to the Governor of Jamaica a letter signed by the trustees, which is already in the possession of the bank, calling upon the Governor to take possession of the railway and work it, as required by the Jamaica Railway Company's Law—Jamaica Law 12 of 1889.

## METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS WAGONS, and RAILWAY IRONWORK of every description. Rail way Carriages and Wagons built for cash, or upon deferred payments, extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

## BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other armor work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by mill makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Ropes, Boiler Plate, and BB. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. \* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1888.

**GREAT WESTERN RAILWAY.**

The Directors of this Company are prepared to receive TENDERS for the CONSTRUCTION of TWO FOOTBRIDGES over the Railway, one near Llantrissant (Glamorgan) and one at Castle Cary Station (Somerset).

Plans and Specification may be seen, and Forms of Tender and Bills of Quantities obtained, at the Office of the Engineer at this Station, between the hours of 10.0 a.m. and 4.0 p.m.

Tenders, addressed to the undersigned, and marked outside "Tender for Footbridges at Llantrissant and Castle Cary," will be received on or before Tuesday, the 19th instant.

The Directors do not bind themselves to accept the lowest or any Tender.

G. K. MILLS, Secretary.  
Paddington Station, London, 1st July, 1898.

**GREAT WESTERN RAILWAY.**

The Directors of this Company are prepared to receive TENDERS for the supply of about 320 TONS of STEEL BRIDGE GIRDERS and other IRON and STEEL WORK.

Plans and Specification may be seen, and Forms of Tender and Bills of Quantities obtained, at the Office of the Engineer at this Station, between the hours of 10.0 a.m. and 4.0 p.m.

Tenders, addressed to the undersigned, and marked outside "Tender for Girder Work," will be received on or before Tuesday, the 19th instant.

The Directors do not bind themselves to accept the lowest or any Tender.

G. K. MILLS, Secretary.  
Paddington Station, London, 1st July, 1898.

**GREAT WESTERN RAILWAY COMPANY.**

NOTICE is hereby given, that, pursuant to the Standing Orders of Parliament, a SPECIAL GENERAL MEETING of the Proprietors of this Company will be held in London at the Paddington Station, on MONDAY, the 18th day of July, 1898, at Twelve o'clock Noon, when the following Bill now pending in Parliament will be submitted for the consideration, and, if thought fit, for the approval of such Meeting, viz.:-

"A Bill to authorise the construction by the Fishguard and Rossare Railways and Harbours Company of new Railways from Waterford to Rossare and the acquisition by the Company of the Undertakings of the Fermoy and Lismore and the Waterford Dungarvan and Lismore Railway Companies to confer running powers over certain Railways to extend the time for completion of Works authorised by the Fishguard Bay Railway and Pier Act 1893 and for other purposes."

It is also proposed to submit for the consideration, and, if thought fit, the approval of the Meeting, clauses which have been introduced into the said Bill giving power to the Company to subscribe the sum of not exceeding £250,000 for the purposes of the Bill and to apply their Capital to such subscription.

CAWDOR, Chairman.  
G. K. MILLS, Secretary.

Paddington Station, 1st July, 1898.

**REORGANISATION of the BALTIMORE and OHIO RAILROAD COMPANY.**

To the Holders of Securities of:-

The Baltimore and Ohio Railroad Company.  
The Pittsburgh and Connellsville Railroad Company.  
The Akron and Chicago Junction Railroad Company, and the  
Washington City and Point Look-out Railroad Company.

As already announced, a PLAN for the REORGANISATION of the Baltimore and Ohio Railroad Company, affecting the abovenamed Securities, has been prepared by the Reorganisation Committee, and the Undersigned have undertaken to act as Reorganisation Managers to carry out the Plan.

Participation under the Plan of Reorganisation, in any respect whatsoever, is dependent upon the Deposit of Securities within such time as may be fixed by the Managers. On and after June 30th, 1898, the Mercantile Trust Company, as Depositary under the Plan, will be prepared to receive Deposit of Securities, either at its Office, No. 120, Broadway, in the city of New York, or at its Agency, the London and Westminster Bank, Limited, 41, Lothbury, London, England; copies of the Plan and Agreement of Reorganisation, and any further information desired, may be obtained at the Offices of the undersigned, or of the Mercantile Trust Co., or its London Agency above stated.

Messrs. J. P. Morgan and Co., Brown Brothers and Co., Baring Magoun and Co., Vermilye and Co., and Speyer and Co., of New York, and Messrs. J. S. Morgan and Co., Brown, Shipley, and Co., Baring Brothers and Co., Limited, and Speyer Brothers, of London, have issued circulars to the Bondholders whom they respectively represent, copies of which may be obtained from the said Bankers, or from the undersigned.

SPEYER and CO., 30, Broad-street, New York.  
KUHN, LOEB, and CO., 27, Pine-street, New York.  
SPEYER BROTHERS, 7, Lothbury, London.  
Dated New York, June 27, 1898.

**GREAT EASTERN RAILWAY COMPANY.**

NOTICE is hereby given, that the SEVENTY-SECOND HALF-YEARLY GENERAL MEETING of the Proprietors of the Great Eastern Railway Company will be held at the City Terminus Hotel, Cannon Street, in the City of London, on TUESDAY, the 26th day of July, 1898, at Twelve o'clock Noon precisely, for the general purposes of the undertaking.

And Notice is hereby further given, that John Foster, Esquire, one of the Directors of the Company, will retire by rotation at this Meeting, and, being eligible, offers himself for re-election; and that any Proprietor eligible for the Direction, and intending to become a candidate for election at this Meeting, must give to the Secretary notice in writing, under his hand, not less than fourteen clear days previous to the date fixed for the Meeting, of his intention to offer himself as such candidate.

And Notice is hereby further given, that Joseph Gurney Fowler, Esquire, one of the Auditors of the Company, will retire by rotation at this Meeting, and, being eligible, offers himself for re-election; and that any person eligible for election by the Company as an Auditor, and intending to offer himself as a candidate for such office, must give to the Secretary notice in writing under his hand, not less than fourteen clear days previous to the day fixed for the Meeting, of his intention to offer himself as such candidate.

And Notice is also hereby given, that at such Meeting, which is hereby specially convened for the purpose, a Resolution will be submitted to the Proprietors for the following purpose:-

To create, in pursuance of the provisions contained in the Great Eastern Railway (General Powers) Act, 1898, for the purposes of the Sale and Transfer to the Company of the respective undertakings of the Ely and Saint Ives Railway Company, the Ely and Newmarket Railway Company and the Colchester Stour Valley Sudbury and Halstead Railway Company, £517,844 nominal amount of new Four per Centum Debenture Stock of the Company; and to create, for the purposes of the Sale and Transfer to the Company of the undertaking of the Melis and Eye Railway Company, Ordinary Stock of the Company to the nominal amount of £15,000, and to authorise the Directors of the Company to issue and appropriate the said Stocks in accordance with the terms and conditions contained in the said Act.

By order,

CLAUD J. HAMILTON, Chairman.  
W. H. PEPPERCORNE, Secretary.  
Liverpool-street Station, E.C.,  
8th July, 1898.

**GREAT EASTERN RAILWAY.**

DRAWING OF LAING'S MORTGAGES.

NOTICE is hereby given, that the following MORTGAGES were DRAWN this day for payment on the 2nd January, 1899, at a premium of 20 per Cent., and the same will be paid off on being presented, duly receipted, with all undue Coupons attached, to the Secretary of the Company, and that from the said date all interest on such Mortgages will cease.

B 29 1-5.  
B 29 6, 7, 8, 9.  
B 79 1-5 6-10.

CLAUD J. HAMILTON, Chairman.  
W. H. PEPPERCORNE, Secretary.  
Liverpool-street Station, London, E.C.,  
July 5th, 1898.

**THE GREAT NORTHERN RAILWAY COMPANY.**

(Incorporated by 9 and 10 Vict., Cap. 71, 26th June, 1846.)

NOTICE is hereby given, that the BOOKS kept for the Registration of Transfers of Stock will be CLOSED on Friday, the 15th instant, and will remain closed until Thursday, the 11th August next, inclusive of the latter day.

By order,

WILLIAM LATTA, Secretary.  
Secretary's Office, King's-cross Station, London,  
6th July, 1898.

**NORTH BRITISH and MERCANTILE INSURANCE COMPANY.**

INCORPORATED BY ROYAL CHARTER AND ACTS OF PARLIAMENT.

SAILINGS TO AND FROM THE CONTINENT VIA GRIMSBY.

Weather and other circumstances permitting, the Company's vessels sail DAILY TO and FROM HAMBURG (Sundays excepted).

To ROTTERDAM EVERY WEDNESDAY and SATURDAY.

Returning every Tuesday and Saturday.

To ANTWERP EVERY MONDAY, WEDNESDAY, and SATURDAY.

Returning every Tuesday, Thursday, and Saturday. Trains run in connection with the above steamers at convenient times from all important centres in Lancashire and Yorkshire and the Midland Counties.

Every information as to goods rates, &c., will be given on application to the Shipping Agents, Messrs. John Sutcliffe and Son, Grimsby; or to Mr. C. T. Smith, Goods Manager, Great Central Railway, Manchester. Particulars as to fares, &c., can be obtained from Mr. R. Haig Brown, Superintendent of the Line, Manchester.

WILLIAM POLLITT, General Manager.  
London-road Station, Manchester.

**GREAT SOUTHERN and WESTERN RAILWAY COMPANY, IRELAND.**

NOTICE is hereby given, that in pursuance of the Standing Orders of Parliament, a SPECIAL GENERAL MEETING of the Proprietors of this Company will be held at the Kingsbridge Terminus, Dublin, on MONDAY, the 18th day of July, 1898, at 12 o'clock Noon, when the following Bill will be submitted for the consideration and, if thought fit, for the approval of such Meeting, viz.:-

"A Bill to authorise the construction by the Fishguard and Rossare Railways and Harbours Company of new railways from Waterford to Rossare and the acquisition by the Company of the undertakings of the Fermoy and Lismore and the Waterford Dungarvan and Lismore Railway Companies, to confer running powers over certain railways, to extend the time for completion of works authorised by the Fishguard Bay Railway and Pier Act, 1893; and for other purposes."

It is also proposed to submit for the consideration and, if thought fit, the approval of the Meeting, clauses which have been introduced into the said Bill, giving power to this Company to subscribe the sum of not exceeding £250,000 for the purposes of the Bill, and to raise capital for the purpose of such subscription.

By order of the Board,

FRANCIS B. OMSBY, Secretary.  
Kingsbridge Terminus, Dublin, 6th July, 1898.

The adjourned meeting of the "Shareholders' Combined Protection Committees of 1894 and 1898" of this company was held on Thursday, at Winchester-house, E.C.; Sir WILLIAM MARRIOTT, Q.C., presiding.

The CHAIRMAN, in opening the proceedings, said that Mr. C. E. Bretherton had promised to be at the meeting, but had telegraphed that he had missed the train, and would not, therefore, be able to arrive before three o'clock. Of course, they could not adjourn the meeting till that hour. He would very much have liked Mr. Bretherton to be present, as he would have preferred to make in that gentleman's presence rather than behind his back the statements he was about to make. Continuing, the chairman remarked that the Morshead committee was placed at a disadvantage in not having the names and addresses of the many hundreds, perhaps thousands, of shareholders in this country. The Banbury committee, through the action of Messrs. Speyer, was in possession of them, but they had declined to furnish a copy to Mr. Morshead, although the latter had undertaken to pay all the cost incurred in making out a list. The real point they had to consider was whether either of the committees was acting with Mr. Huntington or against him. It was agreed that Mr. Huntington was not a friend of the shareholders. There was not a single individual in America or England who would say that he had not drawn between 8,000,000*l.* and 10,000,000*l.* from European pockets, principally British. How was that sum to be recovered? If a committee were working in collusion with Mr. Huntington it would be impossible to do so, but if it were working against him it might. He stated at the last meeting, as instructed, that the Banbury committee was created by Messrs. Speyer, the firm in New York which brought out the Southern Pacific loans in 1880, and which was subsequently connected with Mr. Huntington in certain transactions. Mr. Banbury, in his speech at the recent meeting of his committee, did not deny those statements, and some remarks then made by Mr. Banbury had confirmed him (the chairman) in his belief that Messrs. Speyer were acting for Mr. Huntington at the present time. It appeared that a company had been formed by Messrs. Speyer which would have the control of the shareholders' votes. According to Mr. Banbury, that firm had expended 6,000*l.* or 7,000*l.* for that purpose. He did not suppose anybody would dream that Messrs. Speyer spent that money out of mere philanthropy. From an examination of the speech of Mr. Banbury delivered at the last meeting, he saw nothing to change his opinion that Mr. Banbury was the *alter ego* of Mr. Huntington. As to Sir Rivers Wilson's visit to California in 1894-5, he (Sir William) was clearly of opinion that the position of the holders of the Central Pacific stock had been much weakened by that gentleman's advice, and that of Mr. Huntington had been strengthened. According to his instructions, Mr. Bretherton's business here was to see that the shareholders did not get the better of Mr. Huntington. He wished to state all these things as fairly as he could, but, as counsel, he was obliged to put the facts before them. He had no pecuniary interest in the company himself, but he represented shareholders who held a large amount of shares for which they paid a high price. Mr. Banbury admitted that the board of the company, recently elected, was constituted the same as the one Mr. Huntington had had under his thumb for the last fifteen or twenty years; but, Mr. Banbury added, they had given an assurance that they would not act without consulting the committee in London. That reminded him of a recent incident in public life. They all knew that Russia had been allowed to take Port Arthur on giving a promise that it would not be used for certain purposes, but what person had the slightest belief in that promise? They all knew that Russia would use Port Arthur just as it suited her interests, and he thought most of them would attach no more importance to the assurance which had been given by Mr. Huntington's board than to the promise made by Russia. What was to be done in the future? One of the first things would be a Chancery suit to restrain the Banbury committee from using the proxies they had got. In a suit like that they would be able to get the facts out better than in any other way, and, as he had said before, publicity was what they wanted. Their difficulty was to get at the principal person in the matter, seeing that Mr. Huntington did not live in this country. They must, therefore, attack the Banbury committee at law here. He was in communication with several high officials in Washington, and the question had been before Congress there, with the result that it had been referred to a Commission consisting of the Attorney-General, and, he believed, two Ministers. It was the intention of the Morshead committee to appear before that Commission, and it was probable that he might go to the United States himself for that purpose. He would then be able to explain the whole position of the Banbury committee and how they had succeeded in getting hold of the votes, and, from what he knew of the United States, he believed that the facts would produce a great effect there. Mr. Banbury said in his recent speech that Mr. Morshead wished the Central Pacific Railroad to pay the whole of its debt to the United States Government, and insinuated that that would not be in the interests of the shareholders. They contended that it would be in the shareholders' interest. If the Government were to appoint a receiver the first result would be to terminate the lease which bound the Central Pacific to the Southern Pacific Company. If that were done, and actions were brought against Mr. Huntington, that gentleman would have to disgorge between 10,000,000*l.* and 15,000,000*l.*, in which case the debt would be paid in full to the Government and the railway placed in a position to earn 4 per cent. or 5 per cent. On the other hand, the policy of the Banbury committee was, he said, to whittle down the debt to the Government and then arrive at some agreement with the

Southern Pacific Company. After stating that he was willing to meet Mr. Bretherton at any time in public meeting and discuss the matters in dispute with him, he said that if his statements could be disproved he would be the first to acknowledge his error, but if they could not be contended that a great wrong had been done to the shareholders. There was a way of remedying that wrong, and the Morshead committee was determined to adopt it.

Mr. W. MORSHEAD said he had prepared very carefully a report on the affairs of the Central Pacific Railroad, and he would be glad to send a copy of this printed document to any stockholder who cared to be furnished with it. The committee of which he was a member was determined to probe this matter to the very bottom, and when the shareholders were in possession of the full facts there would be little doubt as to the result. He had received most friendly communications from San Francisco, the headquarters of the Central Pacific Railroad, and he had received a requisition from no less than sixteen large American shareholders to take steps in this country to explain the situation. An action would be commenced in San Francisco at an early date.

Mr. CHESTER referred to Huntington's "dummy" board at San Francisco, which the Banbury committee had re-elected. What the stockholders had to fight against was the perpetuation of wrong-doing. He moved a cordial vote of thanks to Sir William Marriott, Mr. Morshead, and the other members of the committee.

Mr. STUART JONES seconded the motion, which was carried unanimously.

### LONDON TILBURY AND SOUTHEAST RAILWAY.

An extraordinary general meeting was held on Thursday, at the offices of the company; Mr. H. DOUGHTY BROWNE presiding.

The SECRETARY (Mr. H. Cecil Newton) having read the notice convening the meeting,

The CHAIRMAN said—Gentlemen, this is a Bill to make a connection between our line at Bromley and the extension of the Metropolitan and Metropolitan District Railways at Whitechapel. This Act was obtained last year by independent parties. It is to make a line of a little over 2 miles—2 miles and 5 chains—and the authorised capital is 660,000*l.* share capital and 220,000*l.* borrowing powers. As this line is of considerable importance to us, we were approached by the promoters, who asked what we should like to do in the way of subscription, and having consulted with the Metropolitan District Railway, who also take a strong interest in it, we came to the conclusion that the most economical way of proceeding was to make the line jointly, and therefore we are now asking you to approve this Bill, which is necessary to give us the powers to subscribe towards the capital. I think it was in the year 1884, or something like fourteen years ago, that a similar Bill was applied for, and we were then going into a joint arrangement with the Metropolitan Railway to make it, but owing to difficulties in the way it was withdrawn. We felt very strongly then that the line would be most valuable to us because it brings us into connection with the whole of the inner circle. At present passengers on the Metropolitan system suffer because they have to get out either at Aldgate at the one end or at Mark-lane at the other, and this railway will bring us practically into physical connection with the whole of the system. I also should like to mention that we look upon it with favour because it will relieve our line into Fenchurch-street of some of the great pressure of traffic, and, in fact, it will enable us to divert some of the local traffic and consequently increase our facilities for carrying on our long-distance traffic to Southend and other portions of our system. The railway, when made, will, no doubt, stimulate our traffic very much. I look forward to a very great development of traffic in our line as years go on. At the same time we must not conceal from ourselves that the finding of our share of this capital will impose some burden on the shareholders for two or three years during construction, but I do not think that will be very heavy. We shall be able to raise the money at a low rate of interest, and the board are unanimous in recommending to you this scheme, because they believe that although for two or three years it may involve some burden in the payment of interest while it is unproductive, eventually the benefits will be very great. I am glad to say we are going into this with the District Company on the most harmonious terms, and I feel certain that we shall be able to make the line to the best advantage. We have already had negotiations with them as to facilities to be given to us for traffic over their system when the line is completed. Mr. Stride reminds me that there is room for the Metropolitan railway to come in and join us after a time, and I have every reason to hope that they will do so, and, of course, this will make the line more valuable than if we had only the co-operation of the District Company. I will just ask the solicitor, before putting the resolution, to read the heads of the Bill.

The SOLICITOR—The Bill is a very short one. It provides by section 3 power to the District Company to subscribe and guarantee the debenture issue and also a moiety of the share capital of the Bow and Whitechapel Company. By clause 4 neither the District Company nor the Tilbury Company are to transfer their holdings in the ordinary stocks of the Whitechapel and Bow Railway. Clause 5 of the Bill provides for the manner in which the new line is to be worked by the Tilbury and the District Companies. Clause 6 gives the District Company power to apply their powers for the purpose. Clause 7 provides—and that is more a District provision than one affecting the Tilbury Company—for the way in which the District Company will raise their proportion of the subscription. The Bill of the Tilbury Company, which has just passed, deals with the subscription towards the undertaking. Under clause 8 the number of directors of the Bow and Whitechapel Company is to be six;

and under clause 9 the District Company and the Tilbury Company each have the power of nominating three directors, thus nominating the whole board between them. That is really the whole of the Bill.

The CHAIRMAN—I will now move, gentlemen:—

"That the Bill now submitted to this meeting, intitled 'An Act to empower the Metropolitan District Railway Company and the London Tilbury and Southend Railway Company to subscribe towards the capital of the Whitechapel and Bow Railway Company' be and the same is hereby approved, subject to such amendments as the directors may approve and Parliament sanction."

Mr. JOHN WARREN—I have great pleasure in seconding that resolution. It is entirely the case, as the chairman says, that the whole of the board most cordially approve of it.

The resolution was agreed to unanimously.

### DELHI-UMBALLA-KALKA RAILWAY.

An extraordinary general meeting was held on Monday, at Winchester-house, Old Broad-street, E.C., for the purpose of increasing the capital by the creation of 60,000 new shares of 10*l.* each. Sir ANDREW CLARKE presided.

The CHAIRMAN said the board had now completed and signed the contract with the Secretary of State for the construction of the railway from Kalka to Simla. The terms of the contract were practically the same as those placed before the shareholders in November last, and the directors were satisfied that they were such as to justify them in asking the shareholders to authorise the increase of capital necessary to construct the line. The new capital would not trench in any way upon the rights of the present holders of the company's stock. The two lines would, as regards results of working, be for the present practically two distinct lines. The proposed extension had been urged upon the Government of India by the board for a number of years as being absolutely necessary for the full development of the company's line. Much of the present traffic was lost to the company between Umballa and Kalka owing to the competition with country carts, which now took traffic from the railway at Umballa direct from Simla for little more than the usual rate from Kalka to Simla, so that the company at present lost a large proportion of the goods traffic over the section between Umballa and Kalka. By the construction of the Kalka-Simla Railway practically all this traffic would be secured to the company, and the receipts of the main line consequently be considerably increased.

The resolutions to increase the capital by 600,000*l.* were adopted.

## Directors' Reports.

### WATERLOO AND CITY RAILWAY.

The accounts to June 30th, 1898, show that 540,000*l.* has been received on capital account, and 511,317*l.* expended, of which 28,683*l.* was expended during the past half-year. The report states:—

"The directors fully relied on the completion of the railway in the early part of the past half-year, but their expectations have not been realised, and the opening for traffic cannot be arranged before August 1st next, on which date the train services will be commenced by the South Western Railway Company under the agreement of March, 1894. The directors much regret this delay, which has been entirely beyond their control, and is fully explained in the engineers' report.

"The interest payable during construction of the railway was limited to 25,000*l.* by the company's Act of 1893, and as that amount was reached with the distribution made in January last, there cannot now be any further similar payment to the proprietors out of capital.

"The conversion of the share capital into stock took place on March 1st last, and an official quotation was granted by the committee of the Stock Exchange.

"The statement of accounts shows the total capital receipts at the sum of 540,000*l.*, and the expenditure at 511,317*l.*, leaving a balance of 28,683*l.* at June 30th last.

"The estimated further outlay (90,000*l.*) and the available funds to meet the same (200,350*l.*) are stated in tables Nos. 7 and 8, from which it will be seen that the entire cost of the railway works and connected electrical equipment will be fully covered by the authorised capital of the company."

### CITY AND SOUTH LONDON RAILWAY.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 27,552*l.* (against 28,260*l.*), and an expenditure of 15,614*l.* (against 15,733*l.*), leaving net earnings 11,938*l.* (against 12,526*l.*). Adding the balance brought forward from previous account, 1,511*l.*, and sundry credits, 57*l.*, the total net revenue is 13,506*l.* Of this debenture and other interest absorbs 3,008*l.*, leaving a balance of 10,498*l.* Out of this the directors recommend that the full dividend of 5 per cent. per annum (amounting to 2,105*l.*) be paid on the perpetual preference shares, and they further recommend that a dividend at the rate of 2 per cent. per annum (amounting to 6,300*l.*) be paid on the ordinary shares, leaving a balance of 1,005*l.* to be carried forward to the next account. Number of passengers carried, 3,478,977 (against 3,437,810); season-tickets, 526 (against 523); length of line in operation, 3 miles 12 chains; train mileage, 235,342 (against 232,703). The capital account shows an expenditure of 1,270,455*l.*, whilst the receipts have been 1,242,784*l.*—viz., ordinary stock, 630,000*l.*; 5 per cent. preference shares, 297,320*l.*; debenture stock, 4 per cent., 167,701*l.* The report states:—

"Although the receipts from passenger traffic show no increase over the corresponding period last year, it is very satisfactory that they have

been maintained in spite of the fine mild weather that prevailed during the first portion of the half-year, and that last year the receipts for the month of June were abnormally swollen by the heavy traffic occasioned by the Diamond Jubilee festivities. This result has been obtained by a steady increase of the mid-day and short distance traffic. The progress with the works of the extension to Moorgate-street has been continuous and the tunnelling is rapidly approaching completion. The work of upholding St. Mary Woolnoth Church has been successfully carried out, and the large shaft for the lifts at this station is now being sunk. At Moorgate-street both station tunnels are completed, while at Lombard-street and Denman-street the construction of these tunnels is proceeding rapidly. A contract on favourable terms has been entered into for the construction of the extension to Clapham-common. The sites for the stations having been acquired, the work has been commenced, and should be completed by the end of August, 1899. The property adjoining the depot at Stockwell, referred to in the last report, has been purchased, and preparations are being made for the erection of the new engine and boiler house for the reception of the additional plant required for the working of the extension to Moorgate-street and Clapham-common, and the requisite engines and boilers have been ordered. Of the new locomotives required three are under contract, and several others are being constructed in the company's own works. Thirty additional carriages have also been ordered. The Bill promoted in the present session has received the Royal Assent. Its provisions, as explained at the special meeting in February last, were but slightly varied in its passage through Parliament. The City and Brixton Bill has also received the Royal Assent. At the conclusion of the ordinary business the meeting will be made special, in order to sanction the creation and issue of the additional capital authorised by the Act of the present session, and the exercise of the borrowing powers conferred under the same Act. The 22,500 ordinary shares offered to the proprietors in February last were all subscribed for and allotted. The 5 per cent. terminable debenture bonds have now all been paid off."

### NORTH WEST ARGENTINE RAILWAY.

#### CAPITAL.

The accounts to December 31st, 1897, show a total capital expenditure of 1,165,089*l.*, whilst the receipts have been 1,149,800*l.*—viz., deferred shares, 200,000*l.*; preferred shares, 350,000*l.*; first debenture stock, 6 per cent., 349,800*l.*; second debenture stock, 6 per cent., 150,000*l.*; preference debenture stock, 6 per cent., 100,000*l.*

#### REVENUE, &c.

The accounts for the year 1897 show a gross revenue of 83,257*l.* (against 100,493*l.* for 1896), an expenditure of 48,944*l.* (against 49,122*l.*), and a profit of 34,313*l.* (against 51,371*l.*). The above profit of 34,313*l.*, added to transfer fees and sundry other receipts, gave a total revenue in England of 35,188*l.*, which was 1,651*l.* short of the year's charges, including full interest on the second debenture stock. The second debenture interest has not, however, been paid, and the total arrears of interest are now as follows:—First debenture stock, 76,956*l.*; second debenture stock, 54,000*l.*

#### TRAFFIC, &c.

The number of passengers carried was 308,588 (against 308,305); the quantity of freight carried, 542,650 tons (against 656,054 tons); the number of train miles run, 244,928 (against 271,357); the receipts per train mile, 6*s.* 9*58d.* (against 7*s.* 4*88d.*); the expenses per train mile 3*s.* 11*96d.* (against 3*s.* 7*45d.*); the length of line open (exclusive of branches to sugar factories), 94½ miles (in each year); the ratio of expenses to receipts, 58.79 per cent. (against 48.88 per cent.). The report states:—

"The falling off shown in the receipts is entirely due to the decrease in the amount carried of those items of traffic which are dependent on the sugar industry—viz., cane, rum, sugar, and firewood. In other items of goods the amount carried is, on the whole, equal to that of previous years. In order that the title deeds of the land occupied by the line and stations may be obtained from the Tucuman Government, a survey is now being made showing distinctly the boundaries and enumerating the owners."

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Third Readings, House of Lords.—Mumbles Railway and Pier Bill; Barry Railway Bill.

Second Readings, House of Lords.—Cardiff Railway Bill; Fishguard and Rosslare Railways and Harbours Bill.

Third Readings, House of Commons.—Buenos Ayres Northern Railway Bill; Dover Harbour Bill; London Chatham and Dover Railway Bill.

Second Readings, House of Commons.—Isle of Wight Railway (Brading Harbour and Railway) Bill; Norwich Electric Tramways Bill; Rhondda and Swansea Bay Railway Bill.

The Great Western Railway (New Works) Bill and the Great Western Railway (General Powers) Bill come on Tuesday as unopposed measures before Lord Morley's Committee of the House of Lords. Formal proof of the preambles having been given, both Bills were passed in the form in which they were amended in their passage through the House of Commons. The new share and loan capital authorised by these Bills is nearly 1,000,000*l.*

Before a Lords' Committee on Thursday the Great Eastern Railway Company obtained running powers over the Sheffield District Railway into Sheffield. Upon this being acceded the Great Eastern Company withdrew the opposition it had threatened to the Sheffield District Railway Bill which was under consideration.

The Unopposed Bill Committee of the House of Commons on Monday passed the Bill empowering the London and North Western Railway Company to carry out numerous small improvements upon their Chester and Holyhead Railway. The same committee also passed the general powers of this company, under which over 13 miles of new railways and widenings are authorised, principally in connection with their Lancaster and Carlisle Railway. The new capital authorised by these two Bills is 1,650,000*l.*, with the right to issue upon this capital 550,000*l.* debenture stock. These Bills have now been sanctioned by both Houses.

After a long inquiry Lord Brougham's Committee of the House of Lords has thrown out the Bill under which it was proposed to incorporate a company with powers to construct a railway over 9 miles in length from Llanelly to Pontardulais, with branch lines forming junctions with the London and North Western Railway and with the Llanelly and Mynydd Railway. This scheme was promoted for the purpose of competing with the Great Western Railway Company, who were the principal opponents to the Bill. By the rejection of this scheme the Great Western Company retain Llanelly from competition, although in the course of the long inquiry an undertaking has been given to grant the London and North Western Railway running powers to the Llanelly Dock when it is completed.

### FISHGUARD AND ROSSLARE RAILWAYS AND HARBOURS BILL.

The Fishguard and Rosslare Railways and Harbours Bill, which has already passed through the House of Commons, came on Monday before the examiners of the House of Lords for proof of compliance with the Standing Orders. Mr. Greig, Parliamentary agent, appeared for the Dublin Wicklow and Wexford Company, and alleged various non-compliances in respect of the Bill as amended in the Lower House. Most of these were disallowed, but the examiners decided to report non-compliance in respect of certain powers given to the Great Western Railway Company, the name of that company not having appeared in the notices.

On Thursday the Bill came before Lord Morley's Committee on Standing Orders. The examiners reported non-compliance with the Standing Orders in that the Bill conferred powers on certain railway companies in respect of which notices had not been given and that there was no proof that the Bill as introduced into the House of Lords had been submitted for approval, as regarded financial clauses, &c., to the various railway and other companies and bodies concerned. It was stated that the Bill had not been submitted to the shareholders of the various companies because there had not been time to hold the meetings. The meetings were, however, convened for Monday or Tuesday, and after that time the promoters quite expected to be able to give the requisite proof of the approval of the shareholders. The committee agreed to dispense with the Standing Orders subject to its being proved before the committee to which the Bill is about to be referred that the shareholders of the existing companies affected approved of it.

### GREAT CENTRAL RAILWAY BILL.

The consideration of the Great Central Railway Bill was concluded, on the 8th inst., by a Select Committee of the House of Lords, the Earl of Northbrook presiding. Among other things the Bill seeks powers to construct a line about 6 miles in length, commencing at a junction near Northolt with the High Wycombe to Acton branch of the Great Western Railway, authorised in 1897, and joining the Metropolitan Railway at Neasden Station by way of a siding already belonging to the Great Central Railway. The only opponent appearing against the Bill in the second House is the Metropolitan Railway Company. Their petition recites that in 1890 the promoters—then the Manchester Sheffield and Lincolnshire Railway Company—entered into an agreement to connect their system with that of the Metropolitan Railway Company, thus forming a through route between London and the North, and in the session of 1893 obtained an Act authorising this extension of their system. Objection is taken to the construction of the railway No. 1 proposed in the Bill on the ground that it would be physically possible for the Great Central to deprive the Metropolitan Railway for either 39 or 33 miles of the whole of the Great Central traffic to London by conveying it over the Great Western Railway. It is alleged that such diversion of traffic would be contrary to the agreement of 1890. Mr. LITTLER, Q.C., in opening the case for the promoters, described the powers granted to the Great Central Railway by their Act of 1893 and the agreement of 1890, by which that company obtained running powers over the Metropolitan Railway to London. The contention of the Metropolitan Railway Com-

pany, which would prevent the Great Central from carrying any traffic over a railway made by themselves, was against public policy. Mr. WILLIAM POLLITT, general manager of the Great Central Railway, having given evidence, Mr. BALFOUR BROWNE, Q.C. (for the Metropolitan Railway Company), in addressing the committee, said he hoped to show absolutely, without calling any evidence, that there had been a gross breach of faith on the part of the Great Central Railway Company in its dealings with the Metropolitan Railway Company. Mr. LITTLER protested against counsel for the Metropolitan Railway Company bringing a charge of breach of faith without calling evidence to support it. Such a charge involved not only the Great Central Railway Company, but himself (Mr. Littler), the other counsel retained, solicitors, and everybody concerned. After a short deliberation as to whether Mr. Browne should be allowed to proceed, the committee decided that if they considered he made out a *prima facie* case of breach of faith they would ask him to call evidence. Mr. BROWNE said he did not intend to convey the impression that he would not call further evidence, but he hoped to show that there had been a breach of faith on the evidence that had already been heard by the committee. Proceeding, counsel dealt in detail with the Bill obtained by the Great Central Railway in 1893, the agreement of 1890, under which the Great Central obtained running powers over the Metropolitan Railway, and Mr. Littler's explanation of that agreement when the Bill was before the Parliamentary Committee. Mr. John Bell, chairman of the Metropolitan Railway Company, and Sir John Wolfe Barry, engineer to the company, were examined. In cross-examination Mr. BELL alleged that when Sir Edward Watkin was chairman of both the Metropolitan and the Great Central (then the Manchester Sheffield and Lincolnshire) his desire was to amalgamate not only those two companies, but to include the South Eastern in the combination. Mr. LITTLER replied on the whole case. The committee decided that the preamble had been proved, but adopted a clause, which Mr. Littler said the promoters were willing to accept, that nothing in the Bill should affect the Great Central Railway Company's Act of 1896.

By the passage of this Bill the Great Central secures a valuable precedent to assist it in establishing local lines in the neighbourhood of London and so securing a fair share of suburban traffic. From this point of view the decision of the committee is most important.

### OVERCROWDING ON RAILWAYS.

In the House of Commons on Thursday,

Mr. CHANNING asked the President of the Board of Trade whether his attention had been called to the successful claim brought by Mrs. Wiley in the Shoreditch County Court on Saturday last against the North London Railway Company for injuries received by her falling out of an overcrowded compartment in which she was obliged to stand against the door; whether he was aware that such overcrowding was constantly occurring on the London and suburban railways at certain times in the day; and whether he could take steps, by representation to the companies or otherwise, to induce or compel the companies to make better provision of carriages at such hours.

Mr. RITCHIE—My attention has been called to the case referred to, but I understand the company do not admit the accuracy of the facts as stated in the question. I am anxious to do everything in my power to press the companies to mitigate the evils arising from overcrowding, and correspondence is continually passing between the Board of Trade and companies on the subject. No remedy has been found. It is doubtful whether some companies can put on more trains or add more carriages to existing trains. Large accommodation is given by the metropolitan companies; for instance, the North London—the line upon which the accident to Mrs. Wiley happened—state that between 5 p.m. and 8.30 p.m. on week-days (Saturdays excepted) twenty-eight trains are run from Broad-street to Bow, having a seating capacity for 15,112 persons.

### METROPOLITAN RAILWAY—NEW STATION.

In the House of Commons on Tuesday, in answer to Mr. MASSEY-MAINWARING, who asked as to the position of the proposal of the Metropolitan Railway Company to erect a new station on their line at Clerkenwell,

Mr. RITCHIE said—The powers given to the company by the Act of 1885 to construct a station at Clerkenwell have lapsed. The vestry of Clerkenwell have asked the company to build a station near Rosebery-avenue, and the company inform me that the application is under the consideration of the directors, who have not come to a decision, as they are waiting for a report from their engineer. The Board of Trade have no powers of compulsion with regard to such a matter.

### CHINESE RAILWAY CONCESSIONS.

In the House of Commons on Monday,

Mr. J. WALTON asked the Under-Secretary for Foreign Affairs whether the grant of a railway concession from Peking to Han-Kau, in the Yang-tse Valley, had been made by the Chinese Government in favour of a Franco-Belgian Syndicate, as announced by the French Foreign-office; and whether the Government would lay upon the table the terms of the agreement which had been made by Great Britain with China as to the occupation of the Yang-tse Valley.

Mr. CURZON—We have heard that the contract with the Belgian Syndicate for the construction of the Peking-Hankow line was signed on June 27th. There had been no agreement with China as to the occupation of the Yang-tse Valley. The agreement by which the Chinese Government undertook, in response to the request of her Majesty's Government never to alienate any of the Yang-tse provinces, has already been laid on the table in the China Blue-book, No. 85, at page 39.

Colonel MILWARD asked the Under-Secretary for Foreign Affairs whether the Government had confirmation of the alleged opposition of the Russian Government to the construction of the Niu-chwang extension of the Peking and Taku Railway by money borrowed from the Hong-kong and Shanghai Bank, and of the threats of compensation employed by the Russian Government; whether such opposition foreshadowed a definite and exclusive sphere of Russian influence; and whether such action upon the part of Russia would cause an alteration in the policy hitherto pursued by Great Britain?

Mr. CURZON—Her Majesty's Minister at Peking has telegraphed that the Russian Chargé d'Affaires has made use of no such threat as that reported in the press and alluded to in the question. In these circumstances the considerations indicated in the second and third questions do not arise.

In the House of Commons on Tuesday,

Mr. JOSEPH WALTON asked the Under-Secretary for Foreign Affairs whether Russia had withdrawn her opposition to the ratification of the Hong Kong and Shanghai Bank loan for the extension of the Northern Railway to Niu-chwang on the condition that no mortgage upon the permanent way was given to the bank, and that the control of the line remained in the hands of the Chinese, and, if so, whether her Majesty's Government would insist that similar conditions should be imposed in all cases where foreign capital other than English was employed in the construction of railways in China in conformity with the conditions of equality of treatment secured by the Treaty of Tien-tsin.

Mr. CURZON—We have no confirmation of the reports alluded to in the question.

In the House of Commons on Thursday,

Mr. JOSEPH WALTON asked the Under-Secretary for Foreign Affairs whether the French were parties to the Belgian syndicate who had obtained a concession for the railway from Peking to Han-kau, in the Yang-tse Valley; whether he was prepared to state the terms of that concession; and whether that contract was in conformity with the assurances given by the Government of China in respect to the Yang-tse provinces.

Mr. CURZON—I have no information as to the extent to which any of the persons interested in the Belgian syndicate are of French nationality. The concession as signed has not been published, and I am unable to state the precise terms of it.

Mr. JOSEPH WALTON—May I ask whether, in view of the fact that the commercial interests of this country are so deeply involved in the question, the right hon. gentleman will address a telegraphic communication to Peking for information and will convey that information to the House when he receives it?

Mr. CURZON—It is quite unnecessary to send a telegraphic communication to Peking on the subject, because Sir Claude MacDonald has not only general but special instructions to acquaint us of all he can learn on the subject.

### RAILWAY RATES.

In the House of Commons on Thursday,

Sir SEYMOUR KING asked the President of the Board of Trade whether the Board of Trade exercised any supervision over the rate-books of the railway companies, with the view of verifying the fact that their rates were not in excess of the charges authorised in the schedules of the various Charges Confirmation Acts, and what, if any, steps it was in the power of the Board of Trade to take in cases where charges in excess of those authorised by the Acts appearing in the rate-books of railway companies were brought to its notice.

Mr. RITCHIE replied that the Board of Trade had no jurisdiction over the rate-books of railway companies. Section 10 of the Railway and Canal Traffic Act, 1888, conferred on the Railway and Canal Commissioners jurisdiction to hear and determine any question or dispute as to the legality of any rate charged or

sought to be charged for the conveyance of merchandise. This, so far as he was aware, was the only appropriate procedure which could be followed in regard to the matter referred to in the hon. member's question.

Mr. TOMLINSON asked whether the right hon. gentleman had any reason to believe that the traders were satisfied with the present state of the law.

Mr. RITCHIE said he had received various complaints, through the medium of his hon. friend amongst others, to the effect that the traders were not satisfied with the law as it now stood.

#### PROMOTION OF COMPANIES.

In the House of Commons on Tuesday,

Mr. FIELD asked the President of the Board of Trade whether the Government intend to hold an inquiry respecting the promotion of companies, whether the Public Prosecutor had any duty in this matter, and whether he could state how many prosecutions had been instituted since January, 1897.

Mr. RITCHIE said the answer to the first question was in the negative. With regard to the other questions, the promotion of companies was not an offence, and there had been no prosecutions since 1897.

#### THE LIGHT RAILWAYS ACT, 1896.

In the House of Lords on Tuesday,

The Earl of CAMPERDOWN said two years had elapsed since the passing of the Light Railways Act, and the report of proceedings under the Act to the end of last year was now before Parliament. By the Act power was given to the Board of Trade to confirm or alter orders made by the Commissioners for the construction of light railways, and such orders when confirmed had the effect of an Act of Parliament. When the Act was passing through the House objection was taken to the want of definition of a light railway, but still the Act became law, leaving the Board of Trade absolute power to say what was and what was not a light railway. Though Parliament had surrendered its powers in reference to light railways, it had not at the same time surrendered all interest in the subject, and so, when the report was laid before the House it was right and natural that the House should consider how far the intention of the framers of the Act had been carried out. For that purpose it was necessary to know not only the orders as confirmed, but the orders as proposed by the Commissioners, with the modifications made by the Board of Trade. Three orders were laid on the table of the House in 1897 and three more in the present year. In regard to every one of those orders the Commissioners were of opinion that continuous brakes were not required, and in every one of those cases the Board of Trade had incorporated continuous brakes. Then, with regard to signalling. In all those cases the Commissioners were of opinion that no signals were required except at places where the lines joined a main line of railway. In all those cases that clause of the Commissioners had been struck out and clauses had been inserted proposing signals of different sorts. He thought he had said enough to show that in some of the essential principles the Board of Trade had departed from the recommendation of the Commissioners. He would like to know by what tribunal these alterations were made, how far the opinions of the Light Railways Commissioners were taken into consideration, and whether they were consulted as to the alterations before they were made. He moved that the orders of the Commissioners as submitted to the Board of Trade be in future presented to this House together with the orders as confirmed by the Board of Trade.

Earl STANHOPE, in supporting the motion, said the result of the amendments of the Board of Trade was that these light railway schemes were hung up indefinitely. It was, he thought, a hard case to appoint gentlemen to do this work, voluntarily, at a considerable sacrifice of time, and then that their decisions on local inquiries should be set aside, overruled, or, at any rate, delayed by the action of the Board of Trade.

The Earl of DUDLEY said that the Board of Trade agreed that care should be taken not to strangle or stifle light railway enterprises. Although the public were aware of the requirements of the Board of Trade, the applications for orders instead of decreasing had been increasing, and the Board had been asked to sanction more than 1,000 miles of light railways throughout the country. It was said that the Board had insisted on continuous brakes where the Commission had not thought them necessary. But in many cases the promoters had said that no matter whether the Board of Trade insisted on continuous brakes or not, they intended to use them, because without them the manager of the line ran great risk of accident and criminal prosecution in cases of accident. But the Board of Trade being responsible for the public safety must lean more to stringency than laxity. Appliances conducive to safety insisted upon in the case of heavy lines had been dispensed with or modified in the case of light lines. The

Light Railways Act specially placed on the Board of Trade responsibility in this respect, and although the Board had every respect for the able work of the Light Railways Commission and the views they put before them, the Board could not divest itself of the responsibility Parliament had imposed upon it to take every precaution against the possibility of accident. Lord JERSEY, chairman of the Light Railways Commission, stated that although there was a difference of opinion as to technicalities between the Commission and the expert advisers of the Board of Trade he was satisfied with the relations between the Board and the Commission. But in order that there might be no possibility of misunderstanding the Board had arranged that, in addition to the presence of the Secretary of the Light Railways Commission, in future, upon any occasion when it might be necessary to alter an order, a Commissioner should wait on the Board to go fully into the reasons which had induced the Commission to take certain precautions. He hoped he had satisfied Lord CAMPERDOWN that the Board of Trade had done everything it could to meet the views of the Light Railways Commission. He was sorry his noble friend had raised the question at the present time, as the Act was yet too young for them to be quite certain how these matters would work out. He trusted, however, he had said enough to assure the House that the Board of Trade strongly felt the disadvantage of hampering enterprise with any unnecessary restrictions, and that so long as they could adequately discharge the responsibility which Parliament had laid upon them they were perfectly ready to meet both promoters and anybody else who might take their view of the case upon the most reasonable terms possible. In conclusion, he trusted his noble friend would not persist in his motion, as there would not be much advantage in laying these orders on the table. In the first place the orders would have been sanctioned, and, beyond that, it would be impossible for the House to derive proper information from the draft or the completed order.

The Earl of CAMPERDOWN said that all he wanted was some information of a sort that he could understand. At present the House were in absolute ignorance as to what was done by the Board of Trade and what was done by the Commissioners.

The motion was negatived.

#### PRIVATE BILL PROCEDURE (SCOTLAND) BILL.

The Select Committee appointed by the House of Commons to consider this Bill sat again on the 6th inst., Mr. Stuart Wortley in the chair.

Mr. CHANDOS LEIGH, Q.C., the Speaker's counsel, continued his evidence. He stated that the number of provisional orders applied for on behalf of Scotland was much less than those arising in England this year—in the proportion of 12 to 159. It would be a great convenience to have a draftsman attached to the local inquiry, even having in view the fact that clauses would be adjusted by the Secretary for Scotland. He reiterated his objection to the relaxation of Parliamentary control, which the adoption of the proposals in the Bill would involve. He did not consider that the two Chairmen of Committees would really represent Parliament. His objections to the Bill would be considerably diminished if local inquiry followed the second reading stage. The Light Railways Act was a five years' experiment, and he did not approve of the powers under the Act being conferred without Parliamentary sanction. To a certain extent, he admitted there would be more Parliamentary control under the Bill than existed under the Light Railways Act.

The Earl of MORLEY, Chairman of Committees in the House of Lords, said he had considered the present and previous proposals in reference to private Bill procedure, and held the view that it was desirable to have a simpler, cheaper system for schemes of a strictly local nature, and he favoured extension of the provisional order method. Speaking generally, schemes relating to municipal administration, gasworks, waterworks, and, to a large extent, tramways should be dealt with by provisional orders, but not railways. Nor would the system be suitable for Bills relating to public companies, and police and sanitary regulations formed matter for committee consideration, seeing that important points often arose as to whether a proposal encroached on the general law. The difficulty of obtaining peers to serve on private Bill committees was increasing since peers had undertaken duties in connection with county councils and other bodies, and the difficulty was greater with the more experienced chairmen. To the proposal for the constitution of a local tribunal he had not given much attention. An almost essential condition of such a tribunal was that an experienced draftsman or skilled adviser should be attached to it for the settlement of clauses. It was of great importance that Parliament should have control over the Bills, though procedure was shortened and simplified. There would under the Bill, he thought, be a disposition to question the decisions of local tribunals, and appeals to Parliament would

probably be pressed. On the question of devolution of functions to a local tribunal, speaking generally, one disadvantage would be that there would be too much rigidity, that such a tribunal would feel bound by precedent, and its decisions would not have the mobility and flexibility of decisions by Parliamentary committees. The decision of a committee was practically a decision by Parliament and carried more weight, and therefore would be more likely to give public satisfaction. Speaking from his experience, he thought it would be extremely difficult to get peers to undertake inquiries locally, and he pointed out that such a committee would lose its authority as a Parliamentary committee. The members would merely act as individuals experienced in affairs, though no doubt the fact of its being composed of members of Parliament would add to the weight of the committee. As to the functions of the Chairman of Committees in the House of Lords under the Bill, he saw no difficulty in undertaking the duty of dividing proposals into provisional orders and private Bills, but the Chairman would be placed in a difficult and anomalous position. At present he acted as the agent of Parliament, but under the Bill he would act as an individual. Now he was appointed by the House, was responsible to the House, and at any moment his decision could be questioned by the House. This would be the first instance of Chairmen of Committees being mentioned in an Act, and the proposal seemed to him to raise a serious and an important question. He was unwilling to accept the responsibility which the Bill would impose, and would rather suggest that the Secretary for Scotland should refer the matter to Parliament as to how Bills should be dealt with, and then Parliament by order might direct any member to take action as proposed in the Bill. There would be something analogous to the process by which the introduction of Bills was now divided between the two Houses. He quite admitted the force of providing that powerful corporations should not be able to force people into the more expensive mode of procedure, but the qualifying words "without the leave of Parliament" or something of that kind might be added. Questions of *locus standi* might be left to be decided by the committee on the facts before them. A private Bill now came before him at all stages, and he marked on the margin suggestions for alteration or inquiries; but under the present Bill a more formal and less expeditious form of procedure would be instituted. He would not express doubt as to the capability of the proposed tribunal to discharge the functions to be intrusted to it. Whether it would command public confidence was matter of opinion. He would almost suggest that all railway schemes should be excluded from the Bill. For small branch lines the machinery of the Light Railways Act might be made available. It was no pedantic objection he took to the statutory creation of a new authority in the chairman; it was a real and serious objection; and he would hesitate to approve any scheme that removed the security of Parliamentary control by confirming order, and which would confer exceptional powers outside an Act of Parliament.

The committee adjourned.

### THE CARRIAGE OF BICYCLES.

In the House of Commons on Thursday.

Mr. BRYCE asked the President of the Board of Trade whether he could now state what progress had been made by the principal railway companies of the United Kingdom in endeavouring to provide proper facilities for the conveyance by rail of bicycles, for the reduction of the rates charged for their conveyance, and for setting apart at the larger stations places where they might be left without risk of injury.

Mr. RITCHIE—No, Sir; I am not able to make any statement on the subject. I have reason to believe that the matter is receiving the earnest attention of the railway companies, who are doing their best to deal with a very difficult problem.

## Law Intelligence.

### HOUSE OF LORDS.

(Present—The Lord Chancellor, and Lords Macnaghten, Morris, and Shand.)

#### REVELSTOKE v. THE COMMISSIONERS OF INLAND REVENUE.

This was an appeal from an order of the Court of Appeal affirming an order of the Queen's Bench Division. The question was whether a certain instrument or bond was to be stamped under the Stamp Act, 1891. It arose in connection with the Atchison Topeka and Santa Fé Railway Company, incorporated in Kansas, which was reorganised, with the result that a new company was organised. Under an arrangement bonds were issued in return for reorganisation certificates of deposits. With regard to English holders, the bonds were sent here to Messrs. Baring Brothers and Co. in an incomplete condition, in consequence, it would seem, of the insurance of complete bonds

being very heavy. The Vice-President of the Trust Company came from America for the purpose of signing the bonds, and did sign them, and so made them complete. This state of things raised the question whether the bonds were made or issued in England, and if they were they were liable to duty. The Commissioners of Inland Revenue, being of opinion that the bond was a marketable security issued in the United Kingdom, assessed the duty applicable to such a security transferable by delivery at 1s. for every 10l. of the money secured. The Queen's Bench Division approved of this adjudication, and the Court of Appeal took the same view. Lord Revelstoke now appealed, and on his behalf it was contended that the handing of the bond by Baring Brothers to the appellant was not an issue of the bond or an issue in the United Kingdom; that it was really an issue in New York, and the fact of it being countersigned in London was immaterial.

The LORD CHANCELLOR, without calling upon the counsel for the respondents, said that in his opinion this marketable security was both made and issued in London, and it was a document which, when completed, came undoubtedly within the meaning of the statute a marketable security. It was issued when it was for the first time delivered to a person entitled to receive it in London. In his opinion, it was also made in London, and the earlier history of the transaction was immaterial. It was admitted that, when the document got to London, it for the first time fell into the category to which the statute applied. He thought that the judgment of the Court of Appeal was substantially right.

The appeal was dismissed, with costs.

### COURT OF APPEAL.

(Before Lord Justice A. L. Smith, Lord Justice Rigby, and Lord Justice Vaughan Williams.)

#### SALT UNION, LIMITED, v. NORTH STAFFORDSHIRE RAILWAY COMPANY.

This was an appeal by the Salt Union from a judgment of the Railway and Canal Commission (Mr. Justice Wright, Sir Frederick Peel, and Viscount Cobham). The Salt Union claimed an allowance or rebate under section 4 of the Railway and Canal Traffic Act, 1894, from the rates charged to them by the North Staffordshire Railway Company, and they applied to the Railway and Canal Commission to determine what would be a reasonable and just allowance or rebate. Section 4 is as follows:—"Whenever merchandise is received or delivered by a railway company at any siding, or branch railway not belonging to the company, and a dispute arises between the railway company and the consignor or consignee of such merchandise as to any allowance or rebate to be made from the rates charged to such consignor or consignee in respect that the railway company does not provide station accommodation or perform terminal services, the Railway and Canal Commissioners shall have jurisdiction to hear and determine such dispute, and to determine what, if any, is a reasonable and just allowance or rebate." The applicants delivered their goods to the railway company at their own sidings and the goods were there placed upon the company's trucks by the applicants' servants, so that the company did not provide the applicants with any station accommodation, or perform any terminal services for them. Mr. Justice Wright, in delivering the judgment of the Commissioners, held that the applicants had not given sufficient evidence to show that they came within the terms of the section.—For the Salt Union, in support of the appeal, it was contended that the learned Judge had practically nonsuited them, although they had clearly brought themselves within the section. The applicants had to show that the company carried their goods and charged them rates, but did not provide station accommodation or perform terminal services. It was not necessary for them to go further, and show that the charges which were made included charges for station accommodation and terminal services. The applicants had made out a *prima facie* case, and the railway company ought to have been called upon to answer it.

Lord Justice A. L. SMITH said that, in his opinion, what was contemplated by section 4 of the Railway and Canal Traffic Act, 1894, was this—an application by a trader to the Commissioners asking them to allow him a rebate from rates charged to him by a railway company by reason of his being overcharged for station accommodation which had never been provided and terminal services which had never been rendered, in consequence of his not requiring such accommodation or services, inasmuch as he delivered his goods to the company at his own private siding. The applicants sought to construe this section as meaning that, though the trader did not show that he had been charged one penny for station accommodation or terminal services, yet he was entitled to carry in his case and prove the fact that no station accommodation had been provided and no terminal services had been rendered, and on proof of that only he was entitled to call on the railway company to prove that he had not been charged anything for station accommodation or terminal services. The

contention was that the company was bound to prove a negative where no affirmative allegation had been made by the applicants. He could not agree with that argument. In his judgment it was necessary for the applicants to give some presumptive proof that they had been wrongfully overcharged. He was prepared to decide the case against the applicants on the question of the true construction of the section. He quite agreed with what was said by Mr. Justice Collins in the case of "Corporation of Birmingham v. Midland Railway Company"—viz., that the onus was on the applicants to prove every part of their case.

Lord Justice RIGBY said that the applicants, in his opinion, were bound to make out a *prima facie* case somehow; they must raise a presumption that they had been overcharged. In this case they failed to give any evidence that they had been charged for accommodation not provided or for services not rendered. He quite agreed with what had been said by Mr. Justice Collins in the case which had been cited.

Lord Justice VAUGHAN WILLIAMS agreed in thinking that the appeal should be dismissed. He could not, however, take the same view of the section in question as had been taken by Mr. Justice Wright, though, inasmuch as that view was shared by his brother Collins and had now been approved by Lord Justice A. L. Smith, he felt great diffidence in differing. He thought that, looking at the facts of the case and the documents which had been produced, it was clear that the rates which had been charged by the company did not include any charges for station accommodation or terminal services, and the judgment appealed against ought to be affirmed on that ground. But he was not prepared to say that in his judgment it was necessary under this section for the applicant to prove more than that his merchandise had been delivered to the railway company at a siding not belonging to the railway company, and that a dispute had arisen as to what was a reasonable and just allowance or rebate. There seemed to him to be nothing which threw on the applicants the duty of showing more than that the amount of the charge made seemed to be unreasonable as a total charge.

The appeal was dismissed.

### SHOREDITCH COUNTY COURT.

(Before Judge French, Q.C., and a Jury.)

WILEY v. NORTH LONDON RAILWAY COMPANY.

In this case, Mrs. Emily Wiley, a widow, and proprietress of the George and Dragon public-house, High-street, Hoxton, sued the North London Railway Company for damages for injuries sustained through being thrown violently out of one of the company's carriages. Mr. Hayes appeared for the plaintiff, and Mr. James for the defendant company. In opening the case, Mr. HAYES said that the plaintiff went to Shoreditch Station on the evening of March 14th, with the intention of travelling to Bow. The platform was very crowded, as were the carriages when the train came in, and, in consequence, the lady with the plaintiff only managed to get into a third-class carriage, the plaintiff having got into a first-class carriage. This was also very crowded, several people having to stand up, including the plaintiff. As the train started the carriage was violently jerked, causing the plaintiff to be flung on to the platform, the door not having been shut. The JUDGE—You need not be so particular about it being crowded. The company are liable, because the person getting into the carriage would not know whether it was crowded or not. The plaintiff was called and bore out her counsel's opening statement. She said the shock had been such that she had not been able to manage the public-house for two months, besides having to go to the sea-side. Mr. JAMES—But you only went for five days, and the charge is 5*l*. The JUDGE—And quite right, too. Do you expect a woman of sixty-five to go away by herself? Mr. JAMES—If that is your Honour's opinion, I will not object to the amount. The JUDGE—Certainly it is my opinion, and it is ridiculous to try and bate the amount down. I should not allow it. Mr. JAMES (to witness)—Can you swear that you were not thrown out of the carriage? The JUDGE—Is it to be supposed that any one would wilfully throw an old lady of sixty-five out of a first-class carriage? It is not the usual class of passenger that would do that, I think. For the defence two porters were called, who said that the train had not started; they were just closing the door when the plaintiff fell out. The STATION INSPECTOR said the plaintiff told him it was entirely her own fault, as she was trying to force her way into a crowded carriage, and was pushed out. Mr. JAMES submitted that the lady was not ill at all. His HONOUR—That is nonsense, or else the station inspector would never have sent for a doctor. With regard to the pushing out, it is not conceivable to my mind that a first-class passenger would do such a thing without inquiring afterwards what injury he had done. Mr. JAMES—I submit that we are not liable. A passenger who gets into an overcrowded carriage does so at his or her own

risk. His HONOUR—It is not so. The passenger gets to the carriage-door, and does not know whether it is full or not, and in consequence jumps in, and the company are therefore responsible for what may happen to the person, exactly the same as in the case of a collision. Eventually the jury returned a verdict for the plaintiff for 75*l*. damages and costs, which his Honour allowed on the higher scale.

### RAILWAY AND CANAL COMMISSION.

(Lord Trayner presiding; Viscount Cobham; and Sir F. Peel—sitting in Edinburgh.)

CALEDONIAN RAILWAY COMPANY v. NORTH BRITISH RAILWAY COMPANY.

This was an application of the Caledonian Railway Company against the North British Railway Company to fix the terms upon which the applicants may exercise the running powers over the portion of the respondents' railways between Larbert and Carmuir (East) junctions and the harbours and docks of Bo'ness, including the branch to Bridgeness, conferred on them by the Bo'ness Town Improvement and Harbour Act, 1897. The applicants proposed that they should pay in respect of the exercise of the said running powers the following net tolls, without deduction on account of terminals, working expenses, or otherwise, viz.:—Passengers 2*d*. each, goods 4*d*. per ton, and minerals, including pig iron, 3*d*. per ton. The respondents replied that the terms for the exercise of running powers in Scotland are in nearly every case those of the Act of 1865—namely, that the running company shall receive 25 per cent. of the mileage receipts on account of working expenses.

Lord TRAYNER, in giving the judgment of the court, said it appeared that for many years past there had been a practice, certainly in Scotland if not elsewhere, in circumstances like these that the ordinary mode of adjusting the condition on which running powers should be exercised was by giving 75 per cent. of the rate to the owning company and 25 per cent. to the company exercising the running powers. That had been so often adopted, and with legislative sanction, that it really amounted to a rule, and the question, therefore, in this case was whether the Caledonian Company had shown that the present application was attended with any circumstances which ought in fairness to take it out of the general rule and induce the court to fix a different rate. In the particular case with which they were dealing the Caledonian Company had proposed that instead of following what he might call the usual rule, they should be allowed to exercise their running powers from Larbert to Bo'ness for fixed tolls. He must say that the tolls proposed seemed to him altogether inadequate, and that the proposal of the Caledonian Railway Company was entirely out of the question. But reverting to the proposal, on the other hand, of the North British Railway Company, he had now to consider whether the Caledonian Company had shown any reason why that proposal, which was a proposal in conformity with the prevailing rule, should on this occasion be departed from. He was unable to see any circumstances in the case presented which would justify the court in departing from that rule. They had fully before them the whole of the circumstances of the case, and he was very directly of opinion that they should now fix that the sum to be paid by the Caledonian Company to the North British Company for exercising running powers between Larbert and Bo'ness was 75 per cent. of the total rate. It had been stated to them that to fix such a proportion of the rate as that to be paid by the Caledonian to the North British would result in the Caledonian Company being practically prevented from exercising their running powers. Upon that matter he had no fear, and he ventured to think that Mr. Patrick took a somewhat pessimistic view of the case when he suggested that that would be the result. The Caledonian Company had their own ends to serve and in view when they obtained the Bill which gave them the running powers into Bo'ness. He had no doubt whatever that the Caledonian Company were well advised in proceeding to obtain these running powers, and that they had before them all the reasonable considerations which would influence them, as a profitable matter, in seeking to obtain those powers, and that they would now, notwithstanding this judgment, make that use of the running powers which they had, and gain that profit from it which they anticipated when they sought the powers from Parliament. There were other circumstances in the case which went very much to strengthen the view he was expressing, but which it was not necessary in deciding the case to go into. On the whole matter his lordship was of opinion that they should fix that the running powers should be exercised by the Caledonian Company over the North British Company's line from Larbert to Bo'ness on the terms which he had stated—namely, that the Caledonian Company should, after deduction of terminal charges, pay to the North British Company 75 per cent. of the rate and retain 25 per cent. for working expenses.

The other Commissioners concurred.

## CHANCERY DIVISION.

(Before Mr. Justice Byrne.)

LORD HASTINGS v. NORTH EASTERN RAILWAY COMPANY.

In this case the Right Hon. George Manners, Baron Hastings, claimed payment from the company of 3s. per ten (i.e., forty-five tons) for certain coal conveyed over a portion of a railway known as the Morpeth Branch Railway, and shipped at the port of Blyth, and for an account of the coal so conveyed and shipped. Assuming the sum alleged to be payable was a rent, the question of liability turned mainly on the construction of a number of documents, including a deed entered into with one of the plaintiff's predecessors in the title to the land. On this assumption his lordship delivered judgment some days since in the plaintiff's favour, but reserved for argument, which has since taken place, the question whether the plaintiff, being the successor in title of the former lord in respect of the land, as distinguished from the personal estate, was entitled to the 3s. per ton, which, as the defendant company contended, was not a rent passing with the ownership of the land.

Mr. Justice BYRNE delivered judgment as follows:—The interest conferred upon the railway company—viz., a wayleave over land of the grantor, with the right to make a railway thereover, and with the other powers given to them, is, in my judgment, an incorporeal hereditament, a property, and an estate capable of being inherited by the heir (if granted to an individual) and of being assigned to a purchaser. It is a "tenement" within the definition of Lord Coke, being an inheritance concerning or annexed to or exercisable within a corporeal inheritance. I have nearly followed the judgment of the court in the case of "*Martyn v. Williams*," and, following the further reasoning in the same case, I think that the plaintiff is the owner of the reversion within the statute of 32 Henry VIII. To quote from p. 830 of the report:—"There is in reality the relation of reversioner and owner of particular estate between them; there is exactly the same privity of estate as exists between reversioner and tenant properly so called, and upon the determination of the term the entire interest in the land would revert to the plaintiff as upon the expiration of an ordinary lease. In the ordinary case of owner in fee-simple and tenant for years, in which the relationship of reversioner and tenant within the statute certainly exists, the owner of the fee, upon the determination of the term, has vested in him a larger and more extensive interest in the corpus of the land than the tenant for years had. His interest in the minerals and timber, and, indeed, in the soil itself, is very different from that of such tenant." In the case of "*Norval v. Pascoe*" the decision in "*Martyn v. Williams*" was followed by Vice-Chancellor Kindersley, who dealt with other authorities bearing on the matter. In both the cases I have referred to the subject-matter was a lease or licence for a term to dig china clay, with ancillary powers, and in the present case the subject-matter is a lease or licence for a term of a wayleave for a railway to be made and used for traffic over the grantor's land. In general structure it follows the form of what is called "Lease of a wayleave" given in Mr. Davidson's *Precedents*. I think that the subject-matter in the present case is such as to bring it within the principle of the decided cases, and I refer particularly to "*Buckeridge v. Ingram*" and "*The Earl of Portmore v. Bunn*" for instances of analogous rights. In the latter of these an action was brought to recover rent against the assignee of the licence for a term to cut a channel to the river Wey, and, although the actual decision turned upon a variance between the declaration and the evidence, it was distinctly held that a mere easement upon the soil of others to make channels and towing-paths is a real hereditament. The covenant to pay rents or annual sums in the present case is in favour of the grantor, his heirs, and assigns, and although it is quite true that some of such rents or sums are, as I have held, payable, even although the traffic does not pass over any part of the plaintiff's lands, and that they are calculated in part on such traffic, nevertheless I consider that the rents are payable in respect of the hereditaments leased, and that the plaintiff is entitled to sue exactly as the original lessor might have done.

Execution was stayed in respect of payment of the amount to be found due on taking the account, pending an appeal.

The Swiss Chamber of Deputies has approved of the Bill authorising the Government to pay part of the cost of the Simplon Tunnel.

**EPPS'S COCAINER.**—Cocoa-Nib Extract. (Tea-like.)—The choicest roasted nibs (broken up beans) of the natural Cocoa, on being subjected to powerful hydraulic pressure, give forth their excess of oil, leaving for use a finely flavoured powder—"Cocaine," a product which, when prepared with boiling water, has the consistence of tea, of which it is now, with many, beneficially taking the place. Its active principle being a gentle nerve stimulant, supplies the needed energy without unduly exciting the system. Sold only in labelled tins. If unable to obtain it of your tradesman, a tin will be sent post-free for 9 stamps.—James Epps and Co., Ltd., Homoeopathic Chemists, London.

## ARAUCO COMPANY, LIMITED.

Mr. Edwin Waterhouse, the receiver and liquidator of the Arauco Company, Limited, has issued a circular to the bondholders proposing a scheme of arrangement between them and the company. Meetings of both classes of bondholders have been called for Friday, July 22nd. The principal features of the scheme are as follows:—

1. The bondholders shall exchange the bonds now held by them for new debenture stocks of the company upon the terms hereinafter stated.
2. The company shall be authorised to issue 400,000*l.* new 4 per cent. debenture stock (to be called first debenture stock) in place of the present 5 per cent. first mortgage bonds outstanding to the amount of 373,190*l.*, and the 5 per cent. first mortgage bondholders shall be entitled to receive and shall accept first debenture stock at par in exchange for the bonds now held by them respectively.
3. The directors may issue the balance of 26,900*l.* first debenture stock to such persons, at such times, and upon such terms as they shall think fit.
4. The first debenture stock shall constitute a first charge upon the entire undertaking and assets of the company—including the guarantee of the Chilean Government for the remainder of its duration—but the trustees for this debenture stock shall have power to release the Government from its guarantee if they think proper to do so, and upon such terms as may be approved by them.
5. The company shall also be authorised to issue 200,000*l.* new 6 per cent. (contingent) debenture stock (to be called second debenture stock) in place of the present 6 per cent. mortgage debenture bonds outstanding to the amount of 123,600*l.*, and the 6 per cent. mortgage debenture bondholders shall be entitled to receive and shall accept second debenture stock at par in exchange for the 6 per cent. mortgage bonds now held by them respectively.
6. The directors may issue the balance of 76,400*l.* second debenture stock to such persons, at such times, and upon such terms as they shall think fit.
7. The second debenture stock, together with interest thereon at the rate of 3 per cent. per annum, shall constitute a charge upon the undertaking and assets of the company ranking next after the first debenture stock but the remaining 3 per cent. interest thereon shall be payable only out of the net earnings of the company in each year, after providing for the other interest payable upon both classes of debenture stock.
8. Subject to the provisions of the Companies' Acts, the holders of second debenture stock shall be entitled to vote at all meetings of the company in the proportion of one vote for every 20*l.* of stock.
9. The holding of 500*l.* of second debenture stock shall be a qualification for a directorship of the company, and at the next ordinary meeting the holders of second debenture stock shall have the nomination of at least two directors to represent them. Thereafter the number and remuneration of the directors shall be determined by the holders of second debenture stock and the shareholders in general meeting.
10. All such alterations shall be made in the articles of association of the company as may be necessary for the purpose of carrying out this scheme.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## Forthcoming Meetings.

- July 18—Great Southern and Western Railway (Wharnccliffe), Dublin at 12.
- July 18—Great Western Railway (Wharnccliffe), Paddington Station, at 12.
- July 19—Lancashire Derbyshire and East Coast Railway (Half-yearly), Westminster Palace Hotel, at 3.30.
- July 22—Arauco Company, Limited (General Mortgage Debenture Holders), Institute of Chartered Accountants, Moorgate-street, E.C., at 12.30.
- July 22—Arauco Company, Limited (First Mortgage Debenture Holders), Institute of Chartered Accountants, Moorgate-street, E.C., at 11.30.
- July 25—North West. Argentine Railway (Annual and Special), Winchester-house, at 12.
- July 26—City and South London Railway (Half-yearly and Special), 46, King William-street, E.C., at 12.
- July 26—Great Eastern Railway (Half-yearly and Special), City Terminus Hotel, at 12.
- July 26—London and Blackwall Railway (Half-yearly), Fenchurch-street Station, at 1.
- July 27—Great Central Railway (Half-yearly), Manchester, at 12.
- July 27—London Brighton and South Coast Railway (Half-yearly), London-bridge Terminus, at 1.
- July 28—South Eastern Railway (Half-yearly and Special), City Terminus Hotel, at 12.
- July 29—London and St. Katharine Docks (Half-yearly), City Terminus Hotel, at 2.
- July 29—London Tilbury and Southend Railway (Half-yearly), City Terminus Hotel, at 12.

JULY 16, 1898.

## THE SUMMER SURPRISE PACKET.

The months roll by, and with the early days of July come the half pleasurable, half fearful anticipations of the British public as to the summer programmes of the companies—pleasurable, because those which annually come into force on July 1st are eagerly scanned, and never in vain, for facilities new or improved, comforts increased, distance in fact rendered still more negligible to the travellers on business or on pleasure. And well does the public know that these improvements, these novelties, are no isolated and transient catch-penny experiments. They represent a progress steady but irresistible, to which it may almost be said that money is no object and time no bar. They come to stay; year by year they are demanded as a right; as a right rather than as a concession they are granted; and year by year the public, like Oliver Twist, asks for more; and, unlike Oliver Twist, gets it. But we have used the word fearful, and with due deliberation. It is a strange irony which makes the dividend announcements synchronise with these midsummer gifts. With vast creations of new capital, expenditure rising in all directions, and fares falling virtually under the system which gives more and more for the same money, we have, it would seem to the unbiassed observer, a regular war in progress comparable without exaggeration to the more apparent but no more real rate fights so common in America. We are never tired of insisting upon the dual capacity of the public as railway proprietor and railway patron. It is, perhaps, too sweeping to say that an improvement in the status of the one is only to be purchased at the expense of the other, but it is certain that to pay Peter, not only Paul has to be laid under contribution, but even Peter himself. Admitting, however, that there can be no standing still, and that without progress forward there will be progress backward; yet we cannot forbear in the widest interest from expressing the hope that our railway managers will never allow a natural inclination to "go one better" than their rivals to tempt them to expensive "show" on unduly speculative premisses. Let us not be misunderstood. Our managers, by their foresight and enterprise, have brought into being vast and new sources of traffic. Their trains are full, and there are more of them. But the third-class passenger in his millions is ever the backbone of the revenue, and the millions are created rather by the through bookings and the special fares which cause two to travel where one travelled before, and so fill trains that once ran half empty and cost as much to run, than by the more adventitious attractions of the luncheon-car, the corridor-carriage, and the sleeping-saloon. In other words, it is to the perfecting of management rather than to the enhancement of luxury that our railways must look for increased receipts in the future. And, with these remarks, let us briefly see how these two elements are met in the summer programme of 1898. The actual services we propose to examine later, when a few weeks' experience has shown the advantages and shortcomings of the series into which they may be grouped. As regards principles, however, the noticeable features are the exploitation of Ireland, the simplification of long distance working by increasing the length of clear runs, and by uniformity of timing, the further growth of the special excursion fare system, and an enormous expansion of the restaurant car arrangements on

certain lines. There is no doubt that the railway world is at last waking up to the fact that in Ireland it has an almost virgin field, capable, in all probability, of rivalling the Highlands as a pleasure and health resort, and with a productive capacity as yet unmeasured and untried. We referred at length some weeks ago to proposed acceleration of the subsidised Irish day mails. This becomes a fait accompli on August 1st, and, meanwhile, our anticipation that at least a corresponding improvement would be found in the North Wall service has been amply verified. With a reduction of ninety minutes on the down journey and sixty minutes on the up trip to Euston—the changes being effected by putting back the hours of departure, and keeping the arrival times as heretofore—these services are put on a par with the best North Western performances on more competitive routes. The announcement that the East Coast companies had initiated a through train from King's-cross to Stranraer, for Belfast, seems to have originated in the desire of the North Eastern to extend to Newcastle and other northern towns the advantage of a quicker connection with Carlisle, as the distributing point on the west; and the through train talked of resolves itself into a through carriage between Newcastle and Stranraer only. Every addition to the express cross-country facilities is welcome. Wales and the West of England continue to be in tri-weekly communication with Cork *via* Milford, and the Great Western Railway service from Paddington to that port improves by an hour on its own record, and, while incidentally bringing certain important towns nearer to London, improves the Irish journey for those who place economy before mal-de-mer. To turn to the second point—the simplification of train-running. A general levelling-up of speeds rather than an acceleration of exceptional fliers is the order of the day. Thus is the traffic axiom recognised that no line is worked so efficiently as when all trains are timed at a uniform speed. The effect, of course, is to reduce what are known as traffic margins and to utilise the capacity of the line to the utmost. Were it possible, indeed, to limit all running to a uniform 40 miles per hour—longer as certain trains would take on the journey—there would doubtless be the possibility of enormously increasing the aggregate service, for much of the dead time due to these margins between following trains on varying speeds would be saved. It is probable that fuel consumption and general wear and tear of permanent way and rolling stock are twice as great at a 52-mile average, as adopted by the North Western and Great Western, as they would be with the 40-mile average suggested. Such a saving would enable the service to be increased, and the real facilities to the public enhanced in every way. Such, at any rate, is the opinion of more than one of the most public-spirited railway managers of the country. To turn from ideal to performance, we find that the London and North Western Railway, followed by the Great Western Railway, has still further increased the average run clear of stoppages, and has thus secured higher “inclusive” speeds while simplifying the general working and minimising sources of delay. This course has not only necessitated, but has made possible that which was necessary in any case, the running of additional trains to serve intermediate points. As regards our third subdivision, that of excursion fares, the palm is easily borne off by the East Coast companies in extending their system of excursion tickets at single fares for the double journey, to cover the far north of Scotland and thus practically the whole of the east coast. By directing the traffic thus stimulated into certain trains, a higher proportion of the accommodation provided is occupied profitably, and the old problem of spreading the traffic and economising in the expenditure of wasted energy is carried

forward another stage. Such a policy, conceived truly in the mutual interest, cannot be too highly praised. And, lastly, we come to the enhancement of luxury, for as such must be described the lavish increase in the provision of dining and luncheon cars principally by the North Western and to a lesser extent by the other great lines. There is hardly an important town on the London and North Western Railway system which is not thus catered for, not by one but by several trains daily, with restaurant accommodation for all classes. Such generosity may be appreciated as such for a short time, but it is soon looked for as a matter of course, rival lines have to follow suit, and the small advantage that the initiator may have temporarily gained is quickly lost, while all alike are committed to a permanently increased working expenditure. However, sufficient for the day are the dividends thereof, and certainly the public qua passenger has no reason for complaint in the summer programme of 1898.

### RAILWAY PASSENGER COMMUNICATION.

In May, 1897 a Departmental Committee of the Board of Trade was appointed to consider and report “whether the means of communication between the passengers in railway trains and the servants of the company in charge of the train at present adopted are efficient; and whether any particular system of communication in use or available is so efficient as to make its general adoption by the railway companies desirable.” The committee seem from their report, which has just been issued as a Parliamentary paper, to have gone into the question very thoroughly, having conducted various trials of different systems, taken evidence from the Board of Trade officials, and also officers of the leading railway companies. The railway interest was directly represented on the committee by Sir William Birt, general manager of the Great Eastern Railway, and Mr. G. W. E. Loder, M.P., a director of the Brighton Railway—two companies which are well advanced in the particular matter under the consideration of the committee. Under the Regulation of Railways Act, 1868, all railways are required to provide in every passenger train which travels more than twenty miles without stopping “such efficient means of communication between the passengers and the servants of the company in charge of the train as the Board of Trade may approve.” The penalty is 10*l.* for each case of default, and in the case of a misuse of these means of communication the penalty is 5*l.* The system most commonly in use is that afforded by means of an outside cord. This was approved by the Board of Trade in 1869, but, says the report of the committee now before us, “the approval was withdrawn in 1873.” As the outside cord system is still in use on the majority of lines, it seems to follow that technically the companies using it have been breaking the law and rendering themselves liable to penalties since 1873. Practically, three systems are now in use, the aforesaid outside cord or wire communication; one in which communication is afforded by electricity; and another in which the attention of servants on the train is attracted by a partial application of the brake. The first system is, as we have said, in most general use. The electrical system seems to find favour with Southern lines, for both the Brighton and South Eastern use it entirely, and to some extent the Chatham also use it. The brake system is adopted by the Great Central and the Furness companies and partially by the Cambrian. Both the electrical and brake methods have received the sanction of the Board of Trade in the various ways adopted by the companies named. Inquiries made as to systems in operation on

the Continent and in the colonies do not seem to have disclosed anything beyond those in use here, but certainly on the Continent the brake system seems to be most favoured. It is not surprising that the committee condemns the outside cord system and also the modification of it which consists of a cord or wire passing inside the carriage. More often than not it does not act. A passenger on the Great Western recounted the other day how, when passing through Reading, a station at which he wished to alight, he pulled the cord without attracting the attention of either the driver or guard. His bold attempt to rectify the mistake he had made in getting into the wrong train therefore failed. We have ourselves seen yards of the cord pulled out without having the desired effect. The brake system, too, we need not at all wonder, meets with the strong objection of some companies who do not care to "grant a passenger even a limited control over the brake." We can well imagine, for example, nervous ladies in an express train conspiring to apply the brake by a method such as this at the slightest provocation, and to have trains delayed in this promiscuous fashion is clearly more than any railway manager can assent to. The committee in their report do not appear to think that the increasing use of corridor and similar carriages does away with the necessity for this means of communication. Why not? Among the conditions which the committee think desirable in any system is that it should be easily interchangeable, that it should be easily applicable, and communicate with driver and guards; that it should be reasonably cheap, that it should afford an indication outside the carriage from which the communication is made, and that it should not necessitate extra couplings. Most of these are obvious enough, but we should like to add that the system should not be too "easily applicable," as it would lead to endless trouble. "So simple that a child can use it," it certainly should not be, and some more severe penalty for its misuse should be imposed. We believe that the existing much-maligned system is used, or rather misused, at least as much for people who wish to alight at a point at which they find the train does not stop, as for the purpose for which it is provided. The committee also—influenced, no doubt, by the recent outrages on suburban trains—go so far as to recommend that the law be altered so as to require efficient means of communication to be provided on every passenger train, irrespective of distance travelled without a stop. Among their other conclusions, they recommend the electrical system, and condemn the existing methods most generally adopted. They specially refer to an electrical system experimentally used on the Great Eastern, the main advantage of which is that the wires are carried along the brake pipes, so that in coupling the brake between two carriages the communication is at the same time completed. We print in another column a letter addressed by the Railway Department of the Board of Trade to the various railway boards calling attention to the committee's report, expressing the belief that the railways will adopt a proper means of communication and extend the provision to all passenger trains "without waiting for an alteration of the law." No doubt the matter will be taken into account in constructing new stock, and that some suitable method may be found of adjusting an improved means of communication to existing stock, but really the matter does not seem of such urgent importance as to warrant any special action on the part of the companies. The present system has existed for thirty years, and has apparently been technically illegal for the best part of that time, whilst the committee itself took thirteen months to prepare its report. Under these circumstances the matter may very well wait a little longer.

### SOUTH EASTERN CAPITAL.

On the prospective advantages which the agreement with the Chatham Company, now in course of negotiation, was expected to confer, Dover A rose during the early part of this month to 116½, as compared with only 111 a few weeks before. In spite of the satisfactory progress of the aforesaid negotiations, the price has recently slipped back to 112. The proceedings in connection with the working arrangement with the Chatham seem to be so far successful, and the details of the matter should be submitted to the respective meetings of the two companies' stockholders about the end of this month. The "bears" of Dover A have had a very useful lever, however, in the reported coming issue of capital, and the speculative buying of a rather miscellaneous character which set in when the negotiations with the Chatham were first broached certainly did not help the resistance of the market against the attack of the ursine party. As we pointed out in dealing with the Caledonian issue a week ago, the capital "bogey" has been a good deal to the fore in the home railway market lately, and, according to all indications, this unpleasant factor will be increasingly prominent in the coming months. On January 8th last we pointed out how capital expenditure generally was on the increase, and especially how large were the new powers being sought during 1898 by the leading companies. In the case of the South Eastern the position is this. At the half-yearly meeting on January 27th last the proprietors sanctioned the issue of half a million of share capital, but of what kind neither the resolution nor the directors' report gave any indication. The report, however, in referring to the authority asked for the half a million of capital said:—"The proprietors will be asked to sanction the issue of additional capital to the amount of 500,000*l.*, with corresponding borrowing powers, to meet further capital expenditure on widenings and works now in progress. The directors propose to offer the new capital to ordinary stockholders, and to issue it on such terms as will minimise the charge for interest until the new works have become remunerative." This did not give any indication of whether preference or ordinary stock was intended to be issued. If the latter, of course, the price of the existing stock would suffer; if preference stock, then it would have very little effect on quotations. The last issue of share capital was the 500,000*l.* of 3 per cent. preference stock (1897), which carries only 2 per cent. however until 1900. No ordinary stock has been created by the South Eastern since 1888. In that year half a million was offered to the proprietors at 10 per cent. premium, carrying interest at the rate of 3½ per cent. until December 31st, 1893, and thereafter ranking with the old ordinary stock; but only part of the issue was taken up, even on those comparatively favourable terms. So much for the stock authorised in January last; but that is not the end of the matter. The official notice of the meeting for the 28th inst. refers to a resolution to be then submitted authorising the issue of 940,000*l.* further share capital. Again, no indication is given of the stock which it is proposed to issue, and apparently we shall have to wait until the meeting for information on this point. The fact that by the passing of the proposed resolution the company will be able to issue in all 1,440,000*l.* of share capital, and that perhaps the directors may decide to issue ordinary stock to that extent has rendered the position rather uncomfortable for the "bulls." An issue, representing an addition of nearly 15 per cent. to the existing ordinary capital, would not be palatable just now, especially as the dividend outlook for the South Eastern, in common with other companies, is not over bright. Such an issue would require for its dividend the whole of the 60,000*l.* which in some quarters is the estimated advantage which

may be derived by the South Eastern from a better understanding with its rival. We are disposed to think the directors would be acting more wisely if they were to issue preference stock. The proportion of South Eastern ordinary stock to its total capital is 40 per cent., or well above the average ratio, and another  $1\frac{1}{2}$  millions added to its preference issues would certainly not render the capital account top-heavy. The company must have money to carry out widenings and improvements, which under its existing more enlightened management are already producing more efficient services, and may, in course of time, yield more satisfactory revenue results as well. At December 31st last the capital account was over-expended to the tune of 876,000*l.*, and with an outlay of at least half a million during this year, it is obvious that it must be put in funds by some means.

### HOME RAILWAY DIVIDENDS.

The first two home railway dividends apart from the City and South London, which hardly counts, were announced on Wednesday. They were those of the Brighton and Great Central companies. The first confirms the somewhat gloomy forecasts which we have indulged in for some time past, and in fact we thought that there was some hope that the Brighton would be able to repeat the  $4\frac{1}{2}$  per cent. paid for the first half of 1897, though that was practically a record for the first portion of the year. Its traffic receipts showed an increase as published of over 29,000*l.*, and 4,000*l.* extra was brought into the half-year. Notwithstanding the assistance thus afforded, the increase in working charges has been too much for it, and the Brighton has to diminish its dividend by  $\frac{1}{4}$  per cent. (to  $4\frac{1}{4}$ ), and the carry forward is 11,900*l.* against 16,376*l.* a year ago. This means that net revenue available for dividend has been reduced by about 15,000*l.*, and the increase in working will probably turn out to be about 40,000*l.* For the past year the dividend on Brighton Ordinary stock now works out at  $6\frac{3}{8}$  per cent., equal to  $6\frac{3}{4}$  per cent. on the deferred. The new half-year is handicapped by the diminished balance to the extent of about 5,000*l.*, and also by the fact that the full dividend will have to be provided on the 660,000*l.* of ordinary stock against interest at only  $3\frac{1}{2}$  per cent. in the corresponding period. This implies an addition to the half-year's capital charges of 17,400*l.* Its prospects of maintaining this half-year the  $8\frac{1}{2}$  per cent. paid for the second half of 1897 are therefore decidedly poor, and the only consoling feature in the situation is the fact that it may not require to carry forward so large a sum as the 26,243*l.* which remained after paying its dividend up to December 31st, 1897. As the sum named represents  $2\frac{1}{2}$  per cent. of ordinary dividend for the half-year it is obvious that it leaves a considerable margin to come and go upon. The Great Central Board have taken the bold step of dividing its profits right up to the uttermost farthing. They have declared a dividend at the rate of 1 per cent. per annum on the preferred ordinary, which is equivalent to the dividend of  $\frac{1}{2}$  per cent. per annum declared a year ago upon the original old stock, which at that time had not been divided into equal portions of preferred and deferred. The position of the company is very exceptional just now, and our own view, as expressed a week ago, was that the directors would not distribute anything on the preferred ordinary stock at this time, in view of the confusion that might arise six months hence if the preference dividends were not earned in full. We still hold the opinion that the present course decided upon is a mistake, and though the sum involved is only about 13,000*l.*, it may give rise to some curious questions in January next. The position is that by charging a large amount of interest charges to capital account the company, with the aid of a considerable increase

in gross receipts, has been able to show a profit earned upon its preferred ordinary stock at the rate of 1 per cent. per annum for last half-year. But during the current period the heavy interest charges thus met will have to be provided out of revenue, and if they are not met in full—which we think a very probable contingency indeed—some portion of the loss may fall upon the preference stocks. As the latter are entitled to their dividends in priority to the preferred ordinary on the basis of the year's profits, the question will then arise as to why this 1 per cent. on the preferred ordinary was paid when, according to the whole year's results, it may not have been earned. In other words, the 13,000*l.* now being paid to the preferred ordinary stockholders may turn out to be really due to the preference stockholders. Apparently the directors have decided to let the future take care of itself, and in the meantime take full advantage of this—the last for a long time, anyway—opportunity of paying an apology for a dividend to its preferred stockholders. To our mind the preference stockholders, and especially holders of the 1894 issue, which is most exposed to possible loss of dividend for this half-year, would be amply justified in opposing the distribution of 1 per cent. on the preferred ordinary for last half-year, and, taking all things into consideration, we are surprised that the directors have the temerity to recommend it. The Great Eastern dividend was announced on Thursday at the same rate as for the corresponding half of last year with 8,500*l.* forward as against 2,666*l.* As the gross traffic increase, allowing for under-publication, probably approximated to 100,000*l.*, it is clear that as we suggested last week, the growth of expenses of this line has overtaken the expansion in revenue. The market was satisfied, however, as in view of the poor Brighton result referred to above, a decline of  $\frac{1}{4}$  was looked for. In fact, Great Eastern rose by  $\frac{1}{2}$  per cent. The Tilbury dividend is also comparatively good, being 3 per cent. against  $2\frac{1}{2}$ , with 15,300*l.* forward against 7,572*l.* forward. Though  $\frac{1}{2}$  per cent. better than last year, it compares with  $2\frac{3}{4}$  in 1896. Regarding the large balance forward, it is desirable to keep in mind that it is maintained for the specific purpose of meeting a possible liability as the outcome of litigation with the Great Eastern in reference to the widening of the London and Blackwall Railway.

### PASSING NOTES.

The traffic receipts for the week ending July 9th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,761,976*l.*, which was earned on 19,253 $\frac{1}{4}$  miles. For the corresponding week in 1897, the receipts of the same lines amounted to 1,719,157*l.*, with 19,253 $\frac{1}{4}$  miles open. There was thus an increase of 42,819*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for two weeks to date amounted on the same thirty-three lines to 3,493,532*l.*, in comparison with 3,422,238*l.* for the corresponding period last year; increase, 71,294*l.*

A Barry correspondent writes:—"There can be no doubt now that the agreement arrived at between the Taff Vale and Barry railway companies at the time the latter withdrew their Bill seeking to promote a separate line running from Cogan to Cardiff provides for greatly improved facilities being afforded by the Taff Vale Railway Company, over whose line they have running powers. It is intended to widen the embankment and bridge between Grangetown and Penarth Dock, so as to allow another couple of railway tracks to be laid. The Barry Company will then enjoy practically independent access to the Great Western Railway, and afford a better train service between Barry and the Vale of Glamorgan Railway beyond. The through booking service between Cogan and Cardiff has already proved an advantage to the Barry Company."

The belated report of the North West Argentine Railway

Company for the year 1897 has at length made its appearance. Being one of the most insignificant of the Anglo-Argentine railway companies, the North West naturally takes the longest time of all to get out its report. The document tells a sorry tale of diminished receipts and extravagant expenditure, and again the poor debenture stockholders are done out of their due. The committee which was appointed two years ago to frame a reconstruction of the capital account—the board having confessed its incompetence to do so—has at last issued its report and recommendations, but whether the directors are going to forego any of their fees in favour of the committee which has done the board's work we are not told. The scheme on the whole is a fair one, though rather complicated, and should be acceptable to a majority of the stockholders.

Mr. Charles Pond, of the Metropolitan District Railway Company's Shareholders' Association, has issued a circular further criticising the administration of the undertaking. Most people will readily acknowledge that it is execrable—in fact, about as bad as it can be—and what the preference stockholders can be about to tolerate it surpasses our comprehension. A well-organised movement could evict the whole board in about six weeks. The management of the Metropolitan is little, if any, better, and it must be an irritating sight to shareholders to see the public approach the booking-offices with the intention of travelling by the railway, and then turn in disgust from the foul and smoky tunnels and hail the nearest cab or omnibus.

The London and North Western Railway Company have just made an important cession to their platelayers, the increase in wages affecting many thousand men. Foremen have had their wages increased 1s. 6d. per week, second men 2s. 6d. a week, and third men 3s. per week. The reason that the subordinates are to have larger advances than the foremen is the desire of the company to place them on a better footing in comparison with the foremen, who are still paid several shillings per week more than those below them. Where gangs of five men are employed the fourth and fifth men will receive advances in wages.

The Birmingham Railway Traders' Protection Association has just issued a circular pointing out that trade in the midlands is being greatly hampered by the excessive rates charged by the railway companies for the conveyance of goods to the coast, and suggesting that merchants should associate together so that they would become a formidable combination, and would thus be in a position to demand reasonable reductions of the present rates. The circular points out that individually merchants are powerless to obtain any concession from the railway companies.

Considerations of time and space preclude us from dealing with the voluminous circular, dated July 14th, issued by the official receiver and liquidator of that derelict concern, the Arauco Company, Limited. We may, however, have something to say in the next issue of THE RAILWAY TIMES, although the matter is really not deserving of serious notice. The scheme of reconstruction propounded by Mr. Waterhouse is purely visionary, and based on an utter misconception of the existing conditions in Chili.

Mr. Justice Ridley, at Manchester Assizes on Wednesday, was occupied in hearing a charge of manslaughter preferred against Joseph Whyte, the driver of the Lancashire and Yorkshire train which came into collision with another train at Leyland on Whit-Thursday, causing the death of two persons and the injury of many others. The prosecution alleged that Whyte had been criminally negligent in passing signals which were against him. Whyte was found guilty, and was sentenced to a month's imprisonment.

It is announced that the board of the South Eastern Railway Company has resolved to separate the offices of chief officer and secretary, which have hitherto been held by Mr. Stevens; and Mr. Charles Sheath has accordingly been appointed secretary of the company. Mr. Stevens will retain the position of chief officer, and we understand that he will be a member of the joint committee to be constituted under the proposed arrangement with the London Chatham and Dover Company.

Mr. J. G. Burgess, the chief representative of the London

and North Western Railway in Scotland, and who for many years held various important posts under the same company in Ireland, has been appointed to succeed the late Mr. W. G. Skipworth, of North Wall, Dublin, as the principal officer of the London and North Western Railway Company in Ireland.

If a certain gentleman does not get his finances straight pretty soon there is likely to be a vacancy on the board of the Nitrate Railways Company, Limited. It happens also that one of the late directors of this company—a well-known guinea-pig—is in pecuniary straits, but as he is blessed with wealthy relatives the difficulties in this case may be surmounted.

A special general meeting of the City and South London Railway Company is called for the 26th inst. "to sanction the creation and issue of the additional capital authorised by the City and South London Railway Act, 1898, and to authorise the exercise of the borrowing powers under the said Act, upon such terms and conditions the meeting may think fit."

First and third class weekly tickets are now issued between any two stations on the Furness Railway, available for six return journeys by any ordinary train, at a charge of six ordinary single fares. These return journeys can be made at any time during the week. The minimum charge is—first-class, 4s.; third-class, 2s.

The 2s. shares of the Pekin Syndicate have been rigged up to 115l. each, and rumour says that they are to be put to 500l. If the public knew all the parties at the back of this bubble promotion they would not give as many pence for them as are now asked in pounds.

An extraordinary general meeting of the Norwich Electric Tramways Company will be held on the 29th inst. for the purpose of authorising the borrowing by the company on mortgage of the sum of 60,000l. at interest after the rate of 4l. per centum per annum.

The subject of the "illustrated interview" in this month's *Railway Magazine* is Mr. Ammon Beasley, the general manager of the Taff Vale Railway.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 26th inst.*

CITY, FRIDAY EVENING.

The position of the MONEY MARKET has undergone no change during the past week, three months' paper being still done at  $1\frac{1}{2}$  per cent., short loans at  $\frac{5}{8}$  to  $\frac{3}{4}$  per cent., and call money at  $\frac{1}{2}$ . The Bank directors made no further change in the official minimum at their meeting on Wednesday. The Bank Return issued yesterday shows that the exports of gold and the continued expansion in the internal circulation of coin have been partly counterbalanced by the return of notes from the country, so that the reserve is only 264,000l. lower at 25,040,000l.; its proportion to the current liabilities has fallen from  $46\frac{3}{4}$  per cent. to  $46\frac{1}{2}$  per cent. Government payments, probably of dividends to belated fundholders, have diminished the public deposits by 856,000l., and the private deposits are thus 606,000l. higher on balance. Since the return was made up gold to the amount of 30,000l. has been withdrawn from the Bank.

Silver bars are now quoted at 27 5-16d. per oz., being  $\frac{1}{4}$ d. higher on the week. A year ago the price was 27 $\frac{3}{4}$ d.

Eastern exchanges are telegraphed as follows:—Bombay, 1s. 3 27-32d.; Calcutta, 1s. 3 27-32d.; Hong Kong, 1s. 11d.; Shanghai, 2s. 6 $\frac{1}{2}$ d.; Singapore, 1s. 11 3-16d.

The premium on gold at Buenos Ayres has risen during the week 175-50 to 176-00 per cent., making the paper dollar (nominally worth 4s. 2d.) now actually worth 1s. 5-25d. A year ago the premium was 187 per cent., and the value of the paper dollar 1s. 4-62d.

The Valparaiso exchange comes over to-day at 16 $\frac{3}{4}$ d., being  $\frac{1}{4}$ d. lower on the week. A year ago it was 17 5-16d.

The Rio de Janeiro exchange on London is 7 5-32d., being 1-32d. lower on the week. A year ago it was 7½d.

The Bank of Bengal has reduced its minimum rate of discount from 7 to 6 per cent. The Bank of Bombay has reduced its rate from 8 to 7 per cent.

The Bankers' Clearing-house return for the week ending July 13th, 1898, shows a total of 135,415,000l., as compared with 122,907,000l. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Renten, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£36,346,627	£36,731,125
Total Reserve .....	£25,040,373	£25,484,820
Proportion of Reserve to Liabilities...	46½ per cent.	49½ per cent.
Notes in Circulation .....	£28,106,255	£28,046,305
Bank Rate of Discount .....	2½ per cent.	2 per cent.
Open Market ditto .....	1½ per cent.	½ per cent.
Consols (account) .....	111½	112½
French Renten (account) .....	103f. 10c.	104f. 50c.
Paris Cheque Exchange .....	25f. 22c.	25f. 09c.
New York 60 days ditto .....	\$4 84½	\$4 86½

The STOCK MARKETS still remain extremely dull, and already the influences of the holidays are making themselves felt. Consols have fallen away ½ both for money and the account on selling for the purposes of the new Indian loan, which has already reached 4½ premium. British railway stocks have not been influenced much by the dividends declared so far, but on balance the course of prices has if anything been downwards. Chatham issues are easier, the ordinary having lost ¾, the second preference 2, and the first preference 1½, which is only natural, as the rise had been overdone. South Western ordinary to-day picked up 1, but is still down 4 on the week, largely in sympathy with the inexplicable collapse in Waterloo and City stock, which is down a further 7 points on the week, after allowing for a recovery of 1 to-day. Furness ordinary is marked up 2, and Isle of Wight deferred 2. The other movements are recorded in tabular form below. Americans, which have been more or less depressed all the week, picked up a little to-day on the fall of Santiago, which is taken to augur well for peace. On the week, however, prices mostly show a decline. Whether the time is yet ripe for a further upward movement it is difficult to say, but one of the first stocks to respond to any general recovery should be Norfolk preferred. A trifling recovery took place to-day in Canadian Rails, but it did little towards wiping off the effects of the depression which has held sway all the week. The traffic returns of these lines are certainly very disappointing, and, unless a change speedily takes place, the fall in prices will be justified. One of the features of the Stock Markets just now is the utter neglect of Foreign Railway securities; there appears to be an entire absence of buyers of any of these—not only of the discredited shares of Brazilian railways, but the leading Argentine and Uruguayan descriptions are without support. Costa Rica shares are, like the rest, very depressed, though the railway is believed to be doing remarkably well on the whole. The secret of the fall appears to lie in an attempt on the part of the Government—which is somewhat pressed for funds just now—to force a sale of its shares. This, of course, is resented by the market, and jobbers keep nominally marking the shares lower, on each attempt to sell. When the Costa Rica Government is brought to its senses and taught the rudiments of finance, this bugbear will be lifted from the market, and an important and speedy recovery in the railway shares should be witnessed. There are plenty of capitalists ready to give the Government a fair price for its entire holding, or to make an advance on the shares on easy terms; but the Government and its advisers must be taught the futility of attempting to force a sale of this large

block of shares in the open market. Arauco first debentures are up 6 points, presumably because the holders relish the prospect of being shorn, under the reconstruction scheme, of some of their rights. Southern Brazilian debenture stock is down 3½, and Natal and Nova Cruz debentures have shed a like amount. Paraguay Central debenture stock has added ½ a point to last week's rise of 2, there being a few inquiries for the stock on the improved prospects of the company under Mr. Cyril Smith's able management, and the improved relations he has established between the company and the Paraguayan Government. North West Argentine issues have not been effected by the reconstruction scheme just issued. Indian Railway securities are mostly a point or two higher on the rise in silver, and West of India Portuguese stock is up 5½.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Applications have been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Chicago and Western Indiana Railroad Company—\$216,000 additional general mortgage 6 per cent. gold coupon bonds, Nos. 14,153 to 14,368. New York Central and Hudson River Railroad Company—\$11,000,000 3½ per cent. Michigan Central collateral gold bonds of 1898, Nos. 1 to 11,000, of \$1,000 each; and \$53,000,000 3½ per cent. Lake Shore collateral gold coupon bonds of 1898, Nos. 1 to 53,000, of \$1,000 each.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Buenos Ayres Great Southern Railway Company, Limited—224,073 4 per cent. extension shares (1902) of 10l. each, issued at 11l. 10s., 4l. paid (of which 1l. 10s. is premium), Nos. 1 to 224,073. Colorado Midland Railway Company—\$6,250,000 first mortgage 2 3/4 per cent. fifty-year gold bonds of 1947, Nos. 1 to 6,250; \$861,000 first mortgage 4 per cent. fifty-year gold bonds of 1947, Nos. 6,251 to 7,111; and voting trust certificates for \$4,644,800 4 per cent. non-cumulative preferred stock, and \$3,420,200 common stock, in lieu of the first mortgage 6 per cent. bonds and consolidated mortgage 4 per cent. fifty-year gold bonds now quoted. South Western of Venezuela (Barquisimeto) Railway Company, Limited—407,000l. 3½ per cent. first mortgage debentures, Nos. 1 to 4,070; and 480,841l. 3½ per cent. second mortgage debenture stock, in lieu of the 7 per cent. first mortgage bonds now quoted.

Messrs. Thackeray and Co., of Cardiff, under date July 14th.

report as follows:—Barry undivided, 282½ (a fall of 4); ditto preferred, 125 (a fall of ½); ditto deferred, 161 (a fall of 3); Cardiff preferred, 114½ (unchanged); Port Talbot, 9½ (unchanged); Rhondda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 265½ (unchanged); ditto preferred, 123 (unchanged).

## Directors' Reports.

### LONDON BRIGHTON AND SOUTH COAST RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 26,218,234*l.*, whilst the receipts have been 25,638,456*l.*, viz.:—

Undivided ordinary stock .....	£2,755,952
Preferred 6 per cent. ordinary stock .....	2,640,780
Deferred ordinary stock .....	2,640,780
New ordinary stock .....	572,201
Preference and guaranteed stocks .....	10,428,175
Debenture stocks .....	5,900,961
Sundries .....	699,607

Debit balance, 579,778*l.* The estimate of further expenditure on capital account is 210,655*l.* during the current half-year, and 394,003*l.* in subsequent half-years—total, 604,658*l.* Capital powers and other available assets, 574,709*l.*

The capital expenditure during the past half-year was 177,748*l.*—viz., 118,398*l.* on lines open for traffic, 58,258*l.* on working stock, and 1,092*l.* on steamboats and dredgers.

#### REVENUE.

The receipts for the half-year ending June 30th were as follows:—

	1897.	1898.
Passengers—First-class .....	£103,319	£102,757
" Second-class .....	75,620	89,015
" Third-class and Parly. ....	548,494	542,770
" Annual and Season-tickets ..	124,462	133,425
Parcels, horses, &c. ....	82,973	85,989
Mails .....	6,790	6,940
Merchandise (less cartage expenses)...	196,612	202,672
Live stock .....	5,226	5,176
Minerals .....	132,731	139,409
Wharves (net) .....	7,940	6,723
Transfer fees .....	259	273
Rental of property—less payments repairs .....	37,588	40,329
Working steamboats (less reserved for depreciation and insurance) .....	Dr. 9,064	Dr. 11,802
Mileage of trains over East London Railway .....	204	215
<b>Total receipts .....</b>	<b>£1,313,154</b>	<b>£1,343,891</b>

The expenditure during the same period was as follows:—

Maintenance of way, works, &c. ....	£125,791	£139,887
Locomotive power .....	197,924	214,209
Carriage and wagon repairs .....	66,511	68,746
Traffic expenses .....	200,732	211,672
General charges .....	23,808	24,563
Law charges .....	3,790	4,285
Parliamentary expenses .....	448	128
Compensation—Passengers .....	909	1,040
" Goods .....	4,265	7,211
Rates and taxes .....	73,656	73,322
Government duty .....	11,692	12,702
Demurrage and mileage of rolling stock	3,251	3,379
Newhaven Harbour Working charges— less harbour dues, &c. ....	4,976	6,168
S.E.R. for user of joint lines .....	6,271	6,067
Tolls receivable, less tolls payable .....	Cr. 2,573	Cr. 2,808
<b>Total expenditure .....</b>	<b>£721,451</b>	<b>£770,571</b>

The net revenue and the manner of its disposal are shown hereunder:—

Balance from previous half-year .....	£22,283	£26,244
Net earnings .....	591,703	573,320
Interest account .....	2,423	3,582
<b>Total .....</b>	<b>£616,408</b>	<b>£603,146</b>
Prior charges .....	£137,570	£136,796
Preference dividends .....	260,704	260,701
Dividend on ordinary stock .....	62,264 <i>a</i>	74,887 <i>b</i>
" preferred ordinary stock .....	78,081 <i>c</i>	79,223 <i>c</i>
" deferred ordinary stock .....	45,547 <i>d</i>	39,612 <i>e</i>
" new ordinary stock .....	10,865 <i>f</i>	—
Balance to next half-year .....	16,376	11,923
<b>Total .....</b>	<b>£616,408</b>	<b>£603,145</b>

*a* At 4½ per cent. per annum. *b* At 4½ per cent. per annum. *c* At 6 per cent. per annum. *d* At 1½ per cent. per annum (held in reserve). *e* At 1½ per cent. per annum (in reserve). *f* At 7 per cent. per annum.

The gross receipts for the past half-year show an increase of 30,737*l.*, the expenditure an increase of 49,120*l.*, and the net receipts a decrease of 18,383*l.* The ratio of expenses to receipts was 57·34 per cent., in comparison with 54·94 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class .....	860,495	871,472
" Second-class .....	1,363,962	1,489,649
" Third-class .....	22,638,653	22,977,311
<b>Total .....</b>	<b>24,863,110</b>	<b>25,338,432</b>

Mileage—Lines owned .....	412½	412½
" Partly owned .....	30½	30½
" Leased or rented .....	9	9
" Lines worked .....	3½	3½
" Foreign lines worked over ...	16½	16½
" Total operated .....	472½	472½
Train mileage—Passengers .....	3,985,807	4,070,631
" Goods .....	872,452	928,364
" Total .....	4,858,259	4,998,995

The report states:—

The comparison of this half-year with the corresponding half-year of 1897 shows an increase of 30,737*l.* in gross revenue, and an increase of 49,120*l.* in working expenses. The increase in gross revenue may be taken as satisfactory, having regard to the fact that the last part of the June half-year of 1897 included the receipts due to the Diamond Jubilee celebrations and the naval review at Spithead. Of the present increase, 19,240*l.* is attributable to coaching traffic, and 11,470*l.* to goods traffic. The increase in working expenses arises chiefly from the increase in the wages and number of the staff and the greater cost of material and coal, the rise in the cost of coal being mainly caused by the strike in South Wales.

The Workmen's Compensation Act, 1897, which came into operation at the beginning of the current month, has put an end to the Company's Accident Insurance Scheme, but permits of the establishment by an employer of a scheme of insurance for his workmen, provided it obtains a certificate from the Registrar of Friendly Societies. The directors have accordingly framed a new insurance scheme (particulars of which are circulated with this report), and as a very large majority of the men have declared in favour of it, the directors have submitted it to the Registrar for approval, and, if sanctioned by him and the proprietors, they propose to put it in force. The scheme being an optional one, as required by the Act, any of the company's servants who prefer to rely on the provisions of the Act will be at liberty to do so. A resolution approving the scheme will be submitted to the proprietors.

The company's Bill, authorising the widenings and other works which were mentioned and explained in the last half-yearly report, and the Newhaven Harbour Company's Bill sanctioning sea defence works between Newhaven and Seaford, have passed both Houses of Parliament, and only await Royal Assent.

The accounts for the half-year show a balance of revenue over expenditure of 573,320*l.*; balance from last half-year, 26,243*l.*—together, 599,563*l.* Of which the payment of interest on debenture stock, &c., requires 133,214*l.*, and on guaranteed and preference stocks, 260,704*l.*—together, 393,918*l.*, leaving a balance of 205,645*l.* The directors recommend a dividend for the half-year of 2*l.* 5*s.* per cent. on the undivided ordinary stock, and of 3*l.* per cent. on the preferred ordinary stock, amounting together to 154,110*l.*, leaving a balance of 51,535*l.*, of which 39,612*l.* is held on account of the dividend on the deferred ordinary stock, payable at the end of the year, and 11,923*l.* will be carried forward to the current half-year.

**Great Southern and Western Railway.**—A special general meeting will be held on the 18th inst., when the following Bill will be submitted for the consideration, and, if thought fit, for the approval of such meeting, viz.:—"A Bill to authorise the construction by the Fishguard and Rossclare Railways and Harbours Company of new railways from Waterford to Rossclare and the acquisition by the company of the undertakings of the Fermoy and Lismore and the Waterford Dungarvan and Lismore railway companies, to confer running powers over certain railways, to extend the time for completion of works authorised by the Fishguard Bay Railway and Pier Act, 1893, and for other purposes." It is also proposed to submit for the consideration, and, if thought fit, the approval of the meeting, clauses which have been introduced into the said Bill, giving power to the company to subscribe the sum of not exceeding 250,000*l.* for the purposes of the Bill, and to raise capital for the purpose of such subscription.

**South Eastern Railway.**—At a special general meeting called for the 28th inst., the directors will submit the following resolutions:—(1) For authorising the creation and issue of additional capital not exceeding in the whole 940,000*l.*, being the balance remaining unissued under the powers of the South Eastern Railway (Various Powers) Act, 1882, the South Eastern Railway (Various Powers) Act, 1885, and the South Eastern Railway (Various Powers) Act, 1885; and the exercise of the remaining borrowing powers of the said Acts, and the creation and issue of debenture stock. (2) For authorising the company, in pursuance of the provisions of the Crowhurst Sidley and Bexhill Railway Act, 1898, to guarantee the capital, debentures, or debenture stock of the said company, or at their option to subscribe towards such capital, debentures, or debenture stock to an amount not exceeding in the aggregate 200,000*l.* (3) For authorising the company, in pursuance of the provisions of the Chipstead Valley Railway Act, 1898, to guarantee the capital, debentures, or debenture stock of the said company, or at their option to subscribe towards such capital, debentures, or debenture stock to an amount not exceeding in the aggregate 200,000*l.*

## American & Canadian Railways.

### BALTIMORE AND OHIO.

The reorganisation managers of the Baltimore and Ohio Railroad Company notify the holders of securities affected by the plan that the time for further deposits of the bonds and stocks has been fixed and limited to August 1st, 1898, after which date deposits will be accepted, if at all, only upon such terms and conditions as the managers may impose. Notice is given to holders of Mercantile Trust Company's certificates of deposit or receipts for first preferred stock, second preferred stock, and common stock of the Baltimore and Ohio Railroad Company that, the success of the plan for reorganisation appearing assured, the reorganisation managers call for payment of the first instalment, being 25 per cent. of the cash payment of \$2 per share of the first preferred stock deposited, and for 25 per cent. of the cash payment of \$20 per share of the second preferred and common stock deposited, which must be made at the Mercantile Trust Company, New York, or at the London and Westminster Bank, Limited, London, on or before August 1st next.

Messrs. Brown, Shipley, and Co. announce that the period of fourteen days having elapsed, they have deposited, under the plan of reorganisation, with the London and Westminster Bank 1,682,800l. first mortgage  $4\frac{1}{2}$  per cent. sterling bonds (Philadelphia division), due 1933, against which their certificates have been issued (being over 70 per cent. of the total issue of bonds), and \$6,233,000 first mortgage  $4\frac{1}{2}$  per cent. terminal gold bonds, due 1934, of the above company, against which their certificates have been issued (being over 73 per cent. of the total issue of bonds). They further announce that the syndicate having offered to purchase overdue coupons on and after the 15th inst., they will obtain and pay to their certificate-holders, should they desire it, proceeds of the coupons due October 1st, 1897, and April 1st, 1898, of the first-named issue, and December 1st, 1897, and June 1st, 1898, of the second-named issue, with interest thereon at 5 per cent. per annum to July 8, 1898. The further interest on the bonds from the date of the last coupon up to July 1st, 1898, will be payable on completion of the reorganisation.

Messrs. J. S. Morgan and Co., London, and Messrs. J. P. Morgan and Co., New York, announce that holders of certificates of 5 per cent. Baltimore and Ohio Railroad sterling bonds (Chicago Division) due 1927, of 6 per cent. Baltimore and Ohio Railroad sterling bonds of 1874, and of 6 per cent. Pittsburgh and Connellsville consolidated mortgage bonds due 1926, representing in each case more than 60 per cent. of the bonds deposited with them, having given their written assent to the reorganisation scheme, they are empowered to deposit all bonds under the plan. Any certificate-holder who fails to transmit to them his written assent is informed that unless on or before July 28th, 1898, he shall have notified them of his dissent he will be considered by them to have assented to a deposit of his bonds under the said plan. A similar notice is also published by Messrs. J. P. Morgan and Co., Brown Brothers and Co., and Baring, Magun, and Co., New York, stating that over 75 per cent. of the certificate-holders of 5 per cent. Baltimore and Ohio Railroad consolidated mortgage bonds of 1888 have assented to the reorganisation plan. Messrs. J. S. Morgan and Co., Brown, Shipley, and Co., and Baring Brothers and Co., Limited, London, recommend holders of certificates for such bonds to assent to the terms proposed for the bonds under the plan of reorganisation.

### LOUISVILLE AND NASHVILLE.

The preliminary statement of the Louisville and Nashville for the year ended June 30th shows:—Gross earnings, \$21,966,000—*increase*, \$1,594,000; net earnings, \$7,104,000—*increase*, \$581,000; total net income, \$7,694,000—*increase*, \$744,000; surplus over all charges, \$1,621,000—*increase*, \$642,000.

The following statement, signed by Mr. August Belmont, has been sent to us for publication:—"The general results of the operations of the Louisville and Nashville Railroad for the fiscal year ended June 30th, 1898, show an estimated surplus of \$1,621,143. There have been appropriated out of this surplus the following amounts:—For couplers and air-brakes, \$500,000; for rolling stock, \$500,000; for reduction of grade, \$248,441; making a total of \$1,248,441. The amount for the purchase of couplers and air-brakes is sufficient to fully equip, in accordance with the requirements of the Interstate Commerce Commission, all the cars in the service of the company. While the rolling stock has been fully kept up and added to, the increased business of the company has required an addition to the same, the cost of which it was not deemed advisable by the board to charge to the capital account. The reduction of the salaries of the officers and employes, which went into effect in 1893, has been restored (50 per cent. commencing July 1st, 1898, and 50 per cent. commencing

January 1st, 1899), which will appear in operating expenses for the coming fiscal year. The above appropriations complete the extraordinary expenditures which appear necessary to be made, and the surplus earnings which accrue hereafter will be applicable to dividends."

### CENTRAL PACIFIC.

We have received from the Central Pacific Railroad Shareholders' Combined Protection Committees of 1894 and 1898 a somewhat lengthy pamphlet, signed by Mr. Walter Morshead, vice-chairman. Mr. Morshead's charges against the Banbury Committee, on pages 18 and 19 of the tract, are of the most direct and formidable character, and it is stated by one of the directors of the company, Mr. Bretherton, that Sir Rivers Wilson's mission effected no good whatever.

In the course of an interview on the 8th inst., C. P. Huntington said, regarding the importance of the Bill which has been adopted by Congress for the settlement of the Central Pacific debt:—"We have not made up our minds what we had better do. The Bill gives us some little time in which to fix matters up with the Government, and many things are likely to happen in the next twelve months. My impression is that there will be some arrangement come to that is satisfactory to the Government and also to the shareholders. I built the road, and I have still some shares for which I was once offered 76. There have been some complaints in London about me, but I know myself, and I am satisfied I am doing right for shareholders. All the transcontinental roads have been in bankruptcy except the Great Northern. The Central Pacific has always paid its bills, except to the Government. In 1862 and 1864, when Congress passed the Central Pacific Bills, no one supposed that anything would be paid to the Government more than the service to the Government. I say to shareholders I am looking out more particularly for them. The Government has received \$3 in benefits for every \$1 it has advanced in the construction of the road. The new Bill is encouraging to the extent that it will probably lead to something else."

### LATEST EARNINGS.

First week of July.—Baltimore and Ohio South Western, \$107,000—*decrease*, \$3,000; Chesapeake and Ohio, \$189,000—*decrease*, \$8,000; Chicago Milwaukee and St. Paul, \$588,000—*decrease*, \$35,000; Denver and Rio Grande, \$140,000—*decrease*, \$27,000; Louisville and Nashville, \$389,100—*increase*, \$17,000; Mexican Central, \$200,000—*decrease*, \$39,000; New York Ontario and Western, \$70,000—*decrease*, \$5,000; Southern Railway, entire system, \$390,000—*increase*, \$44,000; Texas and Pacific, \$101,000—*increase*, \$3,000; Wabash, \$219,000—*increase*, \$18,000; Missouri Kansas and Texas, \$132,000—*decrease*, \$14,000; Missouri Pacific, \$360,000—*increase*, \$8,000; Oregon Railroad and Navigation, \$132,000—*increase*, \$27,000; St. Louis and San Francisco, \$124,000—*increase*, \$6,000; St. Louis South Western, \$74,000—*same as last year*; Norfolk and Western, \$199,000—*increase*, \$14,000.

Fourth week of June.—Cleveland Cincinnati Chicago and St. Louis, \$378,000—*increase*, \$34,000; Northern Pacific, \$538,000—*increase*, \$17,000. The gross earnings of sixty-nine railroads during the fourth week of June show an *increase* of 8.89 per cent.

Month of June.—Illinois Central, gross, \$2,065,303—*increase*, \$271,849.

Month of May.—Central Pacific, gross, \$1,474,000—*increase*, \$430,000; net, \$624,000—*increase*, \$214,000. Illinois Central, gross, \$2,235,000—*increase*, \$404,000; net, \$701,000—*increase*, \$175,000. Oregon Railroad and Navigation, gross, \$581,000—*increase*, \$202,000; net, \$217,000—*increase*, \$79,000. Philadelphia and Erie, gross, \$392,000—*increase*, \$37,000; net, \$121,000—*increase*, \$26,000.

### RAILROAD NOTES.

The Atchison Topeka and Santa Fé has sold \$3,500,000 of 4 per cent. general mortgage bonds at about the current market price to a syndicate headed by the Guaranty Trust Company, Messrs. Kuhn, Loeb, and Co., and Messrs. Speyer Brothers. Under the reorganisation the Atchison had \$30,000,000 of general fours in the treasury, to be applied to improvements at the rate of \$3,000,000 a year, but owing to the large gross earnings the company has not been obliged to issue its full quota annually. The directors deny the recent reports that they have ordered the payment of the full 4 per cent. interest on the adjustment bonds. They say that this question will probably not be taken up until the September meeting. Other authorities say that the directors' denial is merely technical, as a formal agreement has been already reached for such payment. President Ripley has arranged for a freight steamship line between Galveston and the principal ports of Europe.

A New York correspondent telegraphs:—"The Wyoming and

Western Railroad has been organised by independent coal producers to run from Scranton, Pennsylvania, to the seaboard, and also to New England, to carry coal only. The road will compete seriously with all the coal roads, as it will cut the freight rate to 60 cents per ton from 160 coal-producers. These coal-producers own all the stock of the road, and have already sold the bonds. The road will be completed within a year."

The Missouri Pacific Railway has bought the Central Branch Union Pacific Railroad from the Reorganisation Committee. No details have yet reached here; but it is believed that there were no bidders at over \$10,000 per mile for the Government loan, and that the purchase will be paid in bonds. This line has been operated by the Missouri Pacific Company under a twenty-five years' lease since 1885.

The holders of the second mortgage 5 per cent. bonds of the Pittsburgh and Western are forming another committee for the protection of their interests. The old committee consisted of Messrs. John T. Terry, Dumont Clark, and F. S. Smithers. The last coupon paid was that for November, 1895.

The report of the Pittsburgh Fort Wayne and Chicago the for year ending December 31st, 1897, shows a loss to the lessee company (the Pennsylvania) of \$229,911, as compared with a loss of \$587,097 for 1896, \$57,743 for 1895, and \$1,348,638 for 1894.

Vice-President Sykes, of the Chicago and North Western, says that the reports recently circulated as to a change of the relations between the Chicago and North Western and the St. Paul Minneapolis and Omaha are absolute falsehoods.

The New York Stock Exchange Committee directs that on July 18th the additional capital stock given as dividend to the stockholders of the Chicago Rock Island and Pacific will be listed, making the outstanding capital \$50,000,000.

The directors of the Northern Pacific Railroad Company have declared the regular quarterly dividend of 1 per cent. on the preferred stock. There will be no distribution on the common for at least another year.

Last week's east-bound all-rail freight tonnage from Chicago was 45,000 tons, against 55,000 for the corresponding week last year. The Fort Wayne road led with 6,000 tons.

It is now reported that the Texas and Pacific seconds will probably receive 2½ per cent. in cash next March.

It is stated that the Illinois Central Railroad Company is about to start a steamship service between New Orleans and Mexico.

It is announced that railroad rates are being badly cut between Chicago and Kansas City.

## General News.

### OPENING OF THE WATERLOO AND CITY RAILWAY.

The Waterloo and City Railway was inaugurated on Monday last by His Royal Highness the Duke of Cambridge in the presence of a large and representative gathering. The railway will be opened to the public on August 1st, and Monday's ceremonial may be regarded as almost in the nature of a trial trip. It was certainly most successful, as the run from Waterloo to the City was performed without a hitch of any kind in less than six minutes, the return journey being accomplished in about the same time, though it is intended that in ordinary working the time occupied shall be only five minutes. The entire arrangements gave general satisfaction, and there was a total absence of those unpleasantnesses in the matter of ventilation to which travellers have unfortunately to submit on the existing electric and steam railways of the metropolis. On returning to Waterloo the party were entertained at luncheon by the chairman and directors of the company. Amongst those present were Lord Stalbridge, Lord Cottesloe, Sir Henry Oakley, Sir Algernon West, Earl Russell, Lord Colville of Culross, Sir Charles Scotter, Sir W. White, Sir Courtenay Boyle, Mr. F. J. S. Hopwood, Mr. Hubbard, M.P., Mr. Percy Mortimer, Mr. F. J. Macaulay, Mr. Gooday, Colonel Mellor, M.P., Mr. G. T. White, Mr. J. Aird, M.P., Sir A. Binnie, Mr. Galbraith, Mr. W. H. Preece, Sir Benjamin Baker, Sir R. Farrant, Mr. Herbert Allen, Sir Dixon Hartland, Mr. Gough, Mr. Cripps, Q.C., Sir Allan Sarle, Sir Edward Bradford, Mr. H. M. Stanley, M.P., Sir Fred Marshall, Professor Thomson, F.R.S., Mr. C. G. Mott, Sir Charles

Sutton, Professor Kennedy, Mr. Hugh C. Smith, Sir Francis Marindin, Sir Whittaker Ellis, and many other representatives of public bodies more or less intimately associated with railways and engineering. Mr. Wyndham S. Portal (chairman of the company) presided. The CHAIRMAN, having given the toast of "The Queen," proposed that of "The Prince and Princess of Wales and other Members of the Royal Family," and, on behalf of the Waterloo and City and the London and South Western railway companies, heartily thanked his Royal Highness for his presence on the occasion.—The Duke of CAMBRIDGE, who was loudly cheered on rising to respond, said he was deeply gratified by the kind reception given to the toast and by the appreciative response which the mention of their Royal Highnesses the Prince and Princess of Wales and other members of the Royal Family had evoked. He was equally sensible of the compliment which the visitors assembled had paid to him personally. He was on the verge of eighty. (Cheers.) He had done his best for a great many years to serve the State in an official capacity and also as an ordinary citizen of the great metropolis. In years gone by he could never have anticipated the extraordinary progress which had been made during his lifetime. He was present when his Majesty King William IV. opened London-bridge, travelling thither in a splendid procession of State barges, beautiful in appearance, but slow in movement. (Laughter.) He was glad that he had lived long enough to accompany the chairman and those who were assembled that day in traversing a tunnel railway connecting the Waterloo terminus with the City of London. If, sixty years ago, anybody had ventured to predict that London was likely to see such a railway, he would have been considered a fit subject for a lunatic asylum. (Laughter.) Great intelligence and industry had been necessary to carry out such a project, and he congratulated the proprietors on the completion of the undertaking. (Cheers.) He hoped that the country would continue in the path of progress. No one deplored more than he did himself the strikes which from time to time occurred in the world of labour—troubles which he was afraid were calculated to drive away the trade of the country, and therefore to injure those in whose interest they were apparently promoted. He appealed to working men and to working women—for every woman had a keen interest in such matters—to do all they could to prevent such unhappy struggles, which were destructive to the industrial and commercial advancement of the nation. (Cheers.) His Royal Highness concluded by proposing "Success to the Waterloo and City Railway," and by asking the company to join with him in drinking the health of the chairman. (Cheers.) He hoped that the new line would prosper, and that it would attract a large amount of traffic, and so relieve the streets of London from some of the existing congestion. It would certainly be a great source of convenience and comfort to the public, and he trusted that it would be to the advantage of those who had had the courage to undertake it. (Cheers.) The CHAIRMAN, in responding to the toast, stated that the South Western Company had for half-a-century been anxious to obtain an access to the heart of the City. In the year 1848 they made the first step in that direction by changing their terminus from Vauxhall and Nine Elms to Waterloo, and from that time various efforts had been made to go further east. At one period they went so far as to purchase land very close to London-bridge, but when they came to go into the question of expense they found it better to await a more convenient season before proceeding with the extension which was then proposed. They next tried to carry out a scheme in conjunction with the South Eastern Company, but that company were unwilling to join in the working union which was then submitted. The opening of the South London Electric Railway in 1890 gave a new impetus to that kind of locomotion, and suggested the Waterloo and City Railway, by which those assembled that day had been carried to and from the City in about ten minutes—a feat which had never before been accomplished. (Cheers.) The undertaking had not been completed without the assistance of gentlemen of great knowledge and experience. The companies were greatly indebted to Mr. Galbraith and to the late Mr. Greathead, the first engineers of the line, and also to Professor Kennedy, who had succeeded Mr. Greathead. In the absence of that gentleman through indisposition, he was bound further to mention the name of Mr. Dalrymple-Hay, the resident engineer, who had been so careful, so energetic, and so laborious in all his work. (Cheers.) They were similarly under obligation to Messrs. Siemens Brothers and Co.; to Mr. W. H. Preece, the electrician of the Post-office; to Messrs. Mowlem and Co., the principal contractors; and likewise to Messrs. Perry and Co., who at Waterloo had successfully executed the difficult task of moving one of the immense piers upon which the station rested, and of erecting in its place an arch of 40ft. span.

Details of the progress of the works have appeared in the columns of THE RAILWAY TIMES from time to time. The object of

the Waterloo and City Railway is to afford the London and South Western Company access from their terminus at Waterloo to the heart of the City. The necessity of such a connection was recognised by the directors of the company more than half-a-century ago, and from time to time schemes have been projected with the intention of providing such a railway. All involved an enormous outlay, ranging from 3,000,000*l.* to at least 5,000,000*l.* The directors were unwilling to purchase a City approach at this price, but when they found that the purpose could be achieved by means of an electrical railway deep underground at a cost of about 500,000*l.*, they at once decided to carry out the project. In South London the success of electrical haulage for train service had been clearly demonstrated, and Parliament readily gave its assent to the construction of a double line, carried in tunnels, from Waterloo to the Mansion-house. An independent company was created for the management of the railway, with Mr. Wyndham Portal, the chairman of the London and South Western Company, at its head. Plans were prepared by Mr. W. R. Galbraith, the consulting engineer of the London and South Western Company, and Mr. J. H. Greathead, the local supervision of the work being intrusted to Mr. H. H. Dalrymple-Hay. Mr. Greathead died during the progress of the work, and his place has since been filled by Professor Kennedy, who made himself responsible for the whole of the electrical arrangements as they have been executed by Messrs. Siemens Brothers and Company. The contract for the line itself was let to Messrs. Mowlem and Company, of Millbank, who commenced operations in June, 1894, by erecting a timber pile staging in the River Thames, a short distance above Blackfriars-bridge. Two shafts were sunk to the level of the railway, and these proved of immense advantage, in that they enabled the whole of the excavated material to be brought to the surface, and carried away to the Dagenham Marshes by barges, cartage through the public streets being thus entirely avoided. By the same shafts, iron, cement, bricks, and all else required in the making of the railway were introduced, and the construction of the two tunnels proceeded with steady regularity, the only delay which was experienced being attributable to the water-bearing strata through which, at several points, the tunnels had to be projected. Leaving Waterloo by a somewhat sharp curve, the tunnels pass under York-road at a depth of only 18ft. from the surface, and thence descend towards the river, crossing Waterloo-bridge-road a few inches below the main sewer of the London County Council. Following the line of Stamford-street as far as Hatfield-street, they there turn towards the river, which they traverse in a north-easterly direction, emerging under the Victoria-embankment immediately in front of the Royal Hotel at Blackfriars. Curving into Queen Victoria-street, they continue under the centre of that thoroughfare at considerable depth, and terminate in a commodious station immediately opposite the Mansion House, the total length of the line being about 1½ miles. The most difficult portions of the work had to be undertaken at the two termini. At Waterloo, the station of the Waterloo and City Railway is situate immediately underneath the main line platforms of the South Western Company, the difference between the two levels being exactly 41ft. There are three sloping ways of approach between the two stations, and two independent entrances from the outside thoroughfares. These five inclined ways lead to a common booking-hall of extensive proportions, and there are three spacious avenues sloping towards each of the two platforms, which are 100yds. long and 14ft. wide. The arrival platform and a set of rails occupy one arch; the departure platform and a second set of rails are laid under an adjoining arch, the two lines of rails being divided by a brick pier. The level at which the platforms are constructed is so deep that it was necessary to remove the foundations of the old piers upon which the South Western station stands, and this work was accomplished without the slightest interruption to the enormous traffic conducted at the platforms of the South Western Company. A still more trying task had to be faced in order to provide a cross-over road by means of which the trains on the Waterloo and City Railway can be shunted from one set of rails to the other. The space acquired for the terminus did not permit of such a cross-over road being introduced without utilising a considerable portion of the area under the London and South Western station, and the engineers found it necessary bodily to remove one of the immense piers on which that station rests, and in its place to build a single arch of 40ft. span. This was an interesting and a bold piece of work, which attracted much attention among railway engineers. In the end it was most successfully accomplished, and the strength of the superstructure remains as great as ever. At the City terminus difficulties of another kind presented themselves. The crowded street-crossing which stands immediately in front of the Mansion-house, the Bank of England, the Royal Exchange, Cheapside, and Queen Victoria-street, was honeycombed at no great distance from the level by

pipes of every description—water, gas, pneumatic, compressed air, telegraph, telephone, electric lighting—and enormous sewers. The construction of the Waterloo and City terminus was only part of a great scheme of improvement which had to be undertaken at this point. It had been decided by the late Commissioners of Sewers to provide a subway connecting all the important points of the crossing, so that passengers might be able to go from the Bank or the Royal Exchange to the Mansion-house, Queen Victoria-street, or Cheapside, as also between other points, without incurring the risk of using the open crossing. To this subway it was decided that passengers to and from the Waterloo and City Railway should have access, and a similar facility was also offered to those who will use the Central London Railway, which Parliament had also sanctioned. Thus, three great schemes were simultaneously in progress below the street level at the Mansion-house. The Waterloo and City Railway is the first to be completed; and although the subway has not yet reached the stage when it can be thrown open to the public, travellers by the Waterloo and City line will have access thereto from two points at the City terminus—one in Wallbrook, immediately in front of the private entrance to the Mansion House; the other at the junction of Cheapside and Queen Victoria-street opposite the premises of Messrs. Mappin and Webb. From these two centres stone staircases descend to the railway platforms, and when the public subway has been finished a third means of approach will by its means be established. The Central London Railway Company has constructed a series of lifts at its City terminus, and if similar accommodation should be found necessary in the case of the Waterloo and City Railway, it will hereafter be provided. Invitations addressed to British firms having failed to secure tenders which could be executed within the time specified, the rolling stock required for the new Waterloo and City line has been supplied by the Jackson and Sharp Company, of Rochester, United States. Four complete trains have been delivered, and two others will soon be forthcoming. After construction the stock was shipped in parts to Southampton, put together at the carriage and wagon works of the South Western Railway Company at Eastleigh, and thence conveyed over that company's system to the Waterloo and City Railway, being transferred at Waterloo by a powerful lift which has been specially constructed for the purpose to connect the lines of the two companies. The train consists of four coaches—two motor-cars and two mid-trailers—each carriage being supported on two four-wheeled bogies. The front and rear cars are used as motor-carriages, and contain two motors, the end of the motor-car being fitted with all the necessary electrical appliances, which are, therefore, placed under the control of the driver. Seating accommodation is provided in each motor-car for forty-six passengers, and in the mid-trailers, or ordinary carriages, for fifty-six passengers, so that the total seating accommodation is for 204 persons; but the interior space in each car is such that, if necessary, a much larger number can be admitted. The comfortable seating of the coaches is uniform, and is, for the sake of cleanliness, made without upholstery. Each train is fitted with Westinghouse continuous compressed-air brakes, which can be applied by either driver or guard to all the wheels of the train. The maximum speed attempted will be at the rate of 25 miles per hour, and the journey between Waterloo and the Mansion-house will be accomplished in five minutes, a five-minutes' service being maintained each way throughout the day. Electrical power is supplied from a large generating station which has been established at the Waterloo end of the line. In this station are erected five boilers, engines, and dynamos, each of about 300 horse-power. The line is laid on the central-conductor principle, the conductor being a heavy channel-shaped steel rail, receiving an electrical pressure of 500 volts.

#### NORTH WEST ARGENTINE RAILWAY.

The following circular, dated July 6th, has just been received by the debenture stockholders and shareholders of the North West Argentine Railway Company, Limited:—

Dear Sir or Madam—It will be remembered that at the meeting of proprietors held on July 3rd, 1896, the subjoined resolution was passed:—“That the following gentlemen—namely, Mr. Claude Bishop, Mr. John Higson, Mr. Fitzpatrick Praed, Mr. J. Rathbone, Mr. W. Trotter, and Mr. Alexander Young—be and they are hereby appointed a committee to examine into the financial condition of the company, and to make such recommendations in regard thereto as shall seem to them desirable.” The Chairman of the company, in recommending the adoption of that resolution, dwelt upon the desirability of the committee being so constituted that a scheme might be arrived at which was likely to be acceptable to all classes, justifying in that manner the association of gentlemen who held or represented only debenture stocks with those who held or represented debentures and shares or shares only. With a committee representing such conflicting interests it is not surprising that divergent views were found to exist; hence the long delay. Many proposals or suggestions for an arrangement were made and

considered, but as none of them appeared likely to satisfy every interest, all the members of the committee have, with the view of putting an end to the present unsettled condition of affairs, agreed to join in supporting, and herewith submit for your consideration and approval, the accompanying scheme of arrangement. They recognise that insistence on the extreme rights or views of any one class of proprietors can only result in a continuation of the present unfortunate deadlock, and they feel it to be imperative in the interests of the company that they should come to an agreement, even although such agreement may involve a material departure from individual views, hence the present scheme represents the nearest possible approximation to a solution satisfactory to each of the signatories which they have been able to formulate. As anticipated by some of the undersigned, the income of the company has been greatly reduced during the year 1897, and this circumstance has increased the difficulty of settling a scheme the burden of which might not prove too heavy for the company to bear. The net receipts of the line were, in 1894, 16,854l.; in 1895, 35,131l.; in 1896, 51,371l.; in 1897, 34,337l. If some of the suggestions based on the receipts during 1896 had been yielded to, the company might already have found that its position had been seriously prejudiced instead of being benefited by reconstruction. The fixed annual charges under the scheme now submitted would in respect of the prior lien and first debenture stocks alone be as follows:—Interest on the proposed new 4 per cent. prior lien debenture stock, when the issue has reached the sum of 175,000l., 7,000l.; 6 per cent. on the 349,800l. of first debenture stock, 20,988l.; 6 per cent. on the arrears of interest thereon capitalised at 65 per cent., 2,592l.; making together, 30,580l. As regards the first debenture stock, it will be observed that the only concession proposed under the scheme is the aforesaid capitalisation of the arrears of interest at 65 per cent., equal to 43,200l., payable in first debenture stock. The interest on this at 6 per cent. would impose on the company an additional annual burden of 2,592l., such interest to commence to run from January 1st, 1900. It is an open question whether the interests of the first mortgage debenture stockholders would not be better served by a reduction rather than an increase in the annual fixed charge in respect to their stock, so as to remove its service, as far as possible, from the region of speculation. Whilst opinions on this point may differ, the undersigned are unanimously agreed in being unable to go beyond the figure mentioned above, as they are of opinion that with such an unreliable traffic as sugar to depend upon, what has happened in 1897 may at least happen again, and in this connection it is significant to find that the gross receipts for the twenty-one weeks ended May 28th, 1898, are less by 7,250l. than those for the corresponding period of 1897. As regards the second debenture stock, the annual interest on the existing 150,000l. at 6 per cent. equals 9,000l. The arrears of interest, capitalised at 65 per cent., as proposed by the scheme (taking into account an estimated cash payment of 5,250l. out of the revenue of 1897), would amount to about 24,450l., payable in 6 per cent. second debenture stock, equal to a further sum per annum of 1,467l., making a further annual requirement of 10,467l. The arrangement respecting this second debenture stock, as set out in the scheme, is that the holders shall waive their rights to foreclosure and to any interest not earned until the full amount of the annual interest has been earned and paid for four consecutive years, when the full rights of these debenture stockholders will revive. They will in the meantime have the right to nominate the majority of the directors of the company. As regards the share capital, it would be proper, if the proposed scheme is carried, to reduce the amount thereof by the sum required for the adjustment of the net revenue account. This is estimated at 30,000l. The preference shares amount to 350,000l., the deferred shares amount to 200,000l.—550,000l., leaving a balance to represent share capital of 520,000l. It has been thought convenient to place the new share capital at an even amount of 520,000l., consisting of one stock only. The apportionment of this stock has been a matter of much discussion, and after giving full consideration to the views of the shareholders' representatives, it is proposed that all dividends accrued up to December 31st, 1897, on both stocks shall be cancelled, and that the new consolidated or unified stock shall be apportioned as follows:—To the holders of the existing preferred shares, 420,000l.; to the holders of the existing deferred shares, 100,000l.—520,000l. The difficulties in the way of arriving at practical unanimity in this case have been so great, owing to the diversity and conflict of interests represented, that the undersigned, although not individually prepared to say that the scheme entirely meets their views, do not hesitate to recommend its immediate adoption as the best means, in the circumstances, of relieving the company from the unsatisfactory position in which its capital and revenue accounts at present stand.

#### WATERFORD LIMERICK AND WESTERN RAILWAY.

The following circular has been issued to the shareholders:—Sir, or Madam—An extraordinary general meeting of the company will be held at the offices of the company, Waterford, on Friday, July 15th, 1898, for the purpose of considering the action of certain directors of the company who have opposed and are opposing the sale of the company to the Great Southern and Western Railway Company, and (if thought advisable) for the purpose of removing such directors from the board. If you are unable to attend the meeting personally, you are requested to fill up and sign the enclosed form of proxy, and return the same to the address printed at the back of the proxy form, as soon as possible,

and not later than July 9th. This meeting has been summoned on the requisition of thirty large shareholders, representing, it is believed, the almost unanimous opinion of the shareholders, that the projected amalgamation with the Great Southern and Western Railway ought to take place. Briefly, the terms of amalgamation are as follows:—(1) The ordinary shares of the Waterford and Limerick Railway are to be exchanged for guaranteed preference stock of the Great Southern and Western Railway, which will carry 1½ per cent. for the first year, increasing by ½ per cent. per annum, until finally 2½ per cent. is reached. This 2½ per cent. stock can be exchanged for such amount of 4 per cent. cumulative preference stock of the Great Southern and Western Railway as would yield 2½ per cent. (2) The 3½ per cent. preference stock of the Waterford and Limerick are exchangeable at the rate of 75l. Great Southern and Western 4 per cent. preference stock for every 100l. Waterford and Limerick stock, or 105l. cash at the option of the holder. (3) The 4 per cent. preference stock and the 4 per cent. debenture stock of the Waterford and Limerick Company are exchangeable for an equal amount of the 4 per cent. preference and debenture stocks respectively of the Great Southern and Western Railway. Seeing that shortly before the project of sale was brought forward the ordinary stock of the Waterford Company was officially quoted at 17, the 3½ per cent. preference stock at 90, and the 4 per cent. preference stock at 116; and comparing the Stock Exchange prices for Great Southern and Western preference stock, the result of amalgamation as above would, on a fair estimate, make Waterford and Limerick ordinary shares worth 40 to 45, the 3½ per cent. preference 105 to 110, and the 4 per cent. preference 140. It is well known that a minority on the board, for reasons they have never communicated to the shareholders, opposed at the outset and now oppose the proposed sale. If the minority have their way, and the sale does not proceed, the result would inevitably be a complete failure of dividend on the ordinary stock, and partial failure on the 3 per cent. stocks of the company, with the probable result that the value of the 4 per cent. preference would fall to about 100, the 3½ per cent. preference stock to 50 or 60, and the ordinary to about 5. The following table summarises the position:—

	PRICES.		
	In Dec., 1897.	If Sale Completed.	If Sale Rejected.
Ordinary shares.....	17	40-45	5 (?)
3½ per cent. preference .....	90	105-110	60
4 per cent. preference .....	116	140	106

It is therefore obvious that any director who opposes the scheme of amalgamation (and some have been and are opposing it on and off the board) is acting directly contrary to the interests of the shareholders, who should insist that any person who endeavours to prevent the sale taking place should not do so whilst sitting on the board of directors, whose duty it is to promote the shareholders' interests. Certain of the shareholders had recently a conference, by appointment, with the board, for the purpose of learning the reasons for the action of the minority, but one of them not only did not appear, but wrote a letter refusing to give any explanation to the meeting of his views or conduct, which is openly hostile to the amalgamation. We earnestly ask you for your support, personally or by proxy, at the meeting on July 15th, at Waterford, in our endeavours to secure united action and counsel at this crisis in the history of the company, convinced that if this opportunity of disposing favourably of the property is lost, the position of the company will be worse than ever it has been.—CHARLES F. DILLON, Cratloe, Merrion-road, Dublin; JAMES McCANN, 29, Anglesea-street, Dublin; EDWARD MARTYN, Tullyra Castle, Ardahan, Co. Galway; JOHN G. NUTTING, Luttrellstown, Clonsilla, Co. Dublin; WILLIAM HUTCHESON POE, Lieut.-Colonel, Heywood, Queen's County; NICHOLAS J. SYNNOTT, Furness, Naas, Co. Kildare.

#### AFRICAN TRANSCONTINENTAL RAILWAY PROJECT.

It is so short a while ago that Mr. Rhodes's great scheme of a transcontinental telegraph was looked upon as chimerical, the project itself being now, however, considered on all hands as a really feasible and important one which is within measureable distance of being carried to completion, that people who would in the earlier days have been far more sceptical over the notion of a transcontinental railway will probably have grown more familiar with African possibilities, and will probably now view even such an idea with intense interest. It is a very short while ago that the northern terminus of the South African railway system was at Kimberley or Mafeking. To-day the great trunk line stretches onward to Bulawayo. A short time hence, and it will be on the Zambesi. But when the railhead reaches Tanganyika, a glance at the map will show that the intervening space between the Lakes and Southern Egypt is one that will almost demand bridging, and then the great African trunk line may probably be left to work out its own destinies without further pushing on the part of

individuals. At present, however, what Rhodesia is concerned with is the immediate extension towards the Zambesi. At first blush this is a matter which might be supposed to concern Matabeleland mainly, but it is not so by any means. The railway will be, or ought to be, of great benefit to Mashonaland also, for it will open up the Mofunga Busi coal area, and thus supply the mining industry with the requisite fuel. It is to be noted that, once the coal area is being actively exploited, a light line of some 200 miles would connect the fields with Salisbury itself, and not only so, but such a line would, throughout the greater part of its length, pass through a most important succession of gold areas or belts, including the Lo Magundi, Ayrshire, and Mazoe areas. The making of this line appears to be so necessary a consequence of the opening of the coal area by the main railway, that we should look upon it as a direct and immediate result of the other undertaking, and one which would benefit vastly both the gold district mentioned and Mashonaland as a whole.—*Rhodesian Times*.

#### RAILWAY PASSENGER COMMUNICATION.

A circular letter, dated July 12th, on the subject of railway passenger communication has been issued to the general managers of the different railway companies by Sir Courtenay Boyle, who says:—"I am directed by the Board of Trade to state that in May of last year the President appointed a committee to inquire into questions relating to railway passenger communication, and the report of this committee has now been issued as a Parliamentary paper, No. C. 8,918. It will be seen from this report that the committee unhesitatingly condemn as inefficient the outside cord system of communication, and do not regard as satisfactory methods of communication by pulling a cord or wire passing inside the carriages. They, however, hold that the principal electrical systems and the method of communication by means of a partial application of the brake may be taken as efficient. The views expressed by the committee as to the inefficiency of the outside cord communication are fully shared by the Board of Trade, who have for years refused to approve it. The committee recommend that the law should be extended so as to require the provision of means of communication on all passenger trains irrespective of the distance run without a stop. The Board of Trade attach great importance to the conclusions of the committee, and they have no doubt that those railway companies by whom the cord system is still used will at once take steps to substitute for it a proper means of communication, and that the companies, as a whole, will extend the provision of such a means to all passenger trains without waiting for an alteration of the law. The board will be glad to be favoured with the observations of the directors of your company on the subject, indicating the steps which they propose to take."

#### LIGHT RAILWAY PROJECTS.

A conference was held at Montgomery on the 8th inst. between Mr. C. S. Denniss (general manager of the Cambrian Railways) and delegates representing the promoters of the projected light railway from Montgomery to Churchstoke and Bishop's Castle. After hearing estimates as to the amount of traffic which would be carried on such a railway, and the probable amount of support it would receive in the district, Mr. DENNISS expressed the opinion that the scheme would be advantageous, and promised to lay the matter before his directors at the earliest possible date, in order that the scheme may be drafted in a definite form and laid before the Commissioners. If carried out, the proposed line will connect the Cambrian Railway with the Craven Arms line. The route presents no engineering difficulties of importance, and it is computed that there will be ample traffic to make the railway remunerative.

The Light Railway Commissioners sat on Tuesday at the Town-hall, Wood-green, to consider an application by the Metropolitan Tramways and Omnibus Company, Limited, for powers to construct the London Barnet Edgware and Enfield Light Railway. The scheme, as it was originally put forward, was one of a very far-reaching character, comprising nearly 30 miles of lines in the outer district of North London. In the form, however, in which it came on Tuesday before the Commissioners it was reduced to a scheme of light railways from Wood-green to Enfield and Edmonton, and from Wood-green to Tottenham. These proposed railways formed junctions with the North Metropolitan Tramways at Wood-green, and were practically an extension of that system, over which running powers were proposed to be exercised. In this amended form the scheme was strongly opposed by the London County Council and the local authorities through whose districts the lines were proposed to pass. These opponents contended that these "proposed light railways" were nothing more than tramways, but without the right of the local authorities to purchase the lines. Owing to the uncompromising attitude shown by the opponents, the

scheme was, after some preliminary proceedings, withdrawn by the promoters.

#### THE FISHGUARD AND ROSSLARE SCHEMES.

At a special meeting of the Cork Chamber of Commerce and Shipping last week, the following resolution was unanimously passed:—"That the president of this chamber be requested to convey to the Right Hon. U. Kay Shuttleworth, Bart., M.P., chairman of the Hybrid Committee appointed by the House of Commons to consider the Fishguard and Rosslare Railways and Harbours Bill, how deeply the members of this chamber appreciate the masterly and highly impartial manner in which he presided over and conducted the deliberations of the committee. In the series of recommendations made by the committee and so ably drafted by its chairman this chamber finds all that could under the circumstances be reasonably expected, and it is fully convinced that the satisfactory result of the committee's deliberations is largely due to the chairman's thorough mastery of the details of the very intricate scheme before the committee, and the just spirit which influenced him all through, to safeguard the public interest from being sacrificed to an oppressive monopoly. In this unanimous expression of the feelings of the council of this chamber, it is desired to associate in the fullest manner the other members of the Hybrid Committee, who each and all devoted themselves with so much interest and unsparing effort to arrive at a just and equitable settlement of the questions submitted for their consideration."

#### BUENOS AYRES CENTRAL STATION.

The National Railway Board has sent in its report on the proposal of the Buenos Ayres and Rosario Railway Company for the construction of a central railway station in Buenos Ayres. It states that, acting on orders from Government, a meeting with the representatives of the Buenos Ayres and Rosario and the Central Argentine railway companies was held to discuss the question of a central station on Government land, and also of the construction of a terminus at Retiro. The negotiations fell through on account of the exaggerated ideas of the Rosario Company, which refused to recognise certain rights of the Central Argentine. The solution of these difficulties was submitted to the directors in London, but they could not arrive at a mutual understanding, and it was then that the Rosario Company presented their project, in which they completely exclude the Central Argentine. The Railway Board then proceeds to discuss the advisability of the construction of a central station, and is of the opinion that such a costly work is not required, at all events for the present, and that in exchange the companies be asked to construct termini. Admitting this, the Board is of opinion that it would be advisable to treat with the Central Argentine to take up their lines between Palermo and Retiro. As to do this the company would have to give up property to the value of two million dollars, Government could give them in return the necessary land in Retiro belonging to the nation and the municipality, on the condition that they erected a large station, which could be used by all the other companies, at the north end of town. With regard to the access of the Central Argentine trains from Palermo to Retiro, this could be effected by means of the independent entrance, under construction, of the Rosario Railway, or the Central Argentine could construct a viaduct of its own, parallel to that now being built, for which purpose Government could give the necessary concession, also the necessary lands. By this means there would be two lines of entrance and exit for the trains at the north end. The board, therefore, proposes that Government give to the Central Argentine the necessary land in Retiro for a new station, and also for an independent entrance from Palermo to Retiro, and for communication with the lines of the Buenos Ayres Docks. The company, on their part, to construct a station of sufficient size to meet the requirements of all the companies at present running into Retiro, to remove their lines between Palermo and Retiro, to construct an independent entrance, at their own cost, and the existing tariffs to remain as at present. The following are the principal clauses in the proposed contract:—(1) The railway companies compromise themselves to construct and work for their own account, for the service of passenger trains and freight trains in transit, on the national lands reclaimed from the river by the port works, the necessary lines which must unite the north and south ends of town. These lines to be from the north end of the docks to Calle Brasil and Paseo Colon on the south side. (2) Government to authorise the contracting companies to occupy the land that may be necessary for the lines, stations, sidings, &c., free of all charge, for a period of fifty years. (3) The management, &c., of these lines to be under the sole control of the contracting companies, and under the jurisdiction of the board. The contracting companies reserving to themselves the right to use the stations and lines for passenger service, and

to equip them as they may think best, besides having the option of limiting the service to the local suburban traffic or for the general trains between one terminus and another. (4) The contracting companies to invest the necessary capital for the construction of the stations and lines, these works to be restricted to what is absolutely indispensable for passenger and cargo traffic. (5) Definite plans to be presented within six months of signing contract, and after Government has submitted them to the Public Works Department and the Railway Board, the companies would be placed in possession of the land. The works to be finished two years after the land has been handed over. (6) The concession to be for fifty years from date of opening to public service, after which all would become the property of the Government, it being understood that should the Government desire to sell or rent the lines, preference would be given to the contracting companies. (7) The cost of working to be divided, *pro rata*, amongst the companies making use of the system. (8) Contracting companies to be allowed to import duty-free all necessary material, &c. (9), (10), (11), (12), (13), and (14) all treat of minor details.

The *Review of the River Plate*, in referring to this report, remarks:—"The idea is not a bad one, and if carried out would re-establish communication between the north and south ends of town once more. We presume that the line is to be overhead or else underground, as we cannot for one moment believe that Government would grant concessions for ordinary level lines after having made the companies tear up the existing lines. Although the report of the National Railway Board is dated May 17th, it was only made public on June 13th, and its contents must have been made known to the Central Argentine, because by telegraph we learn that Mr. James Craik, the ex-general manager, and now one of the directors, and Mr. Theobald, the secretary of the company, left England on June 10th, per R.M.S. *Danube*, for Buenos Ayres to treat with Government about the Retiro Station. It appears that the first intimation that the Rosario Company had of the report was seeing it in the press. It is to be hoped that the business will be settled promptly, although we are rather inclined to believe that the present Government will not move in the matter."

### RAILWAYS IN CHINA.

A telegram from Peking dated July 10th states that Russia has withdrawn her opposition to the Northern Railway Extension Loan with the Hong Kong and Shanghai Bank on learning that no mortgage upon the permanent way is given to the bank, and that the control of the line remains in the hands of the Chinese.

Another telegram from Peking states that the Chinese *concessionnaire* for the Tien-tsin-Chin-Kiang Railway has now only a few days left for finding the capital for the line. In the event of his failure to secure it the concession will be given to Herr Carlowitz, a German, who has been vigorously supported by Baron von Heyking, the German Minister.

A report has just been issued by the Foreign-office on a journey, by Mr. Mayers, of the British Consular Service in China, from Peking to Shanghai, not by the usual route along the Grand Canal, but by the way which must be taken by a railway connecting the capital with the cities of the Yang-tze Valley. Southward to Pao-ting-fu, the capital of Chi-li, Mr. Mayers followed the new railway embankment, which runs side by side with the high road, "and the traffic which streams along the former is the best omen of the latter's success." Throughout southern Chi-li, and, indeed, nearly the whole way to the Yellow River, the traffic is enormous, and consists mainly of great quantities of cotton, reed and straw matting, and ground-nut oil, the last seeming to be as great and a valuable production as cotton. Foreign goods from Tien-tsin avoid the natural route to Peking of the Pei-ho river, because of the numerous *likin* stations, and go round by road by cart, pack, or wheelbarrow. The railway runs in a straight line due south, and would be very simple in construction but for the numerous openings necessary to allow the flood waters to run off. These amount to about 100ft. per mile. Mr. Mayers says that throughout its course one might think the railway line quite in the usual order of things in the lives of the Chinese; their attitude to it is one of placid indifference. When the first chances of gain by sale of land, compensation for destroyed graves, and the like were over their interest in the work ceased. "When once the line is in working order this want of curiosity will, of course, change into wonder and appreciation which are visible among the country people along the Tien-tsin line. But the construction, the bridge-making, and the steam pumps are looked on as some 'notion' which does not amuse them." Mr. Mayers regards the carrying possibilities of the line as great, and when it is continued south of Pao-ting-fu these will be greatly increased, if the actual road traffic may be taken as a gauge. The journey took the traveller through Cheng-ting, where the

great Shan-si road turns off to the south-west. He kept to the south-east, crossing the Yellow River where it was about 2 miles wide, and thence turned eastwards through northern Ho-nan and into Kiang-su. At Ma-chia-ching, a city of northern Kiang-su, he found a Jesuit mission station, where the Fathers have to stand frequent sieges from bandits. The station has castellated walls, armed with cannon, and as many as a dozen brigands have been slain at one attack by the militant Churchmen and their flock. Reaching the Grand Canal Mr. Mayers continued his journey by the ordinary route, reaching Shanghai in forty-two days.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### LOUGH CORRIB STEAMBOAT COMPANY, LIMITED.

This is the title of a company which has just been formed, with a capital of 3,000*l.* in 600 shares of 5*l.* each, to establish steamboat accommodation and trading on Lough Corrib and the river Corrib at Galway; 215 shares only issued. Registered office, 7, May-street, Galway.

#### LONDON STEAM OMNIBUS COMPANY, LIMITED.

The prospectus of this company states that the company has been formed to put upon the streets of London and other large towns steam and other motor 'buses, charrs-a-banc, and cars. It is also proposed to run lines of steam 'buses on a daily service from London to other towns and from town to town. This company will have the sole right (within a radius of 20 miles round the General Post-office, London) to work the De Dion and Bouton system of steam 'buses, and will also be entitled to use throughout this country and Ireland the patented systems of motor 'bus, as used by Panhard and Levassor and Daimler. An agreement has been entered into with the British Motor Company, Limited, the vendor, by which the vendor grants these licences, receiving in consideration 21,000 fully paid up ordinary and founders' shares, the proportion being one founders' for every twenty ordinary shares. The authorised share capital is 420,000*l.*, in 10*l.* shares, of which 2,000 are founders' shares. Every subscriber of twenty shares will have the right of securing one founders' share at par. No dividend will be payable on the vendors' shares until the business has earned a net profit of more than 6 per cent. upon the capital subscribed and paid up. The vendors' shares are then entitled to dividends until they have received 6 per cent., when all the shares are entitled to rank equally for dividend. After the company has paid a dividend of 6 per cent. upon its entire issued capital the distinction between the two classes of shares will thereafter cease. The founders' shares take one-third of the remaining profits in each year after 8 per cent. has been paid upon the ordinary shares, and after making a due allowance for reserve.

[We have no hesitation in saying that this is a promotion of the very worst type, and we are surprised to find respectable men like some of those who figure on the board associated with such an enterprise.]

#### BROMPTON AND PICCADILLY-CIRCUS RAILWAY COMPANY.

It is freely rumoured that this issue, like that of the Great Northern and City Railway Company, has proved a failure. At this we are not at all surprised, for there was much in the prospectus which cannot have commended it to the favour of investors.

### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

London Brighton and South Coast Railway (July 13th).—At the rate of 4½ per cent. per annum, carrying forward about 11,900*l.* For the corresponding half of last year the dividend was at the rate of 4¾ per cent. per annum, and the balance carried forward about 16,000*l.* The dividends paid on the ordinary stock for the first half of the past twelve years have been as follows:—

1898 ... 4½ p.cent.	1895... 3½ p.cent.	1892... 3½ p.cent.	1889... 4½ p.cent.
1897 ... 4½ "	1894... 4½ "	1891... 3½ "	1888... 3 "
1896 ... 4½ "	1893... 4½ "	1890... 4½ "	1887... 3 "

Great Central Railway (July 13th).—At the rate of 1 per cent. per annum on the preferred ordinary stock, carrying forward 2,771*l.* This is equivalent to the dividend for the corresponding period last year at the rate of ½ per cent. per annum on the ordinary stock, which had not then been divided into preferred and deferred, and 2,416*l.* was carried forward. Subjoined is a statement of the June dividends on the ordinary stock paid since 1886:—

1897 ... ½ p.cent.	1894... nil	1891... ½ p.cent.	1888... nil
1896 ... 1 "	1893... nil	1890... ½ "	1887... ½ p.cent.
1895 ... nil	1892... ½ p.cent.	1889... 1½ "	1886... ½ "

Great Eastern Railway (July 14th).—At the rate of 2 per cent. per annum, being the same as for the corresponding period of last year. The balance carried forward is about 8,500*l.*, as com-

pared with 2,000l. The subjoined table shows the June dividends paid on the ordinary stock in the past twelve years:—

1898 ... 2 p. cent.	1895 ... 1 p. cent.	1892 ... 1 p. cent.	1889 ... 1 1/2 p. cent.
1897 ... 2 1/2 "	1894 ... 1 1/2 "	1891 ... 1 1/2 "	1888 ... 1 1/2 "
1896 ... 1 1/2 "	1893 ... 1 1/2 "	1890 ... 2 "	1887 ... 1 "

London Tilbury and Southend (July 14th).—At the rate of 3 per cent. per annum, carrying forward about 15,300l. For the corresponding period of last year the dividend was at the rate of 2 1/2 per cent. per annum, and 7,500l. was carried forward. [A year ago it was explained that the large balance carried forward was intended to provide for any payments out of the half-year's revenue which the company might be required to make to the Great Eastern Railway Company in respect of the widening of the London and Blackwall Railway under the award of the Railway Commissioners when made.] For the past twelve years the June dividends have been as under:—

1893 ... 3 p. cent.	1895 ... 2 1/2 p. cent.	1892 ... 2 1/2 p. cent.	1889 ... 2 1/2 p. cent.
1897 ... 2 1/2 "	1894 ... 2 1/2 "	1891 ... 2 "	1888 ... 2 1/2 "
1896 ... 2 1/2 "	1893 ... 2 1/2 "	1890 ... 2 1/2 "	1887 ... 3 "

The half-yearly report of the City and South London Railway Company recommends a dividend at the rate of 2 1/2 per cent. per annum, which compares with a dividend at the rate of 2 per cent. per annum for the corresponding half of last year.

It is announced that the first mortgage trust of the New York Pennsylvania and Ohio Railroad Company will, on and after August 2nd, pay an interim dividend of 1 per cent., less income-tax, for the half-year ended July 3rd, on the ordinary stock of this company.

The Atlantic First Leased Lines Rental Trust, Limited, announces the payment, on and after August 2nd, of an interim dividend at the rate of 2 1/2 per cent. for the half-year ended July 31st.

The directors of the London and Greenwich Railway have decided to recommend a dividend on the ordinary stock at the rate of 1l. 8s. 3d. per cent., less income-tax, for the half-year ended June 30th.

#### FOREIGN AND COLONIAL ITEMS.

At the annual general meeting of the Ottoman Railway Company of Anatolia, held on the 11th inst. at Berlin, a dividend of 5 per cent., say 15l. per share, of series 1, was declared in respect of the year 1897.

The Central Argentine Railway Company has won the suit brought against it by Señor P. Murfine, who claimed \$15,000 damages for an accident that had occurred to his son. It was proved that he had jumped from the train while in motion, so as to prevent arrest by the police.

The directors of the Bordeaux Tramways and Omnibus Company, Limited, notify that they have entered into a provisional agreement for the sale of the undertaking to a French company, at a price equivalent to about 15l. per share on the share capital of the company, preference and ordinary.

In the Supreme Court of Western Australia judgment has been entered against the Midland Railway Company of Western Australia, Limited, on the application made for the appointment of a receiver and manager on behalf of the debenture-holders. The application is made by the Industrial and General Trust, Limited. The railway company was not represented.

At an extraordinary general meeting of the Buenos Ayres and Ensenada Port Railway Company, Limited, on Wednesday, the resolution which was passed at the extraordinary general meeting held on the 23rd ult. was carried unanimously. The resolution was for making certain alterations in the articles of association in connection with the proposed sale of the company's undertaking to the Buenos Ayres Great Southern Railway Company, Limited.

The St. Petersburg *Novosti* states that the Vladikaukas Railway Company has completed its preparations for the construction of a railway line from the station at Nevinomysskaya to Sukhum on the Black Sea. The projected line will be 197 miles in length, and will pass through the Kurban district in Ciscaucasia and the Government of Kutais in Transcaucasia. The line is to follow the course of the river Kuban, and will be laid exactly parallel to that river. At Drandy the new line will be connected with the Transcaucasus Railway by means of a new line 65 miles long to Abas-Tuman.

A large deputation of residents of the Darling Ranges recently waited on the Premier of West Australia with the request that the Government should purchase the Canning-Jarrah Railway. The company is bound under its agreement to carry passengers

and goods for the convenience of the public, and the speakers declared that the company was not observing the spirit of the agreement. Sir John Forrest said he would see that the company obeyed the agreement in every particular. As to the question of purchase, under the agreement the Government had the option to purchase the line in December of next year at 1,000l. per mile, and when that time came the Government would consider the advisability of making the purchase.

The Government of the State of Mexico has obtained from the Department of Communications of the Federal Government a concession for the construction of a railway to start from the City of Toluca, capital of the State of Mexico, and to terminate at Iguala, State of Guerrero, with a branch to Huetamo, State of Michoacan, and passing through the mining camps of Temascaltepec, Sultepec, Zacualpam, Taxco, and Tejuapilloo. Within twelve months from the date of the concession's promulgation—namely, June 16th, 1898, construction work must be commenced, and at least 10 kilometres must be built in each subsequent year, in any event the entire line must be completed within ten years from the time of the commencement of construction.

Just before the Chilean Congress adjourned Bills were passed authorising an expenditure of \$220,000 in surveys for railway extension and for new lines. The Bills in question specially include the termination of the survey of the longitudinal line between Calera and Pisagua, a survey for a new line between Santiago and Valparaiso, a survey of a line to connect Osorno with Puerto Montt, and such other surveys as the Government may decide upon. According to a recent report of the Department of Public Works there remain to be surveyed on the longitudinal line between Calera and Pisagua 600 kilometres, and on the Osorno and Puerto Montt line 120 kilometres. Of the \$220,000 voted by Congress the Government has resolved to devote \$200,000 to the termination of the survey of the longitudinal line.

Mr. Consul Chapman, in his recently published report for the year 1897 on the trade and commerce of Vera Cruz, states that "the freight diverted to Tampico is rapidly returning to its natural course, and that this will be apparent in the returns for 1897-8." The returns of the competitive traffic through the ports of Tampico and Vera Cruz for the month of May, just to hand, would appear to show that Mr. Chapman was much too sanguine. The total amount of competitive freight was 5,308 tons, or nearly 2,000 tons more than in any one month during the history of the railways, of which 3,138 tons went through Tampico, and the remainder—2,170 tons—through Vera Cruz. While the sum total of competitive traffic in this month was greater than it has ever been before, yet the amount through Vera Cruz was smaller than in any previous month of this year.

An extraordinary general meeting of the Demerara Railway Company will be held on the 28th inst., for the purpose of considering, and, if approved, of passing a resolution sanctioning a proposal for varying the contract dated January 31st, 1896, between the Crown Agents for the Colonies acting for and on behalf of the Government of the colony of British Guiana of the one part and this company of the other part, being the contract for the construction, equipment, and working of the new railways known respectively as the Berbice Railway and the West Coast Railway, so as to admit of the former railway terminating at a point or place known as Rossignol, about 1 1/2 miles to the north of the existing Stelling at Blairmont, instead of as at present provided for, and, as regards the West Coast Railway, substituting the Hague for Blankenburg as the place where one of the stations on the said line is to be constructed.

#### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

Making-up Price.		Stock.	Continuation rate.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1858.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	7.146	850 Specimens. 35,267	546 Specimens. 7,102	278 Specimens. 61,061
Average of 5 samples of Blaenavon only	7.176	63 Specimens. 25,688	46 Specimens. 7,468	21 Specimens. 106,281

Prices and any further information as to quality suitable for special purposes may be obtained from

## METROPOLITAN RAILWAY COMPANY.

NOTICE is hereby given, that the next ORDINARY HALF-YEARLY GENERAL MEETING of the Company will be held at the Cannon-street Hotel, in the City of London, at 12 o'clock Noon precisely, on FRIDAY, the 29th day of July, 1898, for the general purposes of the undertaking.

JOHN BELL, Chairman.  
G. H. WHISELL, Secretary.

Notice is also hereby given, that, at the conclusion of the above Meeting, the ORDINARY HALF-YEARLY GENERAL MEETING of the SURPLUS LANDS STOCKHOLDERS will be held for the transaction of the general business relating to the Surplus Lands of the Company under the control of the Surplus Lands Committee.

ALBERT G. KITCHING,  
Chairman of Committee.

Offices of the Company:  
32, Westbourne-terrace, Paddington, W.,  
14th July, 1898.

## AMERICAN RAILWAY SHARES AND BONDS.

THE ENGLISH ASSOCIATION of AMERICAN BOND and SHARE HOLDERS, Limited, Register Shares, Collect Dividends, and Cash Coupons. Shares may be registered either in owners' names or in that of the Association. In the former case dividends are collected by Powers of Attorney (forms supplied at the office), and on shares in Association's name on presentation of the shares certificates. The Association also issues its own certificates good to bearer or registerable, countersigned by the London and Westminster Bank against the deposit of the original shares. These certificates save great trouble to Executors as they can be distributed, avoiding the expense of sending the original shares and certified copies of Wills to America.

Particulars and Forms may be obtained at the Association's Offices, 51, Great Winchester-street, London, E.C.  
JOSEPH PRICE, Managing Director.  
T. LINDLEY, Secretary.

The annual general meeting was held on the 15th inst., at Winchester-house, Old Broad-street, E.C.; Mr. W. BAILEY HAWKINS presiding.

The CHAIRMAN said—Gentlemen, I am glad to be able to appear before you on this occasion much sooner than it has been the custom of the company to meet hitherto, and I hope next year we shall be able to present our accounts at a still earlier date. I regret the statement of accounts which we have laid before you is not so favourable as we could wish. We have suffered very much from a variety of causes—from drought, bad trade, locusts, and, lastly, the most serious thing of all, from the revolution in Uruguay. That revolution affects us very seriously indeed, because our trade seems to be rather leading in that direction, the people there being our best customers. But taking all these things into consideration, I think we really have done even better than we could have expected to do under the circumstances. We have lost a small amount of our passenger traffic—some 252l.; on goods traffic there is a reduction of 1,777l., representing a tonnage of something like 8,400 tons; but our most serious loss has been in our traffic in connection with Uruguay—that is, our cattle traffic. We have not carried half what we did the year before. We have also lost very much on the fencing and posts which we send there largely. This loss of traffic is, I think, entirely owing to the political difficulties that have arisen in that country. The present year opened quite as badly as last year. The traffic receipts for January were £26,033, against £28,028 in January of the previous year; in February they amounted to £22,098, against £27,294 in the previous year; but then came a slight change for the better, and I hope it is the forerunner of improved results. March gave us £28,219, against £25,220, so you will see the reduction had disappeared, and we took a substantial increase of rather more than 10 per cent. April is better still, the receipts in that month being £32,420, against £20,127 in the previous year. That is practically an advance of 33 per cent. I think that month was exceptionally favoured in one or two classes of traffic, which, perhaps, made the result rather better than it otherwise would have been. Whether it may prove to be true or not it is impossible to say, for none of us can see into the future, but it looks as though we were on a rising grade at last. On the expenditure side we have been more successful. There is practically a reduction on every item of cost; we have saved in permanent way charges 1,153l., and in locomotive charges 214l. You will see at a glance that our train mileage has gone back between 5,000 and 6,000 miles, and that entirely arises from the fact that we have had no cattle trains to run as usual. Carriage and wagon expenditure is down 148l., traffic expenses are up 475l., and general charges show a reduction of 299l. The traffic expenses have gone up owing to the alteration we have made in dealing with the accounts; they now charge what we term in England mileage and demurrage. That amounts to something like 500l., which would show that even on the traffic account there is a slight reduction. I can now turn to something more interesting and more satisfactory, and that is the progress of our work. You will have noticed in our report that early in June we received a telegram stating that the rails were laid through—laid through, of course, upon the temporary bridges—and on July 9th we received another message stating that the line would be open from Monte Caseros to Corrientes to public traffic on the 10th. Therefore, I take it that at the present moment our line is used by and working for the public. I do not think we ought to be at all down-hearted because of our unfortunate experience during the past year. I have told you on each occasion we have had the pleasure of meeting you that no one could expect any result from a railway that was not finished and had a gap in the middle of it. That is the position of the Argentine North Eastern Railway; but I think we may look forward to the fact, now that the line is finished through to Corrientes, that we shall have a port at Empedrado, and we have received a telegram stating that a vessel has already been advertised to load goods for Mercedes and Monte Caseros and the places in between. This shows that the public have at once taken advantage of the route, and I think we ought not to consider ourselves too sanguine in looking forward to a vastly different state of things when our line gets into regular working order. You will remember that we told you we were going to ask Mr. Harrison Hodgson, an engineer thoroughly acquainted with South American railways, to go there and report for us on our railway and the way in which it was being carried out. He has done so, and has handed to us a most exhaustive report. An abstract of that report is in your hands, and I think you will regard it as highly satisfactory. He confirms the policy and the course of action which the board have taken, and he says further that the work is being well done; in fact, he entirely supports us. When I have finished the few remarks I have to make I propose to ask him to second the resolution I will put before you, and I am quite sure you will prefer to hear from his own lips what he thinks about the way in which our works are being carried out on the other side. ("Hear, hear.") I should add that Mr. Hodgson has been elected on the board of this company, and is now a valuable colleague. The resolution I have to propose is:—

"That the report and accounts for the year ended December 31st, 1897, presented to this meeting, be received and adopted."

Mr. HARRISON HODGSON—I beg to second the resolution. In November last I was commissioned by your directors to report on your property in the Argentine, and I shall endeavour to give you as briefly as possible the result of my examination. You will no doubt be fully aware that when the line was taken over from the late contractors a large portion still remained to be completed, and, although the whole of the work had been taken in hand and a large quantity of earthworks and masonry were

completed on both the western and eastern branches—that is, from Monte Caseros to Corrientes on the western branch, and again from Monte Caseros to Posadas on the eastern branch—the only portions which were more or less able and capable of carrying traffic were between Monte Caseros and Mercedes and Saladas and Corrientes. The work, however, on these sections, owing to the inferior material used in the construction of the banks and for ballasting, was not in a very satisfactory condition, especially between Monte Caseros and Mercedes, where a good deal of reconstruction work had to be carried out before the required service of trains could be run. Owing to the stoppage of the construction work for a period, I think, of over six years it is not to be wondered at that when once the completion of the works—that is, the connecting link between Mercedes and Saladas—was taken in hand, the cost was much greater than it otherwise would have been had everything been completed at an earlier date. The first work, however, to be done, was part of the eastern branch—that is, between Monte Caseros and the Port of Libres—a distance of 99½ kilometres, and on the completion of this work the Mercedes and Saladas section was actively pushed forward. The distance between these two points is 136 kilometres, between Monte Caseros and Mercedes 140 kilometres, and between Saladas and Corrientes 102 kilometres. On the section of the line now nearing completion, between Mercedes and Saladas, with the exception of large bridges crossing the rivers Corrientes 191 kilometres, Batel 210 kilometres, and Santa Lucia 241 kilometres, there are no engineering difficulties. The first of these bridges over the river Corrientes is about 2,000 metres in length, that over the Rio Batel being 350 metres, and that over the Santa Lucia 450 metres. With the exception of the actual crossing of the rivers where cylinders are used, the girders are carried on screw piles of 19½ in. in diameter. In order to facilitate the work, however, an arrangement was made with the Government for temporary bridges to be erected at each of these places in order to be able to run trains, and afterwards erect the ironwork. As has been mentioned by the chairman, the whole of these temporary bridges have been erected and the rails are now laid, and the work in connection with the permanent bridges is making satisfactory progress. According to my report the whole of the western section of the line ought to be in a sufficiently good condition to allow for the early opening of the railway. With the exception of probably a little ballasting the only work still remaining to be done on the western section is the erection of the permanent bridges over the three large rivers, and this need not be completed in accordance with our concession before June 26th, 1901. It will be better, however—and that is the intention of the directors—to push forward the completion of the permanent bridges, because so long as we have temporary bridges so long are we liable to interruption by flood. On the eastern branch it was arranged that the line should only be constructed from the present terminus of Libres as far as Santo Tomé, a town which is situated on the banks of the river Uruguay, and instructions have been given to your manager to commence this work. On this section there is only one bridge of any note; that is the bridge over the river Aguapey. This is the most formidable bridge we have on the whole system, and when complete will have a total length of 1,328 metres, but it may be found necessary before the completion of the bridge to still further increase this length by an additional 300 metres. The earthworks are extremely light, so that when once this work is taken well in hand it will, I am sure, make rapid progress. According to our concession, this section need not be completed till August, 1902. With regard to the estimate to complete all works, &c., I went into this matter very carefully with your general manager and engineer, and found that the original estimates made by them are about correct. The work, which is carried out departmentally, is, I am pleased to say, being executed in a very substantial manner, which is most important, having in view the future cheap maintenance of the railroad; in fact, there is scarcely a line in the whole of the Argentine where better and more substantial work is done than on the Argentine North Eastern, and considering the district, the distance from the sea coast, and the difficulty in getting men, I consider the work is being carried out economically. Some time since there was an idea that if the work were let to one contractor it might be done more cheaply than departmentally, as it is at present; but considering that the company had a large quantity of construction material, and also capable officers who could undertake the work, I think you will agree with me that it was better that the company did the work themselves, as they have done. I have now, gentlemen, given you an abstract of the work which has been done during the last year, but what will perhaps be of more importance to you will be to hear something with regard to the future of our property, and in dealing with this question we must first of all consider the county traversed by the railway and the towns served by it. First of all, we shall deal with the western branch, because this line is the one we shall expect results from in the first instance. Monte Caseros is, as I have already mentioned, the starting point of the railway; it is some 350 miles from Buenos Ayres and about 96 miles from Concordia, the commencement of the East Argentine Railway. The other large towns in this section are Mercedes, Saladas, Empedrado, and Corrientes. Empedrado is a town of some 6,000 inhabitants, and will in the future considerably develop, owing to the completion of the railway, and it will be the port for our western branch, and goods which are now carried by way of Concordia and Monte Caseros to points on our western branch will, on completion of the railway, come to Empedrado, and from there be distributed over a large section of our line. This will considerably benefit our property by giving us an increased haulage, and at the same time the cost to the shipper from Buenos Ayres will be less. The land alongside the railway on the western branch, although of very fair quality, does not appear to be as good as the

majority of that nearer the coast, but still I consider the land is capable of very great development provided there were a sufficient number of people living along the route of the railway to cultivate the land. This, gentlemen, is one of the great drawbacks to the speedy advancement of your property—the one of immigration. And this is a question which is receiving the attention of your directors. It is not to be wondered at that more progress has not been made in this part of the Argentine. In the first place it is, as I have already explained, a considerable distance from the coast, and consequently immigrants arriving in the Argentine would no doubt select land nearer the coast; but there is a time, and at no distant date, I hope, when many of the immigrants that are now arriving in the Argentine will find their way further inland, and I have no doubt that many of them will eventually settle in a district served by our railway. When this is done, I look forward to an increase in our traffic. But when we consider that up till now we have only had on the western branch two disconnected portions with a long gap of unopened territory between them, it was useless to even expect that the line could possibly make any great advancement, because it is only having a railway through this district that we can expect the land to become cultivated. This, of course, is noticeable in every part of the Argentine Republic, and it is astonishing, in going over the various lines, as I did, to see the magnificent cultivations along the routes of the railways, so that without being too sanguine, I think we have every right to expect within the next few years a good improvement in the local traffic along our line. What I have already said with regard to the western branch equally applies to the eastern branch; although there are, perhaps, more inhabitants along the banks of the River Uruguay, we must not forget that the railway has a competitor in river traffic. Still, it is well known that owing to the shallowness of the river in many places regular boat traffic cannot be depended on. The future of our company, as you will have gathered from what I have already said, depends to a great extent on the introduction of immigrants into this part of the country. The district has in the past had much to contend with. Before the construction of the railway many revolutions against the Government were hatched in the province of Corrientes, and probably the first inception of the idea for the construction of the railway was that it might be useful for military purposes. Then drought and locusts have played their share in hindering the progress of this province, and with the general depression that has existed in the Argentine Republic for many years, it is not to be wondered at that a railway partly constructed at three different sections should show but little material progress. In order to prove the value of the railway, three things are necessary; firstly, the completion of the railway between Mercedes and Saladas, and between Libres and Santo Tomé; secondly, a substantial increase of population within the zone served by the railway; and, thirdly, by the adoption of low rates. From what I have already said, you will see that it would be quite impossible for me, without going into everything in detail, as in my report, to give you figures on the future earning capacity of the line. This, gentlemen, will depend entirely upon the number of immigrants we are able to get into our district, so that, while I tell you that in my opinion there is a future for our property, I do not wish to give you an impression that there will be any great increase in our traffic as soon as the line is opened through to Corrientes. The improvement in the traffic will be gradual, but it will be lasting, and while your directors will do everything in their power to foster the trade of our district, we must not forget that a very great deal depends upon the prosperity of the Argentine. There are matters which I have not touched upon in connection with the future working of our line, and which I am pleased to say are having the serious attention of the directors. I do not know, gentlemen, that there is anything more that I can tell you. I am afraid I have already taken up too much of your time, but if I can answer any questions which any of the shareholders present would like information upon, I need hardly say I shall be very pleased to do so.

Mr. VAN RAALTE suggested that the directors should approach the Government with a view to obtaining four or five years more in which to complete the line.

The CHAIRMAN, in reply, said the board were glad to receive any suggestions from shareholders; but in regard to the one made by the previous speaker, he would remind the meeting that the directors had already asked for further time, and had been given five years from the date of the signing of the contract to complete the eastern section. He did not, therefore, think it would be politic at present to ask for a further extension of time. The matter was actually before the board at the present moment.

The resolution was then put and carried unanimously. The remaining business was purely formal.

#### GREAT WESTERN RAILWAY.

A special general meeting of the proprietors was held on Monday, at Paddington Station; Earl CAWDORE presiding.

The SECRETARY (Mr. G. K. Mills) having read the notice convening the meeting,

The CHAIRMAN said—Ladies and gentlemen, in asking your sanction to the resolutions which will shortly be put to you, it is necessary that I should say one or two words, so as to explain the reason for our meeting to-day, and for our asking you for the powers which we shall ask under the resolutions to be put to you. The proprietors will bear in mind, I dare say, that in February last we received your sanction to certain Bills affecting the districts now in question. One was a Bill to authorise the transfer to the Great Western and the Great Southern and Western Railway Company of the undertaking of the Waterford Dungarvan and

Lismore Company, and for other purposes. There were also powers in the Bill to transfer to the two companies the undertaking of the Fermoyle and Lismore Company. There was a new Bill to confer powers on the Great Western as to the New Ross and Waterford Extension Railways, of the Dublin Wicklow and Wexford Company, and powers were asked for to enable the Great Western, if they thought fit, to contribute to the undertaking. Now, I think the best course I can take, in order to explain to the meeting the reason for the changes which make it necessary to come to you to-day, is to read to you a portion of the statement made to the Standing Orders Committee. The story practically is this:—

"The Great Western and Great Southern and Western Railway Companies, being desirous of opening an improved cross-Channel service for developing the traffic between the south and south-west of Ireland and London and the Great Western system in England, introduced in the present session of Parliament a Bill for empowering them to acquire the undertakings of the Waterford, Dungarvan and Lismore and Fermoyle and Lismore Railway Companies, and an agreement was scheduled to that Bill by which arrangements were made with the Treasury, as mortgagees, for the payment to them of a sum of £93,000. for the purchase of the Waterford and Dungarvan undertaking. This agreement was, however, conditional upon an arrangement being made by the two companies with the Duke of Devonshire with regard to the Fermoyle and Lismore Railway, of which his Grace is practically the owner, but at that time the Duke had not finally decided to enter into such an arrangement. The Fishguard and Rosslare Railways and Harbours Company was formed for the purpose of constructing a harbour at Fishguard, which was the original terminus of the Great Western Railway, and from which that railway formed the best route to London and the whole of the Great Western system, and for establishment of a short steamboat route between Fishguard and the harbour of Rosslare, which they had acquired from the Government, and in connection with this object that Company introduced a Bill into Parliament in the present Session for making new railways between Waterford and Rosslare, and between Cork and Fermoyle, and also for acquiring the undertakings of the Waterford and Dungarvan and Fermoyle and Lismore companies. Owing to the difficulty which those interested in the Fishguard and Rosslare undertaking anticipated in carrying out effectively a scheme of so much magnitude and importance, they opened negotiations with the Great Western Company, with the result that the Bill promoted by the Great Western and Great Southern and Western Companies was abandoned, and the control of the Bill promoted by the Fishguard and Rosslare Company, including the powers therein of acquiring the undertakings of the Waterford and Dungarvan and Fermoyle and Lismore Companies became practically vested in them, with the additional advantage of securing a short sea route, *via* Fishguard and Rosslare."

I would remind the proprietors that at the meeting we had in February last, I stated, in asking their sanction to the Bills then under consideration, that the Bills we were discussing would enable us to do certain things, and that we should report to the proprietors again; and I added this:—"If we can set up in any way a good, workable and substantial traffic between the West of England and the South of Ireland, we shall be doing something which will be of value to you." What we propose to do now is to carry out that, as we think, in a more effective manner than we had any prospect of doing in February last. The facts then were, that we had to bring forward a competing scheme with that of the Fishguard and Rosslare Company; and, as I explained by the remarks I have just made, the Fishguard and Rosslare Company were not in a position to go on with their scheme. We were thus able to bring forward a scheme which I believe is far stronger than the one presented before. By this scheme we should be able to take a short sea route from Fishguard to Rosslare, and powers are asked to make a line from Rosslare to Waterford and across the River Suir, giving access by way of the Waterford Dungarvan and Lismore Railway to the west of Ireland. This is not to be carried out by ourselves, but by us in connection with the Great Southern and Western Railway, who dominate to a great extent the traffic of the far west and south of Ireland. The first resolution I shall have to put will be this:—

"That the Bill now submitted to the meeting, intitled 'An Act to authorise the construction by the Fishguard and Rosslare Railways and Harbours Company of new railways from Cork to Fermoyle and Waterford to Rosslare, and the acquisition by the company of the undertakings of the Fermoyle and Lismore and the Waterford Dungarvan and Lismore Railway Companies, to confer running powers over certain railways, to extend the time for the completion of works authorised by the Fishguard Bay Railway and Pier Act, 1893, and for other purposes,' be and the same is hereby approved, subject to such alterations therein as may be sanctioned by Parliament."

In moving that, I would explain that the running powers referred to there merely refer to certain running powers to be granted over the Great Southern and Western system in the direction of Cork and over a portion of the Waterford and Limerick line—that is, at Waterford. I think the most convenient course will be to explain what the next resolution is which I shall have to move, so that any one may ask questions upon the two resolutions, and then I need not refer to them again. The next resolution reads as follows:—

"That the clauses in the said Bill giving power to the company to subscribe the sum of not exceeding £250,000. for the purposes of the Bill, and to apply their capital to such subscription, be and the same are hereby approved, subject to such alterations therein as may be sanctioned by Parliament."

That £250,000. is the amount which it is proposed the Great Western Company should be entitled to subscribe, but this would not bind the proprietors to subscribe it. It would merely entitle us, if you sanction it to-day, to put it in the Bill. It would rest with the proprietors to subscribe it afterwards. That represents one-half of the total

amount required for the Rosslare and Waterford line, and for giving access over the River Suir by means of a bridge. The powers we asked for before in connection with the New Ross line included some contribution which you authorised us to make, if necessary, towards the bridge over the Suir. Those powers disappear, and these are practically in exchange for the powers we asked for in February last. The most convenient course will be that I shall move the first resolution, and then I shall be happy to answer any questions. I move the first resolution.

Mr. ALEXANDER HUBBARD (deputy-chairman) seconded the motion.

Mr. SHONE thought the attendance at the company's meetings would be greater if the board issued free passes to those shareholders who lived at a distance from London.

Mr. EDMONDS said that he was probably the only shareholder present, apart from the directors, who had travelled through the districts affected by the Bill before the meeting. He recollected the attempts which were made twenty or twenty-two years ago to bring about an amalgamation, and then considered them hopeless; but now he believed that working arrangements with the Great Southern and Western and the other companies which had been referred to by the chairman would be productive of a fair amount of additional traffic to the Great Western. He had great pleasure in supporting the resolution.

The CHAIRMAN, in reply, said he was afraid that free passes could not be issued as an inducement to shareholders to attend the company's meetings. Before he became chairman of the company, the matter was discussed at a general meeting, and a resolution was passed to the effect that free passes could not be given. He was pleased to hear that Mr. Edmonds approved of the scheme which had been brought before the meeting, and which he thought would lead to a development of the Great Western traffic.

The resolutions were then put, and carried unanimously.

### GREAT SOUTHERN AND WESTERN RAILWAY.

A special general meeting of the shareholders of the Great Southern and Western Railway Company was held, in Dublin, on Monday, for the purpose of considering a resolution regarding the Fishguard and Rosslare Bill. Mr. JOSHUA PIM presided.

The CHAIRMAN said—You have all, no doubt, been following with great attention and interest the Fishguard and Rosslare Bill in Parliament, which has occupied an unusual amount of time of a committee of the House of Commons. This meeting is called in pursuance of the Standing Orders of Parliament for the purpose of submitting what I may call the Rosslare Bill, for your approval of clauses in that Bill, giving power to this company to subscribe the sum of £250,000. for the purposes of the Bill. The promotion of the Bill which is now proposed to be submitted for the approval of the proprietors arises out of the Bill which was approved by the proprietors at a special general meeting, held on Saturday, February 12th, 1898, which provided for the transfer and vesting in this company and the Great Western Railway Company of the undertakings of the Waterford Dungarvan and Lismore and Fermoyle and Lismore railway companies. This Bill was withdrawn owing to the Treasury at the time being unwilling to give it the support which had been previously promised. Simultaneously an opportunity occurred of putting an end to the hostile action of the Fishguard and Rosslare Company on friendly terms, and thus carrying out in a more complete manner than could have been effected under the original Bill a new through route for cross-channel traffic between the system of the Great Western Company on the one hand, and of the Great Southern and Western Company on the other hand, by the construction by the Fishguard and Rosslare Company of a railway from Rosslare to Waterford, with the additional advantage of the short sea passage between Fishguard and Rosslare. My board have entered into this project with a large mind, their object being not only to look after the interests of the shareholders, but also to discharge what they conceive to be their duty—viz., the developing of traffic between the south of Ireland and the south of England and Wales, the beneficial results of which, in the future, will in my opinion be very far reaching.

The SOLICITOR explained the clauses of the Bill.

The CHAIRMAN then moved that:—

"A Bill to authorise the construction by the Fishguard and Rosslare Railways and Harbours Company of new railways from Waterford to Rosslare, and the acquisition by the company of the undertakings of the Fermoyle and Lismore, and the Waterford Dungarvan and Lismore railway companies, to confer running powers over certain railways, to extend the time for completion of the works authorised by the Fishguard Bay Railway and Pier Act, 1893, and for other purposes, be and the same is hereby approved and adopted, subject to such alterations, variations, and amendments as Parliament may think fit to make therein. It is further resolved that the clauses which have been introduced into the said Bill giving power to this company to subscribe a sum not exceeding £250,000. to the purposes of the Bill, and to raise capital for the purpose of such subscription be, and the same is hereby approved and adopted, such to such alterations, variations, and amendments as Parliament may think fit to make therein."

Mr. ROBERTSON seconded the motion, which was unanimously adopted.

### LANCASHIRE DERRYSHIRE AND EAST COAST RAILWAY.

The half-yearly general meeting was held on Tuesday at the Westminster Palace Hotel; Mr. E. BAINBRIDGE, M.P., presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of £31,593. (against £16,815.), an expenditure of £17,951. (against £9,674.), and a profit of £13,643. (against £7,136.), of which £10,895. was applied to debenture and other interest payments in respect of the portion of the railway open for traffic—50½ miles, out of an autho-

rised length of 63½ miles—2,528l. was placed to a temporary suspense account, and 219l. was carried forward. The capital account showed a total expenditure of 2,495,515l., and receipts amounting to 2,463,454l., as follows:—Ordinary shares, 1,324,380l.; preference shares, 250,000l.; second preference shares, 332,624l.; 4 per cent. debenture stock, 555,918l.; premiums, 532l. The expenditure during the half-year amounted to 86,403l., and the receipts to 30,894l.

The CHAIRMAN, in moving the adoption of the report and accounts, said that that was the first occasion in the history of the company when the proprietors were able to compare the six months under review with a corresponding period in a previous year, and he ventured to think that they would not regard the comparison as altogether unfavourable. The gross revenue from all sources for the six months just ended was 31,593l., compared with 16,815l. in the corresponding period of 1897. While they could not always expect the receipts to increase at this rapid rate, the directors looked forward most hopefully to a continuation of the steady progress which the undertaking was making towards a dividend-paying position. The increase in receipts occurred under all the traffic heads except "live stock," in which he hoped before long to see an improvement. The proprietors would regard as satisfactory the considerable increase in the receipts from the mineral traffic. One result of the unfortunate labour dispute in South Wales had been to divert the orders to the Midlands, and the collieries on the Lancashire Derbyshire and East Coast Railway had shared in the increased output from the Derbyshire coalfield. There had been a substantial increase in passenger receipts. The tourist and excursion traffic to the "Dukeries" was now "in full swing," and the season promised to be far better than last year. The total expenditure for the half-year amounted to 17,950l., as compared with 9,679l. in January to June, 1897, a satisfactory feature, however, being that the ratio of expenditure to gross receipts in the period under review was 59.82 per cent., against 57.57 per cent. in the corresponding period of last year, notwithstanding the fact that during the six months just closed a very considerable portion of the line had been maintained by the company at a cost of over 3,000l., whereas during the same time last half-year the road was maintained by the contractors under the terms of their contracts. The excess of receipts over expenditure was 13,643l., as compared with 7,136l., and during the half-year under review the company had (although the railway was not really complete) not only earned sufficient to meet all the debenture interest and general interest charged against revenue during the six months, but had also provided for the adverse balance of 2,528l. which had accumulated in the two previous half-years, leaving a balance of 218l. to the credit of net revenue. After detailing the new sources of traffic to which the directors could look forward, the chairman, in conclusion, said he submitted that there was every reason for the directors to be hopeful. The company's financial position was sound. As long as the directors and their friends, who held a very large number of ordinary shares, were content confidently to await the development of the railway, he was sure that the proprietors would not be discouraged. The new capital of 100,000l. required to pay for additional rolling stock would be issued as a terminal debenture stock, and would be offered to the existing proprietors, and the terms would be submitted later in the year.

Mr. W. B. DAVENPORT, M.P., seconded the motion, which was carried. In reply to a SHAREHOLDER,

The CHAIRMAN stated that the company hoped to get access to Sheffield indirectly on the Midland Railway by the end of the year, and by means of the Sheffield District to obtain a direct run to Sheffield by the end of 1899.

## WATERFORD LIMERICK AND WESTERN RAILWAY

An extraordinary general meeting of the shareholders of the Waterford Limerick and Western Railway Company was held in Waterford on the 15th inst., in accordance with the following requisition:—"We the undersigned shareholders of the Waterford Limerick and Western Railway, holding in the aggregate not less than 50,000l. in the capital of the company, by this writing under our hands, require you to call an extraordinary general meeting of the company for the purpose of considering the action of the directors of the company who dissent, or have dissented, from the proposed amalgamation with the Great Southern and Western Railway Company, and, if thought advisable, for removing all, or any, such directors of the company opposing or dissenting, or who have opposed or dissented, from the said proposed amalgamation, or who may not undertake to promote and support such amalgamation, and, if thought advisable, electing other directors in place of the directors so removed." The Hon. PERCY BERNARD, D.L., chairman of the company, presided. There was a large attendance of shareholders.

Statements as to their attitude were made by Lord CASTLETOWN of Upper Ossory and Mr. A. W. SHAW. Both of them handed in their resignations, to be accepted if the meeting so decided. Mr. Shaw's reply to the shareholders favouring amalgamation was not deemed satisfactory, and it was moved that his resignation be accepted. After a long discussion, however, the resolution was withdrawn, and the meeting was adjourned until August 26th next.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft keeping by ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Gt. Cers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

## Directors' Reports.

### GREAT CENTRAL RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure now amounts to 42,481,393l., and the receipts to 40,152,509l., viz.:—

Preferred ordinary stock	£2,746,980
Deferred ordinary stock	2,746,980
Preference and guaranteed stock	17,467,489
Debenture stocks	10,946,660
1894 stocks	6,199,950*
Sundries	44,450

\* London Extension stock, 1,222,000l.; 5 per cent preference stock, 1894, 2,488,630l.; ordinary stock, 1894, 2,488,630l.

Debit balance, 2,328,884l. Estimated further expenditure—In the current half-year, 960,000l.; in subsequent half-years, 2,000,000l.; total, 2,960,000l. Capital powers and other available assets, 4,470,705l.

The capital expenditure for the past half-year was 1,237,084l., viz., 51,859l. on lines open for traffic, 1,130,274l. on lines in course of construction, 11,690l. on working stock, 6,000l. subscriptions to other railways, and 37,261l. on docks, steamboats, and other special items.

#### REVENUE.

The accounts give the receipts under this head for the half-year ending June 30th as follows:—

	1897.	1898.
Passengers—First-class	£11,215	£10,845
Third-class	191,226	191,658
Season-tickets	16,194	17,042
Parcels, horses, carriages, &c.	67,112	67,602
Mails	2,649	2,919
Merchandise (less coll. and delivery)	468,170	488,865
Live stock	9,868	9,089
Minerals	356,418	380,255
Grimsby Dock dues and wharfage	21,710	23,602
Canal receipts	6,307	6,420
Mileage and demurrage	12,975	15,442
Rents receivable	31,349	31,816
Transfer fees	457	527
Sundry receipts	2,333	2,510
Steamship receipts	41,063	40,421

Total receipts ..... £1,240,045 ..... £1,269,023

The expenditure on revenue account for the same period was as follows:—

Maintenance of way and stations	£87,640	£90,928
Locomotive power	182,743	196,222
Carriage and wagon repairs	46,144	54,068
Traffic expenses	226,677	241,758
General charges	33,588	34,645
Law charges	3,125	2,959
Parliamentary expenses	897	863
Compensation—Passengers	953	2,905
Goods	3,090	3,215
Rates and taxes	33,541	35,177
Government duty	916	952
Rents payable	15,751	17,358
Ferry-boat expenses	4,516	4,571
Maintenance of Grimsby Docks	15,418	14,790
Canal expenses	11,299	10,848
Steamship expenses	37,261	38,154

Total expenditure ..... £703,589 ..... £749,413

The net revenue account and the proposed appropriation of balance available for dividend may be summarised as follows:—

Balance from last half-year	£2,400	£2,207
Net earnings	536,456	539,610
Profit from joint lines and lines worked	83,175	86,274
Sundry credits	2,187	2,188

Total	£624,218	£630,279
Prior charges	£203,533	£209,234
Steamship depreciation	2,500	2,500
Preference dividends	402,038	402,038
Dividend on undivided ordinary stock	2,366a	—
preferred ordinary stock	11,365b	13,735c
deferred ordinary stock	nil	nil
Balance to next half-year	2,416	2,772

Total ..... £624,218 ..... £630,279

a At the rate of ½ per cent. per annum. b At the rate of 1 per cent. per annum. c At the rate of 1 per cent. per annum.

The gross receipts show an increase for the past half-year of 48,978l., the expenditure an increase of 45,824l., and the net receipts an increase of 3,154l. The ratio of expenses to receipts is 58.13 per cent., as against 56.74 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class	139,455	143,125
Third-class	7,010,183	7,344,421
Total	7,149,638	7,487,546
Season-tickets	8,270	9,117
Mileage—Lines owned	354	354
Partly owned	195½	195½
Lines worked	21	21
Foreign lines worked over	198	203½
Total operated	768½	774

Train mileage—Passengers.....	3,008,540 ...	3,016,998
" Goods .....	3,966,945 ...	4,144,860
" Total .....	6,975,491 ...	7,161,798
Manchester Sheffield and Lincolnshire Canals and Tramways, 111½ miles.		

\* Including mileage run for other companies and ballasting.

The report states:—

#### EXTENSION TO LONDON.

"The directors regret that owing to the effects of the prolonged dispute in the engineering trade the progress of the extension to London works has been seriously impeded. It has, consequently, been impossible for the anticipations expressed in their last report to be fully realised, but it is gratifying to be able to report that the works are now sufficiently advanced to admit of the working of coal traffic from the 25th instant, of which public notice has been duly given. Every effort continues to be made with the object of bringing to an early and satisfactory completion these large and important works. Arrangements have been made whereby the line is being inspected in sections by the Board of Trade, and after the final approval of that department has been obtained no time will be lost in opening the line throughout for the conveyance of public traffic of all kinds. The directors wish to point out that the fund reserved under the Act of 1893 for the payment of interest upon the London extension stock—£6,200,000*l.*, which includes the 5 per cent. preference stock, 1894, and the ordinary stock, 1894—will be sufficient to provide for interest upon that stock until August 25th next, from which date to the complete opening of the line the stock will cease to receive any interest. The progress made by the contractors with the construction of the Banbury Branch Railway continues to be of a satisfactory character. The Nottingham joint station committee have placed the capital necessary for the execution of the works comprised in the joint passenger station at Nottingham, and the erection of the station buildings is being energetically proceeded with."

Mr. Edward Parry, the engineer for the northern division, in his report dated July 9th says:—

"The works upon this division, extending from Annesley to Rugby, and through the towns of Nottingham and Leicester, a distance of 52 miles, have continued to make good progress during the past half-year. The main line is now practically completed, and is expected to be ready for coal traffic on the 25th inst. The station buildings and other works throughout this division are also making good progress; most of the country stations and stationmasters' houses are in an advanced state, the latter will be ready for occupation by the end of the month. The contract for the building of the Nottingham Central passenger station was let in March last, and the work is now well in hand. The passenger station buildings at Leicester and Loughborough are also in hand, and are being pressed forward rapidly. The large engine sheds, goods warehouses, oil gas works, and other buildings at Annesley, Nottingham, and Leicester, are also making good progress, and are expected to be completed early in the autumn. The buildings for the hydraulic and electric lighting installations at Nottingham and Leicester have been commenced, and are being proceeded with. The signalling throughout the division is well advanced, being practically completed, excepting at one or two points. Upon the branch lines at Bulwell and Basford, forming junctions with the Great Northern (Leen Valley and Derbyshire) lines, the excavation is nine-tenths completed; four out of the five bridges are in a forward state, and the permanent way is laid upon the Basford branch. The work has been commenced upon the branch to the Clifton colliery at Nottingham, and as soon as possession can be obtained of the land for the Gotham branch this will also be proceeded with. The number of men employed upon the works at present is approximately 3,277; with twenty-nine locomotives, twenty-five portable and other engines, and sixty-eight horses."

Sir Douglas Fox, the engineer for the southern and metropolitan divisions, in his report dated July 9th says:—"During the half-year the works upon these two divisions have been in rapid progress, a force of some 5,200 men having been employed upon them. *Southern Division.*—Rugby to Quainton-road, 41 miles.—This division is now ready for coal traffic, and it is intended to open it for that purpose on the 25th instant. The bridges and viaducts are practically completed. The permanent way is now laid throughout, and the top ballasting is proceeding rapidly. The sidings and engine sheds at Woodford will very shortly be ready for occupation. The stations are nearly finished, and the signalling will be ready this month. Banbury branch, 8½ miles.—During the half-year some 260,000 cubic yards of earth have been moved, and good progress is being made with the brickwork. There are about 560 men employed. *Metropolitan Division.*—The covered ways and tunnels are all completed, and there is through communication from the connection with the Metropolitan Railway at Finchley-road into the Marylebone coal yard. The whole of the bridges and new streets are finished. The coal yard is now practically complete, and all arrangements are being made for commencing the coal traffic on the 25th instant. The goods warehouse, goods yard, transfer shed at the Regent's Canal, the carriage shed, goods offices, the oil gas works, the hydraulic and electrical building, are all in progress. The terminal station buildings are now in a forward state, and about one-half of the roofing over the platform is erected. The cab approach is completed, except the paving. The sidings at Neasden will be ready for coal traffic this month."

#### EAST LONDON RAILWAY.

The accounts for the half-year ended June 30th, 1898, show a gross revenue of 14,911*l.*, of which 14,500*l.* is six months' rent of the line. General charges and other expenses absorb 911*l.*, leaving net receipts

14,000*l.*, or 549*l.* in excess of the amount required for interest on the first debenture stock and the second charge debenture stock, class A. Length of line, 5½ miles. Capital, June 30th, 1898:—Received—Consolidated stock, 3,240,799*l.*; first charge, 3½ per cent. debenture stock, 172,920*l.*; second charge ditto, class A, 4 per cent., 544,440*l.*; second class B, 4 per cent., 381,116*l.*; third charge, 4 per cent., 624,994*l.*; fourth charge, 4 per cent., 575,996*l.*; Whitechapel extension debenture stock, 2½ per cent., 250,000*l.*; sundries, 96,031*l.*; total, 5,886,296*l.* Expended, total, 5,888,434*l.* Debit balance, 2,138*l.* The report states:—

"The gross receipts from all sources for the past eleven years have been as follows:—1887, 43,361*l.*; 1888, 44,237*l.*; 1889, 45,339*l.*; 1890, 46,538*l.*; 1891, 49,178*l.*; 1892, 49,484*l.*; 1893, 48,704*l.*; 1894, 49,156*l.*; 1895, 47,990*l.*; 1896, 49,967*l.*; 1897, 51,954*l.* In order that the minimum guaranteed rent of 30,000*l.* may be augmented the annual gross receipts must yield 63,571*l.* When this latter amount has been arrived at the entire receipts, less 44 per cent. for working expenses, belong to the company."

"On July 1st the South Eastern Railway Company commenced running a through express train at cheap fares every week-day, for the summer season, between stations on the East London line, Ramsgate, and Margate. The Great Eastern Railway have commenced their works in connection with the construction of the hoist at Spitalfields for the development of goods and mineral traffic. Tenders have been invited for the hoist and girder work in connection therewith, the period fixed for the completion of the whole work being July 1st, 1899. All difficulties with the southern companies with regard to these works have been now removed."

"The London Brighton and South Coast Company have, by their Bill of this session, acquired the East London Railway's disused low level line and station at New-cross. In substitution, they give the lessee companies the perpetual right to use their high level New-cross station; and should that accommodation be insufficient, they undertake to make all necessary additions. They further undertake at their own expense to construct on their land reception sidings for the interchange of goods traffic between the systems of the East London and London Brighton and South Coast companies. This Bill has passed all stages, and now only awaits the Royal Assent."

"Warrants for the six months' interest on the first (3½ per cent.), second charge 4½ per cent. class A, and 2½ per cent. (Whitechapel Extension), debenture stocks, were posted to the proprietors on the 30th ultimo."

#### LONDON TILBURY AND SOUTHEAST RAILWAY.

##### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 3,398,472*l.*, whilst the receipts have been 3,317,676*l.*, viz.:—

Ordinary stock .....	£1,338,350
Preference stocks .....	972,850
Debenture stock .....	776,134
Sundries .....	230,342

Debit balance, 80,796*l.* Estimated further expenditure—In the current half-year, 45,000*l.*; in subsequent half-years, not stated; total, 45,000*l.* Capital powers and other available assets, 30,680*l.*

The capital expenditure for the past half-year amounted to 33,159*l.*—viz., 14,534*l.* on lines open for traffic and 18,625*l.* on working stock.

##### REVENUE.

The receipts and expenditure on revenue account for the half-year ending June 30th were as follows:—

	1897.	1898.
Passengers, parcels, horses, mails, &c....	£293,139 ...	£296,663
Goods, minerals, and cattle .....	40,877 ...	43,163
Sundries .....	12,708 ...	13,023

Total receipts .....	£146,724 ...	£152,849
Total expenditure .....	83,350 ...	90,726

Net receipts .....	£63,374 ...	£62,123
--------------------	-------------	---------

The net revenue and the proposed appropriation of balance available for dividend may be summarised as follows:—

	£820 ...	£14,592
Balance from last half-year .....	63,374 ...	62,123
Net earnings .....	150 ...	117
Sundry credits .....		

Total .....	£64,344 ...	£76,832
-------------	-------------	---------

Prior charges .....	£21,155 ...	£21,944
---------------------	-------------	---------

Preference dividends .....	18,887 ...	19,457
----------------------------	------------	--------

Ordinary dividend .....	*16,729 ...	†20,075
-------------------------	-------------	---------

Balance to next half-year .....	7,573 ...	15,356
---------------------------------	-----------	--------

Total .....	£64,344 ...	£76,832
-------------	-------------	---------

\* At 2½ per cent. per annum. † At 3 per cent. per annum.

The gross receipts for the past half-year show an increase of 6,125*l.*, the expenses an increase of 7,376*l.*, and the net receipts an increase of 1,251*l.* The ratio of expenses to receipts is 59·35 per cent. as against 56·74 per cent.

##### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers carried (total number) .....	5,584,221 ...	5,788,226

Season-tickets .....	6,683 ...	7,536
----------------------	-----------	-------

Mileage—Lines owned .....	79 ...	79
---------------------------	--------	----

" Foreign lines worked over ...	24 ...	24
---------------------------------	--------	----

" Total operated .....	81½ ...	81½
------------------------	---------	-----

Train mileage*—Passengers .....	551,123	...	588,492
" Goods .....	101,128	...	111,579
" Total .....	652,249	...	700,071

\* Including mileage run by trains of other companies.

The report states:—

"The traffic for the past half-year, compared with the corresponding period of 1897, shows increases of 3,524*l.*, 1,032*l.*, and 1,353*l.* respectively in the receipts from passenger, merchandise and mineral traffic, and a decrease of 100*l.* in the receipts from live stock traffic.

"The Bill promoted by the company in the present session of Parliament has been passed by committees of both Houses without material alteration, and is awaiting the Royal Assent.

"Since the last meeting an inquiry has been held, under the direction of the Railway Commissioners, before Sir Benjamin Baker, K.C.M.G., to determine the cost of the widening of the London and Blackwall Railway, and, under his report, the amount of the Great Eastern Company's original claim upon this company has been considerably reduced. The provisions contained in the company's Bill, referred to in the preceding paragraph, will afford still greater relief, but the additional payments, if any, to be made to the Great Eastern Company cannot be definitely ascertained until the re-hearing provided for by the Act has taken place."

### METROPOLITAN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 12,412,978*l.*, whilst the receipts have been 12,363,898*l.*, viz.:—

Ordinary stock .....	£5,281,830
Preference stocks .....	3,760,113
Debenture stock .....	3,309,999
New ordinary stock (1896) .....	450,000
Premiums .....	3,998

Total .....	£12,805,940
Less nominal additions to capital, &c. ....	442,042

£12,363,898

Debit balance, 40,081*l.* During the past half-year there was expended 85,430*l.*, of which 16,329*l.* was on lines open for traffic, 14,219*l.* on working stock, and 54,881*l.* on lines in course of construction.

The estimate of expenditure for the current half-year is 174,000*l.*, and for future half-years 114,000*l.*—together, 288,000*l.* The capital powers and other available assets amount to 1,107,412*l.*

#### REVENUE.

The revenue account for the half-year ending June 30th shows the following results:—

	1897.	1898.
Coaching receipts .....	£348,192	£349,546
Goods, minerals, &c. ....	40,159	47,296
Miscellaneous .....	22,184	21,610

Total receipts .....	£410,535	£418,452
Total expenses .....	*175,683	†182,590

Net receipts .....	£234,852	£235,862
--------------------	----------	----------

\* 177,191*l.*, less 1,507*l.* for working trains of other companies. † 184,079*l.*, less 1,480*l.* for working trains of other companies.

The net revenue and the manner of its appropriation are shown hereunder:—

Balance from last half-year .....	£14,130	£17,133
Net earnings, as above .....	234,852	235,862
Sundry credits .....	3,078	2,949
City Lines and Extension Joint Com. ....	6,934	7,696
Railway estate revenue account .....	4,494	5,124

Total .....	£263,488	£268,764
-------------	----------	----------

Prior charges .....	£73,291	£73,543
---------------------	---------	---------

Preference dividends .....	74,764	74,765
----------------------------	--------	--------

Dividend on ordinary stock .....	*99,034	†99,034
----------------------------------	---------	---------

Workmen's Compensation Reserve .....	—	3,000
--------------------------------------	---	-------

Balance to next half-year .....	16,399	18,422
---------------------------------	--------	--------

Total .....	£263,488	£268,764
-------------	----------	----------

\* At the rate of 3½ per cent. per annum. † At the rate of 3½ per cent. per annum.

The report of the Surplus Lands Committee states that the rental accrued during the half-year amounted to 38,839*l.*, and the outgoings to 3,068*l.*, leaving 35,771*l.* available for dividend. This will admit of a dividend at the rate of 2½ per cent. per annum upon the surplus lands stock, carrying forward a balance of 1,109*l.*

The gross receipts show an increase for the past half-year of 7,917*l.*, the expenditure an increase of 6,907*l.*, and the net earnings an increase of 1,010*l.* The ratio of expenses to receipts is 43·63 per cent. (as against 42·80 per cent.).

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers (number) .....	47,878,357	48,126,805

Mileage—Lines owned .....	62½	62½
---------------------------	-----	-----

" Lines partly owned .....	4½	4½
----------------------------	----	----

" Lines worked .....	4	4
----------------------	---	---

" Foreign lines worked over .....	13½	13½
-----------------------------------	-----	-----

" Total mileage operated .....	80½	80½
--------------------------------	-----	-----

Train mileage—Passengers .....	900,119	1,018,839
--------------------------------	---------	-----------

" Goods .....	126,162	160,248
---------------	---------	---------

" Piloting, shunting, &c. ....	354,871	363,729
--------------------------------	---------	---------

" Total .....	1,411,152	1,542,816
---------------	-----------	-----------

The report states:—

"The considerable increase in the expense is largely due to the disastrous coal strike in South Wales, which, since April 1st last, has rendered it impossible for the coal contractors to continue supplies of coal under their contract, and compelled the directors in consequence to purchase coal elsewhere at higher prices.

"The directors recommend that 3,000*l.* be transferred to a special account to form the nucleus of a fund for meeting claims on the company under the 'Workmen's Compensation Act, 1897,' which came into operation on the 1st instant.

"The company's Bill of this session, containing important provisions to enable you to improve the ventilation of your railway, to work the traffic by electricity, to alter the levels of your railway in the parish of Willesden, and to execute other works of a general nature, has been passed by Parliament, and is now waiting to receive the Royal Assent. Several Bills promoted in the present session which affect your undertaking were opposed on your behalf, with the result that clauses have been inserted therein for the protection of your interests. Amongst these was the Great Central Company's Bill, in which powers were applied for to construct a railway from Neasden to Ruislip, forming a junction with the Great Western line to High Wycombe authorised last year. The railway to Ruislip has been sanctioned by Parliament, but with a clause in the Bill preserving your rights and interests as in the Great Central Company's Act of 1896.

"Reference has already been made to the company's Bill containing power to work the Metropolitan and the Metropolitan District railways by electricity, and your directors, believing that the time has now arrived when electrical traction can be introduced with success and advantage, have agreed with the Metropolitan District Company for an experimental working by electricity of a piece of line on their system between High-street, Kensington, and Earl's Court stations, at an estimated cost of 20,000*l.*, to be borne in equal proportions by the two companies.

"The company's engineer (Sir J. Wolfe Barry, K.C.B.) reports as follows with reference to the progress of the widenings between Finchley-road and Harrow:—'Widening of Metropolitan Railway between Finchley-road and Wembley-park—The whole of the works on this contract have now been completed, with the exception of a few minor details, and the lines will be ready to run over by the 25th of this month. Widening between Wembley-park and Harrow—The brickwork and retaining walls on this contract are well advanced, but the works have been much delayed on account of the congested state of the steel trade. Every effort, however, is being made to hasten on the manufacturers, and I have hope that the works will be completed by the contract date.'

"The Great Central Railway Company having intimated that they will be ready to commence running coal trains from their system over your railway on the 25th inst., your directors have assented to the working of such traffic under an arrangement which provides that the interest at 4 per cent. per annum payable by the Great Central Company, under the agreement of 1895, upon your outlay in connection with the widening between Finchley-road and Wembley, is to continue until the Great Central Company's new railway is opened throughout for public traffic, and the agreement entered into in 1890, as to the division of traffic receipts, comes into operation.

"The interest received from the Great Central Company in respect of the widening referred to is being held in suspense, and part of it will be appropriated to relieve the revenue of the current half-year of any burden in respect to the 450,000*l.* new ordinary stock, 1896, which ranks for dividend as from the 1st inst.

"Mr. A. C. Ellis, formerly the assistant-solicitor to the London Brighton and South Coast Railway Company, has been appointed solicitor to the company in place of the late Mr. C. A. Mason."

### GREAT EASTERN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure to date amounted to 50,614,319*l.*, whilst the receipts were 50,210,257*l.*, viz.:—

Ordinary stock .....	£12,572,886
New ordinary stock .....	251,916
Preference and guaranteed stocks .....	20,776,335
Debenture stock .....	14,845,343
Loans .....	238,300
Sundries .....	1,525,477

Debit balance, 404,062*l.* The capital expenditure for the past half-year amounted to 252,541*l.*, of which 143,371*l.* was on lines open for traffic, 4,643*l.* on lines in course of construction, 131,767*l.* on working stock, 1,500*l.* on Great Northern and Great Eastern joint lines, and 140*l.* on guaranteed, &c., stocks, 17,000*l.* on subscription to other railways; together 298,424*l.*, less a credit of 45,883*l.* on docks, steamboats, &c.

The estimate of further expenditure is 300,000*l.* during the current half-year; in subsequent half-years, uncertain; total, 300,000*l.* The capital powers and other assets available amount to 447,761*l.*

#### REVENUE.

The revenue account for the half-year ending June 30th gives the receipts under this head as follows:—

	1897.	1898.
Passengers—First-class .....	£69,598	£71,584
" Second-class .....	46,888	46,194
" Third-class .....	744,499	767,715
" Season-tickets .....	136,626	144,328
Parcels, horses, carriages, &c. ....	118,144	120,383
Mails .....	15,115	15,118

Merchandise (less cartage) .....	651,943	672,865
Live stock .....	41,765	43,837
Minerals .....	236,115	252,790
Continental steamboats .....	121,028	117,375
Ipswich and Harwich boats .....	1,546	1,502
Lowestoft Harbour dues, &c. ....	5,080	5,391
Harwich Pier dues .....	428	420
Fosdyke Navigation tolls .....	208	244
Wisbeach Tramways .....	1,272	1,234
Rents .....	65,577	61,842
Transfer fees .....	805	550

Total receipts ..... £2,256,635 ... £2,323,373

The expenditure on revenue account for the same period is shown hereunder:—

Maintenance of way, &c. ....	£193,092	£194,412
Locomotive power .....	337,317	352,604
Carriage and wagon repairs .....	98,900	109,657
Traffic expenses .....	390,002	415,869
General charges .....	66,658	65,746
Law charges .....	5,702	7,209
Parliamentary expenses .....	973	1,091
Compensation—Passengers .....	2,929	6,078
"    Goods .....	6,554	8,217
Rates and taxes .....	106,423	100,286
Government duty .....	8,004	8,273
Working other lines .....	Cr.1,592	Cr.1,632
Carriage and wagon hire .....	1,467	4,112
Woolwich ferry-boats, working and repairs .....	1,899	1,465
Continental steamboat expenses .....	105,604	108,323
Harwich Harbour, &c. ....	2,069	3,846
Ipswich and Harwich boats .....	2,253	2,591
Lowestoft Harbour, working & repairs	9,553	9,118
Stowmarket, &c., navigation, repairs ...	303	314

Total expenditure ..... £1,338,110 ... £1,397,579

The net revenue for the half-year and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance brought forward .....	£50,918	£51,283
Net receipts .....	918,525	925,794
Sundry credits .....	6,764	5,829
Total .....	£976,207	£982,906
Prior charges .....	£469,758	£470,622
Preference dividends .....	378,053	378,053
Dividend on ordinary stock .....	*125,729	†125,729
Balance carried forward .....	2,667	8,502

Total ..... £976,207 ... £982,906

\* At 2 per cent. per annum. † At 2 per cent. per annum.

The receipts for the past half-year show an increase of 66,738*l.*, the expenditure an increase of 59,469*l.*, and the net receipts an increase of 7,269*l.*. The ratio of expenses to receipts is 60·15 per cent., as against 59·29 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class .....	860,511	859,287
"    Second-class .....	2,422,338	2,341,187
"    Third-class .....	44,363,126	45,045,944
"    Total number carried .....	47,645,975	48,246,418
Mileage—Lines owned .....	9094	9372
"    Joint lines .....	1234	123
"    Leased or rented .....	117	914
"    Lines worked .....	106	1054
"    Total operated .....	1,256	1,258
Train mileage*—Passenger .....	6,116,939	6,321,800
"    Goods .....	3,761,601	4,904,145
"    Total .....	9,878,540	10,325,945

\* Including mileage run by other companies and empty carriage trains.

The report states:—

"There is an increase under each of the following heads of traffic receipts—viz., 7,702*l.* in season tickets; 24,508*l.* in other passenger traffic; 2,238*l.* in parcels; 20,922*l.* in merchandise; 16,674*l.* in coal; and 2,072*l.* in cattle. The Continental traffic, however, shows a decrease of 3,652*l.*. The total increase in earnings from all sources has been 66,737*l.*, but there is an increase in the working expenses of 59,468*l.*

#### GENERAL.

"The directors are pleased to announce that since May 1st last the English night mails for Rotterdam, Amsterdam, The Hague, Leyden, and Haarlem have been sent *via* Harwich and the Hook of Holland.

"The capital expenditure for the half-year has been 300,550*l.*, minus 48,149*l.*, the cost of the s.s. *Claud Hamilton*, which has been sold and debited to the steamboats depreciation account.

"The Great Eastern Railway (General Powers) Bill, 1898, received the Royal Assent on the 1st inst. It provides, amongst other things, for the purchase of the Ely and St. Ives, the Ely and Newmarket, the Colchester Stour Valley Sudbury and Halstead, and the Mellis and Eye railways. These railways become an integral part of the Great Eastern Railway from the 1st inst. A resolution will be submitted at the meeting to create the necessary capital for their purchase.

"The Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Bill, 1898, has passed both Houses of Parliament, and now awaits the Royal Assent. Under that Bill, as the proprietors will no doubt remember, certain railways in Suffolk and Norfolk, already constructed, or to be constructed, will become the joint property of the three companies.

"The Benwick line, referred to in the half-yearly report for December, 1897, 4½ miles in length, will be opened throughout on the 2nd proximo. It practically consists of a series of goods sidings, and will, it is hoped, benefit materially both this company and the agriculturists of the district.

#### LIGHT RAILWAYS.

"Section 5 of the Light Railways Act, 1896, provides that in certain circumstances and under certain conditions the Treasury may grant special assistance out of the public money towards the construction of light railways. In the case of two light railways in the company's district, the promoters believe such special assistance will be given, and the directors have undertaken to recommend, if the Treasury will find half the requisite capital as a free grant, and subject to one or two other minor conditions, that the company should provide the other half, and should construct, take over, and work such railways in perpetuity. One of these railways will begin at Kelvedon, and, running through Tiptree-heath and Tolleshunt d'Avey, finish at Tollesbury, a distance of 9¼ miles; the other will commence at Elsenham, and, running through Thaxted and Little Bardfield, end at Great Bardfield, a distance of 10¼ miles.

#### WORKMEN'S COMPENSATION.

"In 1879, with the sanction of the proprietors, and under the authority of Parliament, obtained by the Great Eastern Railway (General Powers) Act, 1878, an accident fund, called the 'Great Eastern Railway Accident Allowance Fund,' was established for the benefit of the company's servants, and was contributed to both by the company and the servants. In 1880, after the passing of the Employers' Liability Act of that year, its terms were somewhat altered, but throughout, until the 1st instant, when the Workmen's Compensation Act of 1897 came into force, it has worked to the mutual advantage of the servants and the company. In consequence of the Workmen's Compensation Act, 1897, it has been necessary to put an end to the above scheme. Encouraged by their past experience, the directors have established a new fund, which has been agreed to by the servants, and has received the approval of the Registrar of Friendly Societies, whose approval it was necessary to obtain under the Act. The basis of the new scheme is practically the same as that of the previous scheme—i.e., both the company and the servants contribute towards it. The company's contribution will be greater probably than their legal liability, but your directors feel that as between them and their servants there should be a liberal and equitable arrangement, so as to avoid recourse to law. The directors, in framing the new scheme, which dates from the 1st inst., called in to their aid many members of the old scheme, and they are pleased to acknowledge the fairness and ability with which those members discussed the different points which came up for consideration. In order that, in the administration of the scheme, proper weight should be given to the views of all the members, it has been arranged that the committee of management should consist of three directors and two officers of the company, and four members of the fund.

#### PENSION FUND.

"The new pension fund and the new pension supplemental fund will, under the Great Eastern Railway (Pensions) Act, 1898, come into operation on January 1st, 1899. The contributions of the members and the benefits to them will remain the same as under the present pension and pension supplemental funds; but the basis of the new funds will be that of the new superannuation fund, authorised by the Great Eastern Railway (General Powers) Act of 1897, which came into operation on January 1st last. The directors will thus be enabled to open both these funds to those servants of the company who are not already members, and it is believed that a very large number will avail themselves of the opportunity of joining. Every servant of the company will then have the opportunity of securing for himself a pension in his old age, and he will have the satisfaction of knowing that his weekly payment towards the fund is in safe hands, and cannot be applied to any purpose other than that for which he contributed it."

#### SOUTH EASTERN RAILWAY.

##### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 26,202,029*l.*, and the receipts to 25,469,537*l.*, viz.:—

Undivided ordinary stock .....	£2,738,790
Preferred ordinary stock .....	3,652,120
Deferred ordinary stock .....	3,652,120
Other ordinary stock .....	59
Preference and guaranteed stocks .....	8,836,542
Debenture stocks .....	6,473,691
Sundries .....	116,215

Debit balance, 822,492*l.*. Estimated further expenditure—In the current half-year, 350,000*l.*; in subsequent half-years, 773,637*l.*; total, 1,123,637*l.*. Capital powers and other available assets, 1,790,236*l.*

The capital expenditure for the past half-year amounted to 356,945*l.*, viz., 272,277*l.* on lines open for traffic, 66,446*l.* on working stock, 11,095*l.* on steam packet account, and 7,011*l.* on Boulogne Hotel.

##### REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as follows:—

	1897.	1898.
Passengers—First-class .....	£95,130	£100,147
"    Second-class .....	84,025	91,677
"    Third-class .....	417,610	426,332
"    Season-tickets .....	89,139	95,256
Parcels, horses, carriages, &c. ....	86,603	89,764
Mails, expresses, and bullion .....	12,774	12,780
Merchandise .....	196,636	205,393
Live stock .....	5,760	5,991
Minerals .....	92,171	98,663

Tolls .....	6,173	...	6,612
Proportion of Eastbourne traffic .....	10,819	...	11,188
Rent and hotel accounts, &c. ....	70,200	...	73,301
Transfer fees .....	348	...	306
Canals, harbours, and pier dues .....	3,580	...	4,291
Steam packet service .....	28,424	...	33,524
<b>Total receipts .....</b>	<b>£1,199,392</b>	...	<b>£1,255,225</b>
For the same period the expenditure on revenue account was as follows:—			
Maintenance of way, works, &c. ....	£88,132	...	£104,162
Locomotive power .....	155,780	...	173,512
Carriage and wagon repairs .....	51,581	...	58,047
Traffic expenses .....	198,660	...	217,420
General charges .....	37,682	...	43,256
Law charges .....	5,176	...	4,730
Parliamentary expenses .....	94	...	165
Compensation—Passengers .....	3,484	...	1,727
"    Goods .....	2,190	...	3,590
Rates and taxes .....	67,024	...	71,044

Haulage account .....	Cr. 2,151	...	Cr. 2,219
Tolls .....	4,928	...	4,965
Rent account—repairs, &c. ....	12,502	...	12,784
Canals, harbours, &c., expenses .....	8,519	...	8,128
Steam packet working expenses .....	22,271	...	29,109
"    depreciation .....	7,140	...	11,149
<b>Total expenditure .....</b>	<b>£672,582</b>	...	<b>£752,003</b>
The net revenue and the manner of its disposal are shown hereunder:—			
Balance from last half-year .....	£5,520	...	£4,055
Net earnings .....	526,810	...	503,222
Sundry credits .....	16,017	...	15,294
<b>Total .....</b>	<b>£548,347</b>	...	<b>£522,571</b>
Prior charges .....	£214,457	...	£219,886
Preference dividends .....	106,164	...	172,112
Dividend on undivided ordinary stock .....	41,888a	...	34,235b
"    preferred ordinary stock .....	109,210c	...	91,303d
"    deferred ordinary stock .....	9,101e	...	—
Balance to next half-year .....	4,527	...	5,035
<b>Total .....</b>	<b>£548,347</b>	...	<b>£522,571</b>

a At the rate of 3½ per cent. per annum. b At the rate of 2½ per cent. per annum. c At the rate of 6 per cent. per annum. d At the rate of 5 per cent. per annum. e At the rate of 4 per cent. per annum.

The gross receipts for the past half-year show an increase of 55,833*l.*, the expenses an increase of 79,421*l.*, and the net receipts an increase of 23,588*l.* The ratio of expenses to receipts is 59·91 per cent., as against 56·07 per cent. for the corresponding half of last year.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class .....	506,180	501,891
"    Second-class .....	1,240,161	1,283,838
"    Third-class .....	15,235,724	15,328,693
"    Total .....	17,032,068	17,114,422
Mileage—Lines owned .....	382½	382½
"    Partly owned .....	23½	23½
"    Leased or rented .....	15½	21½
"    Worked .....	8½	8½
"    Foreign lines worked over .....	21½	22
"    Total operated .....	452½	458½
Train mileage*—Passengers .....	3,103,297	3,252,272
"    Goods .....	917,390	1,026,312
"    Total .....	4,020,687	4,278,584

\* Including mileage run for other companies' lines and on lines partly owned.

The report states:—

"The accounts for the half-year ending June 30th, 1898, show a gross revenue of 1,255,225*l.*, being an increase of 55,833*l.* over that of the corresponding period of last year. The expenditure has been 752,003*l.*, exceeding that of last year by 79,421*l.* Of this, 33,594*l.* was in the up-keep of the line and plant, and larger reserve for steamboat depreciation; 14,612*l.* for additional mileage and higher price of fuel; 4,020*l.* in rates and taxes; and 6,837*l.* in steamboat working, chiefly attributable to the afternoon service. In some of the departments the scale of wages has been raised, and there has been an increase in the number of men employed, owing to the adoption of the shorter hours of labour. The working expenses continue to be abnormally high, owing to the want of adequate means of dealing with the constantly increasing traffic of the line. The directors are hopeful that upon the completion of the works now in progress the cost of working will be materially reduced.

#### NEW WORKS.

"London widenings.—Considerable progress has been made with the widening of the Charing-cross railway and of the Greenwich viaduct. New works.—Caterham line widening. Good progress has been made, and the works are nearing completion. Erith engine-shed. The contractor has so far done this work very quickly, and if the same progress is maintained the shed should be in work at the end of the year. Protective works at Folkestone. These are nearing completion, including the uncovering of the Martello Tunnel. Station enlargements at Addiscombe-road (Croydon), Charlton, Blackheath, Maidstone, and Westenhanger. These are all well in hand, and will shortly be completed. New carriage repairing shop at Ashford. This is completed and now in use. Reading station alterations. These have been completed and are now in work. Sidings at Hither-green, Ashford, Redhill, and Tonbridge.

These works are well forward and partly in use. Port Victoria Pier renewal. This is now completed.

#### GENERAL.

"It is expected that the new steamship *Princess of Wales*, which is being built by Messrs. Laird Brothers for the Folkestone and Boulogne service, will be delivered to the company in September next, and to provide for the large traffic which is expected in connection with the Paris Exhibition of 1900, another vessel has also been ordered from the same firm. As the extension of the Folkestone Pier will allow of it, this vessel will be of larger size than those hitherto worked on this passage. The cost of this vessel will be borne by the steamboat depreciation fund, which now stands at 82,995*l.* 18s. 7d.

"The directors are in friendly conference with the Chatham board with the view of concluding an arrangement for the more efficient and economical working of competitive traffic of the two companies. The terms of a draft agreement are now under discussion, and it is hoped that they will have been settled and the agreement exchanged in time for submission to the proprietors at this meeting.

"The company's Bill of the present session, the provisions of which have been fully reported to the proprietors, has received the Royal Assent.

"The balance of the 3 per cent. (interim interest at 2 per cent.) preference stock 1898, which was not taken by the proprietors, is in course of issue. After the whole of this stock has been disposed of, the capital account will be still in debit, and further capital will be required for the London widenings and other new works, and towards the construction of the Bexhill and Chipstead lines. The proprietors will therefore be asked to authorise the issue of the remaining capital under the South Eastern Railway (Various Powers) Act, 1882, the South Eastern Railway (Various Powers) Act, 1884, and the South Eastern Railway (Various Powers) Act, 1885, amounting altogether to 940,000*l.*, with the usual borrowing powers in addition. The board propose to issue such new capital as preference stock from time to time at favourable opportunities as the money is required, and to offer the same in the first instance to the holders of the company's ordinary stocks. Resolutions will also be submitted for authorising the company to subscribe to the capital of the Crowhurst Sidley and Bexhill, and Chipstead Valley railway companies respectively, not exceeding 200,000*l.* in each case. The directors are pleased to be able to state that an agreement has been made with the Brighton Company for pooling the London and Bexhill traffic, and they have no doubt that this railway and the Chipstead line will be valuable feeders to the South Eastern system.

"Since the last meeting of the company, the directors have had to deplore the death of their chairman, Sir George Russell. His great services to the company, and single-minded devotion to its interests, will be fresh in the recollection of the proprietors, and will be gratefully remembered by them. The board have unanimously elected Mr. H. Cosmo O. Bonser, M.P., as chairman, and the Hon. A. E. Gathorne-Hardy as deputy-chairman.

"The office of chief officer and secretary has been divided, and Mr. Charles Sheath, deputy-secretary, has been appointed secretary of the company. Mr. Stevens retains the position of chief officer, and will be a member of the joint committee under the new arrangement with the Chatham Company."

#### EAST ARGENTINE RAILWAY.

##### CAPITAL.

The total expenditure on capital account to December 31st, 1897, amounted to 1,022,303*l.*, whilst the receipts were 1,048,286*l.*—viz., ordinary stock, 668,000*l.*; 6 per cent. debenture stock, 350,000*l.*; premiums, 5,445*l.*; revenue applied to cost of steamers and expenditure in excess of capital, 24,840*l.*

##### REVENUE.

The accounts for the year ending December 31st, 1897, show a gross revenue of 44,691*l.* (against 49,152*l.*), an expenditure of 36,817*l.* (against 41,571*l.*), and a profit of 7,873*l.* (against 7,581*l.*). The working of the steamboats (included in the above figures) resulted as follows:—Receipts, 7,419*l.* (against 7,744*l.*); expenses, 6,338*l.* (against 7,055*l.*); profit, 1,100*l.* (against 689*l.*).

##### TRAFFIC.

The number of passengers carried was 21,357 (against 24,303); the quantity of goods carried, 60,104 tons (against 73,343 tons); the number of horned cattle carried, 10,970 (against 22,482); the number of train miles run, 119,311 (against 134,855); the receipts per train mile, 6s. 3d. (against 6s. 0½d.); the expenses per train mile, 5s. 1½d. (against 5s. 1½d.); the ratio of railway expenses to railway receipts, 81·82 per cent.; the ratio of steamer expenses to receipts, 85·21 per cent. The mileage of the company's railways is nowhere stated in the report. The report states:—

##### GENERAL.

"It will be within the recollection of the members that at an extraordinary general meeting, held on November 5th last, resolutions were passed approving (1) the *ad referendum* agreement of November 23rd, 1895, between the Argentine Government and this company, and (2) the proposals for rearranging the ordinary and debenture capital of the company. For the carrying into effect of these proposals a further resolution was also passed that the company be wound up voluntarily, and this was confirmed as a special resolution on November 26th, 1897, when the directors were appointed liquidators. The company's ratification of the *ad referendum* agreement was at once communicated by cable and by letter to Buenos Ayres, but it was not until the end of April that the final agreement was signed by the President of the Republic, and it was only on May 26th that the Finance Minister handed to the company's agent a general bond, to be exchanged in

London for the definitive 4 per cent. Argentine Government bonds for 750,000*l.* the price agreed upon for commutation of the guarantee of interest on the company's capital and settlement of arrears to December 31st, 1895. The board at once took steps towards carrying through the scheme of arrangement, and, under an order of the court, meetings of the debenture stockholders and of the ordinary stockholders were held on June 27th, at which the necessary resolutions were duly passed. An order of the court, sanctioning the scheme, and staying the voluntary liquidation, has been pronounced conditionally upon certain formalities being complied with. When this is done the order will be formally drawn up, and the company will proceed to the conversion of the debenture stock, by which a saving of interest will be effected for the current year of 2,041*l.* 13*s.* 4*d.*, and in future years 3,500*l.*

"The general bond has now been exchanged for the 750,000*l.* definitive bonds. The half-year's interest due July 1st on these bonds has been paid, but in respect of the two years' accumulated back interest—viz., for 1896 and 1897 amounting to 60,000*l.*, the board had to take Bills at six months' sight on the Argentine Minister in London. These Bills will mature on January 17th, 1899.

"The board propose to make a distribution to the ordinary stockholders of 3 per cent., payable, free of tax, on August 6th, and a further distribution of 3 per cent. as soon as the Government Bills have been paid.

"The board have been unable to recover the costs in the action brought by M. Paul de Montravel, and the amount thereof—viz., 611*l.*, has been charged to profit and loss. Against this the directors have given notice to sell the 100*l.* ordinary stock standing in the name of M. de Montravel, and the proceeds will appear in the current year's accounts.

"The account against the Argentine Government for guaranteed interest shows a debit balance of 328,709*l.* By the ratification and fulfilment of the agreement of November 23rd, 1895, this claim is liquidated and the account will disappear from future annual reports. The amount due by Government on traffic account on December 31st, 1897, was 7,875*l.*, against 8,366*l.* at the close of the previous year."

## American & Canadian Railways.

### BALTIMORE AND OHIO.

The following is a copy of a petition to Messrs. Speyer Brothers dated July 18th:—"We, the undersigned, brokers and dealers interested in the Baltimore and Ohio Railroad, desire to express to the Reorganisation Committee our great disappointment with, and to protest against, the inadequate terms offered under the scheme to the holders of the first mortgage  $4\frac{1}{2}$  per cent. terminal gold bonds. These terms involve a reduction of  $\frac{1}{2}$  of 1 per cent. in the interest, without the smallest compensation. In the case of all other issues an equivalent has been given for any reduction of interest, which has satisfied the holders. While the new securities given to the holders of other issues will recoup to them the value of their bonds before the failure, and in several instances add a substantial bonus in addition, the terms awarded to the  $4\frac{1}{2}$  per cent. terminal gold bonds leave the holders with a depreciation of from 15 per cent. to 20 per cent. of their capital. We desire to call your attention to this injustice, and to respectfully ask your reconsideration of the subject. In the prospectus issued so recently as in July, 1894, by Messrs. Brown, Shipley, and Co., offering the bonds at a premium of 5 per cent., and in a letter from the president of the company issued with such prospectus, it was stated:—(1) That the rentals of the properties hypothecated to the service of the bonds were included by special trust in the company's operating expenses. (2) That such properties were indispensable to the working of the company. (3) That they were worth to the company much more than the rentals assigned to them. It was on the faith of these representations that the money was subscribed for the bonds, and even if your investigations should lead you to think, as has been alleged, that they were not strictly accurate in fact, they were made upon the authority of the president on behalf of the company, and the money so obtained was received by the company and expended on the property. The Baltimore and Ohio Railroad is one of the oldest railways in America, and for a long series of years has enjoyed a high reputation among investors in this country. We appeal to you to maintain this reputation and not to allow the present reorganisation, which is generally admitted to be satisfactory and admirable in most of its details, to be marred by this blot, or to leave a section of the bondholders smarting under a sense of grave injustice. We submit that it is possible out of the stock reserves of the company, without interfering with the principles of the scheme, to afford the compensation asked, and we appeal to the reorganisation committee to find a way to provide it.—We are, gentlemen, your obedient servants, James Capel and Co., Leon Brothers, Lloyd and Ward, Clayton and Aston, Marten and Christopherson, Wm. Morris and Sons, L. B. Erskine and Co., Sidney Cooper and Co., A. I. Reynolds, John M. Douglas and Co., Hichens, Harrison, and Co., G. S. Herbert and Sons, Laurence, Sons, and Gardner, Chinnery Brothers, Haes and Sons, Twycross and Langton, Wm. Brander and Co., Ransford and Co., Medwin and Löwy.

### DENVER AND RIO GRANDE.

Messrs. Speyer Brothers offer to holders of first mortgage 7 per cent. gold bonds of the Denver and Rio Grande Railway Company maturing November 1st, 1900, the privilege to refund into first consolidated mortgage gold bonds, due 1936, bearing  $4\frac{1}{2}$  per cent. interest, at the price of 103 per cent., New York terms, the 7 per cent. bonds to be taken in payment on a  $3\frac{1}{2}$  per cent. interest basis to maturity—that is, for \$1,000 7 per cent. bond, with November 1st next coupon attached, the holder will receive \$1,000 of the  $4\frac{1}{2}$  per cent. bonds, with interest from 1st inst. and a cash payment of \$59.33. This offer will remain open for a reasonable time, but may be modified or withdrawn without further notice. After the first mortgage bonds shall have been retired the first consolidated mortgage bonds will be the first lien on the entire system of the Denver and Rio Grande, consisting of 1,620 miles, as well as upon all its equipment, terminals, shops, &c. The net income of the company for the year ended June 30th, 1897, after deducting taxes and insurance, was \$2,569,469, and for the year ended June 30th last is estimated at \$2,995,000, whereas upon the completion of the refunding contemplated the fixed charge on the outstanding 4 per cent. bonds and on the issue of  $4\frac{1}{2}$  per cent. bonds will be \$1,433,212.50. The preferred capital is \$23,650,000, the common stock \$38,000,000, and it is paying dividends on the former from its surplus earnings; during the fiscal year just ended these dividends have been at the rate of  $2\frac{1}{2}$  per cent. per annum.

### LATEST EARNINGS.

Second Week of July.—Chicago Great Western, \$86,000—*increase*, \$13,000; Kansas City Pittsburg and Gulf, \$52,000—*increase*, \$12,000; Missouri Kansas and Texas, \$163,000—*decrease*, \$1,000; Denver and Rio Grande, \$148,000—*increase*, \$9,000; Chicago Milwaukee, and St. Paul, \$551,000—*decrease*, \$47,000; Baltimore and Ohio South Western, \$120,000—*increase*, \$13,000; Chesapeake and Ohio, \$291,000—*decrease*, \$27,000; Louisville and Nashville, \$507,000—*increase*, \$11,000; Mexican Central, \$211,000—*increase*, \$15,000; New York Ontario and Western, \$75,000—*decrease*, \$6,000; Southern Railway, \$419,000—*increase*, \$55,000; Texas and Pacific, \$97,000, same as last year; Wabash, \$234,000—*increase*, \$38,000; Missouri Pacific, \$410,000—*increase*, \$31,000; Oregon Railroad and Navigation, \$127,000—*increase*, \$29,000; St. Louis and San Francisco, \$108,000—*increase*, \$1,000; St. Louis South Western, \$75,000—*increase*, \$6,000; Cleveland Cincinnati Chicago and St. Louis, \$258,000—*increase*, \$4,000.

First Week of July.—Cleveland Cincinnati Chicago and St. Louis, \$251,000—*decrease*, \$2,000; Northern Pacific, \$373,000—*increase*, \$18,000. The gross earnings of seventy roads in the first week of July show an *increase* of 0.60 per cent.

Month of June.—Pittsburg Cincinnati Chicago and St. Louis, gross, \$1,177,000—*decrease*, \$12,000; net, \$224,000—*decrease*, \$215,000; net deficit after charges, \$46,000, against a surplus of \$209,000. For the New York Central and Hudson River, gross, \$3,625,000—*decrease*, \$269,000.

The gross earnings of 131 roads in the month of June amounted to \$44,303,511, showing an *increase* of \$2,657,703, or 6.38 per cent.

Month of May.—Missouri Kansas and Texas, gross, \$767,000—net, \$188,000; net deficit after charges, \$98,000.

### RAILROAD NOTES.

During the first half of the present year receivers have been appointed for seven railroad companies, with an aggregate of 347 miles and a combined capital and bonded debt of \$25,400,000. This statement compares with twenty-seven receiverships, an aggregate of 5,232 miles, and total capital and bonded debt of \$370,200,000 in the first half of 1893. Sales under foreclosure, being the clearing of the wreckage of 1893, reached a total of \$110,079,000. Nineteen properties, with a mileage of 2,374 miles, have been sold under foreclosure proceedings. The sales during the past six months have been the largest of any kind in five years, with two exceptions—1896 and 1897—when the totals were \$349,049,000 and \$277,516,000 respectively.

At a meeting of the Trunk-line Commissioners on Tuesday, Mr. Goddard said that the North-western rate situation could be settled in a few minutes by a conference between the presidents of the Canadian Pacific and the Great Northern. He said, further, that the effect of the recent cuts had been largely over-estimated, although they had no doubt been disturbing influences to the eastern lines. The managers of the Joint Traffic Association adjourned for three weeks, after discussing the matter without agreeing upon any plan of action. It was thought wise to give the Canadian Pacific and the Great Northern further time in which to settle their differences.

The Newfoundland Transinsular Railway is completed, and the first through train across the country left St John's, the eastern terminus, on the night of June 29th, arriving at Port Aux Basques, the western terminus, covering the distance of 548 miles in twenty-four hours. At Port Aux Basques the fast ferry steamer *Bruce*, with a speed of 17 knots, takes passengers aboard for Sydney, B.C., landing them there in six hours and connecting with the railway systems of Canada and the United States. This service gives Newfoundland a tri-weekly connection with the American continent.

President Fish, of the Illinois Central, has written to Messrs. Kuhn, Loeb, and Co. and Messrs. Vermilye and Co. that although the year's results of the road's operation would show a large surplus over the regular 5 per cent. dividend on the stock he should recommend it to be applied to improvements which would be properly chargeable to capital account.

It is reported in Seattle that the Northern Pacific contemplates the purchase of some of the property of the Pacific Coast Company, including the Seattle and Northern, the Port Townsend Southern, the Columbia and Puget Sound Railroad, and possibly the company's coal bunkers, wharves, and terminal grounds in Seattle.

The Pullman Palace Car Company is about to divide among the shareholders 5,040,000l. sterling of its surplus funds. This will be equivalent to a supplementary dividend of 70 per cent. The distribution will be made 20 per cent. in cash and 50 per cent. in new shares.

The directors of the Louisville and Nashville, in pursuance of the policy announced a week ago of devoting a considerable portion of last year's surplus to bettering the property, have ordered large improvements to main lines to be at once put in hand.

The balance-sheet of the Kansas City Pittsburg and Gulf Railroad for the year ended April 30th shows current liabilities of \$965,000 and current assets of \$680,000, the latter including securities in the company's treasury and materials on hand.

A Washington correspondent states that the Government has taken steps to assert its interest in about \$3,000,000 in the hands of the receivers of the old Union Pacific Railroad which is applicable on the unsettled debts of that corporation.

The Illinois Central Railroad Company has declared a half-yearly dividend of 2½ per cent. The company has set aside \$1,000,000 to expend in Kentucky and Tennessee in reducing the grade and reballasting the entire line.

The net earnings of the Chicago Great Western for the year ended June 30th amounted to about \$1,456,000, as compared with \$1,100,272 in 1896-7, \$1,255,577 in 1895-6, and \$699,349 in 1894-5.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 40,000 tons, the Panhandle system leading with 6,000. In the corresponding week last year 52,000 went forward.

The reorganisation plan of the Union Pacific Denver and Gulf Road is now expected to be ready for publication by August 1st.

## Law Intelligence.

### RAILWAY AND CANAL COMMISSION.

(Before Lord Trayner, the Right Hon. Sir Frederick Peel, and the Right Hon. Viscount Cobham.)

THE MAGISTRATES, &c., OF ARBROATH v. THE CALEDONIAN RAILWAY COMPANY AND THE NORTH BRITISH RAILWAY COMPANY.

This application was heard in Edinburgh, and (the formal parts being omitted) was as follows:—(3) The platform accommodation provided at the said station is insufficient and the platforms cannot be used without risk of accident and grave danger to the travelling public. For a length of nearly 70ft. the platforms are only 3ft. wide, on the down side, and of a width varying from 2ft. 6in. to 4ft., on the up side. (4) The defendants' trains are habitually stopped by them opposite a narrow part of the platform, which cannot be used by passengers without danger, confusion, and inconvenience. (5) There are not sufficient and convenient waiting-rooms. (6) There is not sufficient lavatory accommodation or other necessary conveniences. (7) The insufficient accommodation for the public at the ticket-office, and the arrangements generally for the issue of tickets, cause obstruction, con-

fusion, and delay. (8) The Board of Trade have held an inquiry, at which the defendants were represented by their engineers and superintendents. Their inspector reported on November 26th, 1895, that the existing platforms constitute a grave danger to the travelling public, and that the station, so far as regards accommodation and conveniences, is not at all satisfactory. The defendants, in their answer, denied the statements categorically, but added that, though they were unwilling to patch up or amend the existing station, they had been desirous for many years past of providing a greatly enlarged and improved station at Arbroath. They had sought Parliamentary powers with this object; but that portion of their Bill was abandoned owing to the opposition of the applicants and the unreasonable conditions which they sought to oppose. (17) The present position of the Arbroath Station is, therefore, entirely the fault of the magistrates and town council of Arbroath. Nevertheless, it is quite sufficient for the existing traffic, and under the rules and regulation for its working quite safe for the public and others. (18) The application is incompetently made, and is irrelevant. It does not comply with the rules of this court, nor give the grounds of application, nor does it state the relief or remedy to which the applicants claim to be entitled. Further, the application, as stated, is not within the jurisdiction of this court. It should be refused.

Lord TRAYNER delivered the judgment of the court dismissing the application. Evidence had been given of negotiations which had taken place between the railway companies and the authorities as to the approval of a plan for a new station, which involved the removal of the bridge over the railway and the closing of a street near. The formal consent of the corporation had been given with certain reservations as to matters of detail upon which the parties had subsequently been unable to agree. As a matter of law, the court held that it was not within the power of the railway companies to make the necessary structural alterations in their station, and that they were consequently not in violation of any statutory duty in neglecting to do so. Nor did the court hold that the companies had neglected their duties as a matter of fact. The station had been built at an early period in the history of railways, and it did not in all respects conform to modern requirements. But the companies were not unwilling to improve it, and under those circumstances the court could do no more than express the opinion that it was the duty of both parties to reconsider their position and consult as to how they might best adjust the details of terms, of which the principles had been practically agreed between them.

### HULL POLICE COURT.

(Before the Stipendiary Magistrate, E. C. Twiss.)

BOWER AND CO. v. NORTH EASTERN RAILWAY COMPANY.

Judgment was given in this case, in which Messrs. R. Bower and Co., of Hull, summoned the North Eastern Railway Company for having failed on May 9th last to keep at their goods station in Railway-street, Hull, a book showing every rate then charged for the carriage of goods from Hull to Thirsk, as required by section 14 of the Railway and Canal Traffic Act, 1873. His Worship said he was of opinion that the summons must be dismissed. He was of opinion that the contentions on the part of the defendant company were well founded. It had been proved that at the goods station in question a book was kept showing every rate for the time being charged for the carriage of traffic, other than passengers and their luggage, to any place to which they booked—including Hull to Thirsk—and stating the distance of every place to which any such rate was charged. That being so, it appeared to him that the company had not impugned the terms of the section under which these proceedings had been taken, but that it had complied with the same. It further seemed to him that the Court had no jurisdiction to inquire into the legality or otherwise of the rate charged, but that the complainants' remedy was, by taking advantage of the provisions of the same section, to appeal to the Commissioners. Holding these views, therefore, it was his duty to order this information to be dismissed. He should make no order as to costs.

### STRONGEST LIFE OFFICE IN THE WORLD.

THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.

ASSETS .....	£49,340,231 Sterling.
SURPLUS .....	10,508,195 Sterling.

## THE BUMBLES AND THE RAILWAYS.

Hardly ever has such an illustration of bumble-dom and its methods been put before the public as that afforded by the recent Railway and Canal Commission action brought by the magistrates of Arbroath against the Caledonian and North British companies for the provision of "reasonable facilities" at that station. The structure is nearly fifty years old, and was certainly designed to accommodate a traffic considerably less dense than that which has now to be dealt with. Many alleged defects and even possible sources of danger were adduced by the municipality, which sought to compel the companies to remedy the same at their peril. But it was a case of knocking at the open door, if only the caller could have perceived the fact. The companies, while pleading *pro forma* that the station was still capable of the work required of it, had some time before given practical evidence of their desire to avoid the least ground of complaint by submitting plans for the construction of an entirely new and enlarged station, to be built on the most modern design, and, of course, subject to the inspection and standards of safety and convenience required by the Board of Trade. So far, it is hard to see where the difficulty of the town of Arbroath came in, since no doubt seems to have been thrown upon the "reasonable" character of the proposed works. But so simple a disposal of the bone which it was sought to pick with the railways was not suited to the temperament of the Canutes who preside over the municipal affairs. As is not unusual when the enlargement of a station situated in the midst of a town is the question at issue, the alterations must require some taking of additional land and interference with the neighbouring streets. But these are the special care of the magistrates, town councillors, bailies, and other leading lights who govern the town of Arbroath, and are far too sacred to be touched even for the purposes of a scheme of station improvement devised for the benefit of the community. The railways were not unnaturally unable to put a quart into a pint pot in the shape of building an enlarged station on the site of the original smaller one. The municipality, on the other hand, refused to agree with the companies on certain details in connection with the closing of a street and other alterations to the local geography, which the decision of the Railway Commission makes it sufficiently clear were fairly to be included in the scheme for providing additional station facilities. So the town of Arbroath has brought the companies into court to force them to make bricks without straw, and the court has very naturally decided that those for whose benefit the bricks are to be made should show a little more regard for the difficulties of those who have to make them. In other words, the action has been dismissed; and Lord Trayner added his opinion to the effect that it was the duty of both parties to consult as to how they might best adjust the details of terms, the principles of which had been practically agreed. Meantime, presumably, the Arbroath ratepayers are saddled with the costs of an action undertaken to compel the delivery of what had already been offered as a spontaneous gift. This is, no doubt, as simple a case as can well come before the Railway and Canal Commission. The law is clear, and while a station may not always conform to the most modern ideas—as, indeed, few stations can do in the face of constantly altering conditions—there is

nothing but a regard for public convenience and its own reputation to force a railway company to embark on rebuilding schemes which are not, on *prima facie* grounds, remunerative to itself as a business corporation. That cause for complaint under these circumstances is rare is the best testimony to the recognition by the railways of their duty to the public. Arbroath Station may be old-fashioned and inconvenient—no doubt to some extent it is—but it, at any rate, does good work and bears no evil reputation as the scene of avoidable accident. The moral of the case under review lies in the great danger of the checking of the spontaneous schemes of the railway companies for rebuilding and bringing up to date their stations, by the eagerness of the local authorities to make the occasion one for grinding out some fresh concession in return for the powers asked for. A railway station is a public facility, and why its improvement in the public interest should be made a reason for fining the owner is more than any fair-minded man can understand. Presumably it is on the same topsy-turvy system as that which assesses the railways for local rates on a scale directly proportional to the prosperity which the railway itself has brought to the district. But this system reminds one somewhat of what befell a fabled bird who laid the golden eggs of immortal memory.

### SOUTH OF IRELAND SCHEMES.

Our readers will remember that on January 1st and March 5th last we dealt at length with the important matters proceeding in regard to railway affairs in the South of Ireland. When the usual notices of Bills appeared last November it was made clear that an interesting Parliamentary fight was to be witnessed. First of all the Great Western and Great Southern and Western companies proposed jointly to acquire the Waterford Dungarvan and Lismore and the Fermoy and the Lismore lines, the former of which is indebted to the Treasury to the extent of 93,000*l.* *plus* interest; whilst the latter belongs to the Duke of Devonshire. The Fishguard and Rosslare Company also sought the same privileges of acquisition, *plus* powers for making numerous new lines. The public in the South of Ireland generally, and especially in Cork, were up in arms against the Great Western and Great Southern Company's scheme, but looked with a friendly eye on the plans of their weak rival as likely to afford independent communication with the South-west of Ireland. Public meetings were held by the score, deputations to the Treasury and to the Duke of Devonshire protested vigorously against the designs of the Great Western and its ally, which was designed, they said, to more firmly establish the monopoly of these companies. This sort of thing went on for some time until the noisy protestors, including some of the Irish members, woke up and found that the Great Western had "conciliated" the Rosslare promoters, and the scheme which was at first the favoured rival of the Great Western and its partner in this business, was made their stalking-horse for obtaining the requisite Parliamentary powers. The scheme of the Rosslare Company thus so successfully "captured" has received the sanction of Parliament, and this week the shareholders of both the Great Western and Great Southern and Western companies have approved of the Bill, which now contains clauses authorising each of them to subscribe 250,000*l.* During the last few months another remarkable development has taken place. This is the provisional agreement entered into by the boards of the Great Southern and Western and the Waterford Limerick and Western for amalgamation on terms which seem to be very satisfactory for the shareholders of the smaller company. The ordinary shareholders of the Waterford Company are to have a guarantee from the Great Southern of 1½ per cent., rising by ¼ per cent. per annum to

2½ per cent. The preference and debenture stockholders are to get stock of the larger company, yielding them the same income as at present, with the exception of the 3½ per cent. stock preference issued in 1895, which will have its dividend cut down to 3, or, in other words, it will get 75*l.* of Great Southern 4 per cent. stock for each 100*l.* It is hardly necessary to say that the scheme, if carried through, would vastly improve the market values of the Waterford and Limerick Company's securities, and advances on a considerable scale have already taken place in anticipation. Last year only ½ per cent. was paid on the ordinary capital of the Waterford Company, and obviously a 2½ per cent. guarantee is tempting in such circumstances. Needless to say, considerable public opposition has been shown to the proposal. As long ago as March 11th meetings were held at Limerick, at which the usual resolutions "viewing with the greatest alarm" and pledging "to strenuously oppose any Bill embodying the scheme" were passed. But quite another kind of opposition has also developed. It appears that a minority on the board of the Waterford Company, led by Lord Castletown, are, or at any rate were, also opposed to the purchase by the Great Southern of the Waterford and Limerick Railway. Perceiving that such opposition is particularly dangerous in view of the fact that the scheme will have to run the gauntlet of a Parliamentary inquiry next session some of the shareholders requisitioned for a meeting, which was duly held on the 15th inst., for the purpose of considering the action of those directors, and, "if thought advisable, removing such directors from the board." Lord Castletown seems to represent the head and front of this opposing minority on the board, for Mr. Shaw, another of like mind, remarked at the meeting last week, "Whatever Lord Castletown says I endorse." The noble lord declined to be catechised, but in effect he argued that he had been striving for better terms from the Great Western, and if the shareholders like to approve in general meeting of the transfer he will have nothing more to say, adding that they "knew their own interests best." Mr. Shaw, of course, says ditto, and in view of the fact that Lord Castletown had frankly offered to resign if that was the wish of the meeting, the threat of removal was not carried out. Instead, a motion to adjourn the matter till August 26th (the date of the ordinary half-yearly meeting) was carried, and so the matter stands. Obviously, much has yet to be done before the scheme is carried through, but certainly the terms offered are too good for Waterford and Limerick shareholders to turn up their noses at. As for the idea that the Great Western would outbid the Great Southern and Western, that is a false assumption, for it overlooks the fact that in all these important schemes in the South of Ireland these two powerful companies are working together. As for the opposition of the public, it should be obvious enough that the Great Southern and Western, with its much larger resources, could more efficiently provide for its needs than the poor company which at present controls about 350 miles of railway running through the heart of the country.

### THE GREAT EASTERN REPORT.

In several respects the Great Eastern report for the past half-year is a particularly interesting document. For five previous half-years the dividend of this company showed successive increases, but last half-year it was only maintained at the 2 per cent. paid for the first half of 1897. Thus the comparatively progressive character of this company is vindicated only by the fact that it has been able to maintain its dividend and slightly augment its balance forward as the net outcome of a period which is likely to be marked by an almost general decline in railway profits. The way in which

working expenses have gradually crept up until they have absorbed nearly the whole of the additional gross revenue is well illustrated by the experience of this company. The following comparison of the respective increases in gross revenue and net revenue for six half-years will show how narrow the margin of the latter has now become:—

Half-year ended	Increase in gross revenue.	Increase in net revenue.
December 31st, 1895 .....	£157,817	£140,260
June 30th, 1896 .....	112,276	68,372
December 31st, 1896 .....	108,412	46,369
June 30th, 1897 .....	114,407	41,922
December 31st, 1897 .....	114,791	26,624
June 30th, 1898 .....	66,738	7,269

In the second half of 1895, when the recent expansion of railway earnings first set in, the Great Eastern was able to increase its net revenue by no less than 88 per cent. of its additional gross earnings. Last half-year, however, the proportion retained in the net revenue had shrunk to 11 per cent. A similar experience has fallen to the lot of most Home Railways, in fact, many have already arrived at the stage where the increase in expenses has been larger than that in gross receipts, so that far from there being any margin of advantage left, net receipts are actually declining. All items of revenue show increases in the Great Eastern accounts for last half-year, except "steamboat receipts," which were 3,700*l.* lower. Regarding steamers, a paragraph in the report points out that the ss. *Claud Hamilton* has been sold and debited to steamboats' depreciation account. The *Financial Times* falls foul of this statement, which it is pleased to call a "remarkable style of book-keeping," and does not appear to understand why the said steamer is "debited" to depreciation account. Really our contemporary should be better informed in a matter of accountancy like this. The position is as follows:—When the steamers are originally bought the cost is debited to capital account, and as they are worked half-yearly charges are made against revenue, and credited to a "steamboat depreciation account." But when a steamer is sold, and disappears from the fleet, obviously its cost should disappear from the charge appearing for steamers in the capital account, and the amount required to do this is debited to depreciation account, and credited to capital. The proceeds of sale, whatever they may be, would form a credit to depreciation account, or, what amounts to the same thing, they would form a set-off to the amount transferred from depreciation account to the credit of capital account. A considerable part of the report is devoted to an explanation of the new arrangements made by the company's Pensions Act of this year, which will come into operation with the beginning of 1899. The old scheme came to an end in consequence of the Workmen's Compensation Act of 1897, but a new scheme has received the approval of the Registrar of Friendly Societies as laid down by that Act, and it will be open to all servants of the company to join. The remark is added that "Every servant of the company will then have the opportunity of securing for himself a pension in his old age, and he will have the satisfaction of knowing that his weekly payment towards the fund is in safe hands, and cannot be applied to any purpose other than that for which he contributed it." Members of the A.S.R.S. please note. It must be obvious that the advantages here indicated are of a substantial character, and we shall be surprised if the bulk of the Great Eastern Company's servants do not decide to participate in the scheme. Two important light railways in the Great Eastern Company's district are projected, the promoters believing that financial aid by the Treasury as contemplated by the Light Railways Act of 1896 may be obtained. If the Treasury will provide half the capital the Great Eastern board has agreed to supply the

other half, and to work the two lines in perpetuity. The two schemes referred to are the Kelvedon Tiptree and Tollesbury and the Elsenham Thaxted and Bardfield, each about 10 miles long. The last report of the Light Railway Commissioners issued in February last referred to the fact that the inquiry into the former scheme had been deferred "pending the result of an application to the Treasury for a grant." It is proposed that it should be of standard gauge, and the estimated cost was 45,500*l.* The other scheme is also for a standard-gauge line, and its estimated cost was 48,850*l.* Originally, the Elsenham project was to have a gauge of 2ft. 6in., but it was raised to the standard gauge in order to secure the co-operation of the Great Eastern Company. Another satisfactory announcement in the report is that the English mails for Holland have now been secured for the Harwich route—so that at last the company has got what it has been striving to obtain for a long time past. A further brief paragraph reminds the shareholders that the Great Eastern and Great Northern and Midland Joint Railways Bill of this year only awaits the Royal Assent. This enactment represents an important compromise regarding rival railway schemes in Norfolk and Suffolk which at one time threatened unpleasant results to the three companies concerned. On the whole, the Great Eastern report for the past half-year, though not containing anything of a particularly favourable character, will certainly rank among the best as regards the net results therein displayed.

### HOME RAILWAY RESULTS.

The South Eastern dividend, announced on Monday, was certainly the most disappointing that has yet appeared for last half-year. It was at the rate of only  $2\frac{1}{2}$  per cent., against  $3\frac{1}{4}$  for the first half of 1897, with about the same amount carried forward. This rate, moreover, is  $\frac{1}{2}$  per cent. below that paid for the first half of 1896. Though Dover A were flat all last week, the stock fell a further 2 points, to 110, on the announcement of so poor a dividend, as the most pessimistic expectation which the market had indulged in was  $2\frac{3}{4}$  per cent., and it is not long ago that more sanguine people were looking for  $\frac{1}{4}$  per cent. increase as the outcome of an addition to gross receipts which, as published, amounted to 46,800*l.* For the year to June 30th the dividend on South Eastern ordinary stock is thus reduced to 4 9-16 per cent., and if the dividend for the current half-year is maintained, the deferred stock will get a distribution of  $3\frac{1}{2}$  per cent. early next year, compared with  $3\frac{3}{4}$  per cent. for 1897. Even now, with dividend outlook none too bright, the price of 112 for the deferred stock looks quite high enough, but the "bulls" are looking for the great advantages to be secured from the negotiations with the Chatham, which are expected to be definitely announced at the meeting on the 28th inst. The report, which has also appeared, refers to the satisfactory progress of these negotiations. In spite of this, the stock was flat on the appearance of the report, on account of the large advance in working expenses it displayed—namely, 80,000*l.* On a closer examination of the figures it is clear, however, that a considerable portion of this outlay represented money expended on the improvement of the line and rolling stock, and such expenditure generally pays in the end—certainly it is better than the policy of subserving all other considerations to the payment of big dividends. Last week we dealt at some length with the important capital proposals of the company, and pointed out that it was desirable to issue preference capital and not ordinary stock in order to provide the means to carry out the important widenings and improvements on hand. The report now issued states that preference stock will be issued, which is satisfactory.

The Metropolitan dividend of  $3\frac{3}{4}$  per cent. is the same as that for the first half of 1897. This company also places 3,000*l.* to a workmen's compensation fund, and carries forward 18,500*l.* Last year only 16,000*l.* was carried forward. From July 1st it should not be forgotten that this company has to pay the dividend on 450,000*l.* of new ordinary stock, and this will require about 18,000*l.* per annum. The South Western dividend is at the rate of only 5 per cent., a decline of  $\frac{1}{2}$  as compared with last year, whilst the balance forward is reduced from 23,525*l.* to only 15,000*l.* This result is practically what we foreshadowed on the 9th instant.

The Great Central and Brighton reports have appeared this week. The former's position in regard to capital charges and the questionable policy of paying a dividend on the preferred ordinary was referred to in our last issue. In their report the directors frankly state that "the fund reserved under the Act of 1893 for the payment of interest upon the London Extension stock—6,200,000*l.*, which includes the 5 per cent. preference stock, 1894, and the ordinary stock, 1894—will be sufficient to provide for interest upon that stock until August 25th next, from which date to the complete opening of the line the stock will cease to receive any interest." The line is announced to be open for coal traffic on the 25th inst., and the statement referred to above only makes more curious than before the payment of a dividend on the preferred ordinary stock just now, before the year's results are ascertained. When the "complete opening of the line" will take place we do not know, but, in our opinion, it is very doubtful if even then the London Extension stock will receive any interest or dividend.

Further railway dividends were announced yesterday—namely, the Midland, North Eastern, and Chatham. They were more favourable than earlier announcements, but only the Chatham shows an increase, and it pays  $2\frac{3}{4}$  per cent. for the year ending June 30th on its second preference, against  $1\frac{1}{4}$  per cent. for the year which ended twelve months ago. The Midland dividend also is in harmony with our forecast, and the price is rather better, as the market expected a decline, and had probably not allowed for under publication of traffic receipts. It will be noted that the Chatham is the only company which has yet announced an increase in its dividend, and in that instance  $1\frac{1}{2}$  per cent. increase on the second preference represents only about 13,000*l.*

### THE SOUTH EASTERN AND CHATHAM ENTENTE.

The first official announcements respecting the proposed working agreement for competitive traffic between the South Eastern and Chatham railway companies have been made this week, and appear elsewhere in this issue, but they do little more than confirm what had already appeared in THE RAILWAY TIMES. By far the most important disclosure is that Mr. Alfred Willis, the traffic manager of the South Eastern, will be general manager for both companies under the new arrangement. Mr. Willis has done excellent work, and we believe such an appointment augurs well for the success of the new arrangements. Indeed, we have little hesitation in asserting that this is the best appointment which has been made in the railway service since Sir Charles (then Mr.) Scotter was given the management of the South Western Railway in 1885. It appears, further, that Mr. Bonser, M.P., will be chairman of the joint committee, and that Mr. Forbes is to be a sort of standing arbitrator or consulting director to the two boards. There is some comfort in knowing that such a post would leave Mr. Forbes little room for doing any harm, and the news must be regarded with intense satisfaction. We have one warning note to sound regarding the detailed arrangements being made to

carry out the scheme of joint control of the two companies. As it is necessary, for purposes of capital and organisation to maintain two separate staffs in addition to the joint board, we trust that those who are responsible for making the new arrangements will take care that the exact jurisdiction of each board, and also of the joint board, will be clearly and unmistakably defined; otherwise the position will be worse than before, and the memories of the shareholders of these two companies will, we imagine, prevent them from despising any safeguards against litigation. Another point will be to see that the extra charges arising from a joint board do not eat away the advantage arising from the closer relations of the two companies. Though no Parliamentary sanction is necessary for the carrying out of the end in view, we note that Mr. Bryce will on Monday ask the President of the Board of Trade whether he will not represent to the Chatham and South Eastern boards the "propriety and desirability" of obtaining the approval of Parliament. As this would practically be an invitation to the two companies to give up in public concessions more than they can hope to realise by the pending agreement, it is hardly likely to be eagerly accepted by them—in fact, as we have all along pointed out, the utmost importance has been attached to the desirability of steering clear of the Parliamentary committee rooms, and rightly so.

### PASSING NOTES.

The traffic receipts for the week ending July 16th, on thirty-three of the principal lines of the United Kingdom amounted to 1,826,104*l.*, which was earned on 19,253 $\frac{1}{2}$  miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,801,758*l.*, with 19,253 $\frac{1}{2}$  miles open. There was thus an increase of 24,346*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for three weeks to date amounted on the same thirty-three lines to 5,319,636*l.*, in comparison with 5,223,996*l.* for the corresponding period last year; increase, 95,640*l.*

The House of Lords on Monday affirmed a decision of the Court of Appeal in an action brought against the Plymouth Tramways Company in respect of the payment of tolls over Stonehouse-bridge. The Act of George III., under which the tolls are collected, says that "every coach, chariot, Perin chaise, chair, or calash" must pay 6*d.*, and "every wagon, wain, dray, car, cart, or sledge, or other carriage" 4*d.* When the case came up at Exeter Assizes, Mr. Justice Day decided that a tramcar came into the category of "other carriages," and was entitled to pass for 4*d.* The Court of Appeal, however, held that tramcars were "coaches," and with this the House of Lords agreed.

A correspondent writes:—"It may interest intending tourists to Ireland to learn that since the 1st. inst. the tourist tickets *via* North Wall, which hitherto have been available by the mail boats, the second-class without extra payment, the first-class on payment of the 3*s.*, can no longer be used for the passage from Holyhead to Kingstown. A charge of 7*s.* on second-class and 10*s.* on first-class tickets is now made—viz., the whole ordinary fares between these two places. I do not think this new charge will tend to increase the tourist traffic to Ireland. The excellent services by the North Wall boats unfortunately arrive in Ireland too late to enable the traveller to proceed to the interior by the mail trains."

The traders of West Cumberland are preparing a scheme for laying down an independent railway from Workington to Wearsdale, in Durham, whereby, it is believed, a saving in carriage of 3*s.* per ton on coke can be effected. All the large steel and iron companies are taking part in the movement. A proposed new dock at Workington is another important feature in the scheme. Engineers have been engaged to survey the route of the proposed line.

Mr. C. W. Neele has been appointed by the Great Central Railway Company to succeed the late Mr. R. Stuart Hampson as

electrical engineer of the company. Mr. Neele is the son of Mr. G. P. Neele, the late superintendent of the line of the London and North Western Railway Company, and has been for many years in the service of that company in the electrical and telegraph department.

The will of the late Sir George Russell, M.P., late chairman of the South Eastern Railway Company, who died on March 7th, has been proved by Mr. H. D. Greene, of 62, Chester-square, and Mr. G. Brackenbury, of 19, Tite-street, Chelsea, nephews, and Lord James of Hereford, the executors, the gross value of the estate being 19,640*l.*, and the net personalty 1,668*l.*

An extraordinary general meeting of the Central London Railway Company will be held on August 3rd for the purpose of considering and, if thought fit, of passing the necessary resolution authorising the creation and issue of 900,000*l.* debenture stock bearing interest at the rate of 4*l.* per cent. per annum, payable half-yearly on January 15th and July 15th.

We are asked to announce that arrangements have been made for all *bonâ fide* railway officials and their wives to be admitted at the Alexandra Palace at half price on showing their privilege railway ticket. In the event of their not holding a railway ticket, they can obtain vouchers from the superintendents of the respective railway companies.

The Scotch railway traffic returns for last week were remarkably good, the passenger earnings constituting a record, while the aggregate of the Caledonian—100,155*l.*—is the largest amount ever drawn in one week by the company. The three leading lines show a gross increase of 11,988*l.*—passengers 6,638*l.*, and goods, &c., 5,300*l.*

During the first six months of this year the North Eastern Railway Company sold 6,757 books of 1,000-mile first-class tickets at five guineas each—about 20 per cent. reduction on the old first-class ticket. During the same period in 1897 the number of these tickets sold was 4,200.

The accounts of the Forth-bridge Railway Company for the half-year ending June 30th, 1898, show that after paying the dividend of 4 per cent. on the capital stock there is a surplus of 309*l.* For the corresponding half of 1897 6,447*l.* had to be taken from the "trust account."

Lieut.-Colonel J. L. Wilkinson, of the Engineer and Railway Volunteer Staff Corps, and general manager of the Great Western Railway, has been appointed a member of the Army Railway Council, in place of Lieut.-Colonel Sir Charles Scotter, resigned.

We regret to have to announce the death of Mr. Arthur Guest, which took place last Sunday afternoon. Mr. Guest had been a director of the London and South Western Railway for nearly twenty years, and chairman of the Taff Vale Railway for about seven years.

It is said that another attempt is to be made to float the Great Northern and City Electric Railway Company, and that the promoters are now seeking the assistance of underwriters.

As a result of the late strike, the directors of the Cork Bandon and South Coast Railway announce that they are unable to declare a dividend to the ordinary shareholders.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 26th inst.*

CITY, FRIDAY EVENING.

The MONEY MARKET continues in a very easy condition. The rate asked for loans is barely  $\frac{1}{2}$  per cent., and five three months' bills are discounted at  $1\frac{1}{2}$  per cent. The Bank directors made no further change in the official minimum at their meeting on Wednesday. The Bank Return issued yesterday shows that, owing to coin and notes having come

back from circulation, the reserve is 136,000*l.* higher at 25,176,000*l.*, in spite of the exports of gold; its proportion to the current liabilities, however, has declined  $\frac{1}{4}$  to  $45\frac{1}{2}$  per cent., owing to increases of 183,000*l.* in the public and 410,000*l.* in the private deposits. The former movement is due to revenue collections, while the latter is balanced by an addition of 454,000*l.* to the "other" securities, which has, rather rashly we think, been assumed in some quarters to mean that the Bank has been investing in one or more of the recent "gilt-edged" issues. Since the return was made up gold to the amount of 20,000*l.* has been withdrawn from the Bank.

Silver bars are now quoted at 27  $\frac{1}{2}$ d. per oz., being 5-16d. higher on the week. A year ago the price was 27 5-16d.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 29-32d.; Calcutta, 1*s.* 3 29-32d.; Hong Kong, 1*s.* 11 $\frac{1}{2}$ d.; Shanghai, 2*s.* 7 $\frac{1}{2}$ d.; Singapore, 1*s.* 11 $\frac{1}{2}$ d.

The premium on gold at Buenos Ayres has fallen during the week 176.00 to 174.70 per cent., making the paper dollar (nominally worth 4*s.* 2d.) now actually worth 1*s.* 5.33d. A year ago the premium was 184 per cent., and the value of the paper dollar 1*s.* 4.74d.

The Valparaiso exchange comes over to-day at 17 $\frac{1}{2}$ d., being  $\frac{1}{2}$ d. higher on the week. A year ago it was 17 7-16d.

The Rio de Janeiro exchange on London is 7 9-32d., being  $\frac{1}{2}$ d. higher on the week. A year ago it was 7 9-16d.

The Bank of Bengal has reduced its minimum rate of discount from 6 to 5 per cent. The Bank of Bombay has reduced its rate from 7 to 5 per cent.

The Bankers' Clearing-house return for the week ending July 20th, 1898, shows a total of 172,592,000*l.*, as compared with 155,004,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£36,244,853	£36,842,819
Total Reserve .....	£25,176,138	£25,721,664
Proportion of Reserve to Liabilities...	45 $\frac{1}{2}$ per cent.	50 $\frac{1}{2}$ per cent.
Notes in Circulation .....	£27,868,715	£27,921,155
Bank Rate of Discount .....	2 $\frac{1}{2}$ per cent.	2 per cent.
Open Market ditto .....	1 $\frac{1}{2}$ per cent.	$\frac{1}{2}$ per cent.
Consols (account) .....	111 $\frac{1}{2}$	112 $\frac{1}{2}$
French Rentes (account) .....	103 <i>f.</i> 20 <i>c.</i>	104 <i>f.</i> 87 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 20 $\frac{1}{2}$ <i>c.</i>	25 <i>f.</i> 10 $\frac{1}{2}$ <i>c.</i>
New York 60 days ditto .....	\$4.84 $\frac{1}{2}$	\$4.86 $\frac{1}{2}$

The STOCK MARKETS are comparatively stagnant, as usual at this season of the year, and the movements in prices call for very little comment. British railway stocks are well maintained, some of the dividend announcements, and particularly those of the Midland and Chatham, having had a good effect. Chatham second preference to-day put on a couple of points, and the week's rise is no less than 6. South Eastern deferred, however, is flat, a notion having got abroad that this company is coming off decidedly second-best in the deal with its neighbour, and it is probably the case that the Chatham has more to gain by the joint working than the South Eastern. The present physical condition of the two concerns is certainly not to be compared. South Western ordinary and deferred have each risen 2 points on the week, although the dividend at first sight seemed a little disappointing. The other changes in this department are noted below. American Rails during the last two days have shown a little better tendency, though there is still next to nothing doing in them, and on balance for the week the movements are still downward in most cases. The friction between the Yankees and the Cubans may be a fruitful source of trouble yet, even when America has settled her differences with Spain. A sudden spurt took place in Canadian Rails a few days ago, but it was not continued, and on balance for the week the movements are now insignificant. Trunk stocks should, however, be safe to buy at present quotations. Beyond a further rise of 2 in West of India

Portuguese, there is nothing worth noting as regards Indian railway securities. Foreign Rails are almost lifeless, and such changes as have taken place are almost entirely nominal. One of the few exceptions is to be found in the case of Costa Rica Railway shares, which have again come into favour, and were quite an active market to-day on the satisfactory announcement contained in the *Financial Times* (reproduced in another column of this issue) to the effect that the Government has abandoned its intention of selling its shares. The price is now  $3\frac{1}{2}$ , as against  $3\frac{1}{4}$  a week ago, and with this bugbear removed the quotation should speedily recover to the former level. Piræus and Athens bonds (often recommended in these columns) have risen 4 during the week, and United of Havana bonds have recovered a further 5, and Arauco first debentures 2. East Argentine is up 2 on the dividend. On the other hand, Central Uruguay is down 3, Cordoba Central first preference 3, and North West Argentine first debenture stock 3. Mexican Rails are quite lifeless.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

			London and St. K. Dock 1½	—	—

Applications have been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Illinois Central Railroad Company—\$4,939,000 St. Louis division and terminal mortgage 3 per cent. gold coupon bonds, Nos. 1 to 4,939, of \$1,000 each, \$6,321,000 St. Louis division and terminal mortgage  $3\frac{1}{2}$  per cent. gold coupon bonds, Nos. 5,001 to 11,145 of \$1,000 each, and Nos. 14,001 to 14,352 of \$500 each, and \$14,320,000 Louisville division and terminal mortgage  $3\frac{1}{2}$  per cent. gold coupon bonds, Nos. 1 to 12,320 of \$1,000 each, and Nos. 18,001 to 22,000 of \$500.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Chicago and Western Indiana Railroad Company—\$216,000 additional general mortgage 6 per cent. gold coupon bonds, Nos. 14,153 to 14,368. New York Central and Hudson River Railroad Company—\$11,000,000  $3\frac{1}{2}$  per cent. Michigan Central collateral gold bonds of 1898, Nos. 1 to 11,000 of \$1,000 each; and \$53,000,000  $3\frac{1}{2}$  per cent. Lake Shore collateral gold coupon bonds of 1898, Nos. 1 to 53,000 of \$1,000 each.

Messrs. Thackeray and Co., of Cardiff, under date July 21st, report as follows:—Barry undivided, 285½ (unchanged); ditto preferred, 125 (unchanged); ditto deferred, 161 (unchanged); Cardiff preferred, 114½ (unchanged); Port Talbot, 9½ (unchanged); Rhondda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 265½ (unchanged); ditto preferred, 123 (unchanged); ditto deferred, 145 (unchanged); Taff Vale, 76½ (a rise of ½), Vale of Glamorgan, 126 (unchanged). There is no change in the state of the market, business being very restricted.

## Parliamentary Intelligence.

### CHINESE RAILWAY CONCESSIONS.

In the House of Commons on Monday,

Mr. J. WALTON asked the Under-Secretary for Foreign Affairs whether, having regard to the provisions of the Treaty of Tientsin, and to the assurances given by the Government of China in respect of the Yang-tse provinces, in which British commercial interests were so predominant, her Majesty's Government would demand from the Chinese Government full information as to whom and on what terms and conditions the concession for a railway from Peking to Han-Kau, on the Yang-tse Valley, had been granted.

Mr. CURZON—Application has already been made to the Chinese Government for this information.

### TRALEE AND DINGLE RAILWAY.

In the House of Commons on Monday, in answer to Sir THOMAS ESMONDE,

Mr. HANBURY said—The Treasury consent to the redemption of the guarantee in the case of the Tralee and Dingle Railway was given on March 2nd, 1896, and it then only remained for the company to obtain the Order in Council prescribed by the Act, a process which has occupied them for upwards of two years. The company then presented their memorial to the Lord-Lieutenant in August, 1896, together with a draft of the proposed Order in Council, which recited that the reduction of their capital had been sanctioned by an order of the Chancery Division of the High Court. Owing to imperfections in the draft order which had to be cleared up by the aid of the company, its terms were not finally settled until May, 1897. It then appeared that the company had not in fact obtained the preliminary order in the Chancery Division, and they did not do so until May 9th. Proofs of that order having been made and registered were furnished on the 23rd ult., and the Order in Council was ready to be signed by the Privy Council at a meeting this week, but I understand that at the last moment a resolution has been received from the Grand Jury seeking an alteration of the order which is likely to involve further delay. As soon as the Order in Council issues, the Board of Works will apply to the National Debt Commissioners for the redemption money to be handed over, and I do not see that the parties locally concerned have any one but themselves to blame for the delay which has occurred.

### PRIVATE BILL PROGRESS.

Third Readings, House of Lords.—Great Northern Railway Bill; Dublin Port and Docks Bill; Bristol Tramways (Electrical Power, &c.) Bill; Bristol Tramways (Extensions) Bill; Neath Pontardawe and Brynaman Railway Bill; Great Western Railway (General Powers) Bill; Great Northern Railway Bill; London Tilbury and Southend Railway Bill; Mersey Railway Bill.

Second Readings, House of Lords.—Fishguard and Rosslare Railways and Harbours Bill; Devonport Plymouth and Stoke Tramways Bill; Whitechapel and Bow Railway Bill.

Third Readings, House of Commons.—London and South Western Railway Bill (Queen's consent, on behalf of the Crown, and the Prince of Wales's consent, as Duke of Cornwall, to be signified); Glasgow and South Western Railway Bill; Midland Railway (West Riding Lines) Bill.

Second Readings, House of Commons.—North British Railway Bill, Seaham Harbour Bill.

The Bill promoted by the Sheffield District Railway came on Thursday as an unopposed measure before Lord Morley's Committee of the House of Lords, and after formal proof of the preamble was passed, and ordered to be reported. This Bill has already passed the House of Commons, and has now been amended by the insertion of powers to raise 100,000*l.* additional capital. The Bill also authorises the Great Eastern Railway Company to raise 50,000*l.*

A committee of the House of Lords on Thursday reported for third reading a Bill, which has already passed the House of Commons, authorising the incorporation of a company, to be called the Usk Valley Railway Company, with powers to construct a new railway from the Abergavenny Junction station to

the Great Western Railway to junctions with the Mid-Wales Railway and the Brecon and Merthyr Tydfil Junction Railway. The total length of these lines will be just under 18 miles, and the share and loan capital proposed to be raised is fixed at 176,000*l*.

After great delay the Bill promoted by the Mersey Railway Company has been passed as an unopposed measure, with some verbal amendments, by Lord Morley's Committee of the House of Lords. The primary object of this Bill is to sanction financial arrangements for the purpose of effecting the redemption of their first debenture stock. The Bill has yet to pass through all its stages in the House of Commons, which is now only possible by a suspension of the Standing Orders.

A Select Committee of the House of Lords on Tuesday commenced the consideration of the Fishguard and Ro-share Railways and Harbours Bill as amended and passed by a Hybrid Committee of the House of Commons. The committee consists of Earl Camperdown (chairman), the Marquis of Bristol, Lord Colchester, Lord Plunket, and Lord Penryn.

The Unopposed Bill Committee of the House of Commons on Tuesday passed the Omnibus Bill of the North Eastern Railway Company in the form in which it has already received the sanction of the House of Lords. By this Bill over 10 miles of new railways and widenings are authorised, and sanction is given to amalgamating with the company the undertaking of the Scarborough and Whitby Railway Company. The new share and loan capital authorised is 2,800,000*l*.

An official notice has been given that the Bill promoted by the Sheffield District Railway Company will pass as an unopposed measure through the House of Lords. This Bill, which has already passed the House of Commons, authorises the company to raise 100,000*l*. additional capital for the purpose of constructing branch lines to collieries. The Bill also empowers the Great Eastern Railway to raise 50,000*l*. additional capital, and confirms important agreements with the Lancashire Derbyshire and East Coast and the Midland railway companies.

The Earl of Morley on Tuesday had before him several unopposed Bills, and amongst the number was the Sheffield District Railway Bill. In this case Messrs. W. and W. M. Bell, Parliamentary agents, applied to have a recently concluded agreement between the Sheffield District Railway Company and the Great Eastern Railway Company to be scheduled in the Bill. It was explained that the object of the agreement was to extend the running powers of the Great Eastern Company over the Treeton and Brightside Railway, in return for which they would subscribe 25,000*l*. to the capital. This application was acceded to.

The Standing Orders of the House of Lords have been suspended in order to enable the Cardiff Railway Company to push its Bill through the Upper House before the close of the present session. Although the time for presenting petitions against this Bill has only just expired, the Bill was on Friday sent for consideration to a Select Committee which will be presided over by Lord Welby. The opposition before this committee threatens to be as determined as it was in the Lower House, notwithstanding the fact that the House of Commons has rejected all the running powers proposed by the company. The opponents—eleven in number—include the Rhymney Railway Company, the Barry Railway Company, the Taff Vale, the Great Western, the Brecon and Merthyr, and the London and North Western railway companies.

A Select Committee of the House of Lords has commenced the consideration of the Bill, practically promoted by the Taff Vale Railway Company, for powers to construct the Windsor Dock on the Penarth Flats. This Bill is again strongly opposed by the Cardiff Railways Company; but much surprise is expressed that the Barry Company, who also opposed in the House of Commons, has not instructed counsel to oppose in the Upper House, although the construction of this dock will affect its undertaking almost as seriously as it will the docks at Cardiff. The general view taken of the action of the Barry Company is that it desires to bring pressure to bear on the Cardiff Railway Company to forego some of the powers it has obtained in the House of Commons during the present session. There is no suggestion of any arrangement between the Barry and Taff companies.

#### GREAT NORTHERN (IRELAND) RAILWAY.

In the House of Commons on Thursday,

Mr. DALY asked the President of the Board of Trade whether he was aware that on the Great Northern Railway (Ireland) no passenger train leaving Dundalk for Enniskillen stopped at Culliville Station from 9.32 a.m. to 7.51 p.m. any day of the week except Monday; whether he could say if the Great Northern Railway were acting legally in leaving Crosmaglen and a thickly populated neighbourhood without railway accommoda-

tion for over ten hours; whether he could state if any other station on the Great Northern system was without railway communication for over ten hours excepting Culliville; whether he was aware that during the management of Mr. Robertson the 4.15 train from Dundalk stopped at Culliville; and, if he would make representations to the company to stop this train at Culliville in the future.

Mr. HANBURY—The Board of Trade cannot give a legal opinion as to whether adequate facilities are afforded by the Great Northern Railway of Ireland—the jurisdiction is in the Railway and Canal Commissioners. The Board of Trade feel strongly, however, that the company should improve the train service and representations to that effect have been and are being made to them.

#### VENTILATION OF UNDERGROUND RAILWAYS.

In the House of Lords on Tuesday, on the third reading of the Metropolitan Railway Bill,

Earl RUSSELL moved to insert in the Bill the following proviso:—"Provided that if the company shall make default in closing the said openings they shall be liable to a penalty of 100*l*. per day for every day the said openings shall remain open after the expiration of three years, such penalty to be recoverable in a court of summary jurisdiction by the London County Council, and the London County Council may enter upon the works of the company for the purpose of closing the said openings, and the company shall be liable to pay the cost so incurred." The openings in question, which were for ventilation, would discharge foul gases in the middle of the public street to the annoyance of the public. The Departmental Committee of the Board of Trade which inquired into the matter recommended the construction of the proposed openings only on the condition that, unless the railway company at the expiration of three years had either adopted electric traction or some satisfactory method of ventilation, they should be called upon to close them. There was, however, no power in the Bill to enforce the closing of these openings, and that was the reason why he brought forward his amendment.

Lord BROUGHAM, as chairman of the Select Committee which considered this Bill, said their decision was arrived at after a most careful and exhaustive inquiry. In these circumstances he asked their lordships to pass the Bill in the same form as that in which it left the committee.

The LORD CHANCELLOR considered that the powers asked for by the noble earl in his amendment were unnecessary.

The Earl of MORLEY hoped the House would support the decision arrived at by the committee.

The Earl of DUDLEY opposed the amendment as imposing conditions which were unnecessarily severe, and expressed the hope that their lordships would allow the Bill to pass in the more elastic state in which it was at present drawn.

The amendment was negatived, and the Bill passed.

#### KHORAT RAILWAY CONTRACT.

In the House of Commons on the 15th inst.,

Sir CHARLES DILKE asked the Under-Secretary for Foreign Affairs whether it was the case that no compensation or redress had been obtained by the firm of Jardine, Matheson, and Co., for their forcible ejection by the Siamese police from their railway works, under the Khorat Railway contract, in August, 1896; and whether the correspondence between her Majesty's Government and the Government of Siam relating to the matter could be laid before Parliament.

Mr. CURZON said that the claim in this case had been referred to arbitration, but the contractor and arbitrator nominated by him having reason to be dissatisfied with the way in which the case was conducted they withdrew. The other arbitrators had delivered an award which the contractor had declined to accept, and had appealed to her Majesty's Government. Her Majesty's Government were now in correspondence with the Siamese Government on the subject.

#### General News.

##### PRESENTATIONS TO SIR HENRY OAKLEY, SIR CHARLES SCOTTER, AND SIR ALLEN SARLE.

An interesting ceremony took place on Tuesday, at the Euston Hotel, when Sir Henry Oakley, Sir Charles Scotter, and Sir Allen Sarle were presented with testimonials subscribed for by a number of railway officers. The presentations took the form of a set of silver bowls, accompanied by an illuminated album containing the names of all the subscribers. The presentation was preceded by a dinner, at which the following railway representatives were present. Mr. F. Harrison, general manager of the London and North Western Railway, presiding;—C. S. Dennis,

Cambrian; T. C. Jenkin, City and South London; A. Aslett, Furness; David Cooper, Glasgow and South Western; W. Pollitt, Great Central; Charles Steel and R. Hill Dawe, Great Northern; J. L. Wilkinson and W. Dean, Great Western; W. Moffatt, Great North of Scotland; V. W. Hill, Hull and Barnsley; J. H. Stafford, W. B. Worthington, and C. Moorhouse, Lancashire and Yorkshire; D. H. Davies and H. Willmott, Lancashire Derbyshire and East Coast; S. B. Cottrell, Liverpool Overhead; Frank Ree, London and North Western; J. F. S. Gooday, C. L. Morgan, and R. J. Billinton, London Brighton and South Coast; J. S. Forbes, London Chatham and Dover; C. J. Owens, A. Malby, and D. Drummond, London and South Western; H. Cecil Newton, London Tilbury and Southend; A. Powell, Metropolitan District; W. E. Adie and G. H. Turner, Midland; J. Conacher, North British; G. S. Gibb, North Eastern; G. Bolland Newton, North London (hon. secretary); J. Light, South Eastern.

Mr. HARRISON, in making the presentation, said—The duty that devolves upon me I feel I am most unworthy to perform in the presence of so many who could do it much better. But still, I was placed in the position of chairman on this occasion, and although there is a touch of painfulness in having to occupy such a position—shared, I know, by all around me—there is a certain honour and gratification in occupying the chair. The cause of our meeting to-night is, as you know, a unique occasion—the retirement from the position of general manager of three gentlemen connected with, if not the principal, at all events very important, railway companies, each of whom, during his term of office had been honoured by her Majesty with the dignity of knighthood—("Hear, hear")—in consideration of the great services they had rendered to the country in controlling the railways under their charge, and in connection with the railway world. Such an occasion will never occur again. I cannot imagine that in one such short period it will recur that three such eminent men will retire from the position of general managers. Independently of that, however, it was felt by all those who had been associated with these three gentlemen, each of them in a different degree, that it was an occasion on which they would like to express their feelings, and make some mark of their sentiment towards them on their retirement from active life. With that view a committee was formed to see whether the idea commended itself to others, although there was very little doubt on that matter. To-night we meet to complete the idea. Mr. Bolland Newton, who was appointed by the committee as honorary secretary, has taken a great deal of trouble to obtain a selection for the presentation, and I hope the choice will be as gratifying to and approved by the general body as it has been by the committee, in the substantial form in which our feelings have been expressed. I think most of those who are here to-night have seen the silver ornaments in the other room. We were very fortunate in getting the idea. Railwaymen's notions of works of art—with one or two exceptions present in this room—do not always run in a happy form of expressing their ideas suitably to the occasion. We found the Government had recently been making a presentation to a foreigner of note who had done some service to the English Government which they wished to mark by a small presentation. We adopted our idea from them, and selected, with the approval of the committee, three silver bowls, which will, I think, be an ornament to any table, with a coat of arms and a small inscription. In addition there is an album, containing the names of all those who have taken part in these testimonials, and expressing as near as we could in a few words the feelings of those who joined in it:—

"Desiring to recognise the goodfellowship and cordiality subsisting between your *confrères* in the railway world and yourself during an association extending over a considerable number of years, your retirement from the office of general manager and election to a seat on the board of directors of the company affords a fitting and suitable opportunity of enabling the following railway officers to invite your acceptance of the accompanying service of plate as a memento of the occasion and as an expression of their friendship and goodwill."

("Hear, hear.") I think those words will commend themselves to you, and will relieve me of a great responsibility, because I need not repeat them in the form of a speech as an expression of my feelings on your behalf. We have to part in a business sense from our three friends so far as their official railway connection is concerned, and, although we have their successors to go to, it is I think to all—to me it is certainly—a source of regret. But they will still be with the companies with which they have been associated. They have risen to that high bench on which our masters sit, and, instead of remaining like we poor mortals to be ruled over by the board, these gentlemen will sit on the board and rule over their successors, and there guide the policy and direct the affairs of the railways better in the future than in the past, necessarily so, I think, because of the exalted position to which they have risen. I cannot say more on your behalf than ask their acceptance of the small memento we have provided, and in your name, and in my own, most fervently

wish them long life, great happiness, and freedom from the cares and troubles of office. ("Hear, hear," and loud applause.) The health of Sir Henry Oakley, Sir Charles Scotter, and Sir Allen Sarle.

Sir HENRY OAKLEY—Gentlemen, I was going to say unfortunately, but for my two compeers happily, I am the oldest of the three, and it has therefore fallen to me to be the first to acknowledge your kindness, and I almost fail to find words to do so. I feel, and we all feel, that we have not merely thanks, but a grateful expression of our feelings, at the cordial welcome you have given to this proposal of Mr. Harrison to-night. We all knew we should find ourselves amongst friends, but until this evening came the secret had been so well kept that not one of us knew what was going to happen. We neither knew whether we were to be feted by attending a genial, cordial party, as we have, or whether, as we have learned to-night, some more substantial recognition, some more permanent record of your goodwill which has always been shown to us, should be confided to our keeping. I won't say happily the latter course has been adopted, because it might savor of a sordid view, but I do say, and I know that Sir Charles and Sir Allen will echo my words, that we are deeply touched by the kindly thought which prompted this meeting to-night, and the more cordial expression embodied in the handsome pieces of plate which Mr. Harrison has just presented to us. The pleasure of meeting you to-night is however, I think you will all agree, tempered in some degree with sadness. We three are here, veterans of your army, men who have served in the work you now have to carry on for, more or less, fifty years. We saw the giants of early railway enterprise in their prime; Saunders, Seymour Clarke, and a host of others have passed away from the arena in which we were then humble participators. It is impossible for you, without personal experience, to realise the bitter hostility, the opposition, the obstacles that were thrown in the way of those men of mark, who first commenced the enterprise of railways in this country. Our duties of late, onerous as they are, expanding and always increasing with the responsibility of management, are entirely different from those that our predecessors undertook. Our great difficulty now is the sordid gentleman who wants his goods carried for nothing, or, I will not speak disrespectfully, the energetic Government Department that wants to control us, and points out how he, sitting in an office, can know better than we all that happens on, or that is requisite for, a railway. These are really minor troubles compared with those that our forefathers underwent, and the retrospect to a man like myself, retiring at an age when Scripture has indicated that all ought to give up work, is somewhat depressing, especially when we feel that we three are still as good as ever we were. ("Hear, hear.") We have the same heart, the same soul, and the same inspiration to-day, and work as valiantly, as earnestly, and, we hope, as successfully as in the past. ("Hear, hear.") But, gentlemen, that question is settled for us. The world wisely recognises that at our time of life the strain may sometimes be too much, and the cord of life that they would gladly see prolonged, might be snapped too suddenly if the exertion were continued. Like sensible men, as I hope we have shown ourselves to be in our lives, we recognise that position, and gracefully retire to make room for younger, and, we earnestly hope, better men, to carry the work on the future. ("No, no.") I say better men for this reason, they have the advantage of the experience we have had to create for ourselves. ("Hear, hear.") Though their lives may be easier, they will still find enough to do. They will find their duties will still increase, that the responsibilities of their management will never grow less, and we hope most earnestly and cordially that their lives in the railway service will be spent as happily as, we are glad to say, ours has been. No words can express more earnestly how happily our lives have gone, how much we owe to the goodwill and friendship of our colleagues and *confrères*, how much consideration and advice and assistance has been given to us, and also how much forbearance has been shown us in our careers. We acknowledge that now, because the time for our part in the strife has gone. We look back on it like reasonable men, and recognise how much we owe to those with whom we have been associated. The only claim we make in that respect is that we hope our former colleagues have participated in any good we have been able to assist in carrying on. I do not know that I need say any more: I really cannot adequately express how deeply we feel, how highly we prize the pleasure of this evening. We all of us know that our families will cherish the records you will enable us to carry away, and which will enable us to show that, loved as we all are in our own homes, there are others besides those bound to us by ties of affection who recognise that we have tried to do our duty in life, and that in the endeavour to gain the goodwill of our associates we have not been absolutely unsuccessful. ("Hear, hear.") I ought to stop. I do not know that I can say more; I am afraid that if I dwelt upon all I ought to say I should break down. But I may say before sitting down that

there is no man in the railway service who more highly appreciates the advantages, the pleasures, the enjoyment, and the excitement of the life than I who have been for fifty years among you, always with increasing affection to my colleagues, my competitors, and my compeers. In concluding, I cannot but say that in the titles that her most gracious Majesty has bestowed upon us, it is only the recognition in our particular selves of the esteem in which the railway service is held by the highest in the land. (Loud applause.)

Sir CHARLES SCOTTER—Mr. Chairman and gentlemen, after the able and touching address you have listened to with so much attention from my friend Sir Henry Oakley, I feel some difficulty in saying more. You will have noticed that he never referred to himself individually, but to the trinity of knights. As the presentation to the three has been made in one speech—an excellent address from the chairman—I really think on the whole you will be better satisfied, and I am sure I should be, if you were to accept Sir Henry Oakley's address as an acknowledgment from Sir Allen Sarle and myself. His lengthened experience of the railway world of course greatly exceeds mine. He began by saying that he was the oldest of the three, and referred in almost pathetic terms to the forces which had driven him from the office of general manager. Gentlemen, I am the youngest of the three, and am inclined to think that the action I took drove both Sir Allen Sarle and Sir Henry Oakley from the office of general manager. I had the moral courage to make up my mind and to say that I had had enough of railway work. Forty-three years of hard work is sufficient for any man, more especially those engaged in railway occupations. When I had made up my mind to resign I saw Sir Allen Sarle, and he said "So you are going to resign." I said "Yes." "Then I shall resign too," he said, and not long after that I heard that Sir Henry Oakley had also resigned, and so you get the trinity of knights resigning at the same time, and coming here to receive these splendid tokens of your friendship and esteem, and these beautiful addresses of your history of railway management, which has been referred to by Sir Henry Oakley. What strikes me looking round this table is the enormous number of changes that take place in the executive connected with the railways of this country. It is now nearly fourteen years since I first came to London, and although that is a comparatively short period in a man's life, yet every large railway in London, with one exception, has changed its general manager. I need not refer to the names, but if you will cast your mind's eye round the railway map, you will see that the only one left of our large London railway managers is Sir William Birt. Then another fact which impresses me to-night is the number of general managers who have been promoted from goods managers. I myself was a goods manager, and a great number round the table have succeeded to the position of general manager from the office of goods manager. There is no doubt it is an excellent school, but there are, of course, good general managers who have never been goods managers. Mr. Harrison in his remarks ventured to say that now we had become directors we should be masters of the general managers. Gentlemen, that is not my experience. I know very well that I was more master of the situation as a general manager than I am as a director. In the position of a general manager I was an absolute monarch, as a director I am simply one of twelve, and, therefore, I think that if Mr. Harrison should in course of time aspire to and obtain the position of a director he will find that all his power and all his authority have gone. Gentlemen, referring briefly to what has been described as an unique occasion, I must say that my association with the railway managers of this country, now between twenty and thirty years, has been in the highest degree satisfactory to me. I have always endeavoured during that period, socially and commercially, to do what is right and just, regardless of consequences. I have never received anything but the greatest kindness from all my colleagues, both at the general managers' conference and at the goods managers' conference. I have very happy recollections of many pleasant days spent in their company, and perhaps the pleasantest of all were those days when, relieved from the turmoil and drudgery of work, we once a year took occasion to leave London for some little place either in Scotland or in the North of England. On those occasions many happy days have been spent, and I hope the general managers of the railways of this country will not forget that a great deal of good arises from these times, and that they and those who succeed them will remember those pleasant days, and continue those gatherings, and enjoy those pleasant relations. I have only to say, in conclusion, that I re-echo every word that has been so well said by Sir Henry Oakley in rendering thanks to you for your kindness to us three to-night. We appreciate more than words can express the kindly sentiments which have dictated and prompted you to present us with what I have seen, and what I declare to be a magnificent present to us of three silver ornaments. We appreciate also the albums containing the

names of those who have subscribed for those beautiful articles. We shall treasure the albums, we shall treasure the articles, and we shall treasure above all those kindly expressions which Mr. Harrison has been good enough to make towards us to-night. (Loud cheers.)

Sir ALLEN SARLE—Mr. Harrison and friends, if it were difficult for Sir Charles Scotter to say anything in complement to what Sir Henry Oakley has said, how much more difficult is it for me to follow him. Unfortunately belonging to a smaller company than those to which they belong, and perhaps owing to the fact that we hold more of a monopoly in our district, I have not had the pleasure of meeting you so frequently as those gentlemen. To a great extent we have not been so subject to competition as the northern lines, or even the London and South Western Company. I think I may possibly claim to be the oldest railway officer in this room—"No"—having commenced my career in 1844. Perhaps there are one or two exceptions, but after such a long service nothing has given me more pleasure than to be the recipient of what Sir Charles Scotter has called a magnificent testimonial, and which you have presented to us this evening, not merely for the intrinsic value of the three bowls, for I value almost equally the beautiful album you have given me, representing as it does a great number of gentlemen whom I shall always look back to in my declining years as friends. But apart from that, I think a meeting of this kind, when so many railway men are together, is an excellent example which can be followed by our younger friends, to see that their services are appreciated by their fellow railway men. ("Hear, hear.") It shows what I may call an *esprit de corps* amongst us which must be appreciated very highly and seriously by all railway men as something for them to look forward to. I will not go back to the old history of railways as Sir Henry Oakley has done, and in part Sir Charles Scotter, although I could give some anecdotes of that period. I will only say that I appreciate most seriously your kindness to us, and to myself particularly to-night. I shall always look in my declining years to these tokens of your friendship, and I am sure it will lighten the darkness as it comes over me. (Loud cheers.)

Mr. J. S. FORBES—It is but reasonable that before we go some one should propose thanks to our chairman—"Hear, hear"—for presiding on this occasion, and so feelingly expressing what is proper to be said in respect to our departing friends. I confess I have listened with mixed feelings to what has been said. I hardly know where I am. I am a kind of compound or complex individual. My deepest sentiments and feelings are those of a general manager, but, as you know, I am, by the favour of my friends, a chairman. But whether I speak as a chairman or as a general manager (I believe the only one existing in this country by Act of Parliament), I cannot lose sight of one pathetic fact—that these thanks and these responses have a sentimental side. Well deserved as the honours of retirement may be, with peace and dignity which falls to the lot of many men, in all who deserve it—and in no case more than in our three friends—there is a pathetic side—the sadness of farewell. I am sure none of us can for a moment conceive or feel that natural, universal, and touching thing on this occasion as it deserves, its influence is as deep as it can possibly be. When I think of the men I have known, of the men who have gone beyond recall, what can I feel but a profound solemnity? Happily our three friends, although their position is changed, will remain with us, and I daresay if we wished to appeal to them for advice, as we have done while they retained their positions, they, as men of experience and friends, will readily place it at our disposal. That is not the case of some who have gone before. Where are our Seymour Clarks and our Allports, friends of my youth? I cannot appeal to them any more; I can recall them with a deep affection, but we have the advantage on this occasion of knowing that almost in the prime of life, and in the full possession of all their faculties, and with all their resources of knowledge, if we want them they are still here. ("Hear, hear.") I confess that seems to me a great consolation for the inevitable. They have a right to retire; they have a right to throw off their shoulders the terrible burden of responsibility of general managers. They have earned their reward, their dignities, and that peace which follows retirement. But, as I said, they are still with us, and we can feel what an advantage that is. Notwithstanding all this there is a certain feeling of sorrow that they should be taken from us. All of you will appreciate that, and, before they bodily go from us, for I am sure their memories will remain green even to the younger members of this community, to whom they have been wise enough in due season to hand over the wearing responsibilities of office. I cannot, I think, do better than commend to the younger ones a careful study of the lives of their predecessors, and in the future do justice, as I am sure they will, to the energies, the abilities, the loyalty, and the generosity of those who have spent their lives in making the

paths of their successors easier, and who have earned and attained a dignified repose. They will be able to give the benefit of their knowledge and their confidence to their successors in times of difficulty. Well, old men like me are apt to moralise. In our matter-of-fact daily business nothing can combine men together so much as a common intimacy and a common duty devolving upon each one. These young fellows are very agreeable, they are very nice, but their duties are comparatively easy; they are treading in the footsteps of their great predecessors, and I am sure they have good examples. I hope, I believe, I know, their intelligence, their training, and their instincts will justify them as the successors of a great race of men who are living in their retirement, and who will be at call if wanted in the railway world. Now, what I really got up to do was to propose the health of the chairman. It seems to me that our chairman is an embodiment of what I have been saying about these young fellows. But what a responsibility to be thrown on the shoulders of one man! The general manager of the London and North Western Railway. ("Hear, hear.") Of course I sometimes rebel against the prescriptive idea that the general manager of a concern like the London and North Western Railway is a subordinate, subject to that mysterious body the board of directors. ("Order.") Somebody said "Order." I am a most disorderly person; I like to express what I think, and I am not at all prepared to fall in with the popular idea that any young man who by accident of birth or something of that sort should be a chairman, that he should rank in precedence of a man whose daily work is to manage such a concern as the London and North Western Railway, or the Great Northern, or I may even descend to the London Chatham and Dover. (Laughter.) I never found anybody disputing the pre-eminence of the men who gave their great abilities and great devotion to the companies. They ought not to be relegated to a subordinate position. I am not preaching rebellion, but only trying to insist on the prerogative of my class. I have made my career by being a general manager of a company, and I have perceived my duty as a general manager to be master of the company. It is so natural. (Laughter.) The instincts of the creature in the first place, and his ability and knowledge obtain it for him. You must acknowledge Cæsar everywhere, but we have a right to insist on great and daily devotion having their right place against the world, directors, and chairmen. I reserve myself. (Laughter.) Now our friend here. Consider for a moment what is on his head, and then I am sure, apart from his being the chairman of this social and extremely interesting gathering to-night to do honour to our departed friends (in a sense, happily they are still with us), there will be no question whether it is not proper that we should propose his health, and thank him, first of all, for presiding on this occasion, and for being the chairman of the committee who brought about this most interesting evening, and being something more than a chairman of anything—including his own railway—a man on whose brain, and energies, and devotion the interests of a great corporation depend. I am sure you will all thank him with me for bringing this enjoyable meeting about. I wonder when I retire what other friends are going to be associated with me. I see Gibb looks as if he would like to stand in; I am not sure whether his neighbour would not like to do so also. But that will not come. I do not suppose that in our time we shall see such a coincidence as the retirement of three such men as Sir Henry Oakley, the grandfather, so to speak, of the railway world, Sir Charles Scotter, and Sir Allen Sarle, who we know had the audacity to claim that he was the oldest man connected with railways present. I began my career filling up the dog-book at Paddington station. It was from anywhere to anywhere. It was quite sufficient for me if I filled in London. The other man filled in with infinite difficulty the station to which it was to go and what the fare was. That was my first job. A good many things have happened since then. Now I have to propose the health of our chairman, first in relation to his position to-night, which is of a fleeting, temporary character, but well deserved, but most of all in reference to that great future which is before him, in carrying out his duty with due regard to his own self-respect and to his profession—the General Manager of the London and North Western Railway.

Mr. HARRISON—Mr. Forbes, chairman, and general managers, I have a difficulty in finding words to express my thanks for the kind way in which you, Mr. Forbes, have spoken of me, and the cordial way in which the proposed toast has been received. He referred to my young shoulders, and the burden they are supposed to carry. I would not venture to give advice to so many who are my seniors, but there are some my juniors, and I would like to say that whatever the shoulders are, whether old or young, whether broad or narrow, they cannot bear the responsibilities of general manager unless they are able to secure the assistance of all those who are associated with them, not only in the conduct of the affairs of the particular concern they are

responsible for, but also the cordial good-feeling of those with whom they are in competition and in opposition. ("Hear, hear.") We are most of us determined in the course we consider right for the interests we have to safeguard. We are right; the other people are wrong if they oppose us. But my experience is that the other people are sometimes as right as you are, and the sooner you recognise that the better, and then make due allowance for their difficulties, as you have to appeal for your own difficulties. It is only by promoting this feeling amongst all who are connected with railway work, and with whom you come in contact, that you can hope to promote the interests of the particular line you look after, and give some small help towards the good of the general railway world. We have examples in the three gentlemen who are now retiring from active life, of how successfully this may be done, and I hope we shall all take lessons from them, and be equally successful. ("Hear, hear.") There is one other feature on this occasion which is very attractive. Our friend Oakley persists in working away. If he could get more work he would do it, day after day, and hour after hour. Our friend Scotter says, I have done my day's work; I will be ready to give my advice at any time if they care for it, but I am going to enjoy my health and strength for as many years as I can. I think Sir Allen Sarle has adopted the same course; although he has done fifty years of hard railway work, he says, I have still a little enjoyment left, and I am not going to devote the remainder of my years plodding away at railway work. It is a very attractive outlook. All I can say is that I think Sir Charles Scotter has adopted the course which commends itself to me. I do not think one ought to go on working forty or fifty years, and then keep working on. The prospect is very pleasant that you can have one day now and then, just one in a month perhaps, to take up work. Now, Sir Charles can go to the South of France, to Norway, or Scotland, or do anything he likes. I only wish they would make it worth my while, and I trust that should the time come I shall carry with me the same good wishes that these gentlemen do to-night.

Sir HENRY OAKLEY—Before you go I would ask your attention for a minute or so. I am not quite sure whether Sir Charles Scotter, Sir Allen Sarle, or myself are the right persons to propose the toast I wish to give, because we have directly and especially benefited by the exertions of the gentleman whose name I propose, but we three having experienced the result of his work also know how to value it. We feel quite sure that the charm and attraction of this meeting could never have been realised if the work, the voluntary work, done with heart and soul had not been undertaken by some one. Our chairman has told us that much of the pleasure of this evening is due to our friend Mr. Bolland Newton. ("Hear, hear.") We who have profited so much by it, we who know from past experience the work entailed on one who undertakes a burden of this sort, recognise to the fullest, most cordially and gratefully, the work of Mr. Bolland Newton. We, therefore, ask you to concur with us in thanking Mr. Newton for his single-mindedness, for his untiring industry, and for the manner in which he has carried out the work intrusted to him. I need not say more. I am sure I have the goodwill of every one present when I ask you to drink the health of Mr. Bolland Newton, and in our name express to him our grateful appreciation of his kindly efforts for us.

Mr. BOLLAND NEWTON—After the eloquence displayed this evening, I am sure you will not expect me to make a speech. It has been my good fortune to be associated for many years with our three distinguished guests of this evening. I can only say that our intercourse has for me many pleasant and agreeable memories. Anything that I have done in connection with the testimonial has been solely and purely a labour of love. Gentlemen, I thank you.

#### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

South Eastern Railway (July 18th).—At the rate of 2½ per cent. per annum, carrying forward about 5,000*l.*, against 3¼ per cent., with a balance of 4,500*l.* Upon the preferred ordinary stock an interim dividend can be paid of 2*l.* 10*s.* per cent. for the half-year; the amount in arrear of 10*s.* per cent. will be added to the dividend upon this stock for the second half-year. Further statement of dividends paid for the June half-year:—

1898 ... 2½ p. cent.	1895 ... 2½ p. cent.	1892 ... 1½ p. cent.	1889 ... 3 p. cent.
1897 ... 3¼ "	1894 ... 2½ "	1891 ... 2½ "	1888 ... 3 "
1896 ... 3 "	1893 ... 2½ "	1890 ... 3¼ "	1887 ... 3¼ "

Belfast and Northern Counties Railway (July 18th).—At the rate of 5½ per cent. per annum, placing 1,000*l.* to reserve, and carrying about 5,000*l.* forward to next half-year, against 5½ per cent. per annum, and about 4,500*l.* carried forward. The June dividends paid in the last twelve years are shown below:—

1898 ... 5½ p. cent.	1895 ... 5 p. cent.	1892 ... 5 p. cent.	1889 ... 5 p. cent.
1897 ... 5½ "	1894 ... 4½ "	1891 ... 5 "	1888 ... 3½ "
1896 ... 5½ "	1893 ... 4½ "	1890 ... 4½ "	1887 ... 2½ "

**Metropolitan Railway (July 19th).**—At the rate of  $3\frac{1}{2}$  per cent per annum, placing 3,000*l.* to a workmen's compensation fund, and carrying forward a balance of 18,500*l.* For the corresponding half of last year the dividend was at the same rate, and 16,000*l.* was carried forward. The surplus lands stock will receive a distribution at the rate of  $2\frac{1}{2}$  per cent. per annum, as compared with  $2\frac{1}{2}$  per cent. a year ago, the sum of 1,100*l.* being carried forward, as against 600*l.* in 1897. For the last eleven years the July dividends on the railway stock have been as follows:—

1898 ... $3\frac{1}{2}$ p. cent.	1895 ... $2\frac{1}{2}$ p. cent.	1892 ... $3\frac{1}{2}$ p. cent.	1889 ... 3 p. cent.
1897 ... $3\frac{1}{2}$ "	1894 ... $2\frac{1}{2}$ "	1891 ... $3\frac{1}{2}$ "	1888 ... $2\frac{1}{2}$ "
1896 ... $3\frac{1}{2}$ "	1893 ... 3 "	1890 ... 3 "	

**Midland Great Western of Ireland Railway (July 20th).**—At the rate of 4 per cent. per annum, carrying forward 5,000*l.*, in comparison with 4 per cent. and 5,000*l.* carried forward. The dividend for the June half of the previous eleven years is shown in the subjoined table:—

1898 ... 4 p. cent.	1895 ... 5 p. cent.	1892 ... 4 p. cent.	1889 ... 5 p. cent.
1897 ... 4 "	1894 ... $4\frac{1}{2}$ "	1891 ... 4 "	1888 ... $4\frac{1}{2}$ "
1896 ... 4 "	1893 ... $4\frac{1}{2}$ "	1890 ... 5 "	1887 ... 4 "

**London and South Western Railway (July 21st).**—At the rate of 5 per cent. per annum, carrying over 15,287*l.*, in comparison with  $5\frac{1}{2}$  per cent., and a balance of 23,525*l.* June dividends for twelve years:—

1898 ... $5\frac{1}{2}$ p. cent.	1895 ... $4\frac{1}{2}$ p. cent.	1892 ... $4\frac{1}{2}$ p. cent.	1889 ... $4\frac{1}{2}$ p. cent.
1897 ... $5\frac{1}{2}$ "	1894 ... $4\frac{1}{2}$ "	1891 ... $4\frac{1}{2}$ "	1888 ... $3\frac{1}{2}$ "
1896 ... 5 "	1893 ... $4\frac{1}{2}$ "	1890 ... $4\frac{1}{2}$ "	1887 ... $3\frac{1}{2}$ "

**North Eastern Railway (July 21st).**—At the rate of  $5\frac{1}{2}$  per cent, being the same as for the corresponding period. June dividends for twelve years:—

1898 ... $5\frac{1}{2}$ p. cent.	1895 ... $4\frac{1}{2}$ p. cent.	1892 ... 3 p. cent.	1889 ... $6\frac{1}{2}$ p. cent.
1897 ... $5\frac{1}{2}$ "	1894 ... 5 "	1891 ... 6 "	1888 ... $5\frac{1}{2}$ "
1896 ... $5\frac{1}{2}$ "	1893 ... $4\frac{1}{2}$ "	1890 ... $6\frac{1}{2}$ "	1887 ... $4\frac{1}{2}$ "

**Midland Railway (July 22nd).**—At the rate of  $2\frac{1}{2}$  per cent. per annum on the preferred ordinary stock and  $2\frac{1}{2}$  per cent. per annum on the deferred ordinary stock (equal to  $5\frac{1}{2}$  per cent. per annum on the former ordinary stock), the balance carried forward being about 18,000*l.* For the first half of last year the dividend was at the rate of  $5\frac{1}{2}$  per cent. per annum on the ordinary stock, and the balance carried forward 18,336*l.* For the first half of the last twelve years the distribution has been at the following rates:—

1898 ... $5\frac{1}{2}$ p. cent.	1895 ... 4 p. cent.	1892 ... $5\frac{1}{2}$ p. cent.	1889 ... $5\frac{1}{2}$ p. cent.
1897 ... 5 "	1894 ... $4\frac{1}{2}$ "	1891 ... $5\frac{1}{2}$ "	1888 ... $4\frac{1}{2}$ "
1896 ... 5 "	1893 ... $4\frac{1}{2}$ "	1890 ... $5\frac{1}{2}$ "	1887 ... $4\frac{1}{2}$ "

**London Chatham and Dover Railway (July 22nd).**—At the rate of  $2\frac{1}{2}$  (against  $1\frac{1}{2}$ ) per cent. on the second preference stock, carrying forward 926*l.* (against 1,500*l.*). The dividends are for the financial year ending June 30th. The dividends paid on the first preference stock for the last twelve years (ending June 30th) have been as under:—

1897-98 ... $\pounds$ 10 0	1893-94 ... $\pounds$ 7 6	1889-90 ... $\pounds$ 10 0
1896-97 ... 4 10 0	1892-93 ... 3 9 0	1888-89 ... 3 17 6
1895-96 ... 4 10 0	1891-92 ... 3 19 0	1887-88 ... 3 10 0
1894-95 ... 3 13 0	1890-91 ... 4 0 0	1886-87 ... 3 10 0

**Great Southern and Western Railway (July 22nd).**—At the rate of 5 per cent. per annum, carrying forward 9,780*l.* to next half-year; compared with a dividend at the rate of  $5\frac{1}{2}$  per cent. per annum and a balance of 12,037*l.* June dividends for twelve years:—

1898 ... 5 p. cent.	1895 ... $5\frac{1}{2}$ p. cent.	1892 ... $4\frac{1}{2}$ p. cent.	1889 ... 5 p. cent.
1897 ... $5\frac{1}{2}$ "	1894 ... $5\frac{1}{2}$ "	1891 ... 5 "	1888 ... $4\frac{1}{2}$ "
1896 ... $5\frac{1}{2}$ "	1893 ... $4\frac{1}{2}$ "	1890 ... $4\frac{1}{2}$ "	1887 ... $4\frac{1}{2}$ "

**Rhymney Railway (July 22nd).**—No dividend will be paid for the past half-year, the undivided balance of 9,943*l.* being carried forward. For the corresponding period of last year the dividend was at the rate of 11 per cent. per annum, and 1,642*l.* was carried forward. The June dividends for the last twelve years have been as follows:—

1898 ... nil	1895 ... $7\frac{1}{2}$ p. cent.	1892 ... 10 p. cent.	1889 ... 10 p. cent.
1897 ... 11 p. cent.	1894 ... $7\frac{1}{2}$ "	1891 ... $6\frac{1}{2}$ "	1888 ... 10 "
1896 ... 10 "	1893 ... 7 "	1890 ... 7 "	1887 ... 10 "

**Belfast and County Down Railway.**—At the rate of  $6\frac{1}{2}$  (against 6) per cent. per annum, carrying forward about 1,500*l.* (against 2,400*l.*) A year ago 1,000*l.* was placed to reserve fund, but there is no similar appropriation on the present occasion.

**Miscellaneous.**—London Road Car at the rate of 8 (against 10) per cent. per annum. London and St. Katharine Dock at the rate of  $2\frac{1}{2}$  (against  $2\frac{1}{2}$ ) per cent. per annum. The directors of the East and West India Dock Company do not propose to make any recommendation in regard to a dividend on the ordinary stock until the result of the working of the whole year is known.

### TRANSIT OF CATTLE.

The Departmental Committee appointed by the Board of Agriculture to investigate the manner in which the inland transit of cattle is conducted, have issued a report in which they recommend the adoption of several important measures for the

protection of animals from suffering and the ensuring of their delivery in the best possible condition. These include the placing of fairs in Ireland in the hands of either the Privy Council or the local authority, the regular attendance of constabulary at fairs, greens, and railway stations on fair days, an increase in the number of travelling veterinary inspectors, the granting of powers to local authorities to acquire fair grounds and remove fairs from the streets, the improvement of loading accommodation at railway stations, and the giving of power to portal inspectors to prevent the shipment of animals which, in their opinion, are unfit for a sea voyage. The committee also recommend that loading banks should be constructed level with the truck floors, that all new trucks should have falling loading doors, that railway companies should have power to detain and feed, at the expense of the owner, animals which, after a voyage, are, in their opinion, unfit to continue the journey; that where there is reason to believe that animals have been twenty-four hours in transit without food the company may unload and feed them and make a reasonable charge upon the owner; that it should be made penal to send cows on a journey when there is a likelihood of calving during transit; and that the substitution of an improved goad for the stick and the disbarning of young cattle should be encouraged.

### DIDCOT AND WATLINGTON LIGHT RAILWAY.

The Light Railway Commissioners have held an inquiry at Didcot with reference to the application of the Light Railway Development Company, Limited, for an order to authorise the Didcot and Watlington Light Railway. Various public bodies and others who are interested were represented. Mr. Lewis COWARD, in support of the order, pointed out that the length of the proposed railway was between 12 and 13 miles, and it was estimated to cost 72,000*l.* It was proposed to commence with a junction of the Great Western Railway at Watlington and to connect with that system at Didcot. The railway had practically the support of all the landlords of the district, and the Great Western Railway Company supported the line conditionally. The local authorities also supported it. Evidence in support of the line was given by Dr. LEMPRIERE, Senior Fellow of St. John's College, Oxford, the Hon. CECIL PARKER, and several farmers residing in the district through which the proposed railway will pass. The Rev. H. J. BIDDER, Bursar of St. John's College, Oxford, objected to the Warborough portion of the line on the ground that it would be prejudicial to the interests of the tenants of the college. At the close of the inquiry the Earl of JERSEY said the Commissioners would recommend the Board of Trade to issue the order.

### ARGENTINE RAILWAY ITEMS.

The Intendente of Buenos Ayres has authorised the Asistencia Pública to allow railway inspectors to take the deposition of victims of railway accidents taken to the municipal hospitals. This authorisation has been granted at the request of the railway board.

There is some probability of the Argentine National Railway Board being shortly abolished on the ground of economy. Should this take place, everything connected with railways will be worked from the Ministry of the Interior, until the new Ministry of Public Works is formed in October.

Sr. Luis Rapelli having resigned the post of general manager of the Argentine Central Northern (National) Railway, Sr. Domenico, manager of the Andine Railway, has been appointed to succeed him, and Sr. Oliva, manager of the Cordoba branch of the Villalonga Express Agency, will assume the managership of the Andine Railway.

In the Chancery Division, on Wednesday, on the application of Mr. Peterson, for the East Argentine Railway Company, Limited, petitioners, Mr. Justice Wright sanctioned a scheme under the Joint Stock Companies Arrangement Act, 1870, subject to the assent of certain creditors being obtained or an amount being paid into court to satisfy their debts.

The claim for damages brought against the Buenos Ayres and Ensenada Railway Company by the family of engineer Noceti, who was killed from the result of a level crossing accident in December, 1892, has finally been settled. The claim was for \$102,510 (currency), and the Judge has condemned the company to pay \$60,000, besides the expenses paid by the family for medicine, &c., \$7,410, and the doctors' fees, \$15,000. The company has also to bear the costs of the case.

The Commercial Appeal Court at Buenos Ayres has confirmed the sentence of the lower court in the case of "Manuel Blancas v. Otto Bemberg and Co." The plaintiff claimed \$90,000 gold for

the transfer of a railway concession from San Rafael to Mendoza. The defendants maintained that the transfer was conditional, and that they did all they could to place it on the European market, but that due to the crisis through which the country was passing they were unsuccessful. The sentence absolves the defendants.

No traffic return has come to hand this week from the Entre Rios Railway Company, but a cable has been received from the acting-general manager to the following effect:—"Estimates (traffic) cannot be forwarded until next week; all traffic stopped by elections causing disturbances. There is no ground for anxiety. We have now received permission to open line for public service, and have commenced running trains. We have been informed that we shall be compensated for all loss caused by suspension of service in addition to payment for services performed and expenses incurred in other ways."

### LONDON AND SOUTH WESTERN RAILWAY.

BASINGSTOKE AND ALTON LIGHT RAILWAY.

The ceremony of cutting the first sod of the Basingstoke and Alton Light Railway was performed yesterday (Friday) by the Right Hon. C. T. Ritchie, M.P., President of the Board of Trade. The plans of the line were deposited in December, 1896. The inquiry by the Light Railway Commissioners commenced at Basingstoke at 11 a.m. on January 28th, 1897, and the Commissioners reported that they would grant the order, subject to the approval of the Board of Trade, at 3 p.m. the same day. The order was confirmed by the Board of Trade on December 9th, 1897, this being the first order granted under the Light Railway Act to an existing railway company. All notices to treat for the lands have been served, the working drawings completed, and the contract let to Mr. T. Firbank, of Railway Approach, London-bridge, S.E., for the construction of the line by October 1st, 1899. The length of the line is 12½ miles. The estimate as deposited, including cost of land, is about 64,600*l*. Though a single line, sufficient land is being taken to admit of the subsequent doubling of the railway. The villages immediately in the neighbourhood of the new line are Cliddesdon, Winslade, Ellisfield, Herriard, Lasham, Bentworth, and Shalden. No counsel were employed, the case for the company being conducted solely by Sir Charles Scotter. Yesterday's ceremony was performed in a field about a mile outside Basingstoke, and was followed by a luncheon presided over by the chairman of the London and South Western Railway Company. Mr. Portal was supported by the other directors of the company and by all the principal officers, the visitors including several local M.P.'s, and representatives of public bodies. The CHAIRMAN proposed a toast in honour of the President of the Board of Trade, and Mr. RITCHIE, in responding, said it was a most agreeable task which he had performed that day, because the relations between the South Western Railway Company and the Government Department over which he presided were always of a most satisfactory and agreeable character. In particular he owed much to the advice and assistance of Sir Charles Scotter whilst the Light Railways Bill was in process of incubation. The railway companies generally, and the South Western in particular, far from being jealous or suspicious of that measure, had assisted him in every way. Originally he regarded the outcome of the Act with some misgiving, for it was purely experimental, but the experimental stage was now passed. Applications for orders from the Commissioners since the passing of the Act had been very numerous and were still increasing. No less than 121 applications had been sent in, of which thirty-two were from existing railway companies, and fourteen of those applied for by other parties were to be worked by existing railway companies. These applications represented 1,305 miles of railway and 7½ millions sterling of capital, and, as the Act was still only two years old, he thought those figures alone afforded sufficient indication of the necessity of the measure. He had often been asked what constituted a "light railway," and he must confess he did not know. Perhaps the best definition he could give of the term was—a railway to be constructed under the provisions of the Light Railways Act. He was very gratified to find the great railway companies taking advantage of the Act so freely, in order to couple up towns and villages which otherwise would lack the benefits of easy, cheap, and rapid intercommunication. As an example of the savings which might be effected under the Act, he would mention that whereas the cost of the undertaking they were there to inaugurate that day was estimated at only 4,000*l*. or 5,000*l*. per mile, under the old system it would have been 36,000*l*. per mile. At all events, that was the estimate of those who applied to Parliament in 1895 for powers to make a railway between Basingstoke and Alton. And these cheap railways were obtained under the Light Railways Act without any sacrifice of principle in efficient working and safety on the part of the Board of Trade. Then, the cost of the application for this railway had been only 150*l*., although every

facility was given to all parties interested to be heard most fully, and the inquiry was in every respect complete. What would have been the cost of an Act of Parliament? He and his colleagues were quite sure this new line could not possibly start under better auspices than those of the London and South Western Railway Company, whose name was synonymous with success. (Applause.) He concluded by proposing the toast, "Success to the Basingstoke and Alton Light Railway," to which the CHAIRMAN responded. Lieut.-Colonel the Hon. H. W. CAMPBELL (deputy-chairman of the London and South Western Railway Company) proposed "Prosperity to the Towns of Basingstoke and Alton," which was responded to by Mr. H. M. JULIAN, mayor of Basingstoke, and Mr. J. G. WOOD, chairman of the Alton Rural District Council. The health of the chairman was proposed by Mr. A. F. JEFFREYS, M.P., and Mr. PORTAL'S acknowledgment of the toast brought the proceedings to a close.

### EXTENSION OF THE NORTH CORNWALL RAILWAY.

In the course of a few days the system of the London and South Western Railway will be extended to Bude, on the coast of North Cornwall. The new line is a continuation of the branch railway from Okehampton to Holsworthy, the distance from Holsworthy to Bude being 10 miles 3 furlongs. Immediately after leaving Holsworthy the line crosses the Deer Valley, over which it is carried by a lofty viaduct of nine arches, each of 50ft. span, the height from the permanent way to the valley being 89ft. There being no suitable building material in the district, it was decided to construct the viaduct wholly of concrete. The spire and arches were built with blocks of concrete, and the foundations and abutments of concrete in mass, the whole of the material being made with broken stone found in the neighbourhood, mixed with inland sand brought from Plymouth and Bideford. At Woolston there is a second viaduct of similar design; but this is not more than 60ft. high, and the two represent a successful application of concrete which has never before been adopted. There is only one intermediate station, and this is placed at Whitstone, about midway between Holsworthy and Bude. A branch line for the purposes of goods traffic has been laid to the basin of the Bude Canal, and another branch may eventually be carried to Marhamchurch, within easy reach of Widemouth Bay. The railway from Holsworthy to Bude consists in the first instance of a single pair of rails, but land has been taken, and viaducts have been constructed, so as to permit of the introduction of a second set of metals, and the directors of the South Western Company are prepared to double the line whenever the local requirements may necessitate larger provision for the traffic. The ruling gradient is 1 in 73, which, for north Cornwall is comparatively good, and all the curves permit of fast running. Tyer's tablet system will be used in working while the line remains single, and as the heaviest type of the South Western permanent way has been employed in construction, high speeds can be maintained with perfect confidence. Messrs. John Aird and Son are the contractors, and their work has been completed within eighteen months. The line was designed by Mr. W. R. Galbraith, the consulting engineer of the London and South Western Railway Company, and constructed under his personal supervision, and that of his partner, Mr. R. F. Church, the resident engineer being E. Connal. It is anticipated that the opening of the new line will be followed by a large increase in the number of visitors to Bude and other charming points on the coast of North Cornwall.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### DELHI-UMBALLA-KALKA RAILWAY.

The directors of the Delhi Umballa Kalka Railway are offering the shareholders an underwriting commission of 2½ per cent. to subscribe for the new stock.

#### INDIAN MIDLAND RAILWAY.

The directors of the Indian Midland Railway Company, Limited, are prepared to receive tenders for debentures of the company to the amount of 150,000*l*. sterling, bearing interest at the rate of 3 per cent. per annum, guaranteed to the company both as regards payment of principal and interest by the Secretary of State for India in Council. The debentures will be to bearer, and will expire on June 30th, 1905, the interest thereon being payable half-yearly in sterling, in London, by coupons attached to the debentures, on January 1st and July 1st in each year. The minimum price of issue is par.

Tenders for this issue were opened yesterday. The applications amounted to 933,300*l*., and ranged from 101*l*. 10s. per cent. to 100*l*.. The minimum tenders at 100*l*. 8s. 6d. per cent. will receive about 41 per cent. The average price obtained was 100*l*. 11s. 4d. per cent.

#### COBURG-NORTHUMBERLAND AND PACIFIC RAILWAY.

A correspondent occupying a high public position in Canada, writes as follows respecting the recent issue of bonds of this

company, against which we warned our readers at the time:—"I see that a railway company with the high-sounding title of the Coburg Northumberland and Pacific Railway Company has issued a prospectus in London asking the oft-deluded public in England to buy its bonds, advertising them with the usual pomp and circumstance in such cases. And I desire to let the public know through the columns of your valuable journal some facts not stated in the prospectus, which it appears to me they ought to know before investing in these bonds. This company was incorporated by the Dominion Act, 52 Vic., cap. 62 (1889), and was subject to the general Railway Act of the Dominion 51 Vic., cap. 29, which provided that if the construction of the railway was not commenced, and 15 per cent. on the amount of the capital stock was not expended thereon within two years after the Act authorising the construction of the railway, or if the railway was not finished and put in operation in seven years from the passing of such Act, then the powers granted by such Act or by that Act should cease, and be null and void as respected so much of the railway as then remained uncompleted. Nothing was done towards the building of the railway under these Acts. Then, by the Act of the Dominion 54-55 Vic., cap. 90, the times limited for the commencement and completion of the railway were thereby extended for one year and three years respectively from July 31st, 1891. Then, by the Act of the Dominion 55-56 Vic., cap. 38, the times for the commencement and completion of the railway were thereby extended for two years and four years respectively from July 9th, 1892. Up to this time nothing was done in constructing the railway. Then, by the Act of the Dominion 57 and 58 Vic., cap. 68, it was provided that the times for the commencement and completion of the railway of the Coburg Northumberland and Pacific Railway Company were thereby extended for two years and four years respectively from July 9th, 1894, and it was also provided that if the railway was not commenced and completed within the times so fixed, then the powers granted for the construction should cease, and be null and void as respects so much of the railway as then remained uncompleted. Within the two years by the last-mentioned Act limited for the commencement of the railway the company did a little grading on a part of the line to serve for a "commencement of the railway," but since that time no part of the work of construction has been proceeded with, and at the date of this letter no part of the railway has been completed, and the time limited by the last-mentioned Act for the completion thereof has expired, and as no legislation has been had extending the time for the completion thereof beyond the time limited by the last-mentioned Act, the powers granted for the construction of the railway have ceased and become null and void. It may be that a small portion of the right of way has been acquired by the company, but if so, it is but a small part of it. If the public, knowing these facts, invest in the bonds of this railway, they ought to ask no sympathy if they lose their money."

#### IMPROVED CORK PAYMENT COMPANY, LIMITED.

The nature of this undertaking is indicated by its title. According to the prospectus of the company (which will be found in another column) the cork paving is non-absorbent, noiseless, non-slippery, and unaffected by weather, and its merits would seem to be attested by the numerous orders which have been obtained from railway companies and other public bodies. The capital of the company is 100,000*l.* in 1*l.* shares, of which 33,000 are now offered for public subscription.

#### SOUTH EASTERN AND CHATHAM COMPANIES.

It is officially announced that at Thursday's adjourned meeting of the two boards (Mr. J. S. Forbes in the chair) the draft competitive agreement was approved, the apportionments of the divisible traffic to be received by each company were fixed, and the seals of the respective companies ordered to be affixed to the agreement forthwith. The heads of the agreement will be submitted to the proprietors of the respective companies at the ensuing general meetings. It is understood that the following directors of the South Eastern will be appointed to serve on the management committee:—Mr. Cosmo Bonsor, M.P. (who has already been elected chairman of the committee), Mr. Gathorne Hardy, Lord Burton, Colonel Surtees, Mr. William Mewburn, and Mr. W. R. Stevens (who, since Sir Myles Fenton retired from the office of general manager and became a director, has acted as the company's chief officer). The directors selected to represent the London Chatham and Dover on the management committee are Mr. Akers Douglas, M.P. (who will be vice-chairman), Sir E. L. Pemberton, Lord Harris, Mr. A. A. Brand, Sir Sydney Waterlow, and Mr. George Wyndham, M.P. It is said that Mr. J. S. Forbes will have the position of standing arbitrator, or will act in some consultative capacity to both companies. The position of Mr. John Morgan, who has seen long service with the Chatham Company, has not yet been settled, but it is expected that in the

event of his not being appointed to a seat on the committee he will be asked to act as joint secretary to the committee with Mr. Sheath. It is proposed that the agreement shall come into operation on January 1st, 1899.

Mr. BRYCE has given notice that on Monday next he will ask the President of the Board of Trade, "whether the Board of Trade have considered the question whether an agreement of this character, which practically amounts to a fusion of two great companies, ought to be brought before Parliament for its approval; whether it is the intention of the directorates of the two companies to submit their agreement to Parliament; and whether, if such is not the intention of the two companies, the Board of Trade will represent to them the propriety of so doing, and the desirability of obtaining the approval of Parliament to an arrangement of such magnitude."

#### COSTA RICA RAILWAY SHARES.

It appears that Costa Rica rails have been flat recently in consequence of reported endeavours by the Costa Rica Government to realise its large holding in the company. We now learn that this cause of depression has been removed, and that the Costa Rica Government will not part with its shares. Thus the fall in the shares from 4½ to 3½ will in all probability be quickly recovered, and it is quite possible that the bears who have acted on the aforesaid report will find themselves in an awkward position. The intrinsic merits of the line are quite as good as when the shares stood at the higher figure; in fact, we believe that further economies in working will lead to better net results in 1898 than were secured last year. Obviously the threat to place on the market a block representing one-third of the total shares promised some fine fun for the bears. But as these shares are not really saleable on the market, being unquoted, that course cannot be adopted so readily as might be thought. Anyway, our information is that the Government has given up the idea of disposing of its holding. It probably appreciates the value and prospects of the line too well to let its interest go at the existing level.—*Financial Times*.

#### FOREIGN AND COLONIAL ITEMS.

Earl Grey has joined the board of the Bechuanaland Railway Company, Limited.

The Italian Government has authorised the cession of the Goulette-Tunis Railway to the French company owning the Bône-Guelma line.

The revenue of the six great French railways for the first six months of 1898 shows an increase of about 800,000*l.*, as compared with the corresponding period of 1897.

Shu King Cheng, president of the board of directors of the Eastern Chinese Railway, left St. Petersburg on Saturday for Berlin, whence he will return to China by way of America.

A syndicate of French capitalists has requested from the Sultan the concession for a railway from Salonica to Elassona. The Ottoman Government has authorised the making of the preliminary surveys.

The Capetown correspondent of the *Daily Mail* telegraphs that Mr. Rhodes has ordered surveys to be made for a railway from Bulawayo to Gwelo, and on through the gold country to Sariba Gorge, on the Zambesi.

Advices from Jibouti report that the railway to Harrar is now complete for a distance of 20 kilometres. Eighty kilometres are to be open for traffic by next May, and the whole line is to be completed in time for the 1900 expedition.

The revenue of the South Italian Railway (principal network) to June 30th this year amounted to 1,928,000*l.*, as compared with 1,944,000*l.* in the corresponding period of 1897, showing a decrease of 16,000*l.* The length of line in operation at the close of June, 1898, was 2,690 miles, as compared with 2,650 miles at the corresponding date last year.

There is believed to be no foundation for the statements which have lately been made public to the effect that the court will give its judgment in the Delagoa Bay Railway Arbitration within a few days, and that an award in favour of the claimants of 2,500,000*l.* may be expected. The contentious procedure is not yet closed, and the case will not be finally submitted to the court, much less decided, for at least three months.

Sir Lepel H. Griffin and Mr. Henry F. Tarks, the trustees for the holders of the 5 per cent. first mortgage bonds of the

Arauco Company, Limited, have sent out a circular to the bondholders strongly advising them to abstain from giving their assent or support to the scheme of arrangement just issued by the company until they receive a communication from their trustees, and if they have already sent in an assent they are advised to withdraw it.

M. Pavloff, the Russian Chargé d'Affaires at Peking, has assented to the loan arranged with the Hong Kong and Shanghai Bank for the extension of the Tientsin-Shanhaikwan Railway upon the following conditions:—The Chinese Government shall promise: First, to give no mortgage upon the roadbed of the line; second, never to alienate the railroad to any foreign Power; and, third, that Hu, the Director of Railways, shall receive the permanent appointment of Director-General.

In the Cape Town Legislative Assembly Sir James Sivewright, in laying on the table a return of the working of the Bechuana-land Railway, said that the line was worked at cost by the Cape Government; there was no profit in working, but the profit lay in the traffic brought to their lines. This amounted, in the six months ended April, to 312,000*l.*, and the traffic from Bechuana-land to 28,462*l.* The Cape share amounted to 151,357*l.* The Cape profit on this traffic amounted to 20,000*l.*

The aggregate receipts of the Leopoldina Railway Company for twenty-seven weeks one day, to July 9th, 1898, were Rs.9,621,000, showing an increase of Rs.771,000 over the corresponding period (twenty-seven weeks and two days) in 1897. Hereafter traffic returns will be published weekly. We are informed that the conversion of bonds for shares in the English company is proceeding satisfactorily, and that of the issues in London 80 per cent. and upward have been converted.

A meeting of the debenture-holders of the New Zealand Mid-land Railway Company, Limited, will be held on the 29th inst., for the purpose of hearing a statement by Mr. Alexander Young, the receiver and manager appointed by the court, as to the affairs of the company, and at such meeting the following resolution will be submitted for consideration, and, if considered advisable, passed:—"That this meeting having heard the statement as to the affairs of the company made by Mr. Alexander Young hereby approves of the course of action hitherto adopted by him and the continuation thereof in future."

The Swiss Federal Council has sanctioned the plans submitted by the Jura-Simplon Railway for the construction of the Simplon tunnel, and has also approved the estimate of cost. The Government has now definitely granted the guarantee of the confederation for the Simplon loan negotiated by the cantonal banks. It will communicate its decisions to the Italian Government in order that the latter, on its side, may also approve the financial statement furnished by the directors of the railway. When this has been done the ratifications of the Simplon treaty concluded between Italy and Switzerland will be exchanged, after which the contractors' concession will be granted.

**Great Central Railway.**—The Great Central Railway Company has decided to commence carrying coal to London (Maryle-

bone depot) on Monday next, and at the same time it will convey coal from the important coalfields touched by its railways to all places *en route* to the metropolis, the more important stations being Nottingham, Loughborough, Leicester, Rugby, Brackley, Aylesbury, Rickmansworth, Harrow, and Pinner. The line is in direct communication with collieries having an aggregate of 70,000,000 tons of coal per annum to dispose of, and sinkings are in progress at various positions on the railway in Lancashire, Yorkshire, Nottinghamshire, and Derbyshire, so that the total should shortly be enormously increased. The entrance to the new depot will be in Carlisle-street, near Edgware-road. The sidings already laid down will find accommodation for upwards of three hundred wagons in position, and there are extensive storage sidings adjoining the Marylebone depot and also at Neasden.

**ABRIDGED PROSPECTUS.**

This Company has been formed to take over as a going concern from April 1st, 1898, the property and assets of the Cork Pavement Company, Limited, which was registered on 24th November, 1893, as a pioneer Syndicate.

The premises, which are situated at Cruiksmouth, Barking, are freehold, and have a wharfage of 335ft. frontage, and contain plant and machinery, storage sheds, &amp;c. The present brickmaking plant is capable of turning out about 450 super. yards of pavement, or 14,400 bricks per week, but there is ample room for the erection of further plant and machinery, and storage accommodation, which it is intended to erect forthwith.

The chief constituents of the pavement bricks are bitumen and cork, which, with certain other materials, are so mixed and subjected to pressure that the blocks manufactured form a durable, practically noiseless, non-absorbent, and perfectly sanitary pavement. The material is of an elastic nature, and non-slippery, and gives a good and secure foothold for horses in all states of the weather, and, when generally adopted for street paving, will prevent the slipping up of the many thousands of horses which fall annually in the streets, and the injuries to others which are lamed from jar on hard pavements.

The jointing material used, being of the same nature as the bricks, makes the pavement homogeneous, yet it can be as readily lifted for gas, water, and sewer repairs as wood, asphalt, or ordinary road metalling.

This pavement requires no sprinkling with gravel (and in this important respect differs from other pavements at present in streets), thus saving considerable expense.

Besides street paving, the bricks are applicable for stables, stable-yards, and kennels, railway approaches and exits, cab-stands, platforms and footbridges, basements and passages, &amp;c., and can be laid by ordinary workmen.

Amongst some of the orders may be mentioned the following:—Chelsea Vestry,

St. Margaret and St. John's Vestry, Westminster, Paddington Vestry, Fulham Vestry, St. George Hanover-square Vestry, Borough of Bournemouth, Newmarket Urban District Council, London County Council, Great Eastern Railway Company, Great Northern Railway Company, London and South Western Railway Company, Caledonian Railway Company, &amp;c.

There are several important orders on hand, and owing to the success which has attended the pavement laid at Princes-street, Edinburgh, for the Caledonian Railway Company, in 1892, which is still in excellent condition (vide recent testimonial with prospectus), contracts are at present in hand for the North British Railway Company for over 3,000 super. yards for the cab-stand, exit, and foot bridge at the Waverley Station, Edinburgh. An order from the Great Eastern Railway (which is the third order from this Railway Company) for paving part of the West Suburban entrance, at Liverpool-street Station, has also recently been received, and in this case wood is being replaced by cork pavement.

Copies of a few of the Testimonials received accompany the Prospectus, and will show how much the pavement is appreciated by those who have adopted it.

Mr. Fletcher Moulton, Q.C., has reported as to the validity of the patents, and Sir Samuel Canning has reported as to the practical utility of the improvements, which reports can be inspected at the Offices of the Solicitors to the Company.

Out of the present issue 20,000 shares will be set aside for subscription as working capital, which in the opinion of the Directors will be sufficient for the present; but a further 20,000 shares has been reserved for future issue if and when necessary.

The certificate from Messrs. Francis and Sharpe, Chartered Accountants, shows that there has been a gross profit of 3s. 11d. per super. yard on an out-turn of 305 super. yards only per week.

It is intended to increase and improve the present plant, with the view of at least doubling the output, which will reduce the cost of production, and it is estimated that the Company will earn sufficient to pay at least 10 per cent on the capital during the first year.

The purchase price has been fixed by the Vendor at £60,000, payable as to £17,000 in shares, and £43,000 in cash, and the purchase includes the freehold land and buildings, machinery and plant, &amp;c., which have been valued by Messrs. Tinkley, Curry, and Beighton, 10, Southwark-street, S.E., at £9,550 12s. 6d.; also stock amounting to about £1,500, and the goodwill, inventions, &amp;c.

The Vendor pays all promotion expenses up to and including the first allotment of Shares, except stamp duty and transfer fees.

For contracts see full prospectus.

The reports, valuation, copies of the Memorandum and Articles of Association, and the Contract dated the 30th day of June, 1898, can be inspected at the offices of the Solicitors to the Company.

Applications for Shares should be made on the accompanying form, and sent with the deposit direct to the Company's Bankers.

Copies of the Prospectus and Forms of Application for Shares may be had from the Bankers, Brokers, and the Solicitors, and at the offices of the Company.

The half-yearly general meeting was held on Tuesday, at the Cannon-street Hotel, E.C.; Lord CLAUD J. HAMILTON presiding.

The SECRETARY (Mr. W. H. Peppercorne) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN—Ladies and gentlemen, I think we may take it that the report and accounts for the half-year which have been submitted to you are on the whole satisfactory. The traffics, however, do not quite come up to our expectation. That was not due to any fault of administration, but it was caused by the eccentricities of our climate. For the first portion of the half-year the weather was hot when it might have been expected that it would have been cold, and during the main portion of the latter half of the year it was cold when it ought to have been hot. Now, you know the result of the hot weather in the early part of the year materially affected the consumption of household coal which we should have carried, and we have therefore lost under that head. Besides there is no inducement for people to travel in the early part of the year, and therefore nothing is gained under the head of passenger traffic by warm weather in that portion of the half-year. In the second portion of the half-year, when people desire to travel and to visit their friends in various parts of the country, the weather was unduly cold, and therefore those who would have travelled stayed at home. Consequently we have not that increase we expected under the head of passenger traffic. With the exception of those two causes I think you may take it that the results of the half-year have been fairly satisfactory. Now, if you will be good enough to turn to account No. 9, page 13, I will refer to the various heads of revenue. Taking the passenger traffic, the first-class shows an increase of 1,986*l.*, the second-class a decrease of 694*l.*, and the third-class an increase of 23,216*l.* Taking the season-tickets, the first-class shows an increase of 1,317*l.*, the second-class an increase of 4,474*l.*, and the third-class an increase of 1,276*l.* Therefore, taking the ordinary passenger traffic and the season-ticket traffic, there is an increase under all heads, and you will observe that the increase under the head of second-class exceeds that under the head of first-class. The parcels show an increase of 2,238*l.* Therefore, the total increase of revenue due to passenger traffic and parcels amounts to 34,400*l.* Merchandise shows an increase of 20,922*l.* That, of course, is due to several causes, one, happily, being the larger amount of money which is in our district; also to the building operations going on in London and the suburbs, and to the large receipts due to the carrying of building materials, and to the result of the good harvest which we had last year. The harvest last year, though good as regards cereals, was not satisfactory as regards roots; and, as many of you are aware, there was a very serious falling off in the potato traffic. Under that head we are down 26,000 tons in home-grown 'potatoes; but, on the other hand, we show an increase of 14,000 tons, due to the carriage of Continental potatoes. The coal traffic shows an increase of 16,674*l.*, which is considered very satisfactory. The coal traffic is now steadily increasing on our system, and we see no reason why that increase should not continue. You will be glad to learn that as regards receipts we are now above the June half of 1892—that is the year preceding the great coal strike; but though our receipts are larger than they were in that half of 1892, we are still slightly under the tonnage weight. You will observe, and I think it is a very satisfactory feature in our receipts, that the increase in merchandise and coal traffic taken together exceeds the increase in the passenger traffic. Now we are supposed to be mainly a passenger line, and therefore it is a most agreeable feature in our receipts that in the first half of the year the united items of merchandise and coal increases should exceed those under the head of passenger traffic. I mentioned to you, I think, a year ago, that we agreed with the East London Railway Company, and some of the companies who are parties to the lease under which the East London Railway is worked, to build a hoist at Spitalfields, and that this would enable us to deal with a large amount of coal traffic in our district by means of the Thames Tunnel and the East London Railway, and so open out a traffic between the districts north and south of the Thames. There were some slight hitches between ourselves and the Brighton and the South Eastern companies with regard to this matter. Fortunately those hitches are now removed, and the order for the erection of the hoist has been given, and we hope that it will be constructed and completed and in working order by July 1st next year. It, of course, is impossible to predict what amount of traffic we shall carry by that route; but I am sure it is a step in the right direction, as I have no doubt as years go on a very considerable amount of goods traffic, and especially of coal traffic, will be carried by our line through that system to the districts south of the Thames. The cattle traffic shows an increase of 2,072*l.* We have more lean cattle coming into our district, and we may, I hope, expect a very large increase in the coming autumn, because, as you know, the amount of food there exceeds that which we have had for many years past. The only weak point about our cattle traffic is the continuance of swine fever in our district. Under the Orders in Council, so long as swine fever is prevalent, the carriage of pigs is prohibited, and we have lost in the last half, and for several half-years past, a considerable amount of traffic which we might have expected. The Continental traffic shows under the head of passengers an increase of 1,620*l.*, of which 1,372*l.* may be credited to the Hook of Holland route and 248*l.* to the Antwerp route. On the other hand, however, there is a falling off of 5,273*l.* in the goods traffic, making a net decrease of 3,653*l.* in our Continental receipts. As I mentioned before, this decrease in our goods receipts is due to the Ostend and Tilbury service, which has had the effect of largely reducing the rates for goods. I am afraid that competition is likely to continue for some time, but I think the outlook is more hopeful, and I trust that in the current half-year we may be able to show an increase in our goods, instead of a decrease. You will have observed in the report that allusion is made to the fact that her

Majesty's Government have at last recognised the justice of English mails sailing under the British flag—(applause)—and they have given us a portion of the mails to Holland—mainly those going to North Holland. I trust this is only an augury of a still further increase of the mail carriage as time goes on; but we have first naturally to prove to her Majesty's Government that we are able to carry the mails with equal facility, if not with greater, than the Zeeland Company, and deliver them at the various points of destination and in better time than when the service was managed by the Flushing route. I am sorry to say, alluding to the Continental traffic, that we have recently lost the services of our Continental manager, Mr. Gooday, who has received promotion—which, of course, we all rejoice at—by being appointed general manager of the London and Brighton Railway Company. He had been associated for many years past with our Continental traffic, and had managed it with very great ability. It was a difficult matter to fill up the post vacated by Mr. Gooday's retirement, but we were very anxious that whoever was appointed to that post should be an officer trained in the service of the Great Eastern Railway—("Hear, hear")—and not an outsider. We were fortunate enough to be able to find a gentleman in the person of Mr. Busk, who from his boyhood has been associated with the Continental department, and I have no doubt that he will prove a worthy successor to Mr. Gooday. The rent of arches, &c., shows a decrease of 3,735*l*. This decrease is not due to any falling off in our hotels or rents of buildings, but is merely due to fluctuations of one of the numerous items included under that head. The total increased receipts, therefore, are 66,737*l*., but as against that I am sorry to say the total increased expenses are 59,468*l*. Now, if you will look at the other side of the sheet, I will deal with the increased expenses. The maintenance of the way and works shows an increase of 1,319*l*., and the locomotive power shows an increase of 15,286*l*. I am glad to be able to state, as I was at the commencement of the year, that our locomotive stock is in most excellent working order, but at the same time the great demands upon it are almost more than it can bear owing to the increase in our traffic and in our train mileage; and though we have not added to our stock for the last year and a half I think it will be necessary for us in the course of the next two years to add something like fifty new locomotives to our existing stock. The carriage and wagon repairs show an increase of 10,756*l*. I told you a year ago that we were erecting new carriage and wagon repairing shops at Temple Mills, and I assure you it was not before they were wanted. Those sheds are completed and in full working order, and we are therefore able to deal with our repairs much more efficiently and quickly than has been the case in the past. Many of us who travel on the Great Eastern Railway know that in outward appearance in many respects our rolling stock is not what could be wished. I hope now that we shall be able to effect repairs in the shape of ornamentation, which catches the public eye, so that in a few years' time the appearance of our stock will be equal to that of any other great railway company in the kingdom. We are turning out now wagons at the rate of 1,400 per annum. If we could afford it we could turn out a great deal more, but this company has not yet arrived at a financial position in which it can afford to have its wagons lying idle at any portion of the year. There is no doubt that our wagon stock is not quite equal to the very heavy demands made upon it during two or perhaps three months of the year, but it is sufficient for our normal requirements. Therefore we do not feel justified in increasing the 1,400 new wagons at the present time. The traffic expenses show an increase of 25,867*l*. That is due chiefly to increased wages, shorter hours of labour, and a larger staff due to increased traffic. The general charges show a decrease of 912*l*. The law charges show an increase of 1,507*l*. The personal injuries show an increase of 3,149*l*. That is due partly to finishing up the settlement of cases arising out of the accidents at March and Globe-road, which took place last year or the year previously. I am glad to say that there are now no longer any important cases outstanding. Damage to goods, &c., shows an increase of 1,663*l*. The rates and taxes show a decrease of 6,137*l*. (Applause.) Now, both I and other railway chairmen have had to complain for many years past of the continual increases under this head. I am afraid you must not expect a continuance of the decreases, which have happily occurred both now and in the half-year previously. They are due to several causes, and to a great extent to the equalisation of rates. Of course matters will soon settle down, and I think that after a time we shall have again to expect a gradual yearly increase in our charges under the heads of rates and taxes. The carriage and wagon hire shows an increase of 2,644*l*., the steamboats show an increase of 2,719*l*., Harwich Harbour shows an increase of 1,777*l*. Now, Harwich Harbour is a very important place not only to the Great Eastern Railway Company, and to traders generally, but also to her Majesty's Government, and we really think that her Majesty's Government are not doing their duty by Harwich Harbour. A great many years ago her Majesty's Government authorised a very large expenditure on the harbour and its defences, and to justify that increase it was settled by Parliament that the Conservancy Board should have represented upon it several Government officials; in fact, they form a majority of the whole Conservancy Board. That was very right and proper so long as her Majesty's Government contributed their share of the expenses of dredging Harwich Harbour; but they have ceased giving any money to that, and yet they still keep their members on the Board. I do not think that is a right principle. Taxation and representation should go together, and members of Parliament and other persons connected with the district are now taking the matter up, and are about to approach the Board of Trade and the Treasury to see whether they cannot once more get her Majesty's Government to pay their fair share to keep Harwich Harbour in proper condition, fit for all emergencies, because in case of war that harbour will be a most important station for ships of her Majesty's Government. I hope that next year I shall be able to report that her Majesty's Government have at last awakened to the sense of their responsibilities. The joint railways in Norfolk and Suffolk for which we shall find half the capital, are those which we came to terms about last year, and in regard to which Bills have passed through Parliament in the present session. Looking back now on the decision we came to last year, we feel more than confident that that decision

was justified—namely, to come to terms with the Midland and Great Northern companies. We have little doubt that we shall work together in a most amicable spirit, with a full desire to develop the district, and that those lines will be of pecuniary value both to this company and to the other two companies. The Benwick line,  $4\frac{1}{2}$  miles in length, in the Fen district, is nearly completed, and we feel certain that that line will be profitable, because it carries no passengers, and, therefore, will be unattended by many expenses connected with the carriage of passengers. It is practically a long goods siding, serving the whole of the farms through which it passes, and we feel so confident about the results that we propose making another railway of a similar kind in an adjoining district. The Fen district is so rich in soil that it is capable of growing almost anything, but what we require for those railways is the growth of the roots. Without railways the farmers could not grow roots on account of the great cost of carriage. We are very glad that the experiment has proved successful, and I feel sure that the line we propose to make in an adjoining district will be equally profitable. The air is very full of light railways. That is a question which must be approached with great care, because there may be light railways which are profitable to those who make them, and there may be others that are the reverse. We have gone on what I think you will admit is a sound principle. We always desire, as you know, to encourage the agriculture of our district, and we have said, "We will encourage light railways, and we will be prepared to assist you in constructing them on certain principles." And the principles are these, that if half the money from any light railway that is projected in our district is handed to us as a free gift we will find the other half of the capital to construct the line, and work it in perpetuity. On those terms, we think that a line, whilst very profitable to those it serves, will be fairly profitable to this company; but we are not prepared to embark on speculative light railways, where we have to find more than half the capital, and the remainder is not given as a free gift. On these terms we have been able to come to an agreement with the promoters of the Kelvedon and Tollesbury line, and with the promoters of the Elsenham and Bardfield Railway. I hope no hitch will occur in coming to a final agreement with those parties, and that being so we shall then be prepared to construct those railways and work them in perpetuity.

MR. NEWBY—What amount?

THE CHAIRMAN—Between 35,000*l*. and 40,000*l*. in each case. Though the Kelvedon and Tollesbury line goes through a sparsely populated country, it is a rich country, and has the advantage of having a terminus at Tollesbury, situated on an estuary of the sea, and there is no doubt that a considerable traffic in mussels and other things can be encouraged by the facilities offered by this railway. I now come to two other important matters—namely, the Accident Fund, and the new Pension Fund. One of the brightest features in the administration of the Great Eastern during the past twenty years has been the Accident Fund, which has done so much to produce such a good feeling between the servants and the directors. We were very sorry when the Compensation Act was passed, and it became necessary for the old accident fund to be abolished; but we felt so clear as to the benefits to yourselves and the servants of the formation of a new fund on the lines of the former one, that we set to work to see what could be done. The men themselves were most anxious, and, in fact, they first approached us for such fund to be re-established, and I am glad to say that after a certain amount of negotiation we were able to come to an agreement with our men and formulate a scheme for the Registrar of Friendly Societies and obtain his assent to it. That has now been sealed with the seal of the company. We felt that in the administration of that fund, having full confidence in the good feeling and the fairness of our men, it would be a wise thing to associate a certain number of the men, members of the fund, with ourselves in the administration of the fund, and we have, therefore, agreed that four elected members belonging to the company's servants should sit with us on terms of equality in the administration of the fund, and that has given very great satisfaction to the staff generally. Of course in the calculations which we have made they have been to a certain extent estimates, but they have been based upon the experience of the last twenty years, and we believe that this fund, which, if all our men join it, and I am sure the great majority will, will put an end to all litigation, and all expenses attending upon litigation, will simply cost you 2,500*l*. a year above what you would have to pay under the provisions of the Compensation Act, supposing there was no fund at all. I feel sure that not any of you will grudge that 2,500*l*. per annum if it will tend to continue the good feeling between the directors and staff and add so largely to the comfort of the staff themselves who may be unfortunate enough to meet with accidents. You will recollect that you sanctioned the superannuation fund being put upon the guarantee of the company, instead of on an actuarial basis, and you also sanctioned the two pension funds, that is to say, the pension fund and the supplemental pension funds, being put upon the same basis. The Bill dealing with those two funds has received the sanction of Parliament, and they will come into operation on January 1st next. By placing these funds upon a different basis we were enabled to effect considerable economies, so much so that as a part of the bargain with the members of the existing fund, we agreed, should the sanction of Parliament be received to those two measures, that we would reopen those two funds to the whole of our staff, so as to enable every servant of the company, should he desire it, to contribute to the funds, and thus obtain a pension in his old age. That we should have been unable to do if the fund had continued on an actuarial basis. I have got out a careful estimate, based on our experience of what these funds would have cost us had they remained on an actuarial basis, with the same number of members who form the membership as at present, during the next five years; and the estimate is that the total cost to the company of these funds on the old basis, extending over a period of five years, would have been 191,000*l*., or 38,224*l*. per annum. Under the new basis we estimate that taking the same number of members as at present—but of course we cannot tell how many additional members will come in—we estimate that the cost to the company during the next five years will be 73,160*l*., or 14,632*l*. per annum. Now I need hardly say that although these funds by being placed on a different basis will tend to large economies being made at present, a period will

come, perhaps some fifteen up to thirty-five years hence, when the demands upon revenue in connection with these funds will be heavy, and it would be manifestly improper and unwise for us to saddle our successors with all the heavy charges which will come upon revenue. ("Hear, hear.") What the directors propose to do is, when they can ascertain the number of members who will come in, to put by a reserve fund of a substantial sum each year, so that it may be properly chargeable to the last half of the year and not burden the first half. By those means we shall be able gradually to build up a fund which can be drawn upon for the assistance of revenue; but in spite of doing that you will still save some 10,000*l.* of revenue charges from January 1st. Therefore, what we have done, I think, will be effected with no danger in the future, and, at the same time, it will save revenue about 10,000*l.* a year. (Applause.) Of course, it is a very involved matter, and I will not go into it further; but we have been so careful that I believe we are on safe lines, and I need hardly say what a vast advantage it will be to servants like those of a great railway company to have the opportunity when they retire of being certain to receive a pension. ("Hear, hear.") Now, having spoken of the past, let me say a word or two about the future. Our prospects for the current half-year, as far as it has gone, are exceedingly good. People have moved rather later than usual, but that was owing to the cold weather which prevailed up to July; but at present our traffics are exceedingly heavy to the sea-side. Places are filling up, and we anticipate large receipts from the holiday traffic. The harvest has been the finest within the memory of man for many years. The hay crop is fortunately all saved. I have been through the eastern portion of our district lately, and I found that the wheat and the barley crops are in excellent condition. Unfortunately, the straw is so long that if we had storms or gales of wind the crops might be laid, owing to the weakness of the straw, but given fine weather I think they will be able to gather in the harvest, which has not been equalled for many years past. At this period of the year we usually take the practical course of obtaining a report from the stationmasters in our district as to the condition of the crops in their respective neighbourhoods, and it will, perhaps, interest you to hear what our stationmasters say. The statement I have here does not give the actual number, but it includes reports from between 200 and 300 stations. As regards the hay, the report is "very good" from 313 stations, as against 269 last year. As regards wheat, the report is "very good" from 209 stations, as against 124 last year. As regards barley, the report is "very good" from 144 stations, as against 135 last year. As regards root crops, the report is "very good" from 172 stations, as against 104 last year. As regards potatoes, the report is "very good" from 170 stations, as against 80 last year; and taking other vegetables, the report is "very good" from 105 stations, as against 54 last year. (Applause.) Therefore we may assume that given fine weather we have nothing to fear as regards this year's harvest. Now, the building in our district is going on very briskly, not only in the suburbs, but also at the chief seaside places, and I am glad to say we have new hotels of an important character springing up at many of these places. Within the last few weeks a new hotel has been opened at Felixstowe, another at Sherringham, and another at Gorleston; and a new hotel is in course of projection at Lowestoft, which, when completed, will be by far the finest hotel in the eastern counties. This all points to the fact that the eastern counties are becoming more popular every year, not only with the general public, but with the medical profession, who can be of great assistance in recommending certain districts. But all this increasing development will mean a slightly increased expenditure if we are to keep pace with the demands made upon us by the public, and we may have to spend more in the next few years than we have in the past. But I think you are sufficiently well acquainted with your board of directors to know that we shall spend no money that is not really necessary, and that whatever money is sanctioned will be spent with the greatest care. ("Hear, hear.") One of the great difficulties we find is the want of accommodation at some of our stations at the sea-side. We have recently built a fine new station at Felixstowe, which is now open. We are building a new station at Newmarket, which has been wanted for years, to deal not only with the local traffic, but with the race traffic. That is very important, because for thirty-four days in the year enormous crowds come to and leave Newmarket during the day. We have also to build a new station at Clacton-on-Sea, one of our most thriving watering-places, and also at Great Yarmouth. You will know the station, South Town, is totally inadequate to meet the demands made upon it by the travelling public; and we have entered into arrangements with the corporation that if we build this new station they will widen the approaches to it, and also widen the bridge over the river Yare. At Manningtree, an important junction, we have also to build a new station. When the new joint line from Yarmouth to Lowestoft is completed, I have no doubt we shall have to build a new station at Lowestoft to accommodate the increased traffic. All these things mean money, but they bring about almost an immediate return, for the traffic is already there. Then we have to widen certain lines. We have to double the line between Lowestoft and Beccles, double the line between Lowestoft and Reedham, and to continue doubling by degrees the line between London and Cromer. It is already doubled up to Wroxham, and there are only about 10 miles to double to Cromer. That traffic is almost the most satisfactory one on our system. It is increasing by leaps and bounds; in fact, I am told that at the present time it is impossible to find adequate lodging accommodation in the town. Then we have to widen a piece of the Southend line. We have just finished the widening of the Tendring Hundred line to accommodate the Clacton traffic. We have a new line sanctioned by Parliament from Ilford to Woodford, and we think that when that is completed it will be one of the most profitable on our system. It will be a great source of convenience to us in the handling of our coal traffic. All the coal traffic from the Cambridge line has to come to the Colchester branch through Stratford, which has become greatly congested. By making a loop line by means of this Ilford and Woodford line we shall be able to take the coal traffic by that route and thus lessen the pressure on the Stratford Junction. Those are the main

points as regards the future, and any money which we spend will, as I have just said, bring you in almost immediately a return. Therefore, you need not have any fear that we shall spend recklessly, or embark on speculative lines where we have to wait before we receive any considerable traffic. I think I have now dealt with all the matters of importance. I think we may look with a feeling of satisfaction towards the condition of the company at the present time, and I trust that when I have the pleasure of meeting you again in January next I may have a good tale to tell you of the results of the current half-year. (Applause.) I beg to move:—"That the directors' report, together with the statement of accounts now submitted, be received and adopted."

Colonel W. T. MAKINS seconded the resolution.

Mr. BEAVIS thought the report was eminently satisfactory, but said it contained one feature which was disappointing, and to which he had frequently drawn attention—namely, the decrease in second-class traffic. That was very significant when it was considered that regardless of season-tickets the company had carried over 600,000 additional passengers. The chairman had said that the second-class, including the season-tickets, showed an increase. This was perfectly true, but it was hardly fair to reckon the season-tickets, because practically the Great Eastern Company refused to grant season-tickets to the third class, and perforce those who were not able to travel first class had to take second-class season-tickets. He therefore contended that the number of second-class travellers was decreasing, and that it entailed a loss to the company to continue the second-class passenger traffic.

Mr. NEWBY deprecated the continuance of the Continental steamboat traffic, which was worked at a loss to the company, and said that another "white elephant" was the Lowestoft harbour. It entailed an enormous expense for dredging when easterly gales set in, and he could not understand why the Midland and Great Northern companies should benefit by the Lowestoft traffic and not contribute towards the expense of dredging the harbour. He considered that the funds of the different benevolent institutions should be invested in securities not associated with the Great Eastern, and in accents which betokened mystery he intimated that he had something to say concerning a matter which was of importance to ladies. Amid cries of "Whisper it to them," "Sit down," "Time," and "Shut up" he then, after much circumlocution advocated improved means of communication between passengers and guards or engine-drivers. He was about to enlarge upon the subject of "suicides and self-murders"—(laughter)—in railway carriages, when

A SHAREHOLDER intervened, and moved that Mr. Newby be no longer heard.

The CHAIRMAN appealed to Mr. Newby to resume his seat, as the subjects he was discussing were not relevant to the motion before the meeting, but it was not until the stamping of feet and other evidences of disapproval became of a very decided character that Mr. Newby subsided.

The CHAIRMAN, in reply, said he thought every reasonable shareholder would agree with him that if the second-class passenger traffic showed an increase of 3,781*l.* in the half-year, it was not a bad result. ("Hear, hear.") The board did not encourage the issue of third-class season-tickets in their suburban districts, but if anybody wished to travel at a reduced fare he could do so by taking a half-fare ticket before eight o'clock in the morning. With regard to the steamboats, they acted as feeders to the railway, and although they sold for very little when they became antiquated, yet the company put aside ample funds for depreciation, and for insurance. Lowestoft Harbour brought to the company's coffers upwards of 30,000*l.* a year, therefore it was necessary to keep it properly dredged, especially as the traffic was increasing every year. The Midland and the Great Northern companies had desired to have access to the Lowestoft harbour, but they were only given access to the passenger station. It would therefore be unjust to ask them to contribute to the dredging of the harbour. ("Hear, hear.") With regard to the means of communication between passengers and engine-drivers, recent experiments had taken place, and the invention which had received the most support was one due to the electrical superintendent of the Great Eastern, Mr. Hollins. It was now being fitted to 100 carriages, and if it proved successful it would probably be adopted over the whole of the company's system. The Board of Trade would not interfere with the railway companies so long as they endeavoured to find out before incurring large expense what was the best means of communication between passengers and engine-drivers. ("Hear, hear.")

The resolution was then put and carried unanimously.

On the motion of the CHAIRMAN, seconded by Colonel MAKINS, the retiring director, Mr. John Foster, was unanimously re-elected; and on the proposition of the CHAIRMAN, seconded by Mr. BAILEY, M.P., the retiring auditor, Mr. J. G. Fowler, was also reappointed.

The CHAIRMAN next moved:—

"That in pursuance of the provisions contained in the Great Eastern Railway (General Powers) Act, 1898, and for the purposes of the sale and transfer to the company of the respective undertakings of the Ely and St. Ives Railway Company, the Ely and Newmarket Railway Company, and the Colchester Stour Valley Sudbury and Halstead Railway Company, there be created new 4 per centum debenture stock of the company of the nominal amount of 517,844*l.*, and that for the purposes of the sale and transfer to the company of the undertaking of the Melis and Eye Railway Company, there be created ordinary stock of the company of the nominal amount of 15,000*l.*, and that the directors of the company be and they are hereby authorised to issue the said debenture and ordinary stocks in the manner and in accordance with the terms and conditions contained in and provided by the said Act."

Colonel MAKINS seconded the resolution, and it was agreed to *nem. con.*

A hearty vote of thanks to the chairman and directors for their past services terminated the proceedings.

#### LONDON TILBURY AND SOUTHEAST RAILWAY.

The eighty-fourth half-yearly general meeting was held yesterday at the Cannon-street Hotel, E.C.; Mr. HENRY DOUGHTY BROWNE presiding.

The SECRETARY (Mr. H. Cecil Newton) read the notice convening the meeting.

The CHAIRMAN then said—Gentlemen, in rising to move the adoption of the report (an analysis of which has already appeared in *THE RAILWAY TIMES*), I think we may fairly congratulate ourselves on the increase in the traffic, which amounts in the half-year to 6,100l. It is not quite so good as we had hoped at one period of the half-year, because the inclement weather during June interfered with the early pleasure traffic on which now we, to a certain extent, depend, and the consequence is that the traffic is, I should say, perhaps, 1,000l. less than we might have received had conditions been more favourable. The expenses show an increase of 7,300l. This shows a small loss on the working of the half-year. The expenses, to a certain extent, have been exceptional during the first six weeks of the half-year. Owing to the phenomenal high tide that occurred we had the line between Grays and Purfleet under water for the first six weeks of the half-year, which not only necessitated a considerable increase in train mileage, because of the traffic to Gravesend and the docks having to be sent round by Upminster and Grays, but at the same time also the traffic to a certain extent was interfered with because people could not go direct to their destination. We have also been somewhat unfortunate in the consumption of coal. A year ago we thought that we could make some reduction by altering the class of coal we used for locomotive purposes, but, unfortunately, that has not been the case. The coal bill has been somewhat more than the increased mileage justifies. We further have been rather hit by the increased expenditure on the repair and renewal of engines and rolling stock. This is not really an additional expenditure so much as it is the result of our having anticipated repairs with regard to the engines and rolling stock, so that all our engines and stock may be available for the pleasure traffic. We, consequently, have anticipated the outlay on those two items, which involves an increased expenditure on the half-year of something like 2,000l. The increase in traffic, as the shareholders will see if they read the report, is derived from practically all items, and we are again able to chronicle—which is always considered a favourable point in railway accounts—a considerable increase in the amount we have received for season-tickets. ("Hear, hear.") The Bill promoted by the company in Parliament, I am glad to inform you, has passed both Houses, and now only awaits the Royal Assent. It gives us powers to increase our capital, so that we shall be able to provide our subscription to the Whitechapel and Bow Railway, and it also has passed a clause which will enable us to deal on equitable terms for the user of the London and Blackwall Railway. It is because this Bill has passed in this form that we feel confident that the amount we shall have to pay to the Great Eastern for the widening of the Blackwall Railway will not be so onerous as we anticipated when the first judgment of the Railway Commissioners was given. In the first instance we were able by a reference to Sir Benjamin Baker to get the cost of that widening materially reduced, but by the passing of this clause the Railway Commissioners, when it goes back to them to be further considered, will be able to deal with all the circumstances of the case, which was not so when the previous application was made. With regard to the Whitechapel and Bow Railway, of which we propose to become half proprietors with the Metropolitan District, I have both at the previous half-yearly meeting and also at the Wharnclyffe meeting, recently held, explained to the shareholders the reasons why we have adopted that course. There is no doubt whatever that our traffic suffers from the fact that we have not a physical communication with the Metropolitan railway system. We anticipate the best results from doing so. It will do much to relieve Fenchurch-street station from the pressure of traffic, and at the same time it will give us a very large collecting ground for the pleasure traffic during the summer months, on which the prosperity of our railway so much depends. I have before stated, and I repeat it on this occasion, that though for a time no doubt the outlay on this undertaking will be to a certain extent a burden on the proprietors, still, on the other hand, such great advantage will eventually accrue to the railway that we have the utmost confidence in pursuing this course; and I may also add, that in practically a similar case, where, perhaps, the reasons were not quite so strong as they are in this—namely, the Tottenham and Forest-gate Railway, where a similar burden was imposed upon the proprietors, the results have been most satisfactory to us, and placed us in a position which we never could have hoped to occupy unless we had undertaken the making of that line. ("Hear, hear.") Gentlemen, I do not know that I have anything particularly to add. We are doing our best to develop the traffic of our district. We are running a considerable additional train mileage, so that our constituents, especially at Southend, shall have no reason to complain. I think our permanent way and stations, rolling stock and engines are all being thoroughly well kept up, and it seems to me that if the development of Southend goes on in the future as it has done in the past, there is no reason for any proprietor to be uneasy about the future of the railway. With these remarks, gentlemen, I will move the first resolution:—

"That the report of the directors and statement of accounts for the half-year ending June 30th, 1898, which have been circulated amongst the proprietors, and are now presented, be received and adopted."

Mr. JOHN WARREN (deputy-chairman) seconded the resolution.

Mr. J. J. GOSSET said that after the full statement made by the chairman there was very little room for any independent shareholder to make remarks on the report; but there were one or two matters on which they were fairly entitled to congratulate the directors. One was the successful manner in which they had carried the independent Bill for the settlement of differences and for the increase of their capital. The Act, he hoped, would be conducive to the future prosperity of their line. He further hoped he was not too sanguine in supposing that the very ample provisions made for any possible contingencies might possibly add to their dividend in the next half-year. There was also the other matter with respect to the junction with the Bow and Whitechapel line. If this only added to their traffic in the same proportion as in the case of the Forest-gate and Tottenham line there was little doubt that it would tend greatly to their future prosperity and to increase their dividend.

The resolution was then put to the meeting, and carried unanimously.

The CHAIRMAN further moved—

"That the following dividends (less income-tax) for the half-year ending June 30th, 1898, be declared—namely, upon 400,000l. preference stock at the rate of 4l. per cent. per annum; upon 304,100l. consolidated preference stock, 1887, at the rate of 4l. per cent. per annum; upon 268,750l. preference stock, 1891, at the rate of 4l. per cent. per annum; upon 1,338,350l. consolidated ordinary stock, at the rate of 3l. per cent. per annum, and made payable on and after July 30th, 1898."

Proceeding, the Chairman said—I did not, as I ought to have done in my preliminary remarks, refer to the fact which, perhaps, was the most important fact in the view of the shareholders, that the dividend is  $\frac{1}{4}$  per cent. higher on the ordinary stock than in the corresponding period, because we have no longer to make such large provision for any claims the Great Eastern may make upon us; and at the same time I may answer the remark Mr. Gosset made, that we have the utmost confidence that the sum we have reserved, which now stands at 15,000l., is under any conditions sufficient to meet any claim that may be made upon us, and may not improbably be considerably more than the Great Eastern may be able to establish.

Mr. WARREN seconded the motion, which was agreed to.

Mr. GOSSET moved a vote of thanks to the directors for their past services and to the staff for the admirable manner in which they discharged their respective duties.

Mr. THOMAS CARTLAND, in seconding the motion, said that speaking not only a shareholder, but as an independent traveller on the line, he might say he had always received the greatest courtesy from every member of the staff, and he thought this was endorsed by the general travelling public. ("Hear, hear.")

The resolution was put and carried unanimously.

The CHAIRMAN—On behalf of my colleagues, myself, and the staff, I beg to return you my best thanks for the vote of confidence you have passed to us. I can only say that having now been connected with this railway for twenty-four years, I naturally take a very great interest in it, and I am glad to be able to say that our prospects at the present time are good. With regard to the staff, I am very glad that Mr. Gosset has also connected them with this vote, for I beg to assure the proprietors that they are deserving of their best thanks for the devotion and earnestness which they give to the performance of their duties. I would specially mention that during the very anxious and arduous time when the line was under water for nearly three months, the traffic was worked under great disadvantage without hitch and without the smallest amount of inconvenience to our customers. ("Hear, hear.")

The proceedings then terminated.

## LONDON BRIGHTON AND SOUTH COAST RAILWAY

The half-yearly general meeting was held on Wednesday, at the offices, London-bridge Terminus; the Right Hon. Lord COTESLOE presiding.

The SECRETARY (Mr. J. J. Brewer) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*) were taken as read.

The CHAIRMAN said—Gentlemen, although we meet you with a dividend for the half-year of 2l. 5s., a decrease of 2s. 6d. upon the two last corresponding half-years, I find upon the average of the last ten years we have only had a dividend of 2l. 0s. 3d. From this point of view, therefore, the result is not unsatisfactory. The accounts show an increase of gross revenue of 30,737l. over the corresponding half of last year, and 59,255l. as compared with the first half of 1896. We made about the same progress in each year. Well, then, the train miles run have been 140,736 more than last year, and 223,781 in excess of those run in 1896. The June half-year of 1897 showed an increase of 23,518l. in gross revenue, and of 88,045 additional train miles over the same half-year of 1896. The revenue increase this half-year is slightly better than in the corresponding half-year, and, on the other hand, the train mileage is very much larger, because of our doing more work. It is over 52,000 more train miles, as compared with the corresponding half-year. Those figures, at any rate, show a steady progress of business. It is not attributable to any exceptional circumstances such as were experienced last year. In the corresponding half of last year we had the Jubilee celebration. On the other hand, we should remember, of course, that we have had exceptionally favourable weather for traffic during the early part of this year, in fact there has been no part of it which I think has not been thoroughly favourable for traffic. The early part was exceptionally mild and good for travelling as compared with the year proceeding, and, indeed, with the average of years. But, our increase of 30,000l. odd in revenue has only been obtained by an additional expenditure of 49,120l. in the cost of working as compared with 1897, and 82,000l. as compared with 1896. That shows how our working expenses have gone up. In each case it was due to important additions to our train service, to additional accommodation and staff to meet the public demands made upon us, partly by the Board of Trade, and partly in the interests of our own servants, and in the increased cost of labour and materials. Out of the 49,120l., about 18,400l. represents increase in wages, about 7,700l. increase in materials, about 2,000l. increase in the cost of repairs of stations, and about 12,000l. is due to increased running expenses. Those four items alone represent over 40,000l. out of the 49,000l. increase. The chief items of the remaining 9,000l. are, taken in round figures, 2,800l. increased loss on the working of the steamboats, 1,200l. additional cost in working at Newhaven Harbour, and 4,200l. in general and law charges and compensation. The exceptional cause of loss this half-year has been the strike among the South Wales miners. Of the 12,000l. increase in running expenses, 5,000l. may be set down to that, as we have had to purchase at a higher price coal less suitable for locomotive work, and the consumption of which is greater than in the case of Welsh coal. We have had to buy more coal, and it has not gone so far in the working, and it has cost us dearer. The working expenses of the half-year are 57.33 per cent. of the gross revenue, as against 54.94 per cent., or an increase of 2.39 per cent. on the half-year of 1897, and as against 53.60 per cent., or an increase of 3.73 per cent., respectively in the corresponding half-years of 1897 and 1896. That shows you how steadily the working expenses are mounting up, and how steadily the proportion of profit which you get out of your gross revenue diminishes. The train

mileage this half-year has cost us 3s. 99d.—you may say 3s. 1d. per mile, as against 2s. 11'63d. per mile in 1897, and 2s. 10'64d. in 1896. That shows an increase of 1'36d., getting on for 1d., and 2'35d., getting on for 2d., in the two years. That shows your working expenses are growing. Well, the general result is that adding 26,243l. brought in from last half-year to the 573,320l., the balance of revenue over expenditure, and deducting interest on debenture and preference stocks there remains a sum of 205,645l., which it is proposed to distribute, 154,110l. in dividends on the undivided and preferred ordinary stocks, and to hold 39,612l. towards the year's dividend on deferred stock, and to carry forward 11,923l. to the current half-year. It would have been possible to have paid the same dividend as last year, 2l. 7s. 6d. on the ordinary stock, but if this had been done, and a proportionate addition had been made to the sum we have in reserve for deferred dividends, only 1,200l. would have been left to carry forward, a manifestly inadequate balance. I return to the details of the capital and revenue receipts and expenditure. First of all as to capital. The balance to the debit of that account you will see by the accounts is 579,778l. That shows a reduction since January last of 15,454l., being the difference between the amount received, which was 193,202l. on capital account, and the amount of expenditure, which was 177,748l. This amount of 177,748l. is the capital expenditure for the half-year, and that, as usually happens, was less than was estimated. I think we estimated for a very considerable sum, some 240,000l., but these things fluctuate, and it is the general experience that your works do not go on as fast as you expect, and, therefore, you have not to put out your money so quickly. Less progress has been made on the Earlswood and Croydon and suburban widenings, but those works are going on satisfactorily, and we will urge our contractors to push them on as fast as they can. The chief items in this capital expenditure are the Croydon and Earlswood and other widenings; they figure out at 55,000l. and something, but I have added that to the other widenings, and the total sum comes to 61,333l. Then at Willow-walk there is an item of 21,173l. Then, added to the expenditure on new engines and rolling stock we have a sum of 59,350l. The greater part of that is rolling stock, no less than 53,000l. of it. Well, these three items together account for nearly 142,000l. of capital expenditure, and the remaining 35,000l. include such items as new carriage shed at Brighton—which is very much wanted—Brighton goods yard improvements—which are progressing, and which will be a considerable source of expenditure to us for some years to come—additional lines: these three account for about 15,000l. more. Then there are three other items which I have picked out: Portsmouth Station enlargement, that is the great work which is going on at the Town Station at Portsmouth, and additional hydraulic machinery for goods, and the expenses of our Bill in Parliament (which has cost us some 2,000l. or 3,000l.). These last items account for 7,000l. Of the 35,000l. there is left remaining about 13,000l., or for minor matters, all of which are set out in the accounts. And to meet this debit balance that there is against capital 579,000l. odd of the estimated future expenditure—which we put at a little over 600,000l.—we have a loan and other capital powers available at any moment to produce 536,000l. at least, and we have unexhausted powers beyond to produce over a million, so that our capital account stands in a good position. Taking the revenue account as to receipts, we have carried 10,977 more first-class passengers than in 1897, and we have received 562l. more for them. That is not a very great difference. Last year we had an increase both in money and in numbers, but, as I have stated, exceptional circumstances existed in that half-year. That is not a large item—560l. and 11,000 passengers; but in the second-class, on the other hand, we have carried 125,657 more passengers, and we have received 13,364l. more money. That is most satisfactory, and that, I think, shows the policy adopted of putting down the second-class fares to something like 1d. per mile has been thoroughly satisfactory. But what is unsatisfactory, and almost unknown in our experience of late, is the decrease in the third-class receipts. In the third-class we have actually carried 338,600 more passengers and received 5,724l. less for doing so. How is that to be accounted for? It means, in the first instance, that a good percentage of our long-distance third-class passengers now travel second-class. Putting that aside, it means also that of our increasing millions of third-class passengers a very large proportion of them travel by workmen's trains which carry them at scarcely remunerative rates. Let me give you a few instances of what we are doing. From South Croydon the return to London is 5d. for 22 miles; that is less than 1d. a mile. From Sutton the return fare is 6d.; for 27 miles that is less than 1d. a mile. We are pretty well filled up already with these trains, and yet we are being urged and invited very strongly to put on more. We are asked to put on thirty-six more of those workmen's trains, but I think we must really hold our hand. As we are pretty full up with them we must decline to run these very cheap trains any further. It is not only the *bond fide* working man that travels by these trains; anybody can travel who chooses. Clerks travel by them, women travel by them, and all sorts of people, and if things were extended very much further they would certainly begin to affect our season-ticket traffic. I am told so by our manager. I think we must, therefore, put our foot down very strongly and resist any increase in the number of workmen's trains. (Applause.) Our earning per passenger seems to go pretty steadily down, although it was up a little last half-year. In June, 1897, the corresponding half-year, it was an average of 7'2d. per passenger carried—2s. 4'8d. first-class, 1s. 1'3d. second, and 5'8d. third-class. In this half-year it is lower. Against 7'2d. we only get 6'9d. per average mileage. The second-class, of which we have carried so many more passengers and got more money, does show an increase, but the first does not, nor the third. The average is only 6'9d., against 7'2d. That is a very considerable decrease. The general result of the passenger traffic is 475,332 more passengers carried, at an increase of 7,108l. in receipts. That is not a large increase in receipts for that enormous number of millions. Season-tickets are 8,963l. better; it nearly balances the apparent loss of last year. Parcels and mails are 8,160l. better; and these three items—passengers, season-tickets, parcels and mails—make up the passenger traffic increase of 19,240l. In the goods the increase is 11,470l., a satisfactory figure in view of the increase in the corresponding half of last year of 18,000l., and in the

December half of last year of 28,000l. That is steady progress, I think, and it shows that the necessity for additional rolling stock and the enlargement of the principal goods stations has been very fully proved. Of the new stock a good deal is delivered, and we shall soon get it all, and other works and improvements are going on. For lasting very much longer they take a longer time to be finished, but still they are proceeding rapidly, and our capital expenditure for the half-year includes sums amounting to 66,400l. spent on these improvements. Rents are increased by 2,740l., and there are other trifling increases bringing the total to 33,475l., from which we have to deduct 2,738l. lost on the boats, leaving the actual gross increase on revenue at 30,737l. Now take the revenue expenditure. I take the departments a little more in detail. Maintenance of way shows an increased expenditure of 14,096l., of which wages are responsible for 4,329l. 6,786l. represents additional cost of materials due to heavier rails and enhanced prices. 23 miles have been completely relaid in the course of this half-year, as against 27 in the corresponding period; but then these 23 miles have been laid completely with everything new—sleepers new, chairs new, everything new. If that is carried on for a certain number of years we shall have our line in very first-class order. Repairs and renewals of engines, carriages, and wagons show an increase of 3,530l., due to wages and cost of material and locomotives. Running expenses have risen by 15,000l., of which 3,018l. is for wages, and 12,045l. for increased cost of coal and coke. The coal strike, as I said before, caused 5,000l. of this rise, and the remaining 7,000l. is due partly to higher prices, the rise being about 8d. per ton, and partly to the additional mileage. Traffic charges show an increase of 10,940l., almost entirely due to wages, and about 3,000l. additional in respect to goods traffic has been paid. That in itself is a very unsatisfactory thing, but it is mainly due to claims for delay and damage arising from congestion of traffic at the principal stations. Last year, I told you, I think, that our goods traffic had quite outgrown the capacity of our stations, and that the whole thing was carried on under circumstances of very great difficulty. That, of course, leads to claims for delays, and claims for loss. The claims, therefore, both on account of delay and on account of damage have been very large, but these will not be repeated, because a good deal has been already done in enlarging Willow-walk, almost doubling it, and we are doing a great deal at Brighton. The improvements that we are making are already having their effect, and in the course of time I hope we shall have things in thoroughly good order; at all events this year we have every reason to expect will be very different from the last in this respect. Then, you see we have got new rolling stock—a very great part of it already in use—which will make it much easier to deal with the traffic. Last year we had not sufficient rolling stock to work it properly. The increase mentioned, with the additional loss on working the steamboats, which is almost entirely due to increased cost of repairs, and some other small items not necessary to specify, bring up the total increase of expenditure to 49,021l., as stated in the report. Now, what is our prospect in the future? The great rise in wages, which has come upon us more rapidly than we expected, and the rise in the cost of materials must still continue, and the coal strike seems as far off from a settlement as ever. With regard to wages gentlemen will remember what a great movement there was about railway men's wages in the early part of this year or at the end of last year, and that they even talked about a general strike. They pressed very much for their grievances to be considered, and for then very great advances were made. In many cases, however, unreasonable demands were made, but the directors thought that it was their duty to go into every question and deal with them very carefully. We did consider the demands very carefully, and we did our utmost to meet those classes of men, at all events, who really seemed to have an actual grievance very handsomely and very fairly. That has entailed a very large advance in wages; but I think that nobody can say that we have not met every fair demand as far as we knew, that could be urged on the part of our men. We shall now hold our hand in that matter also, and we hope that although the increase must continue on the current half-year, as compared with the half-year of last year, that it will not, for the present, go any further. Of course, that must be an item of increase for the current half-year, as it must be for the next half-year. Then materials are dearer all round. The increase in coal must be very considerable. The increased expenditure is 30,000l., and we bring in a balance diminished by 4,000l., and we have to pay 14,000l. extra on interest on dividends in the new stock. That is 48,000l. increase in prospect; and, finally, we compare with the half-year, which showed a gross increase in traffic of no less than 62,000l., a net increase of 55,500l. Under those circumstances, I think to maintain our dividend for the current half-year would require a greater development of traffic than we can at all reasonably anticipate. At the same time, I think we may hope that the dividend will, if circumstances be tolerably favourable to us, not be materially diminished. I should mention, perhaps, that there is a new French boat being built for the Newhaven and Dieppe service, with a view to meeting the requirements for the traffic of 1900. For that we shall have a capital charge of 20,000l. The boat will cost about three times that sum, but we only pay one-third, the Western of France, the company who is the predominant partner, paying two-thirds. That is the proportion on which the service is worked. We have also in prospect the necessity of building thirty new engines for our traffic, and that will be an expenditure of from 50,000l. to 60,000l. We are committed already to further large capital expenditure. But, as shareholders know, we have taken powers from the Bill of the present session, as there are still large items of expenditure which we will have to incur in the not very distant future. However, it will not be necessary to issue any further capital for another twelve months or so. An encouraging feature is the continued growth of our goods traffic. The additional works at Willow-walk, in course of construction, already give relief, and they will give a great deal more as time goes on. Then there is the improvement on Deptford Dock which we have taken in hand, an improvement in the interests of our goods traffic, and we hope to have that effected in the course of the present autumn. That work has presented rather more difficulties than were expected. The sandy bottom is the difficulty which has to be dealt with, but the difficulties are being got over, and in a few months' time we hope that that dock will serve us better

than it hitherto has done. Then the works of the Earlswood and Croydon widening are very heavy. I was astonished when I saw them. They are all deep cutting and tunnelling throughout, and it has taken longer to complete them than we expected. We have asked the contractor to hurry on, and we expect he will do so, and then we shall get the benefit of that work in the course of next year we hope. We shall try and get it done by July 1st, so as to be ready for the heavy traffic of next year. I am afraid, however, that it will not be completed quite so soon, but in the course of the year we may confidently expect that it will. Our Bill has just received the Royal Assent, two days ago and since the report was issued. The chief items in it are the widenings between Grosvenor-road and Battersea and between Streatham and Croydon. These are with a view to ultimately getting four lines of railway all the way down to Croydon. Then there is the extension of the Brighton goods-yard, which is a very important matter, and which requires Parliamentary powers. That will take some time. There is also the doubling of the small line between Seaford and Newhaven. I ought to say a word now, perhaps, about the working arrangement between our neighbours the South Eastern and the London and Chatham. I do not think it is necessary for me to say more than this, that we are very glad to hear of anything which is going to increase the prosperity of our friends the South Eastern and Chatham. We see no reason to suppose why that working arrangement should interfere at all with the very cordial and harmonious relations which now exist between ourselves and each of those companies. Indeed, we have from Mr. Cosmo Bonsor, who is to be chairman of the Joint Committee or the manager of the whole concern, the most friendly assurance that he desires to go on still in the most cordial manner of working with the Brighton Company. (Loud applause.) Then I think I need only further refer to the resolution which is to be laid before you regarding the contracting-out scheme under the Workmen's Compensation Act of 1897. It is rather an ugly name, a "contracting-out" scheme, but I understand the Registrar of Friendly Societies prefers to call it officially by that name. I daresay it will be remembered that for many years past a scheme of this kind has been in existence here, and that in 1881, after the passing of the Employers' Liability Act of 1880, the benefits to the men were substantially increased. This has involved the company in considerable expense, but it has saved us from ill-feeling and litigation, and has been of the greatest possible advantage to our men. We have for the last eighteen years shouldered a large part of the liabilities imposed upon us. The directors have now given careful consideration to the provisions of the new Act, and, with a view to maintaining the amicable relations now existing between the company and its servants, they now recommend the institution of a new scheme, the details of which are before the proprietors. Since the issue of the report the scheme has received what is necessary, the certificate of the Registrar of Friendly Societies. The Registrar is allowed to sanction and put in force a scheme of this kind if he finds that it is not less favourable or rather more favourable, to the workmen than the benefits they would receive under the Act of last session. We have got the registrar's consent, and, of course, it was necessary to take a canvass of our men about it. We had to ascertain whether they would agree with us and come under this contracting-out scheme. It has been accepted by over 90 per cent. I am told, of our men, and it gives to them the advantage of relief during the first fortnight, a relief which the Act does not give them. If a man is down for a fortnight by accident he receives nothing by the Act, but that is an advantage they get by joining us in the scheme, and they get something for small wages which they would not get under the Bill. On the other hand, it gives us the advantage of avoiding disputes, friction, and law costs. Of course, it is impossible to forecast the actual working of the Act, and it is impossible to say what the actual expenses will be under the Act or under this contracting-out scheme; but I do not think we need apprehend that it will throw upon the company any great burden in addition to what the shareholders have shouldered for the last eighteen years. It will be to the great advantage of our employees, and I believe to the great advantage of the company itself. I may add in this connection the board have requested officers to consider the best mode of initiating a pension fund which is to include all permanent servants not included in the present superannuation fund; that is to say, every platelayer, every porter, and every workman in the Brighton shops, and every one else, servants of the company, will have in old age such an allowance as will keep them out of the workhouse. I think I need say no more, and I now beg to move:—"That the report of the directors for the half-year ending June 30th, 1898, now submitted, together with the half-yearly statement of accounts, be received and adopted."

Sir ARTHUR OTWAY seconded the motion.

Mr. BEAVIS urged the directors to reduce the present return third-class fare from London to Brighton.

Mr. NEWBY characterised the steamboat traffic as unremunerative.

Mr. B. L. COHEN, M.P., congratulated the board on maintaining the average dividend in the face of very great difficulties, and very great demands made upon them by the Legislature and by the working classes. He did not consider that a railway company ought to be managed as a charity. (Applause.) It was not a philanthropic institution, and it was due to the shareholders to see that the line was managed on business principles. As to their Continental traffic, there was absolutely no limit to it, provided that trains were run with punctuality.

The CHAIRMAN, in reply, said that to reduce the return fare to Brighton to 6s. would mean a loss of 8,567*l.* a year, and that from Brighton alone. They could hardly face that, and therefore they must stick to 1*l.* per mile. No doubt the third-class paid a great proportion of the dividend, but in this particular year the second-class, in proportion, was paying a great deal more than the third.

Sir ARTHUR OTWAY, referring to the Continental traffic, said that the cause of unpunctuality was owing to the state of the harbour at Dieppe. That had been for a very long time in a very bad condition, but he was happy to say that there was some hope that the depth of water necessary to ensure entry of their vessels at all times would be improved. At the last conference they had in Paris he had the assurance of the French Government, and of the Chamber of Com-

merce at Dieppe, that by some concerted action the depth of water would be such as to allow their steamers to enter with the same facility as at Newhaven. This company had expended a sum of over half-a-million sterling in creating an excellent harbour at Newhaven, therefore to throw up the traffic would be one of the most unbusiness-like things that any company could be guilty of. With regard to the future they had every prospect of seeing their Continental traffic prove remunerative.

The resolution was then put to the meeting and agreed to. It was also resolved:—

"That dividends for the half-year of 2*l.* 5s. per cent. on the undivided ordinary stock, and 3*l.* per cent. on the preferred ordinary stock, be and the same are hereby declared."

"That the directors be, and they are hereby, authorised to formulate and carry into effect in accordance with the provisions of the Workmen's Compensation Act, 1897, the scheme now submitted for insuring the workmen in the employ of the company against personal injury by accident arising out of and in the course of the employment, with such amendments therein as may be required by the Registrar of Friendly Societies, and be approved by the directors, and that the directors be and they are hereby authorised to apply the revenues of the company to the purposes of such scheme."

### SOUTH EASTERN RAILWAY.

The half-yearly general meeting was held on Thursday, at Cannon-street Hotel; Mr. H. Cosmo Bonsor, M.P., presiding.

The SECRETARY (Mr. George Sheath) read the notice convening the meeting.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that the report gave rather fuller details than usual. That was to enable the chairman's speech to be shortened, and allow time for questions and the wholesome criticism which should always take place at a meeting like that. He pointed out that no business could possibly be prosperous unless its income was continually increasing, and there was a continual increase in its capital for carrying out that business, and unless it laid aside a sum of money for the purpose of renewals. That was the purport of the report in their hands. They would observe that the capital had increased by 410,000*l.*, but they had made a satisfactory issue of their debenture stock at 15 per cent. premium, and it was a matter for congratulation that they had obtained such good prices. They would remember that when their preference stock was issued there were wars and rumours of wars, and there was naturally much distrust in the City, so that the Bank rate advanced rapidly. There was therefore some proportion of that stock unissued, and they had to borrow from their bankers at the usual rate of 4 per cent. They thought they could do better than that, and consequently entered into terms with a City house to take the remainder of the stock at 3 per cent. Since then more than 100,000*l.* had been issued, and the remainder of the stock would be disposed of within a fortnight or so either at par or over par. The capital expenditure showed a total for the half-year of 356,945*l.* Of that amount 45,000*l.* was for the widening of the line. There only remained now one large factory to be bought, and then they would have completed the whole of their purchases up to the Surrey Canal, with the exception, always the exception, of Peek, Frean, and Company's premises, which they had learned to do without. (Laughter.) They had greatly improved their rolling stock, replacing the old by more comfortable vehicles. Another figure in the same expenditure was 32,000*l.* odd for artisans' dwellings. That accounted in a large way for the amount of interest charged against the half-year, as they had a large sum of money lying idle there. So soon as these houses became occupied a good income and a good remunerative interest would be forthcoming for the shareholders in the future. As to the estimate of further expenditure on capital account, which amounted to 350,000*l.* for the current half-year, he would not say much, except that no capital expenditure would be entertained by the board unless they were certain that it would be remunerative in the future. ("Hear, hear.") They had still unissued 2,167,000*l.* of capital, and the directors were asking them to issue 940,000*l.* They would watch very carefully how that money was expended, and it was their intention in its issue to watch the money market, and do their best for the shareholders. They felt that if they issued it in the form of preference stock that would best meet the wishes of the shareholders. ("Hear, hear.") Their last issues had been very economical, as they had gone at 2 per cent., with the certainty of 3 per cent. when the capital became remunerative. He had very little to say on the subject of earnings. Their increase that half-year had been 56,000*l.*, a sum far in excess of any June half-year before, and it was the more satisfactory because there was no sort of exceptional reason why there should be that increase. Their season-tickets were progressing in the most satisfactory way, a sure test of prosperity of a line. There had been an enormous increase in goods traffic. They had carried 125,000 tons more than in the corresponding half-year, and received 15,000*l.* more. That figure was one of the great reasons why their expenditure had gone up. Practically they were underhanded. They had no sidings to carry that great accumulation of traffic and no waggons to put it in, and so unless they were to refuse traffic it was necessary to go into a great expenditure. That excess was greatly attributable to the policy of the board in reducing rates and doing away with anomalies, so that traders knew exactly what they were doing. ("Hear.") The expenditure was, perhaps, to the shareholders the least satisfactory part of the report. But not a single shilling had been spent without careful scrutiny. Personally he would not now cut down a farthing of it could he do so. They had done a great deal for the upkeep of the line, and though some of the charges might have been paid out of capital it was better for the company to pay out of revenue. They had run 250,000 more miles than the corresponding half-year, and to that some of the expenditure was due. He referred to the appointment of Mr. Sheath as secretary, and to the fact that Mr. Stevens was to retain the important post of chief officer to the company, speaking of both gentlemen in highly complimentary terms. It would have been impossible for him to have gone through the work of the last few weeks without the

cordial assistance of Mr. Stevens. Coming now to the Chatham agreement for competitive traffic, he said he had again, in the first instance, to take them into his confidence as regarded the existing state of affairs. During the three years he had been director he had been on the Continental Committee, and the agreement with the Chatham Company practically only extended the powers of the Continental Committee. They had a Continental Committee practically under the Act of Parliament, and had powers of pooling with the Chatham Company, and also to a smaller extent with the Brighton Company, but he was bound to say that it had not worked well for the public nor economically to the shareholders. To him, a man of business, when he came on the board the state of affairs was almost intolerable. He did not wish to blame either the South Eastern Company or the London Chatham and Dover Company. It was an axiom that under the circumstances competition must ensue. Of course, he was aware that the percentage given by the companies was sufficiently high to tempt competition, but he was certain that competition would have existed so long as there were two general managers, two goods managers, and duplicate staffs. ("Hear, hear.") The only way out of the difficulty was to endeavour to bring about an arrangement for unity of management. Of course, there were always the two alternatives—to let things go on as they were or to take off their coats and fight, which latter would no doubt furnish a good sporting time for a few months, but would probably have cost him his place on the board when next he came before them. (Laughter.) Consequently in May he was only too pleased to enter into a conference, with the result he had now the honour to place before them. He wished them to bear in mind that the main principle they had in view was unity of management over the two systems with one chairman, one general manager, one set of locomotives, one set of locomotive shops, one set of engineering shops, and one set of carriage shops for the two systems. It was only natural that in carrying through a business of that importance they would want the cordial co-operation and goodwill of all the officers of both companies, and consequently they thought it necessary to assure any of them who might be likely to be affected that their interests would be thoroughly conserved, and they would be most generously treated. He felt sure they would endorse that part of the agreement. ("Hear, hear.") The other question was, who was to be the chairman of the joint committee? They felt that there could not be two chairmen. In fact, on the Continental Committee one difficulty was that there was no permanent chairman, but that each acted as chairman at different times. When Mr. Forbes suggested that the chairman of the South Eastern Railway should be chairman of the joint board, he (Mr. Bonsor) could not but assent to that proposition, but then came the question, what was to be done with Mr. Forbes? He could hardly ask him to take a subordinate interest. Neither of them could afford to part with his great experience and unrivalled ability, when they required all the talents they could get to carry out these experiments. It was, therefore, suggested that Mr. Forbes should, in some way, give his services to the joint committee. Mr. Forbes held a unique position. He was both chairman and general manager of the Chatham Company, and he had declined to allow any personal consideration to stand in the way. He (Mr. Bonsor) had conferred with his colleagues, and they had come to the conclusion that it would not be fair for Mr. Forbes to be a loser pecuniarily. They had therefore asked him to accept a position on the board as advisory member, and they asked the shareholders to assure to Mr. Forbes the same fees he now obtained for a period of ten years. ("Hear, hear.") The agreement was still a draft agreement, and they had not been able to put the seal of the company to it, but there was now no real difference between the two companies. He ran rapidly over the heads of the agreement, which constituted a joint board, with five members from the Chatham and six from the South Eastern Company, the committee to last for three years, each company to pay a remuneration to be fixed by the shareholders. An arbitrator would be appointed by the committee, and, failing that, by the Board of Trade. The Continental agreement was to be varied for the purposes of the new agreement, and each company would have running powers over the other railway. He would be anticipating their first question if he said that what was competitive traffic had to be settled by Mr. Forbes and himself, and the proportion of the whole to be paid to each company had also to be settled by them. There was no possibility of any difference between them on the account of competitive traffic. Schedules were being prepared by their officers, but as regarded the proportion of the pool, that was a question on which no doubt they were bound to differ. They had arranged the proportion, or rather a basis for the proportion, but it was impossible for him at present to give them the figures. There would be no difference between him and Mr. Forbes, for it would simply be a question of the rule of three. If he were to mention figures they would have all the financial journals working them out in sums, and the board's lives would be a burden to them. (Laughter.) They were paying the Chatham Company a certain sum for the agreement, and the bargain must be a good one because neither side was particularly satisfied. But their company would gain at once entry into Victoria and Holborn stations, and the companies would practically have four London termini, an enormous advantage. (Applause.) The first benefit would be to the travelling public, who would gain greater facilities. He thought that when what was called in bank parlours the "rest" came to be divided amongst the shareholders it would amount to something very considerable. The saving in the two time-tables, workshops, competitive stations, and the Continental agencies they could not appreciate at once, but he was certain the advantages they could give the public would bring about greatly increased earnings.

Mr. A. E. GATHORNE HARDY seconded the motion, which was carried.

Resolutions were afterwards passed recommending the dividends and approving an agreement between the company and the Chatham Company "for the more efficient and economical working of competitive traffic of the two companies" . . . . . "subject to such alterations and modifications therein as the directors may consider necessary or expedient."

At a special general meeting held subsequently, resolutions were

passed:—(1) For authorising the creation and issue of additional capital not exceeding in the whole £40,000, being the balance remaining unissued under the company's Various Powers Acts of 1882, 1884, and 1885, and the exercise of the remaining borrowing powers of these Acts and the creation and issue of debenture stock; (2) for authorising the company to guarantee the capital, debentures, or debenture stock of the Crowhurst Sidley and Bexhill Railway Company, or, at their option, to subscribe towards such capital, debentures, or debenture stock to an amount not exceeding £20,000; and (3) for authorising the company to guarantee the capital, debentures, or debenture stock of the Chipstead Valley Railway Company, or, at their option, to subscribe towards such capital, debentures, or debenture stock to an amount not exceeding £20,000.

### EAST LONDON RAILWAY.

The half-yearly general meeting was held on Monday, at the Cannon-street Hotel, E.C.; Mr. A. E. GATHORNE HARDY presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said the traffic receipts last year were the highest they had had since the year 1887. The point he looked forward to as the bright spot ahead from which the shareholders were eventually to reap benefit was the development of their goods traffic—the point at which he had been working ever since he had been chairman of the company. It had gradually been developed, and at last they saw daylight. The work connected with the hoist at Spitalfields for the purpose of making a junction with the Great Eastern Company, in order to enable that company to carry coals and minerals over the East London line, had now been begun, and tenders had been sent in for the iron and girder work. The Great Eastern Company were going to spend £25,000, in order to make this junction. All the differences which had arisen between the Great Eastern, the South Eastern, and the Brighton Companies with regard to this work were settled, the agreement between them was arranged, and the time fixed for completing the whole work was July 1st, 1899. It had been suggested that possibly their expected goods traffic might be prejudiced by the improved relations which, as every one knew, were about to come into force between the South Eastern and the Chatham companies. As a matter of fact, with respect to the carriage of goods, the point could not affect the East London Company in the least. The idea, he supposed, was that they might prefer to carry coal and minerals over the Blackfriars junction instead of by the Great Eastern line and the new junction which that company were making; but whatever goods came to the East London Company by that junction would come by the Great Eastern system, whose interest it was to bring them in that manner. With reference to the Blackfriars branch, they had always in the South Eastern Company believed that it was of the greatest importance that there should be an alternative route; but to carry goods over that branch was at present very difficult owing to the congested state of the traffic. He had not the least doubt that whatever improved relations existed between the South Eastern and the Chatham companies would be to the advantage of the East London Railway. As they were aware, the Chatham was one of the six leasing companies, and one of the greatest difficulties they had always found in the working of the very awkward constitution which existed under the Act of 1885 had been this—that the Chatham Company, having no physical connection with the East London line, had had no real interest in developing the traffic over it, and had practically shown, he might say, a not unnatural jealousy in any development which would cause expense, as they would themselves reap no actual benefit from the immediate improvement of the working. For that reason, among others, he thought it would be greatly to this company's advantage that improved relations should exist between the other companies. He believed that their prospects were as favourable as they had ever been.

Mr. CORNELIUS SURGEY, in seconding the motion, said he agreed with the chairman that the company's prospects had materially improved.

Mr. W. H. BISHOP remarked that he was strongly impressed with the idea that the men who made the East London Railway were not wrong in their conception of the uses to which it might be put, and he was almost persuaded that the lease should be dealt with in some more drastic way than that in which it was being dealt with at the present time. There ought to be facilities for running through trains to the sea-side resorts in the south. If through traffic could be carried over their railway, they would not have merely a mineral line, but trains running through from the north to the south; and he could see no reason why such trains should not be run straight through. He was, however, afraid that until the public was awakened to the idea of this means of transit there would be little change. In 1891 their gross receipts amounted to £5,000, and for the past year they were £1,000. There was no line placed like theirs which had shown in this period such a small increase in passenger traffic, while the goods traffic was practically nil.

The CHAIRMAN, in reply, stated that the only reason why the directors had not elected another member on the board was in connection with the subject of remuneration, and they could not allow any one to work with them who received no remuneration. Such an arrangement as that was out of the question. Moreover, the directors did not work the line, this being done by the six leasing companies. The directors' work consisted in negotiating with and worrying a great many people, and in trying as far as possible to get the leasing companies to do their duty. In regard to Mr. Bishop's remarks, he believed that they had made substantial progress in the last two or three years. He did not believe that the Great Eastern, Brighton, and South Eastern companies would spend the large sums which they proposed expending in connection with the interchange of traffic over the East London railway unless those companies believed that a substantial traffic would be secured. Since the 1st inst. special trains at cheap fares had been running between stations on the East London line and Ramsgate and Margate.

The motion was adopted.

## GREAT CENTRAL RAILWAY.

The half-yearly general meeting was held at Manchester, on Wednesday, the Earl of WHARFCLIFFE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said they were now approaching the end of the term required for the construction of their extension to London, and they had hoped originally that they would have been able to report the complete opening of it by this time. The gross traffic of the company showed an increase of 48,428<sup>l.</sup>, and of this the largest portion came from coal, which contributed 24,837<sup>l.</sup> Merchandise and live stock showed an increase of 19,916<sup>l.</sup> The expenditure showed an increase of 45,823<sup>l.</sup>, of which maintenance of way was responsible for 3,238<sup>l.</sup> (more miles having been relaid than was usually the case); locomotive power for 13,478<sup>l.</sup>, carriage and wagon repairs for 7,924<sup>l.</sup>, and traffic expenses for 15,081<sup>l.</sup> He had referred at previous shareholders' meetings to the large demands which were constantly made upon railway companies by their servants, and the Great Central Company had been obliged, in common with others, to grant concessions to the men, while at the same time the increase in the traffic had compelled them to add to their stock. There had been large additional expenses necessitated by that increase. Respecting the extension to London, the company had been disappointed with the progress of the works, owing largely to the delay in the delivery of the iron work. The directors had neglected no opportunity of pressing the contractors to fulfil their engagements, but the latter had not always been able to do what they wished because they again had made contracts which were interfered with by the great engineering strike. The line had been opened for coal traffic since Monday in this week, and the directors were doing all that lay in their power to hasten the completion of the line in other respects. There were, however, many difficulties in the way, and he was sorry to say that the company had not been receiving that assistance and countenance from the Metropolitan Railway which would have made things more easy for them. That was not the time to enter into a detailed discussion of the relations between the Metropolitan and the Great Central companies, but he might venture to say that if the former had shown more goodwill towards the Great Central, and had done more to facilitate the construction of their line, this would have been in a more advanced state than was now the case. The capital for the construction of the Nottingham passenger station—which was a joint station of the Great Central and Great Northern railway companies—had been placed during the past few weeks on favourable terms, and the work was now being rapidly proceeded with. The chairman went on to allude to a clause in the report relating to the payment of interest upon the London Extension stock. It was evident, he said, from letters which had appeared in the newspapers, that this matter had excited some feeling on the part of certain shareholders. The interest authorised to be charged on capital by the Act of 1893 would become exhausted on August 25th next, and the directors regretted, therefore, that on and after this date, and until the line was entirely open for public traffic, no further interest could be paid on the London extension stock. It must be remembered that in so large an undertaking, although the most skilled engineers were employed, the actual expenditure was liable to be considerably exceeded, and also that unexpected delays in the carrying out of the work might occur. In order to avoid as far as possible any difficulty of this kind, tenders had only been invited from the most experienced contractors in the country, but notwithstanding this, delays had arisen from causes which could not have been foreseen, and the result was that some months would still have to elapse before the line was completely ready for passenger traffic. This, of course, was a vague statement, but the directors had every reason to believe—though they could not give any definite promise—that the line would be fully equipped and open before January 1st next. (Applause.) The contractors had made every possible effort to utilise the line at the earliest possible moment for the coal traffic, which it was necessary should pass over it for some time before the passenger trains were run, in order that the banks might be properly consolidated and the whole of the works thoroughly tested. It was impossible at the present moment to say what the pecuniary result of the opening of the line for coal traffic only might be, but they hoped that a fair profit would be realised. This would depend largely upon the co-operation extended to them by the Metropolitan Railway Company. If they would help the Great Central Company, as one company ought to help another with which it was closely connected, there could be no doubt that a large coal traffic could be developed before the beginning of the new year. If, however, impediments were put in their way which could not be overcome, the shareholders must not blame the directors of the Great Central Company. He could only hope that this would not be so, but still he warned the shareholders that the ultimate profit to be derived from the coal traffic to London and along the new line depended almost entirely upon the co-operation which they received from that influential line over which they ran for so many miles. There would be in any case chargeable to revenue the interest due on Lloyds bonds and the amount payable to the Railway Rolling Stock Trust for hired rolling stock, and towards meeting these demands the earnings of the extension line would be available. But certainly no part of such earnings would be devoted to any purposes other than those connected with the London Extension. (Applause.) In conclusion, the chairman said he did not think it advisable to add more with regard to the Extension; in the present condition of the line, and depending as it did for prosperity and successful working on other lines, he thought the less said just now the better. He had no desire either to add any bitterness to changes which had taken place between the Great Central and other lines. Nothing would be kept from the shareholders when the time came which could possibly be communicated to them, and in the meantime he begged that they would trust their directors to do the best they could for them.

Mr. E. CHAPMAN (deputy-chairman of the company) seconded the motion, which was unanimously agreed to.

A dividend at the rate of 1 per cent. per annum on the preferred ordi-

nary stock was declared, and the meeting closed with the usual vote to the chairman.

## CITY AND SOUTH LONDON RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices of the company; Mr. C. G. MOTT presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said he must congratulate the proprietors upon the steadily improved position of the company, the dividend on the ordinary stock being the highest they had yet paid. The steady progress the line had made from its initiation was a very satisfactory feature, and one which especially belonged to electric railways. The expenses of working a line of this kind did not increase in the same way as those of an ordinary steam railway in proportion to the traffic carried; in fact, theirs was no larger this half than when they opened it, although their actual receipts had increased very nearly 50 per cent. The consequence was that with a permanent and fixed expenditure and steadily increasing receipts, they had half-year to half-year been able to declare increased dividends. Although they did not yet amount to anything like the figure they hoped they would, they had little doubt that in the future, with a continuance of the progress they had experienced in the past, the line would attain a position of undoubted financial stability and prosperity. Although they had not had the exceptionally large traffic which the Jubilee celebrations brought them, and a mild winter to contend with, they had maintained the same amount of receipts they secured in the corresponding period of last year. That was a satisfactory result, showing how regularly the ordinary traffic was growing. Although the receipts from passenger traffic showed no increase over the corresponding period last year, it was very satisfactory that they had been maintained in spite of the fine mild weather that prevailed during the first portion of the half-year, and that last year the receipts for June were abnormally swollen by the heavy traffic occasioned by the Diamond Jubilee festivities. Despite the large number carried last half-year, they had an increased number again of 41,167, although the receipts showed a decrease of 54<sup>l.</sup> This result had been obtained by a steady increase of mid-day and short distance traffic. The decrease in receipts was subject not for regret but satisfaction, because it had led to the creation of a substantial mid-day and short distance traffic, which was so profitable. The circumstances of the line would be to some extent altered when their extensions were carried out, which would still further augment the mid-day service. That to Moorgate-street had been progressing very satisfactorily. The station tunnels at Moorgate-street and Lombard-street were completed, and would be opened next month. The tunnels between St. Mary Woolnoth and the station on the other side of the river at Denman-street in connection with the Brighton and South Eastern terminus were making rapid progress, and another—that to the corner of Lombard-street—would be opened within a month. The whole of the tunnelling work would, they expected, be finished in about three months from date. The tunnels to the Borough Station were also completed. The work at St. Mary Woolnoth Church had been so admirably carried out that not a single crack had occurred in the ancient fabric, which was a marvellous piece of work. The immense shaft and the lifts had also been sunk without damage. Arrangements had been completed with the Central London Railway for the subway to connect the two stations at the Bank and Lombard-street. The extension to Clapham Common was also proceeding satisfactorily, and some time next year they hoped to have an entire railway open for traffic from the Common to Finsbury-pavement. ("Hear, hear.") The Bill for the extension to Brixton had been passed, and arrangements were now going forward to raise the necessary funds, and proceed with the work as soon as possible. The working expenses had decreased since the line was opened from 797 to 567, which was, he thought, a gratifying result. They were the pioneers of electric railways in London, but this new method of travelling had not yet established itself with the investing public, who did not realise their future value. In his opinion they were destined to become a valuable and permanent investment.

Mr. S. HANBURY seconded the motion, which was agreed to.

An extraordinary meeting was subsequently held for the purpose of sanctioning the creation and issue of the additional capital authorised by the company's Act.

## ARAUCO COMPANY, LIMITED.

A meeting of the 5 per cent. first mortgage bondholders of this company was held on the 22nd inst.; Mr. EDWIN WATERHOUSE (receiver and liquidator) presiding.

The CHAIRMAN explained that the meeting had been called, with the permission of the court, to enable him to submit proposals, informally, for the reconstruction of the company. His circular setting out the details of his scheme was sent out on the 15th inst., and on the following day he received papers from bondholders intimating that, on the whole, they approved the suggestions made. It was, of course, of very little use for them to discuss the details of the scheme until they had heard what Mr. TIARKS thought of the matter. His (the chairman's) object was to do the best he could for the 5 per cent. bondholders, as being those who had a special interest in the property; but, at the same time, he had to do justice to all parties.

Mr. HENRY F. TIARKS (one of the trustees for the first debenture holders) said that the trustees were unable to recommend the 5 per cent. bondholders to assent to the scheme put forward by Mr. Waterhouse. Referring to the security they now possessed, he remarked that they had an unassailable guarantee by the Chilean Government for any deficit in the amount required to make up the 22,500<sup>l.</sup> annually required for the service of the bonds until 1910. By the scheme they were asked to give up their 5 per cent. mortgage bonds on the railway alone, and in place of them to take new 4 per cent. debenture stock on the security, first, of the railway, and, generally, of the mines. They were also asked to allow that stock to be raised to 400,000<sup>l.</sup> and to sacrifice the sinking fund, and so be left for all time with this capital sum on the railway, which depended so largely on the mining industry for its traffic. It was

further suggested that it might be of great interest to sacrifice the Government guarantee. He thought no sane man would consider that what was offered the 5 per cent. bondholders under the scheme was an equivalent for the security they already had. It might be that the Arauco mines were of great value, and would yield admirable results without any extra expenditure, but it might happen that, just as they believed themselves to be in perfectly smooth water, something would occur to necessitate considerable outlay, and the question arose as to where it would be possible to find the money. Naturally, if they held the new first mortgage bonds they would be told that new capital could only be raised by being placed before them, with the result that they would have to take the second place. On the other hand, if things went on splendidly the shareholders alone would get the benefit. Therefore, in the most favourable circumstances they could never get more than a modest 4 per cent. on their perpetual debentures. It would be unjustifiable for the trustees on behalf of the 5 per cent. bondholders to listen for a moment to the chairman's proposals and take anything less than their existing security. They sympathised with the Arauco Company, and desired to work hand in hand with it, if a scheme which business men could accept should be produced. If the Arauco Company declared that it could not go on, it would be for the trustees, in connection with certain important bondholders he would mention later, to consider what should be done. Their security was an excellent one, and there should be no difficulty in maintaining the payment of their interest and sinking fund until the year 1910, by which time the capital sum would be largely reduced. He concluded by moving the following resolution:—

"That the scheme of arrangement, bearing date July 14th, 1898, is not acceptable to the 5 per cent. first mortgage debenture-holders, and that in the event of the liquidator having any other proposal, he be requested to submit the same to a committee consisting of the gentlemen mentioned below, who shall take action thereon as they may consider fitting—Mr. Clarke and Sir Lepel Griffin (trustees for the 5 per cent. bondholders), Mr. Charles A. Hanson, and Mr. Walpole Greenwell, with power to add to their number."

Mr. A. HOWARD seconded the resolution.

After some remarks from Mr. SLOPER, Mr. CLEGG, and other bondholders,

The CHAIRMAN remarked that he had not the slightest objection to the resolution. He hoped the committee would confer with representatives of the 6 per cent. bondholders and the shareholders, if necessary, with the view of getting the company out of the position in which it was placed. He had not expected that his scheme would be cordially received by the 5 per cent. bondholders; but he was glad they had got so far as to secure the appointment of a representative body of bondholders to consider the matter in detail.

After further discussion, Mr. Gasquet's name was added to the committee, and the resolution was carried with two dissentients.

A meeting of the 6 per cent. general mortgage debenture-holders was afterwards held; Mr. WATERHOUSE presiding.

The CHAIRMAN said that if things were allowed to drift as they were doing at present he was afraid they would go from bad to worse. The shareholders had sunk 450,000l. in the property without receiving any dividend, and he thought it unlikely, therefore, that they would be prepared to assist the company as a body in its financial needs. Having regard to the action of the 5 per cent. bondholders, he did not advise them to pass any resolution in reference to the scheme he had placed before them by circular.

A discussion followed, in which Mr. WILLIAMS (representing the Guardian Investment Trust) moved a resolution disapproving the scheme, but on a show of hands it was negatived.

Eventually the following resolution was carried *nem con*:—

"That this meeting, having considered the scheme laid before them by the receiver, and heard his explanation of the position of the company, resolves to appoint a committee to frame, in consultation with the receiver, a scheme which may be submitted to the committee appointed by the 5 per cent. bondholders, and afterwards put forward for the sanction of the court, the committee to consist of the following 6 per cent. bondholders—Mr. Kimber, M.P., Mr. Martin, Mr. Riddale, Mr. J. J. Smith, and Mr. Williams."

### NORTH WEST ARGENTINE RAILWAY.

The annual general meeting was held on Monday at Winchester-house, E.C.; Colonel F. G. OLDHAM presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), expressed regret that the result of the past year's working had not been more satisfactory. The progress made up to 1896 had received a check, which had thrown them back to the position they were in at the end of 1895, the net receipts for that year and the one under review being practically the same. The prosperity of the company, as most of them were aware, was dependent on the condition of the sugar trade, and, although the prospects of the present season were not encouraging, there were considerations which, he thought, justified them in looking more hopefully to the future.

Mr. G. W. DAWES seconded the motion, which was adopted.

An extraordinary general meeting was held on Monday, at Winchester-house, E.C.; Colonel F. G. OLDHAM presiding.

The CHAIRMAN said that the business before them was to consider the scheme of the committee appointed in July, 1896, to examine into the financial conditions of the company and make such recommendations in regard thereto as should seem to them desirable. It was proposed that the chairman of the committee (Mr. Alexander Young) should explain the provisions of the scheme to a mixed meeting of pre-preference debenture stockholders, first debenture stockholders, second debenture stockholders, and shareholders, and that afterwards the vote of each particular class should be taken separately. As to the scheme itself, the board had unanimously decided to support it, believing, first, that it was absolutely necessary for the welfare, even the safety, of the company; and, secondly, that it was improbable that a better one could be brought forward within a reasonable period.

Mr. YOUNG then explained the scheme at great length, remarking that it was a compromise, and, having regard to the divergent interests represented on the committee, he considered that it would have been difficult to approximate more nearly to the views of all concerned. He must confess that it was not a compromise which altogether pleased

him—perhaps it did not please any member of the committee—but it had been assented to because they were convinced that, among other things, it was important the company should have a chance of getting the capital it required in order to place the line in good working order.

On the motion of Mr. W. TROTTER, seconded by Mr. J. NORBURY, special resolutions for carrying into effect the recommendations of the committee were agreed to by the holders of the pre-preference debenture stock.

On the same resolutions being submitted to the first debenture stockholders,

Sir HENRY CARTWRIGHT said he believed that the scheme could be improved. He thought that the interests of the debenture-holders had been sacrificed to those of the shareholders.

Mr. JAMES JUDD said that when investors took debentures they expected they were getting a safe security, and he disliked the present *ad misericordiam* appeal on behalf of the shareholders. By the present scheme the company would be more severely handicapped in a few years than it was now. He objected to various features of it, and proposed that a committee should be appointed to introduce amendments.

The CHAIRMAN, intervening, pointed out that Mr. Judd had only 40l. of debenture stock, and these he had recently acquired.

Colonel HETWORTH considered that the scheme had been badly conceived. It would not extricate them from their difficulties; on the contrary, when it came to be matured in 1900 it would bring heavier charges on the company than it now had to bear.

On a show of hands the requisite majority was not obtained.

A poll was taken, and the result, subject to a scrutiny, was declared as follows:—For the resolutions, 122,430l.; against, 11,410l.

The special resolutions were also passed by the second debenture stockholders and the shareholders.

### METROPOLITAN RAILWAY.

The half-yearly general meeting was held yesterday at the Cannon-street Hotel; Mr. JOHN BELL presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the increased revenue was 7,916l., derived from merchandise, passengers, and parcels. The increase in the passenger traffic amounted to only 792l., which the shareholders might think rather small; but it was highly satisfactory, because they were comparing with the Jubilee celebration, when they carried an enormous number of people. The Jubilee celebration was their record for the largest number of passengers carried on the railway in any one week since the line was opened. Their previous record week was during the omnibus strike in 1891, but the Jubilee week exceeded that by over a quarter of a million of passengers, and 1,972l. in money. The increase in the past half-year in the number of passengers carried was 248,448, and it was gratifying to find that this increase was derived from all classes. The first-class increased by 54,042, the second by 99,498, and the third by 94,908. The largest part of the revenue increase was in the merchandise traffic, which was 6,959l. higher, principally for carriage of materials for the widenings and for the Great Central line to London. This large increase bore no relation to the amount of work done to earn it, and the money received returned little more than "change for a shilling," owing to the very low rates quoted for the traffic; so that any falling off in this exceptional revenue would be compensated for by a saving in running expenses. The increase in expenses was 6,906l., a very considerable sum, but it was largely owing to the coal strike in South Wales—namely, about one-third. The remainder was chiefly due to the higher wages, caused by the additional staff, increased cost of materials, and the fact that they ran 92,806 more miles in the half-year. The balance available for dividend was about 5,000l. over that of the corresponding period, a sum very nearly, but not quite, sufficient to pay an additional  $\frac{1}{4}$  per cent. dividend. But in considering the question of dividend, they had to bear in mind the very onerous obligations placed upon employers of labour under the Workmen's Compensation Act. The company had had offers from insurance companies to insure the railway against claims under that Act, but the rates were high, and the board thought it desirable that the company should itself establish a fund to meet any claims, and the directors, therefore, proposed to transfer to a special account out of the increase in net revenue 3,000l. to form the nucleus of such a fund. That would still leave sufficient to maintain the  $\frac{3}{4}$  per cent. dividend which had been declared for several half-years, and to carry forward about 2,000l. more than was brought into the account. In referring to the Bill which had received the Royal Assent to improve the ventilation of the railway, he commented on the opposition of the London County Council, who had succeeded in putting the company and the ratepayers to considerable expense, but the council quite failed to convince Parliament that their contentions were justifiable. With regard to the experiments they were about to make for working by electricity the piece of line between High-street and Earl's-court stations, he pointed out that it was a mutual arrangement which had been entered into between the District Company and themselves, by which each agreed to pay 10,000l. towards the cost. They were very sanguine of the success of the experiment. If it succeeded—and they anticipated success—no time would be lost in applying electrical working to the whole of the circle. He would be glad if it were in his power to report that their relations with the Great Central Company were in all respects satisfactory, but he was sorry he could not do so. It was obviously impossible for amicable relations to be preserved as one could wish while one company promoted Bills for powers which were clearly prejudicial to the interests of the other. There had been three Bills promoted by the Great Central Company without communicating with the Metropolitan Railway in any way, while the latter had had to oppose, and if any evidence were needed to show that this opposition was well founded, it lay in the fact that Parliament had granted protection to the Metropolitan Company in each Bill. This policy of the Great Central Company of promoting Bills with the apparent object of breaching the agreement of 1890—Bills which the Metropolitan Company

had to fight at considerable expense—was one which in the interests of both companies ought not to continue. They had had to oppose these Bills at considerable expense. They had shown with reference to the working of the coal traffic that they were ready to assist the Great Central in every way in their power. The interest received from the Great Central Company in respect of the widening was being held in suspense, and part of it would be appropriated to relieve the revenue of the current half-year of any burden in respect to the 450,000*l.* new ordinary stock, 1898, which ranked for dividend as from the 1st instant. He concluded by expressing the belief that the directors were following a right policy.

Mr. MELLOR seconded the motion.

Mr. NEWBY and Mr. HALL commented on the action of the Great Central Company.

The CHAIRMAN, in replying, after some further discussion, said they had tried the use of liquid fuel, and he would give the results privately to any shareholder desiring them. He agreed with what had been said as to the conduct of the Great Central Company. Lord Wharnclyffe, at the meeting of that company at Manchester, had said in a vague and uncertain way that if the Metropolitan Company had assisted them more, they would have done better. He (the Chairman) asserted the Metropolitan Company had placed their entire service at the disposal of the Great Central, and if he said what was the Metropolitan view of the case, he thought he would raise such a storm in that room that the Great Central would get no further facilities.

The motion was adopted, and the dividends recommended in the report were declared.

### DEMERARA RAILWAY.

An extraordinary general meeting was held yesterday at the offices, 110, Cannon-street, E.C.; Sir GEORGE R. CHAMBERS presiding.

The SECRETARY (Mr. H. Martin Sells) having read the notice convening the meeting.

The CHAIRMAN said—Gentlemen, this meeting is purely formal, but inasmuch as an alteration is to be made with regard to certain stations which are particularly specified in the Contract, it is thought necessary that the assent of the shareholders of the company should be obtained. At Blankenburg, where one station was to have been, some little difficulty has arisen, and we could not get the accommodation we required. In the meantime, an almost immediately adjoining estate, the Hague, which has come into other hands, offers us greater advantages, and the transfer from the one spot to the other in that case will be unquestionably a considerable advantage to the company. With regard to the other station, when the extension was proposed, it was thought we must keep to the old route, but as the work went on it was found that a shorter line could be made with much more advantage in many respects, saving us about 1½ miles in distance, and giving us a better place for the stappings we require; and in consideration of that shortening of the line we obtain a great advantage in making our West Coast Railway, by getting rails of 70*lb.* instead of 45*lb.* per yard. The contractor met us in that way. All we have to do is to propose a resolution, which I suppose will be carried without opposition, for no one can doubt that the alterations will be of great advantage to the company. The proposal is approved by the Colony, and immediately it is known that the shareholders have given their assent, an ordinance will be passed. The resolution is:—

"That the proposal for varying the contract dated January 31st, 1896, between the Crown Agents for the Colonies, acting for and on behalf of the Government of the colony of British Guiana of the one part, and this company of the other part, being the contract for the construction, equipment, and working of the new railways known respectively as the Berbice Railway and the West Coast Railway, so as to admit of the former railway terminating at a point or place known as Rossignol, about 1½ miles to the north of the existing stalling at Blairmont, instead of as at present provided for, and as regards the West Coast Railway, substituting the Hague for Blankenburg as the place where one of the stations on the said line is to be constructed, be, and the same is hereby approved and sanctioned and authorised to be carried out, and that the directors be at liberty to take all such steps, and to enter into such supplementary or other contract or contracts for giving effect thereto by or on behalf of the company as they may think desirable."

Mr. J. E. TUNNE seconded the resolution, and it was carried unanimously.

The proceedings then terminated.

## General News.

### BRAZIL GREAT SOUTHERN RAILWAY.

The following circular has been sent out to the holders of the outstanding 6 per cent. mortgage debentures, of the 6 per cent. permanent debenture stock, and of the 6 per cent. mortgage debentures 1893 issue, of the Brazil Great Southern Railway Company, Limited, in identical terms, save for necessary adaptations to the several securities concerned:—

"14, Queen Victoria-street, E.C., July 21st, 1898.—Dear Sir, or Madam—On the 16th ult. Messrs. N. M. Rothschild and Sons publicly announced that the Government of Brazil had decided to fund for three years—namely, from July 1st, 1898, to June 30th, 1901, both inclusive—the interest on its external debt and internal gold loan, and the amounts payable annually for railway guarantees, also that the sinking fund and redemption of the loans will be suspended for thirteen years from July 1st, 1898. The general anticipation that some step of this sort would be taken by the Brazilian Government has for a long time past caused a general depreciation in the values of all Brazilian securities, and has prevented this company from realising the balance of about 50,000*l.* of its 1893 6 per cent. bonds, which were created to enable it to liquidate its floating debt, and complete the reconstruction of the railway, necessitated by disastrous floods, and through the line not having been originally designed in a manner to ensure economical working and freedom from flood damage. In consequence of the Brazilian Government failing to pay in cash the guaranteed interest, my

directors have no alternative but to submit to you the following scheme of arrangement—namely, in exchange for the coupons on your bonds for one year, due respectively August 1st, 1898, and February 1st, 1899, you will receive fractional certificates (bearing interest) for the amount of such coupons in the 1893 6 per cent. bonds of this company. These bonds are issued at 85 per cent. in amounts of 100*l.* each, and are to bearer, with coupons attached. The fractional certificates must be presented at the offices of the company in amounts of not less than 100*l.*, and will then be exchanged for bonds. In exchange for the coupons on your bonds for two years, due August 1st, 1899, February 1st and August 1st, 1900, and February 1st, 1901, you will receive scrip of the Brazilian Government funding stock to an equal amount, which scrip can be exchanged for bonds to bearer in sums of 20*l.*, 100*l.*, and 500*l.*, bearing interest at the rate of 5 per cent. per annum, payable quarterly in sterling. Although it is proposed to fund the interest on the company's securities for the period stated, and although the Brazilian Government has decided to suspend for thirteen years the sinking fund and redemption of its loans, it is not proposed to interfere with the operation of the sinking fund upon the mortgage debentures which you hold, which will continue to be drawn half-yearly, or purchased in the market, to the full extent of the cumulative sinking fund, in accordance with the deed of trust. This will insure in your interests the maintenance of the market price of your mortgage debentures, and, so long as that price is below par, will hasten the date when the whole issue will be redeemed. I am further directed to state that the present proposal is being made to the other bondholders of the company—namely, the 1893 bonds of 100,000*l.*; the permanent debenture stock of 200,000*l.*; and the Flood loan bonds of 50,000*l.*; whilst, as regards the share capital of 350,000*l.*, no dividends have been paid for several years past, and can hardly now be paid until the completion of the three years funding scheme. It is also considered right to state for your information that, since the present board acquired office, the directors have had to provide for an expenditure of 121,832*l.* in excess of the original capital outlay, in order to reconstruct the line and make good the heavy flood damage already alluded to. In order, therefore, to give effect to the scheme, you are requested to sign the accompanying form of assent.—By order of the board, ARTHUR LEMON, Secretary."

### BRISTOL DOCK SCHEMES.

A meeting of the Bristol Docks Committee was held on Monday, under the presidency of Alderman Proctor Baker. It will be remembered that proposals to extend the Avonmouth Dock and undertake new works at an estimated cost of a million and a half were practically suspended owing to the attitude of the Great Western Railway Company, and the alternative schemes were dockisation and extensions at Portishead. The committee were convinced of the impracticability of dockisation. Then came the question of developing Portishead Dock, which is served entirely by the Great Western Railway Company, whereas both the Midland and Great Western have running powers at Avonmouth. The committee were influenced by the fact that they have a dock at Portishead which is very deep, though the lock is not sufficiently deep, long, or wide. The suggestion was made to construct a new lock at Portishead, and it was pointed out that a similar work could not be undertaken at Avonmouth because the foundations were so insecure that the safety of the old works would be imperilled. At Portishead the foundations are said to be excellent, and no difficulties present themselves. Eventually the committee approved a scheme for reconstructing the Portishead lock so that it shall be 750*ft.* long between the gates, 9*ft.* deeper than the existing lock, and 80*ft.* wide. The scheme is to provide for ample warehouse accommodation of the most modern type, cattle lairs, cold stores, and all the ordinary accessories for conducting traffic. It was estimated that the work could be carried out in two years at the moderate cost of 350,000*l.* The present quay at Portishead is 1,800*ft.* long, and it is therefore available for use by three of the largest ships at one time. It is not contemplated so to enlarge the dimensions of the dock at present as to provide turning space within the dock for the largest class of vessels, which can be taken out stern foremost with the greatest facility, as in the Langton Dock on the Mersey, and at every wharf without exception at New York. Sir J. Wolfe Barry formerly expressed preference for Portishead as the place at which to make provision for the largest class of vessels. In order that a Bill may be promoted in the next session of Parliament, all necessary steps will be taken.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	20 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## Forthcoming Meetings.

- Aug. 2—East and West India Dock (Half-yearly), Winchester-house, at 2.
- Aug. 2—Sheffield District Railway (Half-yearly), Westminster Palace Hotel, at 2.
- Aug. 3—Central London Railway (Half-yearly and Special), 16, Great George-street, S.W., at 12.
- Aug. 3—London Chatham and Dover Railway (Half-yearly), City Terminus Hotel, at 12.
- Aug. 3—Tottenham and Hampstead Junction Railway (Half-yearly), 28, Great George-street, S.W., at 2.45.
- Aug. 4—London and South Western Railway (Half-yearly), Waterloo Station, at 12.
- Aug. 4—Waterloo and City Railway (Half-yearly), Waterloo Station, at 2.
- Aug. 5—Bristol and South Wales Railway Wagon (Half-yearly), Bristol, at 1.
- Aug. 5—Metropolitan District Railway (Half-yearly), Westminster Palace Hotel, at 12.
- Aug. 5—Midland Railway (Half-yearly), Derby, at 1.30.
- Aug. 5—North Eastern Railway (Half-yearly), York, at 12.30.
- Aug. 5—Rhymney Railway (Half-yearly), Cardiff, at 1.
- Aug. 6—Midland Railway Carriage and Wagon (Annual), Birmingham, at 12.
- Aug. 9—Neath and Brecon Railway (Half-yearly), Charing-cross Hotel, at 11.30.
- Aug. 9—North Staffordshire Railway (Half-yearly), City Terminus Hotel, at 2.

- Aug. 12—Ealing and South Harrow Railway (Half-yearly), 14, Victoria-street, S.W., at 11.
- Aug. 12—London and North Western Railway (Half-yearly and Special), Euston Station, at 12.
- Aug. 16—Taff Vale Railway (Half-yearly), Bristol, at 2.
- Aug. 19—Brecon and Merthyr Railway (Half-yearly), 134, Palmerston-buildings, E.C., at 1.

## The Railway Times.

Established 1837.

JULY 30, 1898.

## THE CHATHAM AND SOUTH EASTERN AGREEMENT.

At the South Eastern meeting, on Thursday, Mr. Bonsor was unable, as had been hoped, to announce that the arrangement with the Chatham had been finally settled. Neither was he able to give any information on the all-important matter of the apportionment of the net earnings from competitive traffic under the contemplated agreement, though he assured his hearers that no real difficulties existed in the way of a final settlement. We hinted last week in our money article that the Chatham Company probably had more to gain from the arrangement than the South Eastern, and that this notion having got abroad has accounted for the strength of Chatham issues on the one hand and the weakness of South Eastern deferred on the other. The same feature has again been observable this week, and Mr. Bonsor frankly stated that after the public the Chatham shareholders would rank next in the realisation of benefits from the united working. The flatness of Dover A after the meeting was probably due to this declaration. The details of the scheme as given by the South Eastern chairman show that the arrangement will be very comprehensive, and should certainly be successful in attaining the ends in view. The united working is proposed to come into operation on January 1st next, and so far as the competitive traffic is concerned it practically implies one management and one board of directors, in fact unity in every respect except capital. Until, however, the exact terms of the apportionment of net receipts are disclosed, the advantages to either company must be a matter of the merest surmise. The explanation of the contemplated favoured treatment of the Chatham is no doubt to be found in its more progressive net revenue. Each time that the Chatham has declined the terms of the South Eastern on previous occasions it has been justified by subsequent results, and it is therefore suggested that the South Eastern will have to give it comparatively liberal terms by way of discounting its more progressive character. At the present time the Chatham is earning an amount equal to nearly 39 per cent. of the united revenue, leaving 61 per cent. as the South Eastern Company's contribution. Rather over twenty years ago the respective proportions were 29 and 71, though it must be added that during recent years the progress of the Chatham has been much less marked than formerly. The Chatham report, issued this week, shows an increase of 16,500*l.* in gross receipts, and one of 14,000*l.* in expenses, so that 2,500*l.* only is added to the net profit. The additional dividend to be paid on the second preference stock is thus mainly due to the augmented balance brought into the half-year, for of the 13,000*l.* required to pay the additional 1½ per cent. on that stock, 7,750*l.* is thus accounted for. A paragraph relating to the South Eastern negotiations says that the terms are practically settled, "after much discussion," and it is hoped that the agreement will be exchanged "in time to allow of its submission to the proprietors at the forthcoming meeting." The wording is identical with that contained in the South Eastern report, though the pious wish there indulged in was not gratified.

## THE GREAT NORTHERN POSITION.

With the opening this week of the Great Central line to London for coal traffic Great Northern shareholders receive another reminder that the competition so greatly feared for a long time past is about to become an accomplished fact. Until the new line is completely opened it will, of course, be quite impossible to gauge its effects, and even then some time must elapse before traffic shakes down to the altered circumstances. Readers of THE RAILWAY TIMES are well aware that so far as the Great Central itself is concerned we have always treated the London line as a huge mistake, and our view has already received ample backing by the depreciation which has taken place in the securities of the old Sheffield company since the Metropolitan extension was embarked upon. That depreciation has proceeded in its course year by year through a period otherwise marked by the general rise in Home Railway profits and in the prices of their securities; so that Great Central stocks now stand at record low figures, whilst the worst has yet to be faced, as we have shown on recent occasions. Truly the last state of that company is infinitely worse than the first, and if the matter ended there it would be bad enough in all conscience. But just as the evil consequences of folly or grave error of judgment on the part of an individual are not visited merely on the offender, likewise a foolhardy financial venture such as the Sheffield line to London produces widespread disaster not by any means confined to the shareholders of the Great Central. We do not wish to be misunderstood in this matter. From an engineering and utilitarian point of view it is no doubt a fine achievement to have added another trunk line to those already existing. Our point of view is that of the interests of the shareholders, not only of the Great Central itself, but also of the Great Northern and other companies who must inevitably feel the effects of the added competition. The Great Northern Company is, of course, the one which must suffer most, and certainly judging by the depreciation which has overtaken its junior stocks, a very large consequent loss to that company is anticipated. The position of the Great Northern was and is a peculiar one, for when in 1890 the then Sheffield Company first gave notice of intention to introduce a Bill for a line to London, it was working amicably with that company under an agreement entered into as long ago as 1860, whereby it was entitled to carry all unconsigned traffic arising on the smaller company's system, giving in return a bonus on such traffic. No doubt the existence of that agreement, which did not expire until 1910, had considerable weight in inducing Parliament to reject the Sheffield Company's first appeal in 1891. When in the autumn of that year an understanding was arrived at on the footing of the Great Northern agreeing not to further oppose the application of the Sheffield Company, many were inclined to think that the former had sold its birthright under the agreement for a mess of pottage. The consideration it received was running powers over the Great Central line west of the Great Northern main line, the agreement of 1860 being at the same time cancelled. The new agreement dated January 30th, 1892, is scheduled to the London Extension Act of 1893, and, of course, the running powers will be of considerable importance in enabling the Great Northern to keep a hand on at least a portion of its existing traffic, originating on or beyond the Great Central system, comprising such points as Liverpool, Manchester, Warrington, Chester, &c. During recent years the Great Northern has been further preparing for the new condition of things by providing itself with independent terminal accommodation at various important centres. Under these circumstances it would be a mistake to assume

that the present traffic to the south originating on the Great Central will be transferred *en bloc* to the latter company, and, further, the Great Northern will be rid of its obligation to pay a bonus on such traffic. In 1890 Great Northern deferred stock stood at considerably over par, now it is quoted at only 54½, or about half its former quotation. Last year a dividend of 2½ per cent. was paid, representing a sum of 189,709*l.*, and it has even been suggested that the whole of this may be wiped away on the opening of the new line—a view we do not altogether share. From the chairman's remarks at the Great Central meeting on Wednesday, it seems clear that the new line will not be completely opened until January 1st at the very earliest, so that the Great Northern will have still further time within which to complete its arrangements. It is undoubtedly the case that the Great Northern will suffer very much from the new line, but does not the great depreciation in its deferred and A stocks sufficiently discount this? In the meanwhile the board is providing for possible eventualities by refraining from recommending any dividend on the deferred and "A" stocks for the past half-year, and carrying forward the unusually large balance of 37,000*l.*, as compared with a balance of 4,500*l.* a year ago. In adopting this course they are, we think, exercising a commendable prudence.

## THE SOUTH WALES RAILWAYS.

Dealing on June 4th last with the effect of the South Wales coal strike, as indicated at that time, we showed how precarious was the dividend outlook of the leading railways serving that district. As the strike continued through the half-year, and is even now proceeding without any immediate prospect of a settlement, the losses of these railways have since, of course, been much increased, and for last half-year the ordinary shareholders of the Barry, Rhymney, and Taff Vale companies are in the unenviable position of receiving no dividends. First of all, the Taff Vale announced that it would suspend the dividend on its preference stock for the past half-year, and in view of the further loss from the continuance of the dispute, there is no reason to fear that at the very least part of it will be in default on the year's results. This, of course, implies that nothing will be paid on the ordinary stock. For the first half of 1897 the Taff Vale paid at the rate of 3½ per cent. per annum—equal to 8½ per cent. on its original ordinary capital. The passing of its ordinary dividend entails a loss to holders of 90,800*l.* Last week the Rhymney also passed its ordinary dividend, which for the first half of 1897 was at the rate of 11 per cent. per annum, representing a sum of 34,600*l.* Not for twenty-two years have Rhymney ordinary shareholders been in this unfortunate position, whilst the 11 per cent. paid in the corresponding period was the best dividend for fifteen years. Only a year ago Rhymney ordinary shareholders were congratulating themselves that they were wise to decline the Bute Docks Company's guarantee of 10 per cent.; now, of course, even that rate would be very welcome, though it is quite possible that by the conditions under which that rate would have been paid, part at least would be in default, even under the proposed guarantee. The third of the usually prosperous railways in South Wales—the Barry—has also passed its dividend this week, though it paid at the rate of 10 per cent. per annum for the first half of 1897. This is the first time that this favoured company has been in this unfortunate predicament, and the loss to the ordinary stockholders represents 49,060*l.* In all, therefore, the actual loss to the ordinary shareholders of these companies by the passing of their dividends is 174,000*l.*, and in addition further losses not only to them but possibly to some of the preference stock-holders may

result for the current half-year. Further, the Great Western dividend is likely to suffer seriously from the same causes, and it is almost inevitable that its pending dividend will show the largest decline of any of the leading railways for the past half-year.

### BRAZILIAN RAILWAY GUARANTEES.

In our issue of the 18th ult. we pointed out that the Brazilian Government's proposal to pay the railway guarantees in scrip for three years was likely to be disastrous to the interests of these companies, and we added that "we are afraid it may result in financial embarrassment to several of the poorer companies." The companies—even the best placed of them—depend on the guarantee not only for the regular payment of fixed charges and dividends, but also for meeting in some instances losses on working. With practically their sole source of income reduced to a payment in depreciated paper it became obvious that some arrangement must be come to between the debenture-holders and shareholders. The first company to open the question is the Brazil Great Southern Railway, which has just issued a circular to the holders of its obligations inviting them to assent to a scheme for paying its interest in paper also for three years. No dividend has unfortunately been paid on this company's share capital for some years past, so no question can arise as to the debenture-holders being made to suffer for the benefit of the shareholders. Indeed, it seems pretty clear that, without some relief such as that suggested, the company would soon be in complete bankruptcy, for it already has an awkward floating debt which a somewhat incompetent and discredited administration has so far failed to grapple with. It is proposed to pay the interest due on August 1st, 1898, and February 1st, 1899, in scrip of the 1893 bonds of the company bearing 6 per cent. For the two following years it is proposed to pay interest in the scrip of the Brazilian funding loan—that is, the company proposes to pass on to its debenture-holders, in payment of interest, the same scrip in which its guarantee is paid by the Government of Brazil. As the company has had to meet large capital expenditure in excess of the original outlay provided for, and has also had to meet heavy outlays arising from floods the position seems to be about as bad as it could well be, but whether the directors are making the best of a bad job is questionable. Perhaps the first effect of their present crude proposals will be to bring the first debenture-holders about their ears, for it is scarcely to be expected that this body, whose bonds stand in the market at , will be content to receive no better treatment than is meted out to the holders of the debenture stock, which stands at no more than . Of course the other guaranteed railways are not all in such a parlous case, for most of them have managed out of their guarantee payments as received in cash to not only meet fixed charges, but also to distribute something to their stockholders. Now that the guarantee is paid in depreciated bonds, which implies that practically it is reduced by 20 to 25 per cent., we suppose the shareholders will have to suffer. Anyway the questions raised are likely to be actively discussed by the various companies affected during the next few months.

### PASSING NOTES.

The traffic receipts for the week ending July 24th, on thirty-three of the principal lines of the United Kingdom amounted to 1,826,656*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,800,508*l.*, with 19,253½ miles open. There was thus an increase of 26,148*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for four weeks to date

amounted on the same thirty-three lines to 7,146,292*l.*, in comparison with 7,024,504*l.* for the corresponding period last year; increase, 121,788*l.*

Mr. Charles Pond, of the Metropolitan District Railway "Shareholders' Association," has sent out another circular, in which he charges the directors of the District Railway with losing 300*l.* a year by not letting a room at Charing-cross station for refreshments. He proposes that Mr. Paul Speak should be elected to the board in order to remedy this deficiency. Surely Mr. Pond can find some more substantial grievance against the District board than this, if not the sooner he ceases his agitation the better. Or is it that the "Shareholders' Association" is a creation of the directors, designed as a red herring to be dragged across the scent with the object of diverting attention from the all-round maladministration of this undertaking.

The Railway and Canal Commission decided on Saturday an application by Huntingdonshire County Council for an order enjoining Mr. Leonard Taylor Simpson, proprietor of the Ouse navigation at Huntingdon, to afford all reasonable facilities to traffic up and down the river. Mr. Simpson was alleged to have dismantled the St. Ives lock. The President, in giving judgment, said the court could not compel respondent to act as a canal company, or to work the navigation, and he might abandon it if he chose to do so, but he was not entitled to dismantle the staunch. Whatever form the order of the court might take it must in some way undo the injury which was now being done.

The important acceleration of the Irish Mail service, which has frequently been referred to in these columns of late, will commence on Monday next. The morning train from Euston for Holyhead, which has hitherto left at 7.15, will not start until 8.30, and passengers will arrive in Dublin at 5.30 p.m.—twenty-five minutes later than at present—which will mean an acceleration of fifty minutes between the two capitals. The return day mail will leave Dublin at eight o'clock instead of 7.15, and passengers will reach London at the same time as now, viz., 5.45 p.m.

The directors of the London Tramways Company, Limited, have issued a circular to their shareholders notifying that the entire undertaking, "exclusive of the 2½ miles, and the Lawson-street dépôt, for which a valuation has already been made," is recommended by them to be sold to the London County Council for 850,000*l.* This offer, which the shareholders must ratify, does not include stores, unexpired licences, &c., and altogether the directors estimate that it will mean a return to the ordinary shareholders of about 9*l.* 10*s.* to 10*l.* per share."

At the summer assizes at Belfast on Wednesday six men were found guilty of defrauding the Great Northern (Ireland) Railway Company. According to the evidence, a conspiracy existed along the line by means of which tickets were illegally obtained and sold to the public by two guards and a head porter of the company, who appropriated the proceeds. Three persons were also charged with receiving the tickets. The railway officials were sentenced to twelve months' and the others to three months' imprisonment each.

The Great Central Railway on Monday began running trains over the London Extension by sending through Quainton-road Junction on to the Metropolitan Railway system two special store trains followed afterwards by four coal trains. The line is being worked on the block and time interval systems, at present, till the wires are connected.

The Lancashire and Yorkshire and London and North Western railway companies have added to their fleet a new steamer, called the *Duke of Cornwall*. She is a twin-screw vessel of 1,540 tons gross register, with a speed of about 20 knots, and accommodates about 800 passengers—412 saloon and 388 steerage.

The London and South Western Railway Company on Wednesday established a new express train, leaving Waterloo at 11.40 a.m., and landing passengers by special steamer at Cowes at 2.50 p.m. There is also a service leaving Cowes at 5.20, and reaching London at 8.30 p.m.

Mr. H. B. Palmer, who was for many years in charge of the traffic department of the District Railway, has been appointed assistant superintendent of the line of the Metropolitan Railway (in succession to the late Mr. Hamilton), and took up that position on Thursday.

The London Brighton and South Coast Railway Company have decided, after the 31st inst., to abolish the booking fees on parcels handed in at London receiving offices destined for stations on their line.

The *London Gazette* of last week officially announces that Lieutenant-Colonel Pollitt, of the Engineer and Railway Volunteer Staff Corps, is granted the honorary rank of Colonel, dated July 20th, 1898.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 10th prox.

CITY, FRIDAY EVENING.

The feature in the MONEY MARKET is the rise which has taken place during the last few days in discount rates, three months' bills now commanding 1 9-16 to 1  $\frac{1}{2}$  per cent., as against 1  $\frac{1}{8}$  per cent. a week ago. Money rates, however, are unaltered at  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent. for day-to-day loans, and  $\frac{1}{2}$  to  $\frac{3}{4}$  for short advances. The Bank directors made no further change in the official minimum at their meeting on Wednesday. The Bank Return issued yesterday shows that the exports of gold and the increase of the home circulation of notes and coin, owing to harvest and holiday requirements, have diminished the reserve, by 1,010,000*l.*, bringing its total down to 24,167,000*l.*, and making its proportion to the current liabilities  $\frac{1}{2}$  lower at 45  $\frac{3}{8}$ . This decrease is almost balanced by a decline of 1,045,000*l.* in the private deposits. Government disbursements have reduced the public deposits by 505,000*l.*, but, on the other hand, the other securities, which were swelled by temporary causes last week, have declined by 551,000*l.* Since the return was made up gold to the amount of 10,000*l.* has been withdrawn from the Bank.

Silver bars are now quoted at 27*d.* per oz., being  $\frac{1}{2}$ *d.* lower on the week. A year ago the price was 26  $\frac{1}{2}$ *d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 25-32*d.*; Calcutta, 1*s.* 3 25-32*d.*; Hong Kong, 1*s.* 10  $\frac{1}{2}$ *d.*; Shanghai, 2*s.* 6  $\frac{1}{2}$ *d.*; Singapore, 1*s.* 11 3-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 174-70 to 173-60 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 5-39*d.* A year ago the premium was 192 per cent., and the value of the paper dollar 1*s.* 4-30*d.*

The Valparaiso exchange comes over to-day at 17  $\frac{1}{2}$ *d.*, being unaltered on the week. A year ago it was 17  $\frac{1}{2}$ *d.*

The Rio de Janeiro exchange on London is 7 13-32*d.*, being  $\frac{1}{2}$ *d.* higher on the week. A year ago it was 7 7-16*d.*

The Bank of Bengal has reduced its minimum rate of discount from 5 to 4 per cent. The Bank of Bombay has reduced its rate from 5 to 4 per cent.

The Bankers' Clearing-house return for the week ending July 27th, 1898, shows a total of 128,732,000*l.*, as compared with 118,844,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£35,283,046	£36,618,462
Total Reserve .....	£24,166,561	£25,452,557
Proportion of Reserve to Liabilities...	45 $\frac{1}{2}$ per cent.	50 $\frac{1}{2}$ per cent.
Notes in Circulation .....	£27,916,485	£27,965,905

New York 60 days ditto .....	\$483 $\frac{1}{4}$	\$486 $\frac{1}{4}$

Very little business has been transacted in the STOCK MARKETS to-day. The attendance of members was very thin, and by three o'clock business was virtually suspended. The House reopens on Tuesday next. Consols, after being flat, finished up  $\frac{1}{8}$  higher on the day, but on the week the loss is  $\frac{1}{2}$  on the uncertain money outlook. In British Railway stocks the feature was a rise of nearly a point each in Great Northern A and deferred on the dividend announcement, and Hull and Barnsley improved  $\frac{3}{4}$  on the announcement of that company. North London rose 1, and North British preferred  $\frac{1}{4}$ ; whilst Brighton deferred, North Eastern, and North Western declined  $\frac{1}{4}$ , and Caledonian deferred  $\frac{1}{2}$ . The week's movements in these stocks are shown below. American Rails opened generally lower to-day upon New York, and subsequently recovered a little, but at the end were slipping away again. The declines on the day ranged from  $\frac{1}{4}$  to  $\frac{1}{2}$ . On the week, however, there are some substantial upward movements. Canadian Rails continue weak. Foreign Railway issues showed little change to-day, and among the movements of the week (beyond those shown below) may be mentioned a fall of 11  $\frac{1}{2}$  in Brazil Great Southern debenture stock, 6 in ditto first debentures, 3  $\frac{1}{2}$  in ditto seconds, 3 in Donna Thereza debentures, 3 in Central Uruguay Eastern Extension debenture stock, 2  $\frac{1}{2}$  in Corboba and Rosario preference, 2 in Arauco first debentures, and 2 in Cordoba Central preference, and 1 in Nitrate debentures, and a rise of 6 in Western of Havana bonds, 4 in United of Havana, 2 in North West Argentine first debenture stock, and 1 in Costa Rica second debentures.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

Messrs. Thackeray and Co., of Cardiff, under date July 28th, report as follows:—Barry undivided, 284  $\frac{1}{2}$  (a fall of 1); ditto preferred, 125 (unchanged); ditto deferred, 159 (a fall of 2); Cardiff preferred, 114  $\frac{1}{2}$  (unchanged); Port Talbot, 9  $\frac{1}{2}$  (unchanged); Rhondda and Swansea Bay, 4  $\frac{1}{2}$  (unchanged); Rhymney undivided, 264  $\frac{1}{2}$  (a fall of 1); ditto preferred, 123 (unchanged);

ditto deferred, 145 (unchanged); Taff Vale, 76½ (unchanged); Vale of Glamorgan, 126 (unchanged). This market shows no signs of improvement, and local events have tended to further depress stocks. The coal strike seems as far away as ever from settlement.

Application has been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Central London Railway—further issue of 12,356 ordinary shares of 10l. each, fully paid; 49,124 ordinary shares of 10l. each, 6l. paid; 1,779 preferred half-shares of 5l. each, 1l. paid; and 3,767 deferred half-shares of 5l. each, fully paid.

The Stock Exchange will be closed to-day (Saturday).

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

The Public Works Commission of the Buenos Ayres City Council has reported favourably on the petition of Sr. P. Aleu for a concession for the construction and working of a steam tramway on the Serpollet system in the suburbs of the municipality. The concession is requested for sixty years; but if after three months' working the municipality considers the system a dangerous one, it will be changed for electricity.

## Directors' Reports.

### NORTH EASTERN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure on this account has been 69,479,315l., whilst 88,457,021l. has been received as follows:—

Ordinary stock .....	£27,700,903
Preference and guaranteed stocks .....	20,728,898
Debenture stock .....	16,230,761
Loans .....	19,790
Premiums .....	3,705,069
Sundries .....	71,600

Balance at debit of capital account, 1,022,294l. The expenditure during the half-year amounted to 490,820l.—viz., 294,306l. on lines open for traffic, 14,683l. on lines in course of construction, 181,831l. on working stock. Estimated further expenditure—In the current half-year, 585,791l.; in subsequent half-years, 1,049,102l.; total, 1,634,893l. Capital powers and other available assets, 4,020,830l.

#### REVENUE.

The revenue account shows the receipts for the half-year ending June 30th as follows:—

	1897.	1898.
Passengers—First-class .....	£265,986	£270,784
" Second-class .....	1,608	1,512
" Third-class .....	747,810	767,917
" Periodical-tickets .....	71,352	77,598
Parcels, horses, carriages, &c. ....	163,123	164,695
Mails .....	30,683	30,385
Merchandise (less coll. and delivery) ..	1,249,434	1,273,444
Live stock .....	52,638	51,154
Minerals .....	1,284,723	1,339,459
Rent and receipts on real property .....	50,054	47,479
Transfer fees .....	307	312
Dock revenues .....	73,273	74,148
Mileage and demurrage of wagons, &c. ....	5,227	7,162

Total receipts .....

The expenditure on revenue account for the half-year ending June 30th was as follows:—

	1897.	1898.
Maintenance of way, works, &c. ....	£234,662	£261,229
Locomotive power .....	650,775	683,943
Carriage and wagon repairs .....	312,639	318,131
Traffic expenses .....	684,000	713,950
General charges .....	67,072	68,318
Stationary engines, inclines, &c. ....	13,096	12,439
Law charges .....	5,895	5,965
Parliamentary expenses .....	3,500	1,650
Compensation—Personal injury .....	3,798	3,776
" Damage to goods .....	7,145	8,785
Rates and taxes .....	131,385	138,919
Government duty .....	5,514	5,647

Total .....

The net revenue for the half-year and the manner of its disbursement is shown hereunder:—

	1897.	1898.
Balance from last half-year .....	£231,602	£232,125
Net earnings .....	1,567,737	1,583,597
Sundry credits .....	2,886	2,728
Total .....	£1,602,225	£1,618,450
Prior charges .....	£235,802	£235,438
Preference dividends .....	435,156	434,982
Dividend on ordinary stock .....	*787,893	†796,401
Balance to next half-year .....	22,374	31,649

Total .....

\* At 5½ per cent. per annum. † At 5½ per cent. per annum.

The gross receipts for the past half-year show an increase of 110,131l., the expenditure an increase of 94,271l., and the net receipts an increase of 15,860l. The ratio of expenses to receipts is 59·46 per cent., as against 58·70 per cent.

#### TRAFFIC, &c.

	1897.	1898.
Half-year ending June 30th.		
Passengers—First-class .....	467,528	512,394
" Second-class .....	69,086	65,665
" Third-class .....	22,021,616	21,995,789
" Total .....	22,558,230	22,573,848
Season-tickets .....	30,533	34,452
Mileage—Lines owned .....	1,574	1,574
" Partly owned .....	15	15
" Leased or rented .....	42½	42½
" Foreign lines worked over .....	148½	148½
" Total operated .....	1,780½	1,780½
Train mileage—Passengers .....	6,211,766	6,501,442
" Goods .....	7,828,378	8,180,920
" Total .....	14,040,144	14,682,362

The report states:—

#### GENERAL.

"The company's Bill, which was submitted to the proprietors at the half-yearly meeting in February last, has passed through committees of both Houses of Parliament, with the exception of the provisions relating to the proposed Hull Dock works. These provisions were opposed by the Hull Corporation, who raised objections to the proposed extension of the Victoria Dock, and also by the Humber Con-

servancy, the Hull and Barnsley Company, and various owners of navigations. It being evident that the scheme of dock improvement could not be carried without another prolonged contest in Parliament, the directors decided not to proceed with the portion of the Bill relating to Hull works, but to promote a Bill for the construction, jointly with the Hull and Barnsley Company, of a new dock to the east of the Alexandra Dock. An agreement providing for the construction of such a dock and for the grant to this company of running powers over a portion of the Hull and Barnsley Railway has been entered into with the Hull and Barnsley Company, and a Bill will be promoted in the next session of Parliament to carry the agreement into effect. Under the provisions of the above-mentioned Bill, the undertaking of the Scarborough and Whitby Railway Company vests in this company as from July 1st instant. The capital authorised by the Bill is 90,000*l.*, with the usual borrowing powers, in addition to 128,300*l.* 4 per cent. preference stock and 133,333*l.* 3 per cent. debenture stock to be issued as the price of the Scarborough and Whitby undertaking.

"The contract for the construction of a deep-water entrance at Middlesbrough Dock and the extension of the dock has been let, and the work has been commenced.

"The directors record, with deep regret, the death during the past half-year of their valued colleague, Mr. H. T. Morton, who had been a member of the board since 1881. To fill the vacancy thus created on the board, the directors have elected Sir Edward Grey, Baronet, M.P., of Fallodon, Northumberland, as a director of the company."

### METROPOLITAN DISTRICT RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure on this account has been 7,762,840*l.*, whilst 7,836,569*l.* has been received, as follows:—

Ordinary stock .....	£2,250,000
Preference and guaranteed stocks .....	3,544,444
Debenture stock .....	1,938,825
Loans .....	103,300

Balance at credit of capital account, 73,929*l.* The expenditure during the half-year amounted to 10,199*l.* Estimated further expenditure—In the current half-year, 56,845*l.*; in subsequent half-years, 19,305*l.*; total, 76,150*l.* Capital powers and other available assets, 2,685,177*l.*

#### REVENUE.

The revenue account for the half-year ending June 30th shows:—

	1897.	1898.
Total receipts .....	£229,382	£227,642
Total expenditure .....	103,838	105,453
Net receipt's .....	£125,544	£122,189
Balance from 1st half-year .....	404	4,006
Rentals and interest .....	7,844	7,800
Total .....	£133,792	£133,995
Prior charges .....	£75,136	£74,983
Dividend on guaranteed stock .....	24,276	24,276
Dividend on preference stock .....	*30,000	†30,000
Balance to next half-year .....	4,380	4,736
Total .....	£133,792	£133,995

\* At the rate of 4 per cent. per annum. † At the rate of 4 per cent. per annum.

The gross receipts for the past half-year show a decrease of 1,740*l.*, the expenditure an increase of 1,615*l.*, the net earnings a decrease of 3,155*l.* The ratio of expenditure to receipts is 46.32 per cent., as against 46.14 per cent.

#### TRAFFIC, &c.

Half-year ended June 30th.	1897.	1898.
Passengers carried—total .....	21,382,318	20,979,345
Season-tickets .....	13,715	13,939
Mileage—Lines owned .....	13	13
" Lines worked .....	5½	5½
" Lines partly owned .....	1½	1½
" Jointly leased .....	3	3
" Foreign lines worked over .....	15½	15½
" Total .....	38½	38½
Train mileage*—Passengers .....	810,060	781,962
" Ballast, shunting, &c. .....	78,022	78,597
" Total .....	888,082	863,559

\* Total run by District engines (not on District Railway only) and exclusive of mileage run on City lines and extensions, which for the half-year ending June 30th, 1897, was 74,245, and June 30th, 1898, 71,191.

#### The report states:—

"In comparing the receipts of the half-year with those of the corresponding half of 1897, it must be remembered that in June, 1897, the abnormal traffic consequent upon the Queen's Jubilee brought about 8,000*l.* into the coffers of the company. It must, therefore, be considered an indication of satisfactory progress that the volume of the receipts has been so well maintained in the half-year under review. Compared with the June half-year of 1896, the total receipts of the June half-year, 1898, show an increase of 8,409*l.*

#### GENERAL.

"Considerable progress has been made in the construction of the Ealing and Harrow line, though the works have been somewhat delayed by difficulties attending the acquisition of land. These are now for the most part overcome. The Acton Junction line will also be shortly opened, and will afford access to the Midland and other companies for coal and other traffic to the western extensions of this company.

"The application of electrical power to traction of trains on the Metropolitan and District lines is a somewhat complicated and novel question, seeing that it may have to be carried on in conjunction with the running of trains propelled by locomotives. The boards of the

two companies have thought it desirable and prudent to have the question thoroughly studied, and have remitted the matter to Sir J. Wolfe-Barry and Mr. W. H. Preece, C.B., the eminent electrician, who are now engaged upon it with power to carry out certain test experiments.

"The Tilbury Company having during the present session obtained powers to subscribe one-half of the cost of the Whitechapel and Bow Railway, authorised by Parliament in 1897, the District Company are applying for a similar power. Negotiations are pending between the companies with the view of proceeding immediately with this important work, which will open up the District Railway to the Tilbury Company and vice versa, and must soon develop a large local and through traffic. There is little doubt that the Metropolitan Company will also appreciate the great advantage of this junction, and will at a later stage avail themselves of it, to the mutual advantage of the three companies concerned."

### LONDON AND SOUTH WESTERN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 41,306,625*l.*, while the receipts have been 40,949,963*l.*, as follows:—

Ordinary stock .....	£11,945,390*
Preference and guaranteed stocks .....	14,750,063
Debenture stock .....	12,759,111
Dock bonds .....	19,950
Sundries .....	1,475,459

Balance at debit of capital account, 356,662*l.* The expenditure in the past half-year was 313,754*l.*, of which 149,377*l.* was on lines open for traffic, 42,345*l.* on lines in course of construction, 87,669*l.* on working stock, 3,528*l.* subscriptions to other companies and contributions to joint lines, 50,834*l.* on Southampton Docks. Estimated further expenditure—In the current half-year, 434,000*l.*; in subsequent half-years, 1,263,000*l.*; total, 1,697,000*l.* Capital powers and other available assets, 2,057,539*l.*

\* Under the powers of conversion authorised by the South Western Railway (Stock Conversion) Act, 1890, section 2, sub-section 13, this amount of 11,973,505*l.* is now represented by—Original ordinary stock 9,285,460*l.*; preferred converted ordinary stock, 2,659,930*l.*; deferred converted ordinary stock, 2,659,930*l.*

"The option of conversion of ordinary stock into preferred and deferred has been exercised by the proprietors to the extent of 2,659,930*l.* up to the end of the year."

#### REVENUE.

The account for the half-year ending June 30th shows the receipts under this head to have been as follows:—

	1897.	1898.
Passengers—First-class .....	£147,624	£134,304
" Second-class .....	127,843	138,508
" Third-class .....	725,426	727,694
" Season-tickets .....	103,276	108,208
Parcels, horses, carriages, &c. ....	161,039	163,935
Mails .....	15,319	15,299
Merchandise (less cartage) .....	403,926	410,802
Live stock .....	17,749	17,170
Minerals .....	160,857	171,097
Rent and houses, land, &c. ....	35,862	41,649
Transfer fees .....	446	391
Steamboats .....	78,223	75,585
Dock receipts .....	91,605	94,857
Total receipts .....	£2,069,195	£2,069,479

The expenditure on revenue account for the same period was as follows:—

Maintenance of way, &c. ....	£202,185	£210,663
Locomotive power .....	265,403	305,958
Carriage and wagon repairs .....	85,490	85,017
Traffic expenses .....	337,301	360,164
General charges .....	44,918	45,439
Law charges .....	4,123	2,927
Parliamentary expenses .....	112	119
Compensation—Passengers .....	502	965
" Goods .....	7,722	8,247
Rates and taxes .....	81,786	83,432
Government duty .....	16,000	16,068
Mileage and demurrage .....	6,539	6,124
Tolls and joint line expenses .....	10,290	6,899
Steamboats .....	88,157	82,784
" Renewal and insurance fund .....	10,740	10,738
Dock expenses .....	61,612	63,443
Total expenditure .....	£1,222,885	£1,289,007

The net revenue and the proposed appropriation of available balance may be summarised as follows:—

Balance from last half-year .....	£24,805	£23,038
Net earnings .....	846,310	810,472
Sundry credits .....	3,439	3,688
Total .....	£874,554	£837,198
Prior charges .....	£245,025	£235,793
Preference dividends .....	282,233	287,483
Dividend on original ordinary stock .....	259,288a	232,136b
" preferred conv. ord. stock .....	46,897c	53,199c
" deferred conv. ord. stock .....	17,586d	13,299d
Balance to next half-year .....	23,525	15,288
Total .....	£874,554	£837,198

a At the rate of 5½ per cent. per annum; b at the rate of 5 per cent. per annum; c at the rate of 4 per cent. per annum; d held in reserve.

The gross receipts for the past half-year show an increase of 30,284*l.*, the expenses an increase of 66,122*l.*, and the net receipts an increase of

35,838%. The ratio of expenses to receipts is 61:39 per cent., in comparison with 59:09 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class	1,196,295	1,170,639
Second-class	2,077,675	2,190,010
Third-class	21,655,499	25,451,248
Total	27,929,459	28,811,927
Season-tickets	23,077	27,216
Goods and minerals (tons)	2,677,664	2,793,431
Live stock (number)	327,566	318,750
Mileage—Lines owned	7834	7834
Partly owned	28	28
Leased or rented	854	854
Foreign lines worked over	444	444
Total operated	941	941
Train mileage—Passengers	5,734,406	5,920,224
Goods	2,130,317	2,232,822
Total	7,864,723	8,153,046

The report states:—

"The receipts on revenue account (exclusive of steamboats and Southampton Docks) for the half-year were 1,929,057*l.*, as compared with 1,899,367*l.* at June, 1897, showing an increase of 29,690*l.* The receipts for the half-year ended June, 1897, were largely increased by the Jubilee celebrations, while those for the half-year ended June, 1898, have been reduced owing to the large steamers of the American line which ran to and from Southampton having been temporarily withdrawn in consequence of the war between Spain and America. Taking these circumstances into consideration, the directors are of opinion that the revenue is satisfactory, as, when compared with the same period of 1896, it shows an increase of 120,060*l.*

"The expenditure on revenue account (exclusive of steamboats and Southampton Docks) for the half-year was 1,132,042*l.*, as against 1,062,377*l.* at June, 1897, showing an increase of 69,665*l.* This large increase is mainly attributable to the enhanced cost of coal, owing to the strike in South Wales.

"There has been a decrease of 2,657*l.* in the receipts of the steamboats; but the expenditure has been reduced by the sum of 5,374*l.*

#### GENERAL.

"The Holsworthy and Bude Railway is practically completed, and now awaits the sanction of the Board of Trade, and it is hoped the line will be opened in time for the autumn traffic. The contracts for the construction of the Meon Valley (Alton to Fareham) Railway and the Basingstoke and Alton Light Railway and the widening of the line between Alton and Farnham have been let. Further widenings between Waterloo and Nine Elms and Clapham Junction and from Woking to Basingstoke are making good progress. The Waterloo and City Railway has been passed by the Board of Trade, and arrangements are being made for the opening for public traffic on August 1st next. The extension of the North Cornwall Company's Railway from Wadebridge to Padstow is nearly finished, and is expected to be ready for opening in the course of the current half-year. The company's application for power to construct a light railway from a point near Grateley Station to Amesbury and the new military camp on Salisbury Plain has been sanctioned by the Light Railway Commissioners, and now awaits the necessary order of the Board of Trade.

"This company's Bill has passed through Parliament, and now awaits the Royal Assent. The powers sought with reference to the proposed enlargement of the Waterloo Station were struck out of the Bill. Further powers will be applied for by the company in the next session of Parliament.

"The directors have to announce, with great regret, the death of Mr. Arthur Edward Guest, which occurred on the 17th inst."

### MIDLAND RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 98,184,459*l.*, whilst the receipts have been 97,456,123*l.*, viz.:—

Ordinary stock	£35,525,508
Preference and guaranteed stocks	34,200,863
Debenture stock	22,974,938
Loans	3,100
Premiums, &c.	4,751,716

Balance at debit of capital account, 728,336*l.* The receipts on capital account during the half-year amounted to 813,377*l.*, and the expenditure amounted to 481,106*l.*, of which 193,207*l.* was on lines open for traffic, 53,873*l.* on working stock, 182,655*l.* on lines in course of construction, and 51,371*l.* on subscriptions and contributions. Estimated further expenditure—in the current half-year, 750,000*l.*; in subsequent half-years, 7,456,107*l.*; total, 8,206,107*l.* Capital powers and other available assets amount to 8,206,107*l.*

#### REVENUE.

The revenue account shows the receipts for the half-year ending June 30th to have been as follows:—

	1897.	1898.
Passengers—First-class	£104,460	£103,072
Third-class	922,820	965,374
Season-tickets	114,936	119,882
Parcels, horses, carriages, &c.	286,011	289,077
Mails	34,075	33,369
Merchandise (less cost of coll. & deliv.)	1,889,906	1,959,252
Live stock	44,512	42,487
Minerals	1,273,578	1,370,579
Cunals	833	994
Rents	48,025	53,116
Transfer fees	891	1,235
Total receipts	£4,720,097	£4,938,437

The expenditure on revenue account for the same period was as follows:—

Maintenance of way, &c.	£274,058	£416,516
Locomotive power	788,076	843,889
Carriage and wagon repairs	234,454	251,867
Traffic expenses	1,024,422	1,093,193
General charges	90,388	97,606
Law charges	7,369	7,026
Parliamentary expenses	1,906	1,180
Compensation—Passengers	2,140	2,522
Goods	20,974	24,874
Rates and taxes	168,967	171,526
Government duty	7,690	7,418
Carriage and wagon hire	Cr.7,427	Cr.8,804

Total expenditure ..... £2,712,717 ..... £2,908,813

The net revenue account and the proposed appropriation of balance available for dividend may be summarised as follows:—

Balance from previous account	£40,037	£38,143
Net earnings	2,007,380	2,029,624
Sundry credits	99,081	101,984

Total ..... £2,146,498 ..... £2,169,751

Prior charges	£543,919	£459,201
Preference dividends	669,947	769,691
Dividend on ordinary stock	*914,296	—
Dividend on pref. con. ord. stock	—	†436,835
Dividend on defd. convtd. ord. stock	—	†485,629
Balance to next half-year	18,336	18,395

Total ..... £2,146,498 ..... £2,169,751

\* At 5½ per cent. per annum. † At 2½ per cent. per annum. ‡ At 2½ per cent. per annum.

The gross receipts for the past half-year show an increase of 218,340*l.*, the expenses an increase of 196,096*l.*, and the net receipts an increase of 22,244*l.* The ratio of expenses to receipts is 58:90 per cent., as against 57:47 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class	610,360	621,155
Third-class	20,489,996	20,960,286
Total	21,100,356	21,581,441
Season-tickets	63,694	65,751
Mileage—Lines owned	1,333	1,368½
Partly owned	209½	211
Lines worked	44½	18½
Foreign lines run over	395½	395½
Total	1,982½	1,993½
Train mileage*—Passenger	8,269,568	8,613,357
Goods	12,617,386	13,324,032
Total	20,886,954	21,933,389

\* Including mileage run for other companies.

The report states:—

"The general trade of the country has been well maintained during the past half-year, and the company's revenue shows a satisfactory increase in each of the principal descriptions of traffic. The increased earnings have been absorbed by the increased cost of working and by the charges for new capital.

#### GENERAL.

"The company's two Bills in Parliament have received the Royal Assent. During the progress of the West Riding Lines Bill negotiations with the Lancashire and Yorkshire Company resulted in an agreement for an exchange of running powers, and the withdrawal from the Bill of the proposed railway from Thornhill to Huddersfield and Halifax. Under this agreement the principal objects sought by the Bill will be attained at a considerable saving of capital outlay. The Great Eastern and Midland and Great Northern joint Bill for constituting a joint committee, representing the three companies, to construct and work the railways in the north of the county of Norfolk and between Yarmouth and Lowestoft, has also received the Royal Assent.

"The Workmen's Compensation Act, 1897, has involved a partial reorganisation of the Midland Railway Friendly Society and its relations to the company. From July 1st, 1898, the company have become liable to pay the compensation prescribed by that Act in cases of accidental injury to their servants, a liability which has hitherto been partly covered by the company's annual contribution to the friendly society. An amended scheme of benefits for the society has been arranged by your directors, in conjunction with elected representatives of the members of the society. Under this altered scheme the contributions of the members will be increased, and the proprietors will be asked to authorise an annual contribution by the company of 10s. per member instead of 12s. as heretofore.

"The vacancy caused by the decease of Mr. Robert Rankin has been filled by the appointment of Mr. Charles Booth, jun., of Liverpool."

#### WORKS IN PROGRESS.

Mr. McDonald, the engineer-in-chief, reports:—"That during the past half-year the lines, sidings, stations, buildings, &c., under his charge have been maintained in an efficient state of repair. Eighty-one miles of road have been relaid with steel rails, and the cost charged to revenue. Somers-town New Coal Depot.—This work is nearly completed, and will be brought into use during the current half-year. Camden and Kentish Town Widening.—Good progress has been made with this widening, and the portion of it between Paul's-road Junction and Kentish-town will be brought into use during the present half-year. Stairfoot and Cudworth Branch.—Satisfactory progress has been made with this branch. New Mills and Heston Mersey.—A contract for the first 5 miles of this line, including the tunnel, has been let, and preparations are being made for starting the work. Gloucester Docks Branch.—This branch is nearly completed with the

exception of the swing bridge over the canal, the steel work for which will be delivered very shortly. Beighton and Treton Widening.—A good start has been made with the earthwork for this widening. Messrs. M'Donald and Abernethy, the engineers for the Heysham Harbour, report under date July 8th, 1898, as follows:—"Good progress has been made with this work during the past half-year. The outer sea embankments have been formed for rather more than half their total length, for which purpose about 200,000 cubic yards of material has been excavated from the adjoining cliffs."

### LONDON CHATHAM AND DOVER RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 28,475,264*l.*, and the receipts to 27,830,576*l.*, viz.:—

Ordinary stock .....	£11,259,282
Second preference stock .....	869,532
Arbitration preference stock .....	6,686,184
Shortlands Railway guaranteed .....	220,000
Sheerness rent-charge stock .....	127,002
Loans .....	355,051
Debtenture stock .....	7,897,525
Subscriptions by other companies .....	416,000

Debit balance 644,689*l.* The capital expenditure during the past half-year was 28,365*l.* on lines open for traffic, 40,241*l.* on working stock, together 68,606*l.*; less 94,528*l.* credited on docks, steamboats, &c. Estimated further expenditure—total, 151,150*l.*

#### REVENUE.

The revenue account shows the receipts for the half-year ending June 30th to have been as follows:—

	1897.	1898.
Passengers—First-class .....	£78,609	£76,242
" Second-class .....	62,566	64,606
" Third-class .....	259,891	260,428
" Season-tickets .....	60,058	61,940
Parcels, horses, carriages, &c. ....	55,342	54,948
Mails .....	1,125	1,125
Merchandise (less cost of coll. & deliv.) ..	84,256	88,968
Live stock .....	2,777	2,283
Minerals .....	58,407	64,700
Queenborough Pier and Bridge tolls ..	391	479
Transfer fees .....	547	386
Rents of property, &c., net .....	22,959	26,280
Steamboats .....	58,952	59,996
<b>Total receipts .....</b>	<b>£745,880</b>	<b>£762,381</b>

The expenditure on revenue account for the same period was as follows:—

Maintenance of way, &c. ....	£52,214	£57,901
Locomotive power .....	92,450	100,432
Carriage and wagon repairs .....	23,908	24,890
Traffic expenses .....	121,052	125,889
General charges .....	20,882	21,376
Law charges .....	1,641	2,231
Compensation—Personal injury .....	4,009	696
" Damage to goods, &c. ....	1,260	1,965
Rates and taxes .....	47,963	49,546
Government duty .....	7,348	7,381
Charges by other co.'s for haulage .....	4,798	4,939
Parliamentary expenses .....	732	732
Steamboat expenses .....	49,115	43,365

**Total expenditure .....** £427,372 ... £441,343

The net revenue account and the proposed appropriation of balance available for dividend may be summarised as follows:—

Balance from last half-year .....	£64,543	£72,295
Net earnings .....	318,508	321,038
<b>Total .....</b>	<b>£383,051</b>	<b>£393,333</b>
Prior charges .....	£220,182	£218,056
Dividend on preference stock .....	150,439 <i>a</i>	150,439 <i>b</i>
Dividend on second preference stock ..	10,869 <i>c</i>	23,912 <i>d</i>
Balance to next half-year .....	1,561	926
<b>Total .....</b>	<b>£383,051</b>	<b>£393,333</b>

*a* At the rate of 4½ per cent. per annum; *b* At the rate of 4½ per cent. per annum; *c* 1½ per cent. for the year ending June 30th; *d* 2½ per cent. for the year ending June 30th.

The gross receipts show an increase for the past half-year of 16,501*l.*, the expenditure an increase of 13,971*l.*, and the net receipts an increase of 2,530*l.* The ratio of expenses to receipts is 57·89 per cent., as against 57·29 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class .....	822,865	763,347
" Second-class .....	1,261,012	1,223,957
" Third-class .....	14,336,037	14,304,304
" Total .....	16,419,914	16,291,608
Season-tickets .....	25,725	26,543
Mileage—Lines owned .....	187½	187½
" Partly owned .....	8½	8½
" Foreign lines worked over ..	6½	6½
" Total operated .....	202½	202½
Train mileage*—Passenger .....	1,963,767	2,001,793
" Goods .....	426,886	463,173
" Total .....	2,390,653	2,464,966

\* Including miles run by trains of other companies.

The report states:—

"The board feel they may congratulate the proprietors upon the financial results of the half-year, as well as of the entire book-year ended June 30th, especially in face of the very large additional expenditure consequent upon the increasing burden of rates and taxes, the higher rate of wages, and the abnormally heavy coal bill, amounting in itself to some thousands of pounds."

#### GENERAL.

"The company's Bill, notwithstanding some opposition, which was successfully overcome, has received the Royal Assent. It authorises the closing of certain level crossings, the acquisition of some additional land, and the extension of the existing guarantee upon capital necessary for the completion of the important works at Dover, now being carried out by the Harbour Board."

"The whole of the new passenger stock of carriages, of greatly improved character, has been delivered and put into use, the total expenditure having been 110,000*l.* The provision of a considerable addition to the number of merchandise and mineral trucks will be proceeded with as soon as the condition of the labour market has resumed a more normal state than at present. The expenditure will be of great benefit to the company's traffic, and will be much more economical than the hire of wagons, now forming a large annual charge upon the working expenses."

"The directors are in friendly conference with the South Eastern board with the view of concluding an arrangement for the more efficient and economical working of the competitive traffic of the two companies. The terms are now, after much discussion, practically settled, and it is hoped they will have been finally determined, and the agreement itself exchanged, in time to allow of its submission to the proprietors at the forthcoming meeting."

### SHEFFIELD DISTRICT RAILWAY.

The capital account to June 30th, 1898, shows that the whole of the authorised share capital of 200,000*l.* had been created, and 158,799*l.* received. The expenditure amounts to 131,898*l.*, of which 49,561*l.* was expended during the past half-year. The directors' report states that the construction of the railway has made satisfactory progress during the half-year. The engineers, in their report, state:—

"Treton and Brightside Railway.—Possession of the whole of the land has now been obtained, and the works generally have made satisfactory progress. About 76,000 cubic yards of excavation have been got out, and the embankments have been almost completed from the commencement of the line at Treton to within about ½ mile of Tinsley. The earthwork for the proposed station at Brinsworth is far advanced. The concrete and brickwork for the whole of the bridges and viaducts between Treton and Brightside is in hand, with one exception, and has made satisfactory progress, and we anticipate that all brickwork will be completed by October next. The steel and iron work for the superstructures of the bridges is all in hand. Attercliffe Station.—During the last six months Attercliffe station has made good progress, and the whole of the station-yard will be complete and ready for goods traffic during the next four months."

### CENTRAL LONDON RAILWAY.

The accounts to June 30th, 1898, show that the whole of the authorised share capital of 2,850,000*l.* has been created, and that 1,892,656*l.* has been received. On the other hand, 2,073,508*l.* has been expended, the expenditure during the past half-year having been 466,560*l.* The directors' report states:—

"The engineers report that during the past half-year good progress has been made with the tunnelling, which, with the exception of the portion eastward of Chancery-lane, is well advanced. The operations at the Bank Station have presented great difficulties and caused considerable delay, but the large gas and water mains which intersected the area have now been removed and replaced in a new subway provided by the company for their reception. The construction of the underground works at this point is being pressed forward, and two out of the five lift shafts are nearly completed. The power station and the carriage and engine sheds at Shepherd's Bush are in course of erection, and arrangements have been made for commencing some of the station buildings. The manufacture of the electrical plant is also reported to be well advanced."

"The whole of the share capital of the company being now issued and 6*l.* per share paid up thereon, the directors purpose asking the authority of the shareholders to create and issue debtenture stock bearing interest at the rate of 4 per cent. per annum."

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Royal Assents.—Canals Protection (London); South Western Railway; London Brighton and South Coast Railway; Charing-cross Euston and Hampstead Railway; Bideford and Clovelly Railway; Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee; Great Eastern Railway (Pensions); Norwich Electric Tramways; Buenos Ayres Northern Railway Company; Rhondda and Swansea Bay Railway; Dover Harbour; Barry Railway; Mumbles Railway and Pier; London Chatham and Dover Railway; Blackpool and Fleetwood Tramroad; Hull Barnsley and West Riding Junction Railway and Dock; Glasgow and South Western Railway; Midland Railway (West Riding Lines); Great Northern Railway; Bristol Tramways (Electrical Power, &c.); Neath Pontardawe and Brynaman Railway.

Third Readings, House of Lords.—Burnley Corporation (Tramways, &c.) Bill; Usk Valley Railway Bill; Sheffield District

Railway Bill; Ipswich Dock Commission Bill; Great Western Railway (New Works) Bill; Sheffield District Railway Bill; Devonport Plymouth and Stoke Tramways Bill (now Devonport and District Tramways Bill).

Third Readings, House of Commons.—Newhaven Harbour Bill (Queen's consent, on behalf of the Crown, to be signified); Buckie (Cluny) Harbour Bill; Isle of Wight Railway (Brading Harbour and Railway) Bill; London and North Western Railway (Wales) Bill.

Second Readings, House of Commons.—Mersey Railway Bill.

The Unopposed Bill Committee of the House of Commons has passed the Bill promoted by the Exeter Teign Valley and Chagford Railway Company authorising certain deviations of this line, and extending the time for the completion of the railway. This Bill has now been sanctioned by both Houses.

The Lancashire Derbyshire and East Coast Railway Bill came on Tuesday before Lord Morley's Committee of the House of Lords, and was passed with amendments and ordered to be reported. The amendments inserted empower the company to raise 100,000*l.* additional capital. This Bill has already been sanctioned by the House of Commons.

The House of Lords Committee on the 22nd inst. concluded the consideration of the Fishguard and Rosslare Railways and Harbours Bill. They decided not to give the running powers asked for to the Dublin Wicklow and Wexford Railway, and subsequently the preamble of the Bill was passed. No change of any important character has been made in the Bill, which now practically stands as it did when it left the Commons.

The Unopposed Bill Committee of the House of Commons on Tuesday passed the Omnibus Bill of the North British Railway Company, under which that company is empowered to construct over 13 miles of new railways, and numerous minor powers are granted to the company with reference to additional lands, roads and other matters. The new share and loan capital authorised to be created for the purposes of this Bill is 520,000*l.*

The Caledonian Railway Bill, which has already been sanctioned by the House of Lords, has now passed by a committee of the House of Commons. In the form in which this Bill will now receive the Royal Assent numerous minor powers are granted to the company, including the construction of about half-a-mile of new railways, being widenings of their lines at Newton. The Bill also authorises the creation of 411,640*l.* additional share and loan capital.

An official notice has been given in the Private Bill-office of the House of Lords of the withdrawal of the Bill promoted by the Tenterden Railway Company. This Bill had already passed the House of Commons, and its withdrawal is consequent upon the abandonment of the Bill promoted by the Cranbrook and Paddock Wood Railway Company. The main object of the Tenterden Railway Bill was to effect an agreement by which that company's undertaking would have been handed over to the Cranbrook Company.

The Unopposed Bill Committee of the House of Commons on Thursday passed the Bill authorising the incorporation of a company for the purpose of constructing a railway from Windsor to Ascot, a distance of about 10 miles. The proposed railway will form a junction with the Great Western Railway at Ascot. The share and loan capital authorised to be raised is 732,000*l.*, of which 549,000*l.* will be share capital. This Bill has already been passed by the House of Lords.

An official notice has been given that the Cranbrook and Paddock Wood Railway Company will not proceed any further with its Bill of this session, which has already been sanctioned by the House of Lords. This Bill was promoted for the purpose of extending the Cranbrook and Paddock Wood Railway a distance of over 28 miles, so as to join the South Eastern Railway at Appledore Station and at Snargate. The new capital required was 666,000*l.*, with power to the South Eastern Company to subscribe towards this sum. Although no reason is given for the abandonment of this Bill in the Second House, it is attributed to the working arrangement entered into between the South Eastern and Chatham railway companies.

## THE SOUTH EASTERN AND CHATHAM ALLIANCE.

In the House of Commons on Tuesday,

Mr. BRYCE asked the President of the Board of Trade whether his attention had been called to the proposed agreement between the South Eastern and London Chatham and Dover railway companies; whether the Board of Trade had considered the question whether an agreement of this character, which practically amounted to a fusion of two great companies, ought to be brought before Parliament for its approval; whether it was the present intention of the directorates of the two companies to submit their agreement to Parliament; and whether, if such was not the present intention of the two companies, the Board of Trade would represent to them the propriety and the desirability,

in the interests of the companies themselves as well as of the districts affected, of obtaining the approval of Parliament to an arrangement of such magnitude, which must exert a great influence upon the convenience of the travelling public generally, as well as upon the large and important districts which these railways served.

Mr. RITCHIE—I have received a letter signed by the secretaries of these two companies jointly, in which I am informed as follows:—"In reply to your letters of yesterday we are instructed to say that the proposed agreement between the South Eastern and London Chatham and Dover railway companies, therein referred to, is made in pursuance of powers conferred upon them by various Acts of Parliament, and it does not therefore require further Parliamentary sanction. There is no reason to apprehend that the operation of this agreement will subject the public using the respective lines to any disadvantage; on the contrary, it will enable the two companies to make some reduction of fares, and also to give their customers many important facilities and advantages which could not otherwise be afforded. The agreement does not in any sense constitute an amalgamation of the two companies, but the directors believe that when the public have had some experience of the united working, it will be so generally popular as to justify them in applying for Parliamentary authority for a complete fusion of the two undertakings."

Mr. BRYCE—I have not gathered from the answer of the right hon. gentleman what is the view of the Board of Trade. We should be glad of some indication of the right hon. gentleman's view of the matter, as well as that of the railway companies'.

Mr. RITCHIE—I have told the right hon. gentleman and the House what the views of the two companies are. The Board of Trade are not yet in possession of sufficient information on the subject to be able to express an opinion.

Mr. BRYCE—I shall endeavour on some future occasion, when there has been an opportunity for consideration, to elicit the view of the Board of Trade on this question.

Mr. COSMO Bonsor—As the chairman of one of the contracting parties I think I may ask the leave of the House to supplement the answer of the right hon. gentleman.

The SPEAKER—Order, order.

Mr. LOUGH—Can the arrangement be completed without the Board of Trade making up its mind as to whether it is legal or not?

The SPEAKER—Order, order. That is discussing the question.

## PRIVATE BILL PROCEDURE (SCOTLAND) BILL.

The report just issued of the Select Committee of the House of Commons to whom this Bill was referred states that the committee were satisfied by the evidence of the Lord Chairman and of the Chairman of Ways and Means that the task of discriminating between subjects which could be dealt with by provisional order and those which ought to be dealt with by private Bill could be easily and efficiently discharged by them so long as it is limited to Scotland; and by an almost unanimous decision the committee came to the conclusion that the scheme of the Bill is preferable to any scheme not embodying the provisional order system. The only other question of difficulty and importance which remains is the constitution of the tribunal which is to conduct the local inquiry provided under the Bill. A substantial minority of the committee were of opinion that the tribunal should be composed of members of the two Houses of Parliament. While this proposal has much to recommend it, its disadvantages—the difficulty of obtaining the services of members of the two Houses, especially during the recess, so in the event of an autumn session—make it expedient, in the view of the majority of the committee, to prefer a tribunal formed of persons who are not necessarily members of either House of Parliament. The committee have amended the proposals of the Bill for the formation of a panel of persons from whom such a tribunal can be selected. This tribunal, they suggest, might be of a permanent character, instead of being reconstituted every five years, as prescribed in the Bill. A minority of the committee, it is added, was in favour of substituting for the proposed tribunal a permanent body analogous in composition and functions to the Light Railways Commission. Finally, the committee strongly recommend that those who are responsible for fixing the fees in relation to private business should materially reduce them. It is pointed out that the average sum received from this source is 54,176*l.*, whilst the expenditure of the two Houses for the year 1897 under this head is estimated at only 21,680*l.* An appendix to the report gives the two alternative schemes under which it was proposed to form a tribunal composed of members of the two Houses.

## EMPLOYMENT IN TUNNELS.

In the House of Commons on Monday,

Mr. CHANNING asked the President of the Board of Trade

whether he had considered the circumstances disclosed at the inquest on George Freeman, an employé of the Great Northern Railway Company, on Tuesday last; whether it was the fact that Freeman, in discharge of his duty as flagman to bricklayers repairing Welwyn Tunnel, was on duty for twelve hours in the tunnel without relief; whether the Board of Trade was represented at the inquest; and whether, having regard to the facts disclosed, and the opinion expressed by the jury that twelve hours in a tunnel without being visited was far too long, he would take action under the Act of 1893 to have the hours of such railway servants reasonably reduced, and recommend further precautions to the company concerned.

Mr. MADDISON had on the paper a question relating to the same subject.

Mr. RITCHIE—The Board of Trade have not yet received the coroner's return, but should it turn out that Freeman was a servant of the railway company, and that the facts are as stated, the Board will communicate with the company under the Railway Regulation Act, 1893. The department was not represented at the inquest, as the coroner did not ask for the assistance of an assessor. Freeman had been off duty for thirty-six hours previous to commencing work at 6 p.m. on the 17th inst. There was no mental strain upon him, and no complaint had ever been made by him that the hours were too long. Consequent upon this accident having occurred, the company have under consideration the steps best adapted for preventing the recurrence of a similar accident.

#### FRASERBURGH AND ST. CONALS LIGHT RAILWAY.

In the House of Commons on Monday,

Mr. BUCHANAN asked the President of the Board of Trade when would the scheme for the light railway from Fraserburgh to St. Conals be issued, and what is the cause of the long delay.

Mr. HANBURY, who replied, said that this order was submitted to the Board of Trade by the Light Railway Commissioners on June 7th. The time for the lodging of objections expired on July 4th. A meeting to consider the order was held on July 14th. The order, subject to the consideration of one point, would shortly be approved.

#### LONDON AND NORTH WESTERN RAILWAY (WALES) BILL.

In the House of Commons on Monday,

On the order for the third reading of the London and North Western Railway (Wales) Bill,

Mr. LEWIS, while not offering any opposition to the third reading, protested against the maximum rates upon the Chester and Holyhead section of the London and North Western Railway, which, he said, were higher than upon other sections of the main line. Although the traffic over this section was so great that two extra pairs of rails had been laid down, the maximum charges, as compared with the other sections, were 25 per cent. higher for distances up to 20 miles, 32 per cent. higher up to 50 miles, and 60 per cent. for distances beyond 50 miles. In the early history of the company they were allowed to charge exceptional rates owing to the exceptional cost of construction, but he contended that the justification for those rates had long ago passed away and ceased to exist in the case of the Chester and Holyhead line.

The Bill was read a third time.

#### PEKING HAN-KAU RAILWAY CONCESSION.

In the House of Commons, on Thursday,

Mr. JOSEPH WALTON asked the Under-Secretary for Foreign Affairs whether he would communicate to the House the reply of the Chinese Government to the application of her Majesty's Government for full information as to whom, and on what terms and conditions, the concession for a railway from Peking to Han-kau in the Yang-tse Valley had been granted.

Mr. CURZON—The reply of the Chinese Government is to the effect that the concession in question has been granted to a Belgian syndicate and that the terms and conditions will be communicated to her Majesty's Government as soon as they are received from Shanghai. At the same time the Chinese Government have formally assured Sir Claude M'Donald, and have requested him to convey the assurance to her Majesty's Government, that the Russian Government are not interested financially or otherwise in the Peking-Han-kau line. A similar statement has been made to Sir Claude M'Donald by the Belgian Minister at Peking.

Sir ASHMEAD BARTLETT asked whether the assurance of the Chinese Government covered the Russo-Chinese Bank.

Mr. CURZON—I have given the assurance in the exact terms in which it was received.

Sir A. BARTLETT asked whether a large portion of the concession had been parted with to the Russo-Chinese Bank.

Mr. CURZON—We have no information to that effect.

## American & Canadian Railways.

### BALTIMORE AND OHIO.

Messrs. Baring Brothers and Co., Limited, notify that, under the terms of the Baltimore and Ohio Railroad Reorganisation Plan of June 22nd, 1898, they have encashed the coupon due March 1st, 1898, on the bonds of the 6 per cent. loan of 1872 deposited with them in accordance with the bondholders' agreement of June 16th, 1898. Certificates issued by them representing the bonds so deposited should now be presented in order that the holders may receive the amount due thereon in respect of the above coupon.

The Baltimore holders of Baltimore and Ohio stock seem to be generally selling out to the New York market. The Gregg estate, the second largest holder of common stock, is reported to have sold half its holdings to friends of the reorganisation committee, and to be negotiating for the sale of the remainder. It is also said that the John Hopkins University, which owned between 2,500 and 3,000 shares of the common stock, has sold its holding to the same parties. The University declines to accept the plan of reorganisation, and will push its suit to have the first preferred declared a lien ahead of the mortgages. It is stated that the Reorganisation Committee have definitely decided to foreclose the company's property.

A question having arisen as to the future relations between the Baltimore and Ohio and the Baltimore and Ohio South Western companies, the following authoritative statement has been secured:—The managers of the Baltimore and Ohio reorganisation and the advisory committee are taking up the question of dealing with the leased and operated lines. They are working assiduously on those matters, and, when they have finished with them, attention will be turned at once to the question of the future relations with the present guaranteed lines; meantime, nothing is likely to transpire in connection with Baltimore and Ohio South Western matters.

### LATEST EARNINGS.

Third week of July.—Chicago Milwaukee and St. Paul, \$568,000—decrease, \$21,000; Missouri Kansas and Texas, \$183,000—decrease, \$1,000; Texas and Pacific, \$105,000—increase, \$1,000; Wabash, \$251,000—increase, \$1,000; Chicago Great Western, \$85,000—increase, \$5,000; Chesapeake and Ohio, \$207,000—decrease, \$20,000; Chicago Great Western, \$85,000—increase, \$5,000; Denver and Rio Grande, \$153,000—increase, \$3,000; Louisville and Nashville, \$419,000—increase, \$20,000; Mexican Central, \$239,000—increase, \$44,000; Missouri Pacific, \$438,000—increase, \$25,000; New York Ontario and Western, \$87,000—decrease, \$4,000; Southern Railway, \$456,000—increase, \$92,000; Baltimore and Ohio South Western, \$119,000—decrease, \$5,000; St. Louis and San Francisco, \$118,000—increase, \$6,000; St. Louis South Western, \$89,000—increase, \$12,000; Oregon Railroad and Navigation Company, \$151,000—increase, \$24,000.

Second week of July.—Norfolk and Western, \$236,000—increase, \$13,000; Northern Pacific, \$419,000—increase, \$26,000. The gross earnings of seventy-five roads in the second week of July show an increase of 4.15 per cent.

Month of June.—Chicago St. Paul Minneapolis and Omaha, gross, \$614,000—decrease, \$22,000. Northern Central, gross, \$507,000—increase, \$35,000; net, \$117,000—increase, \$34,000. Southern Railway, gross, \$1,590,000—increase, \$157,000; net, \$364,000—increase, \$59,000. Chicago and North Western, gross, \$2,996,000—increase, \$81,000. St. Louis and San Francisco, gross, \$507,000—increase, \$38,000; net, \$173,000—increase, \$35,000. Chicago Milwaukee and St. Paul, gross, \$2,746,000—increase, \$27,000; net, \$1,003,000—decrease, \$91,000. Mexican National, gross, \$505,000—increase, \$2,600; net, \$94,000—decrease, \$3,000.

On 131 lines reporting earnings for the month of June, the total receipts were \$44,303,000 (on 101,865 miles), whilst for the same month in 1897 the receipts were \$41,645,000 (on 100,855 miles). Increase in receipts, \$2,658,000; increase in mileage, 1,010. On 133 lines reporting earnings from January 1st to June 30th, 1898, the aggregate receipts were \$289,137,000, as compared with \$255,179,000 for the corresponding period in 1897—increase, \$33,958,000.

Month of May.—Baltimore and Ohio, gross, \$2,447,000—increase, \$420,000; net, \$614,000—increase, \$310,000. Baltimore and Ohio South Western, gross, \$630,000—increase, \$130,000; net, \$154,000, same as last year. Pacific Mail Steamship Company, gross, \$326,000—decrease, \$60,000; net, \$72,000—decrease, \$44,000.

The net earnings of 133 roads in the month of May amounted to \$21,532,225, showing an increase of \$3,621,174, or 20.22 per cent.

## RAILROAD NOTES.

A statement has been issued by the Grand Trunk Railway Company of Canada showing the volume of business done in the half-year ending June 30th. From this it appears that the number of passengers carried was 3,007,710 (against 2,876,891 in the corresponding half of 1897), and the amount received therefrom 439,421*l.* (against 465,479*l.*); the number of immigrants carried was 7,659 (against 6,418), and the receipts 3,565*l.* (against 3,535*l.*); the receipts for mails, express freights, &c., were 91,909*l.* (against 86,507*l.*); the number of tons of freight carried, 4,509,043 (against 4,043,129); the receipts from freight, 1,286,538*l.* (against 1,185,520*l.*); and miscellaneous receipts to 49,172*l.* (against 13,188*l.*). The aggregate gross receipts for the half-year amounted to 1,870,605*l.* (against 1,754,229*l.*). The length of line in operation was 3,512 miles, being the same as in the corresponding half of 1897.

A Reuter's telegram, dated Chicago, July 25th, says:—"All freight rates on the railroads west of Chicago have been restored to the normal tariff. A long and disastrous rate war, during which many millions were recklessly thrown away, is thus ended." On the other hand, a New York correspondent, telegraphing on the 26th, says:—"President Hill, of the Great Northern, says that the transcontinental rate war is no further from a settlement than it was six months ago; neither is it any nearer. He added: 'The reports that President Van Horne and myself have reached a settlement of the differences is absolutely without foundation.'"

The railway under construction by the British Yukon Company from Skagway over the White Pass to the navigable head waters of the Yukon has been completed to within 7 miles of its terminus and will reach Lake Bennett within thirty days, when the train service will begin. The line provides steamer and rail communication with Dawson City. The company holds a United States and a Canadian charter. The rumour that the Canadian Government will stop the construction of the line at the summit of the pass is officially contradicted by the Minister of the Interior.

Advices from St. Paul state that the Chicago Great Western Railway is spending \$100,000 to \$150,000 per month in contracts for improvements and betterments. This year it will spend \$1,100,000, which is \$100,000 more than in 1896, and the largest amount in one year. In 1897 it spent \$750,000. The traffic department reports that freight earnings will be \$130,000 below those of the Chicago and Alton's this year, though it was once thought they would equal them. Passenger business still lags.

A correspondent writes:—"How is it that Messrs. Speyer Brothers take no notice of the gross libels upon them contained in the *Financial News* of the 15th inst., wherein several charges of the gravest character are brought against them in connection with Mr. Huntington and the Central Pacific Railway? I see, too, in the *Financial News* of the 25th inst., that Sir William Marriott virtually repeats these charges, though in much more guarded language."

Messrs. J. S. Morgan and Co., and J. P. Morgan and Co., give notice that, referring to their circular of June 1st last, offering to exchange various New York and Hudson River Railroad Company bonds for the new 3½ per cent. gold mortgage bonds of 1897 of the same company, their offer to supply the new bonds at 104 and interest will be withdrawn on August 4th next, after which date the rate will be 105 and interest.

The report of the Chicago and North Western for the year ended May 31st shows:—Gross earnings, \$36,050,000—increase, \$5,073,000; net earnings, \$13,407,000—increase, \$2,369,000; net after payment of taxes, \$12,304,000; net after fixed charges, \$5,298,000; total net income, \$5,755,000; balance after payment of dividends, \$2,235,000—increase, \$1,065,000.

Mr. Thomas H. White has been appointed chief engineer of the proposed Ontario and Rainy River road, and it is announced that he will at once begin the location of the line from Port Arthur, Ontario, to Rainy Lake.

A Toronto despatch says that the Canadian Pacific is trying to make unnecessary any formal decision by the Interstate Commerce Commission that it is not entitled to any differential on American business.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 41,000 tons, the Panhandle system leading with 6,000. In the corresponding week last year 48,000 tons were moved.

The income account of the St. Louis and San Francisco for the fiscal year ended June 30th is expected to show that 3½ per cent. has been earned on the second preferred stock.

The Chicago St. Paul Minneapolis and Omaha has declared a half-yearly dividend of 3¼ per cent.

The Baltimore and Ohio Railway has adopted the use of electric fans on its sleeping-cars.

## General News.

## DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

Metropolitan District Railway (July 25th).—At the rate of 4 per cent. per annum on the preference stock, carrying forward 4,735*l.* This time last year the dividend was at the rate of 4 per cent. per annum, and 4,380*l.* was carried forward. The following statement shows the June dividends on the preference stock for twelve years:—

1898 ... 4 p. cent.	1895 ... 3 p. cent.	1892 ... 3½ p. cent.	1889 ... nil
1897 ... 4 "	1894 ... 3½ "	1891 ... 2½ "	1888 ... nil
1896 ... 3½ "	1893 ... 2½ "	1890 ... 1½ "	1887 ... 1½ p. cent.

Lancashire and Yorkshire Railway (July 26th).—At the rate of 5 per cent. per annum, carrying forward about 21,600*l.* The dividend for the corresponding half-year was at the rate of 5 per cent. per annum, carrying forward about 21,400*l.* For twelve years the June dividends have been as follows:—

1898 ... 5 p. cent.	1895 ... 3½ p. cent.	1892 ... 3½ p. cent.	1889 ... 4½ p. cent.
1897 ... 5 "	1894 ... 3½ "	1891 ... 3½ "	1888 ... 3½ "
1896 ... 5 "	1893 ... 3½ "	1890 ... 4 "	1887 ... 3½ "

Great Northern (Ireland) Railway (July 28th).—At the rate of 6½ per cent. per annum, placing 4,000*l.* to reserve, and carrying 24,100*l.* forward to next account. A year ago the dividend was at the rate of 6½ per cent. per annum, 4,000*l.* was placed to reserve, and 21,500*l.* was carried forward. Dividends for June half of the past twelve years:—

1898 ... 6½ p. cent.	1895 ... 6½ p. cent.	1892 ... 5½ p. cent.	1889 ... 4 p. cent.
1897 ... 6½ "	1894 ... 6 "	1891 ... 5 "	1888 ... 5 "
1896 ... 6½ "	1893 ... 6 "	1890 ... 4 "	1887 ... 4½ "

Taff Vale Railway.—This company will pay no dividend for the past half-year. For the corresponding half of last year the dividend was at the rate of 3¼ (equivalent on the old stock to 8½) per cent. per annum, and the balance carried forward 7,000*l.*

Dividends for the June half of the last twelve years:—

1898 ... nil	1895 ... 3½ p. cent.	1892 ... 3½* p. cent.	1889 ... 15 p. cent.
1897 ... 3½* p. cent.	1894 ... 3½* "	1891 ... 2½* "	1888 ... 15 "
1896 ... 3½* "	1893 ... 3½* "	1890 ... 3½ "	1887 ... 14 "

\* Equivalent to 8½ p.c. per annum on the old stock. † Equivalent to 5½ p.c. per annum on the old stock.

North Staffordshire Railway (July 28th).—At the rate of 4 per cent. per annum, against 4 per cent. per annum for the corresponding half of last year. The balance carried forward is 4,899*l.* (against 3,356*l.*). The June dividends for the past twelve years are shown below:—

1898 ... 4 p. cent.	1895 ... 3½ p. cent.	1892 ... 4½ p. cent.	1889 ... 4 p. cent.
1897 ... 4 "	1894 ... 4 "	1891 ... 4½ "	1888 ... 4 "
1896 ... 4 "	1893 ... 4 "	1890 ... 5 "	1887 ... 3½ "

Great Northern (July 29th).—At the rate of 3 per cent. per annum, as against 3½ per cent. per annum for the corresponding half of last year. The dividends for the half-year are thus 2 per cent. on preferred converted 4 per cent. ordinary stock, and 3 per cent. on the 6 per cent. "B" stock. A year ago ½ per cent. was paid on these two stocks, and 4,596*l.* was carried forward. These payments leave a balance of 37,000*l.*, of which 21,000*l.*, the equivalent of ½ per cent. on the deferred and A stocks, is held in reserve until the close of the year, and 16,000*l.* carried forward. For the past twelve years the June dividends have been as follows:—

1898 ... 3 p. cent.	1895 ... 2½ p. cent.	1892 ... 3 p. cent.	1889 ... 3½ p. cent.
1897 ... 3½ "	1894 ... 3 "	1891 ... 3½ "	1888 ... 3 "
1896 ... 3 "	1893 ... 3 "	1890 ... 3½ "	1887 ... 3 "

Barry Railway (July 27th).—The directors announce that the profits of the past half-year will not enable them to declare a dividend on the ordinary capital, but 6,558*l.* is carried forward. At the corresponding period last year the dividend was at the rate of 10 per cent. per annum, and 6,805*l.* was carried forward.

North London Railway (July 29th).—At the rate of 7½ per cent. per annum (with 7,100*l.* carried forward) as against 7½ per cent. per annum for the corresponding period last year, 5,000*l.* to reserve, and 6,200*l.* carried forward.

Hull and Barnsley Railway (July 29th).—Nothing on either the preference stock or the ordinary stock.

Other Railways.—Liverpool Overhead, at the rate of 3 (against 3) per cent. per annum; Conde D'Eu, at the rate of 3 per cent. per annum (interim); Vale of Glamorgan (nil); Tottenham and Hampstead Junction, at the rate of 7½ (against 7½).

**Miscellaneous.**—Railways and Metropolitan Omnibus, at the rate of 5 per cent. per annum; Midland Railway Carriage and Wagon,  $7\frac{1}{2}$  per cent., and a bonus of 5 per cent. Brown, Marshalls, and Co., Limited, 10 per cent.; London Road-car, at the rate of 8 (against 10) per cent. per annum; London General Omnibus, at the rate of  $10\frac{1}{2}$  (against  $10\frac{1}{2}$  per cent. per annum). Stock Conversion and Investment Trust (North Eastern Railway deferred charge stock)— $1\frac{1}{2}$  per cent. for the year ending June 30th. Metropolitan Railway Carriage and Wagon—7s. 6d. per share, making, with the interim dividend already paid, 10 per cent. for the year, and also a bonus of 5s. per share. Union Rolling Stock, at the rate of 8 per cent. per annum. Bristol and South Wales Railway Wagon, at the rate of 10 per cent. per annum.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### YORKSHIRE DALES RAILWAY.

The promoters of the Skipton-in-Craven and Grassington Railway (Yorkshire Dales Railway) have been compelled to postpone the commencement of work owing to insufficient public support. The directors have issued a further appeal, and it is hoped that the required help may be forthcoming by August 5th, the limit of time fixed.

#### GREAT NORTHERN AND CITY RAILWAY.

The prospectus of the Great Northern and City Railway Company was reissued on Tuesday, the only alteration in it being a change in the name of the brokers, and an announcement that upwards of two-thirds of the whole share capital have been underwritten and arrangements made to construct, equip, and open the railway for traffic. It has since been announced that Sir Henry Burdett will join the board after allotment. The subscription lists were closed on Thursday, and it is understood that the applications from the general public have again been somewhat meagre. At this we are not surprised, for recognising even the exceptional auspices under which the company makes its appearance, we are still disposed to regard its prospects as extremely uncertain.

#### BENGAL-NAGPUR RAILWAY.

The directors of the Bengal-Nagpur Railway Company, Limited, invite tenders for debentures of the company to the amount of 400,000*l.* sterling bearing interest at the rate of 3 per cent. per annum, guaranteed to the company, both as regards principal and interest, by the Secretary of State for India in Council. The debentures, which will be payable to bearer, will expire on August 18th, 1905, the interest thereon being payable half-yearly in sterling in London. The minimum price of issue is par.

#### GREAT INDIAN PENINSULA RAILWAY.

The directors of the Great Indian Peninsula Railway Company are prepared to receive tenders for debentures of this company to the amount of 250,000*l.* sterling, bearing interest at the rate of 3 per cent. per annum, guaranteed to the company both as regards payment of principal and interest by the Secretary of State for India in Council. The debentures will be to bearer, and will expire on June 30th, 1905, the interest thereon, in sterling, being payable half-yearly in London on January 1st and July 1st in each year by coupons attached to the debentures. The minimum price of issue is par. Tenders must be delivered at the company's offices, 48, Copthall-avenue, E.C., on Friday, August 5th.

#### RAILWAY DEVELOPMENTS COMPANY, LIMITED.

This is the title of a company which has just been formed to carry on the business of railway and tramway proprietors and carriers in the United Kingdom and elsewhere; to construct and supply motor carriages, locomotives, or other vehicles to be used either with or without rails or other permanent way; to build warehouses, factories, harbours, docks, piers, wharves, sewers, waterworks, gas, electric, and other lighting works; to deepen any harbours, rivers, or channels, and execute any other public works in the United Kingdom or elsewhere; as engineers, ironfounders, shipbuilders; to establish and maintain telegraph and telephone systems. The capital is 100,000*l.* in 1*l.* shares. The signatories are:—L. H. Isaacs, 3, Verulam-buildings, Gray's-inn, W.C., 200 shares; J. Hart, Ashleigh, Knighton, Leicester, 200; E. C. Arnold, 24, Portland-place, W., 200; W. S. Tait, 106, Sumatra-road, West Hampstead, 200; J. S. Rubinstein, 5, Raymond-buildings, 200, W.C.; A. H. Beal, 20, Regent-street, S.W., 100; W. Leggatt, 5, Raymond-buildings, W.C., 200. The first directors—of whom there shall be not less than three nor more than seven—are to be elected by the signatories. Qualification, 200*l.* Remuneration 250*l.* per annum and a per-centage of the profits divisible. Registered by Leggatt and Co., 5, Raymond-buildings, W.C.

### CHINESE RAILWAY CONCESSIONS.

Dalziel's Shanghai correspondent, telegraphing on Tuesday, says:—"The North China Gazette publishes to-day the text of a convention alleged to have been signed by Sheng Taotai and the representatives of the Belgian syndicate regarding the Luhan Railway. It shows that the project is, as a matter of fact, an affair of the Russo-Chinese Bank, which takes 78,000 shares of 500*f.* each out of a total of 225,000 shares, and agrees to make full advances against the remaining 147,000 shares. The bank will share the control of the line with the nominees of the syndicate. The first instalment of the money to be advanced by the bank is due to-day, but has not yet been paid in. An important French mission under M. Bouin has reached Sui-Fu, in the province of Sze-Chuen, and is examining the route of the projected railway extension along the Yan-tse-Kiang to the Upper Mekong Railway. A concession has already been issued for a line running from the frontier of Tonquin to Yunnan. This will forestall the projected British connecting line with Burma, and cut off Great Britain from the Upper Yang-tse-Kiang valley." The same correspondent, telegraphing on Wednesday, says:—"A very strong feeling has been aroused among the British community throughout China by the disclosure of the fact that the Belgian Syndicate has sold the concession of Luhan Railway to the Russo-Chinese Bank. According to the terms of the transfer Belgium is to furnish men and material for the construction of the line, while the Russian financiers undertake to finance the concern, subject to having complete control of the working of the railway under similar conditions to those obtaining on the Liao-Tung and Manchurian lines. This will destroy the claims of Great Britain in the Yangtse Valley. It is further reported that Sheng Taotai received 1,000,000*f.* in recognition of his having approved the introduction of the name of the Russo-Chinese Bank into the contract."

Reuter's agent at Peking, telegraphing on Wednesday, says:—"M. Pavloff has reiterated to the Tsung-li-Yamen the Russian objections to the Hong Kong and Shanghai Bank loan for the projected Neu Chwang railway extension; but the Chinese Foreign-office has so far not replied to them. In renewing these objections, the Russian *Chargé d'Affaires* weakened his original protest by formulating specific conditions, and this fact is regarded as a diplomatic victory for the Chinese. Nevertheless, M. Pavloff's renewed insistence upon the fulfilment of certain conditions is beginning to cause alarm in Chinese official circles, and the uneasiness felt on this account is increased by M. Pavloff's peremptory declaration that he would permit no discussion on the matter, and that the Tsar's wishes must be carried out. Dr. Yung Wing, the Chinese concessionaire, has been granted three days more within which to find the capital for the Peking-Ching Kiang Railway, the Tsung-li-Yamen being anxious that the concession should be granted to a Chinese subject. Should the capital not be found by the Chinese concessionaire, the concession would go to German capitalists. The Tsung-li-Yamen desires British capital to be invested in the projected line, and, in the event of Yung Wing's failure to procure the required funds, would be disposed to grant an entirely fresh concession either to British capitalists or to an Anglo-German syndicate. Since the signing of the Han-Kau Peking Railway contract places the railway approach to the Yangtse in the hands of a nation which may be inimical to British interests, the necessity is urged of securing for Great Britain control over a second line connecting North China with the British sphere of influence."

The Peking correspondent of the *Times*, telegraphing on the same day, says:—"The Russo-Chinese Bank, as the bank of the Han-kau Railway, has notified the Tsung-li-Yamen that it holds at the disposal of the Chinese Government the first payment of 35,000*l.* on account of the Belgian railway loan. [It will be observed that this news does not at all accord with the Chinese Government assurances to the English Government as announced by Mr. Curzon in the House of Commons on Thursday.]

The Shanghai correspondent of the *Times*, telegraphing on Thursday, says:—"The French Minister in Peking has protested to the Tsung-li-Yamen against the negotiations now proceeding for the construction of a railway between Kau-lung and Canton by a company represented by Messrs. Jardine, Matheson, and Co. The ground of the protest is that the province of Kwangtung is in the French sphere of influence."

### THE IMPENDING ECUADOR RAILWAY FLOTATION.

The *South American Journal* in its issue of the 23rd inst. says:—"We hear that the prospectus for the Guayaquil-Quito Railway is now in print, and being privately circulated, and it is asserted that the capital has been fully underwritten. More wonderful still, the promoters appear to have induced such experienced railway men as Sir Myles Fenton and Sir Allen Sarle to accept the position of directors; also such gentlemen of high standing as the Hon. Thomas F. Bayard and Sir Gerald Fitzgerald to join

the board. Is it possible that these gentlemen can be aware of the nature of the undertaking for which they will become responsible? . . . . The prospectus of the proposed Ecuador National Railway was issued in 1892, but although it was a much more reasonable scheme than the Guayaquil to Quito Railway, of which we shall have to speak presently, its reception by the public was most chilly, the whole amount of capital applied for being, we are informed, less than a tenth of the amount spent in advertising it. Within three years after coming into force, the new arrangement for the settlement of the Ecuador debt was broken by the Government, which in February, 1896, suspended remittances on account of the service, and appropriated the 10 per cent. surcharge of the Customs duties, specially hypothecated for that purpose, for other ends. These facts are mentioned principally to show the unscrupulous character of the Government of this republic, how scandalously it has behaved in the past, and how little reliance can be placed upon its pledges. . . . . Matters were in this position when a group of American capitalists, who were reported to be of very good standing individually, obtained a concession to build a railway from Guayaquil to Quito. Mystery number 1 is—What could have induced a syndicate of rich and presumably astute men to undertake to build one of the most difficult of railroads, and one which does not appear to have the least chance of being made to pay by its traffic earnings for years and years, if ever, when, if they were anxious to invest their money in South America, there are innumerable other railways which could be made to give a handsome return? Mystery No. 2: Why they should have undertaken to build it at a price which comes out somewhere about 9,000*l.* a mile? It requires but very little experience in railway matters to see that this road could never be built for the money. Even if it could, where is the traffic to come from? Those who know the country will agree that there is none to justify the building of a road up to Quito at present, and probably none to warrant it for many years. The former scheme—that of the Ecuador National Railroad—only proposed to take the line to the foot of the Andes. That was a more reasonable and, in fact, a necessary road, but, even then, it was a formidable undertaking in such a country and climate. . . . . Readers of this journal know well that we should be the last to throw cold water upon any practicable South American enterprise, and that we desire above all things to see the countries of that continent developed, but how can any sensible writer approve of such a scheme as this."

#### FURTHER CAPITAL FOR ENGLISH RAILWAYS.

##### LONDON AND NORTH WESTERN RAILWAY.

A special general meeting of the London and North Western Railway Company is called for the 12th prox., for the purpose of authorising the creation and issue of new ordinary capital, not exceeding 935,000*l.*, in pursuance of the powers of the London and North Western Railway Act, 1885, the Lancashire and Yorkshire Railway Act, 1885, and the London and North Western Railway (New Railways) Act, 1892, and for authorising the company to create and issue debenture stock to the extent of the borrowing powers authorised by the said Acts.

##### LANCASHIRE AND YORKSHIRE RAILWAY.

A special general meeting of the Lancashire and Yorkshire Railway Company is called for the 10th prox., for the purpose of "authorising the directors to borrow on mortgage such sum or sums of money as the said meeting shall determine, not exceeding in the whole the sum of 482,000*l.*, being as to 132,000*l.*, the amount which the company is authorised to borrow under the 'Lancashire and Yorkshire Railway (Various Powers) Act, 1892;' as to 200,000*l.*, the amount which the company is authorised to borrow under the 'Lancashire and Yorkshire Railway Act, 1893;' and as to 150,000*l.*, the amount which the company is authorised to borrow under the 'Lancashire and Yorkshire Railway Act, 1894,' and to authorise the company to raise, from time to time, all or any part of the said sum of 482,000*l.* by the creation and issue of debenture stock, in accordance with the provisions of part 3 of the Companies' Clauses Act, 1863."

##### GREAT WESTERN RAILWAY.

A special general meeting of the Great Western Railway Company is called for the 11th prox. (1) to sanction the creation and issue of the capital authorised by the Great Western Railway (General Powers) Act, 1898, and the Great Western Railway (New Works) Act, 1898, and the exercise of borrowing powers and the creation and issue of debenture stock. (2) To authorise the company to subscribe or contribute towards the undertaking of the Fishguard and Rosslare Railways and Harbours Company under the provisions of the Fishguard and Rosslare Railways and Harbours Act, 1898. (3) At such meeting resolutions will be submitted to the proprietors to sanction and approve the following agreements—viz., (a) an agreement between the Easton and Church Hope Railway Company and the Great Western and

London and South Western railway companies for the maintenance, working, and user of the Easton and Church Hope Railway. (b) An agreement between the North Pembrokeshire and Fishguard Railway Company and the Great Western Railway Company for working the North Pembrokeshire and Fishguard Railway between Clynderwen and Goodwic, near Fishguard.

#### WESTERN RAILWAY OF SAN PAULO.

The receipts of the Paulista Railway last year amounted to \$22,223,833, and the expenses to \$14,752,190, the net revenue being \$7,471,643, of which \$6,000,000 was paid in dividends to the shareholders, \$1,000,000 carried forward as suspended profit to this year's account, and \$471,643 carried to the reserve fund. The capital, now all paid up, amounts to \$60,000,000, so that the dividends paid were at the rate of 10 per cent. per annum. The receipts of the Rio Claro branch amounted to \$3,944,864, against \$1,214,595 in 1893. The service of the foreign debt last year cost the company \$4,857,423, including \$867,639 (27,500*l.*) paid on account of the redemption of the debt of 1892. The whole foreign debt amounted to 2,817,200*l.*, and its redemption will be completed in 1933. In August of the present year the company will pay the last instalment, amounting to 98,994*l.*, on account of the redemption of the debt of 1878. Last year the length of the road in operation was 791 kilometres. Twenty-five years ago—that is, in 1872—it was only 38, the number of passengers then carried being 33,531, the quantity of freight 26,150 tons, the gross receipts \$311,148, and the net revenue \$124,886. Last year the trains of the company carried 690,644 tons of freight and 1,422,100 passengers, of whom 43,082 were immigrants, and were carried free from charge. The length of the waterway on the rivers navigated by the company's boats was 200 kilometres.

#### SAMBRE AND MEUSE RAILWAY.

The accompanying letter has been sent to certain shareholders of the Sambre and Meuse Railway Company who have dissented from the proposed division of the assets of the company, authorised at the general meeting of June 18th; but as it will probably interest other shareholders, the liquidators think it well to circulate it more generally:—

"76, Rue Belliard, Brussels, July 26th, 1898.

"Sir—We have the honour to acknowledge your letter of the—

"In our capacity of liquidators of the Sambre and Meuse Railway Company we can only legally carry out the resolution unanimously passed on June 18th, 1898, by the extraordinary general meeting of the shareholders of the company, relating to the division of the assets between the holders of ordinary and preference shares, unless this resolution be judicially reversed.

"Mr. Frederick Edward Owen, of the firm of G. Sachs and Oppenheim, of Warforn-court, Throgmorton-street, London, having given us legal notice of an objection analogous to your own, we have summoned him to sustain, before a judicial tribunal, the validity of such objection.

"In conformity with Article 47 of the statutes of the Sambre and Meuse Company, any differences between the shareholders of the company having to be settled by arbitration, we have called upon Mr. Owen to name three arbitrators, who should be empowered to decide disputed points raised by him, and on the nomination of whom we will send him our assent or dissent within the period provided by the 47th Article of the statutes of the company.

"Possibly you may find it convenient to put yourself in communication with Mr. Owen, and to come to an understanding with him for the appointment of such arbitrators who will have to pronounce judgment on the disputed points which interest you.—WILLIAM ARSTIN, ARNOLD DE BEER, ALBERT GODDERIS, ERNEST DE HENNIN, Liquidators."

#### FOREIGN AND COLONIAL ITEMS.

The Natal-Zululand Railway Company has received information by cable to the effect that the line will be open for traffic to Stanger on August 10th.

The ratifications of the treaty concluded between the Swiss and Italian Governments for the construction of the Simplon Tunnel were exchanged on Thursday.

The length of the railways of Cuba is 1,105 miles, owned by seventeen corporations, practically all of standard gauge. These lines own 308 locomotives, 442 passenger and 6,021 freight cars.

It is rumoured that the Cordoba and Rosario Railway is to be extended from Rosario to Buenos Ayres. At present the line runs from Rosario to Frontera, with a branch from Frontera to Rafaela.

The income of the Chilean State railways in May amounted to \$1,232,446 and the expenditure to \$1,022,544. The figures for the corresponding month in 1897 were respectively \$1,261,520 and \$1,040,836.

At an extraordinary general meeting of the Delhi Umballa Kalka Railway Company, Limited, held on Wednesday, the resolutions which were passed at the meeting held on the 11th inst. were confirmed as special resolutions.

We understand that the Lagunas Syndicate, Limited, has at last effected a change in its local management, and that Mr. C. A. Gibbes retires with full pay up to December next, when his contract with the company would have expired.

At an extraordinary general meeting of the Antwerp-Rotterdam Railroad Company recently held in Brussels, under the presidency of Mr. Georges Montefiore Levi, it was decided to dissolve the company. The railway has been purchased by the State.

The Board of the San Paulo (Brazilian) Railway Company, Limited, have made a further and final call of 2*l.* per share on account of the capital, and 10*s.* per share, the unpaid balance of the premium, making together 2*l.* 10*s.* per share, on the new ordinary shares of the company, payable on September 1st next.

It is intended to invite subscriptions in London for the 3½ per cent. 60,000,000*f.* loan for the construction of the Simplon Tunnel. The Canton Berne Local Government has decided to apply to the Grand Council of the Canton for credits for definitive surveys, &c., for the construction of the projected Loetschberg Railway, which would form the most direct route to the Simplon Tunnel from England.

The staff of the Villa Maria and Rufino Railway, which on July 1st ceased to be worked by the Buenos Ayres and Pacific, is composed as follows:—Mr. W. F. Damon, general manager; Mr. S. D. Mackay, accountant; Mr. J. C. Todd, resident engineer; Mr. W. Johnson, locomotive superintendent and storekeeper. The administration offices are at La Carlota. Mr. Damon, now general manager, has been in charge of the traffic of the line for several years.

The Railway Commission of Victoria has, for a second time, recommended Parliament to construct a line from Collingwood to Melbourne, at a cost of 100,000*l.* It is expected to yield at the outset a profit of 660*l.* per annum. The question for the construction of a parallel line from Fitzroy to Melbourne has been postponed. The Government has withdrawn its assistance in connection with the carriage of coal. It is understood that the Railway Department will raise the freight charge to coalowners from 4*d.* a ton per mile to 3*d.*

Telegrams from Melbourne state that the proposed construction of a branch line of the Emu Bay Railway to run to the Mount Lyell mining field has been strongly opposed in the House of Assembly by the promoters of the Great Western Railway (which has been begun to connect Hobart with Mount Lyell and is now being floated in London), but without success. The Tasmanian law officers have advised the Ministry that a branch line is legal. The Premier, Sir E. Braddon, has informed a deputation that his honour is pledged to authorise a branch line if the law officers declare it legal.

**English Rolling Stock in the United States.**—The half-yearly report of the Union Rolling Stock Company, Limited, states that the slight revival in rolling stock business in the United States, referred to in the directors' last report, has made little progress during the period under review. Four contracts have been entered into for cars, costing in all about 59,600*l.*, but these have been at lower rates than were entertained in the past. The contracts entered into before the autumn of 1893, and which have since formed the main part of the company's business, are rapidly running out. The chairman has recently visited the United States in order to confer with the company's agent, and form an opinion as to the requirements of rolling stock, and rates of interest for purchase hire wagon leases, likely to prevail in the near future. After seeing many car builders, bankers, and others in New York and elsewhere, he reports that a fair amount of business may shortly be offered; but great efforts will be made to get it accepted at low rates, and some of it may have to be passed on account of the plethora and consequent cheapness of money in the United States for the time being. But if good trade continues the company may look forward to entering into contracts at moderately remunerative rates.

**Great Northern and Great Central Competition.**—A Sheffield correspondent writes:—"The agreement between the Great Central and Great Northern railway companies for the exchange of London and Manchester traffic expired this week, when the former company commenced to run coal and goods

trains from [Sheffield to London over their new line. The Great Northern, however, possess running powers over the Great Central line between Retford and Manchester, and they have decided to avail themselves of them. Yesterday the company commenced a service of trains worked by their own engines right through from London to Manchester, conveying merchandise for Sheffield, Manchester and Liverpool, which towns they are now able to serve direct. A considerable development of this traffic is anticipated in the near future, while there is every probability that at the end of the year the same company will work their London passenger express trains through to Sheffield, Manchester, and Liverpool, instead of only to Retford as heretofore. In such case the Great Central main line between Manchester and Sheffield will be one of the busiest railway sections in the provinces. The Great Northern have completed their new goods station at Manchester, and have opened a depôt at Sheffield."

**New Rail and Steamboat Route to Margate.**—In order to show the advantages of the new "Royal" route to Margate and Ramsgate, the directors of the London and Sea Coast Express Steamers (Limited) invited a number of gentlemen to travel over it on Wednesday. This they did by starting from Charing-cross, London-bridge, or New-cross, to Port Victoria, and thence by boat to the two sea-side resorts named. Mr. P. Blair Black, general manager of the company, was present, accompanied by one or two of the directors, and pointed out the conveniences of the route, which was adopted only a month or two ago. The journey by rail is, for the most part, through very pleasant country; the narrow reaches of the Thames are avoided; there is a clear course for the boats from the pier out into the roomy Medway; and a considerably longer time than is ordinarily the case is allowed on shore both at Margate and Ramsgate. The time of arrival of the vessel, both at Margate and Ramsgate, was excellent, and the *Jupiter* was back again at Port Victoria about seven o'clock in the evening. It was stated that next season there would not only be a new route, but new steamers would be put on. It is intended that the vessels shall call at Herne Bay when the new pier there is completed.

**Liverpool Railway Rates.**—At a meeting of the council of the Liverpool Chamber of Commerce on Wednesday Mr. G. H. Cox, the chairman of the Special Committee on Light Railways, made a short statement as to the labours of the committee, which, he said, were now concluded. The final report of the committee, he intimated, would be issued on August 8th, and would be found to be perhaps the most important report ever issued under the auspices of the chamber. The object for which the committee was called into existence was to devise a cheaper method of transit for goods between Liverpool, Manchester, and the manufacturing districts than was afforded by the present railways. The railway companies had declined to do anything at all for Liverpool, although within the last few months they had materially reduced the rates between the manufacturing districts and Southampton. It was, therefore, all the more important that they should have cheaper communication between Liverpool, Manchester, and the manufacturing districts of Lancashire and Yorkshire, and he thought that in the report about to be issued the committee had suggested something which would bring that about.

**Storage of Bicycles.**—On and after August 1st the North Eastern Railway Company will issue weekly and fortnightly tickets which will enable cyclists to stable their bicycles at the following stations:—Newcastle, Sunderland, Tynemouth, Alnmouth, Barnard Castle, York, Scarborough, Whitby, Bridlington, and Hull. Holders of these tickets may take out their machines and return them to the storage room as often as required. A room fitted with cycleholders will be set apart for this purpose at each of the stations included in the scheme. The charge will be 1*s.* per ticket for a week, 1*s.* 6*d.* per ticket for a fortnight. The object of the arrangement is to provide accommodation at the station for the storage of the cycles of visitors staying in apartments in the watering-places or large towns, where the accommodation for cycles is necessarily limited. Further particulars can be obtained from the superintendent of the line, York, or from the station-master at any of the stations affected.

## METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Rail way Carriages and Wagons built for cash, or upon deferred payments, extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

ESTABLISHED 1774.

**BLAENAVON COLD BLAST PIG IRON**

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1898.

**GREAT WESTERN RAILWAY COMPANY.**

NOTICE is hereby given, that the next HALF-YEARLY GENERAL MEETING of the Proprietors of this Company will be held, pursuant to Act of Parliament, in London, at Paddington Station, on THURSDAY, the 11th day of August next, at One o'clock in the Afternoon, for the general purposes of business.

At such Meeting, which is hereby specially convened for the purpose, Resolutions will be submitted to the Proprietors:—

To sanction the creation and issue of the Capital authorised by "The Great Western Railway (General Powers) Act, 1894," and "The Great Western Railway (New Works) Act, 1894," and the exercise of borrowing powers and the creation and issue of Debenture Stock.

To authorise the Company to subscribe or contribute towards the Undertaking of the Fishguard and Rosslare Railways and Harbours Company under the provisions of "The Fishguard and Rosslare Railways and Harbours Act, 1894."

At such Meeting, which is hereby also specially convened for the purpose, Resolutions will be submitted to the Proprietors to sanction and approve the following Agreements, viz.:—

An Agreement between the Easton and Church Hope Railway Company and the Great Western and London and South Western Railway Companies for the maintenance, working and user of the Easton and Church Hope Railway.

An Agreement between the North Pembroke-shire and Fishguard Railway Company and the Great Western Railway Company for working the North Pembroke-shire and Fishguard Railway between Clynderwen and Goodwic, near Fishguard.

And Notice is hereby also given, that a SPECIAL GENERAL MEETING of the Proprietors will be held at Paddington Station, on the same day, at Half-past One o'clock in the Afternoon, when the following Order will be submitted for the consideration and, if thought fit, for the approval of such Meeting, viz.:—

"Order authorising the construction of a Light Railway in the Parish of Pewsey, in the county of Wilt."

CAWDOR, Chairman.

G. K. MILLS, Secretary.

Paddington Station, 25th July, 1898.

**LONDON, CHATHAM, and DOVER RAILWAY COMPANY.**

NOTICE is hereby given, that the HALF-YEARLY ORDINARY GENERAL MEETING of the Company will be held at the City Terminus Hotel, Cannon-street, in the City of London, on WEDNESDAY, the 3rd day of August, 1898, at Twelve o'clock at Noon, for the transaction of the ordinary business of the Company.

The Transfer Registers will be Closed from the 18th of July to the 3rd August, both inclusive.

Dated the 5th day of July, 1898.

J. S. FORBES, Chairman.

JOHN MOGGAN, Secretary.

Victoria Station, Pimlico, S.W.

**THE BENGAL-NAGPUR RAILWAY COMPANY, Limited.**

ISSUE OF £400,000 THREE PER CENT. DEBENTURES, GUARANTEED BY THE SECRETARY OF STATE FOR INDIA IN COUNCIL.

**MINIMUM PRICE OF ISSUE—PAR.**

The Directors, with the sanction of the Secretary of State for India in Council, are prepared to receive TENDERS for DEBENTURES of the Company to the amount of £400,000 sterling, bearing Interest at the rate of three per cent. per annum guaranteed to the Company, both as regards Principal and Interest, by the Secretary of State for India in Council.

The Debentures, which will be payable to bearer, will expire on the 18th day of August, 1945, the Interest thereon being payable half-yearly in sterling, in London, by coupons on the 18th day of February and the 18th day of August in each year; the first coupon payable on the 18th February next will be for six months' Interest.

Tenders may be made for the whole or any part of the Issue in sums of £100 or integral multiples thereof, but not for any fractional part of £100, nor at a price below par.

Tenders at a fraction of a shilling other than sixpence will not be preferentially entertained.

In the event of the receipt of Tenders, at or above the minimum price, for a larger amount than that proposed to be raised, the Tenders at the lowest price accepted will be subject to a pro rata diminution.

Tenders must be delivered at the Company's Offices, 132, Gresham House, Old Broad-street, London, E.C., in sealed envelopes addressed to the Directors, marked "Tenders for Debentures," not later than 12 o'clock at Noon on Wednesday, the 3rd day of August, 1898, after which hour the Tenders received will be opened and the Directors will proceed to an Allotment.

Cheques on London for a deposit of five per cent. on the amount tendered for must accompany each Tender, which will be returned in the event of no Allotment being made.

The balance of the price must be paid either in cash or by cheque on London, to the Company's Bankers, Lloyds Bank, Limited, 72, Lombard-street, E.C.—on or before the 16th day of August, 1898.

Should default be made by any allottee in payment of the balance due on Allotment, the Allotment will be liable to be cancelled, and in that case the deposit paid on Application will be forfeited to the Company.

Forms of Tender can be obtained on application at the Company's Offices, where also a form of the Debenture intended to be issued can be seen.

By order of the Board,

ROBERT MILLER, Managing Director.  
132, Gresham House, Old Broad-street,  
22nd July, 1898.

**GREAT SOUTHERN and WESTERN RAILWAY COMPANY, IRELAND.**

NOTICE is hereby given, that the next HALF-YEARLY GENERAL MEETING of the Shareholders of this Company will be held at the Kingsbridge Terminus, Dublin, on SATURDAY, the 13th day of August, 1898, at the hour of 12 o'clock Noon, for the purpose of receiving the Report and Statement of Accounts from the Directors for the Half-year ending 30th June, 1898, and of transacting the general business of the Company.

And Notice is hereby also given, that as soon as such general business is disposed of, or adjourned, the Meeting will be made SPECIAL, for the following purposes, that is to say:—

For the purpose of considering and, if so determined, of passing resolutions approving of the proposed Amalgamation of the Undertakings of the Waterford, Limerick, and Western Railway Company, and the Waterford and Central Ireland Railway Company, with the Undertaking of the Great Southern and Western Railway Company, upon the terms agreed between the respective Boards of these Companies.

For authorising the Directors to subscribe to and take Shares in the Undertaking of the Fishguard and Rosslare Railways and Harbours Company, in a sum of £250,000. And for the purpose of creating £250,000 Ordinary Stock of the Company in pursuance of the powers of the Fishguard and Rosslare Railways and Harbours Act, 1894, and for authorising the issue of such new Stock, at such times, in such amounts, and manner, on such terms, and subject to such conditions as the Meeting shall think fit.

Dated this 26th day of July, 1898.

By order of the Board,

FRAS. B. ORMSBY, Secretary.  
Kingsbridge Terminus, Dublin.

**THE BURMA RAILWAYS COMPANY, Limited.**

The Board of Directors of the Burma Railways Company, Limited, is prepared to receive TENDERS for:—

**STEEL TYRES.**

Specifications and Forms of Tender can be obtained at the Company's Offices, 76, Gresham House, Old Broad-street, E.C.

For each Specification a fee of 10s. will be charged, which will not be returned.

Tenders to be delivered not later than Noon on Wednesday, 17th August, 1898.

The Board do not bind themselves to accept the lowest or any Tender.

By order of the Board,

A. G. BEGBIE, Managing Director.  
26th July, 1898.

**LONDON, BRIGHTON, and SOUTH COAST RAILWAY COMPANY.**

At the ONE HUNDRED and FIFTH ORDINARY HALF-YEARLY GENERAL MEETING of the Proprietors of the London, Brighton, and South Coast Railway, held in the General Meeting Room, situate in the Offices of the Company at their London-bridge Terminus, Southwark, in the County of London, on Wednesday, the 27th day of July, 1898,

The Right Hon. Lord COTTESLOE in the Chair, it was resolved:—

1. "That the Report of the Directors for the Half-year ending the 30th June, 1898, now submitted, together with the Half-yearly Statement of Accounts, be received and adopted."

2. "That Dividends for the Half-year of £2 5s. 0d. per cent. on the Undivided Ordinary Stock, and £3 0s. 0d. per cent. on the Preferred Ordinary Stock, be and the same are hereby declared."

3. "That the Directors be and they are hereby authorised to formulate and carry into effect, in accordance with the provisions of the Workmen's Compensation Act, 1897, the Scheme now submitted for insuring the workmen in the employ of the Company against personal injury by accident arising out of and in the course of the employment, with such amendments therein as may be required by the Registrar of Friendly Societies and be approved by the Directors, and that the Directors be and they are hereby authorised to apply the revenues of the Company to the purposes of such Scheme."

COTTESLOE, Chairman.

The Chairman having left the Chair, it was unanimously resolved:—

"That the best thanks of this Meeting be given to the Chairman and Directors for their able conduct of the business of the Company."

**Meetings.****LONDON CHATHAM AND DOVER RAILWAY.**

The half-yearly general meeting was held on Wednesday, at the Cannon-street Hotel, E.C.; Mr. J. S. FORBES presiding.

The SECRETARY (Mr. John Morgan) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—I propose to go through the paragraphs, not at too great length, until we come to the one in particular dealing with the results of the half-year. It is very much in the old form. No. 1, No. 2, and No. 3 tell you exactly what the progress was that we made in the half-year, which was not quite so good a half-year for us as for some of our neighbours. We had a very fair increase in the gross receipts, but unfortunately, though not quite to the extent as some of our neighbours, we were punished in the working expenses. I had, perhaps, better, in relation to these paragraphs, give you some few details as I am in the habit of doing. Anybody familiar with the accounts can follow them for himself, but as it is not given to all to have the gift of analysis, I had better perform it. As you will see by paragraph 1, the increase in the gross receipts was 16,500l. from all sources of traffic—passengers 2,092l., merchandise and live stock and minerals together about 10,500l., rents and miscellaneous income 3,248l., and steamboat earnings 1,044l. Being strictly *ad rem* of what we shall talk about when we come to paragraph 10, I may say that that result—that small increase in the steamboat earnings—was attributable in a considerable measure to the fact that our late competitors—I trust, our new associates—the South Eastern, had entered into a more active competition during the half-year than in the preceding periods, and at very great cost to themselves and some heartburnings to their friends, they managed to abstract a few thousands of pounds from our route and their own in which they were partners in order that they might pay a great deal more for conducting that business than they got out of it in gross receipts. ("Hear, hear.") Well, that is an object-lesson, and it is a very curious thing—I am not breaching any confidence when I tell you—that the principal business we are met here to-day to discuss, and if you please to determine, arose from a recognition on both sides that that act and a little retributive act of our own in the same direction was an absolute folly. ("Hear, hear.") Happily, the spirit of things with our partners is changed. ("Hear, hear.") The old competitive element has died out—"Hear, hear," and a VOICE—"Bravo"—and at last, after many years, there is a chance for men of peace, like myself and your directors. (Laughter and applause.) Well, we have improved the occasion. In a few words it was settled that, in the interests of everybody, that state of things ought to be put an end to, and the result is what I shall have to explain to you later; but it just shows that but for our partners competing with us out of their own pocket, we, and both of us, would have been a good deal better off this half-year. Now if anybody—any reasonable man—wants an apology for bringing together in closer accord the two companies, I think that will be, as I have said, an object-lesson. When we come to the expenses, fortunately we do present a contrast, because we find that our working expenses have not absorbed all the increased traffic—"Hear, hear"—for I tell you that with the element of wages always going up, rates and taxes always going up, this year, by one of those strokes of fortune which cannot be foreseen or avoided, the coal bill, owing to the strike of the colliers in Wales, has cost our small company during the half-year close upon 6,000l. extra. Therefore dealing with those items, they are these—the maintenance and renewal of way and the stations, and so forth, has come to 5,687l. more than in the corresponding half, and the locomotive expenses to 7,982l.—of which about 6,000l. is the extra cost of coal. It is true we ran more mileage—a considerable quantity more mileage—but not such a quantity as would account for more than about 1,000l. Well, then, running more mileage of course means more wages and more repairs. We have run 61,477 train miles more in the half-year, and if those train miles had been run—as I trust they will be in future—not over lines already more than sufficiently served with power, but over those lines of both companies which by union can be made new main lines—"Hear, hear"—between points which otherwise would have been alien to both companies, you will see what is likely to arise from transferring surpluses from one place to that which was sadly wanted to develop traffic in another. Now, I am telling you as I go along pretty much the underlying principles of the agreement which we shall propose to you. Out of 4,837l. increase in traffic expenses, salaries and wages have absorbed 3,033l. The philanthropic spirit of the day involves a constant diminution of hours and a constant increase in wages—the fair share of the working classes. All right! (Laughter.) The other general charges are very small, but it all comes to this—that there was an increase of expenditure of 13,970l., which leaves us a very small balance of 16,000l. odd of increase. But, there it is, it is the inevitable; it might have been better, it certainly might have been worse, because, as you know, some other companies have absorbed much more than their increased earnings in their increased cost. The result of the thing is that we have such an amount of profit to carry forward as produces on the face of our report an extremely pleasant item, because, if you will kindly look at No. 4—that long table—over, dear me! twenty-four years, showing the progress of the concern from small beginnings, you find for the first time, or, at all events, last year you found for the first time, the necessity of adding a new column to the disposition of our profits in dividends on the second preference stock. ("Hear, hear.") You will see those, I think, are eloquent figures, when they are honest ones. ("Hear, hear," and laughter.) In 1897, for the first time, those people who had waited, with exemplary patience, for a number of years—not, I will say, without causing my colleagues and myself a certain *mauvais quatre d'heure* from time to time—at last tasted blood, and in 1898, you will see, for one year we have been able to give them another 1l. 10s. for their yearly dividend. Well, that takes a load off our shoulders, and I am sure it must be satisfactory to the recipients, at least, and I dare say the contrast between the market value of the preference

shares three or four years ago and to-day when they are at a large premium, but not, I think, if you confirm this agreement, too high a premium—"Hear, hear"—that will, I think, justify our persistence and their long waiting. ("Hear, hear.") Now, the appropriation of it will be found in account No. 10, and we shall recommend the payment upon the arbitration preference stock of the full amount. You know we pay that half-yearly, and we cannot pay anything upon the second preferences until the result of the working of the entire year, which, in our case, is the year ending June 30th. We cannot distribute anything to the second preference-holders until the result of the entire year is known, and it is our happiness, I may say, to be able to pay the second 2½. per cent. for the half-year upon the first preference, and, with your sanction, to distribute to the second preference the 2½. 15s. for the year ending June 30th, as I have already explained to you. I shall move a resolution presently in accordance with that proposition. Well, then, we feel that we may congratulate the proprietors upon the financial results. I have already discounted that statement by explaining to you the reasons why things are not better, and some of the reasons why things are not worse, and I am afraid you will be obliged to put up with the consequences, whatever they are. Now, we come to "Parliamentary." We have had a Bill before Parliament involving matters comparatively unimportant, but still important in themselves. We have been bothered for a great many years by great difficulties and great dangers attending level crossings. Remember the difficulties under which this railroad was constructed, lying in a country of sparse population, through agricultural lands chiefly in the neighbourhood of towns. Level crossings are inconvenient to the traffic of those towns, and year after year they have become a trouble and a danger, and a great inconvenience to the local residents; and for many years past from time to time we have, as opportunity offered, by agreement, or Act of Parliament, stopped up a great number of them. This Bill deals with some of the last, and certainly some of the most important. One of them is at the entrance to the town of Faversham—one of our chief towns, a very busy town, and this caused a great deal of trouble and risk to the company, and extreme inconvenience to the inhabitants. That has been got rid of. At Dover, where the company, being committed to considerable risks in reference to the great improvements to the harbour, we were terribly interfered with in our business, as there were level crossings between our station and the pier. Those we have succeeded, subject to certain references to arbitration, in getting rid of, and the reference does not at all interfere with the power of shutting them up. It only interferes with the question of how some alternative road is to be provided, which is reasonably necessary, and which is a reasonable recompense for the advantage we get by covering up those crossings. Those are the objects of this Bill, and I am happy to say that the Bill, after opposition in one of the Houses of Parliament, received the Royal Assent. That is another illustration of the advantages of being agreed, having a common interest, having no competition underlying even an agreement, because our chief opponents there were the South Eastern Railway Company. Under the new light they withdrew their opposition in the second House. Being, as we hope to be, partners without any conflict of interest whatever, there was no reason why the small difficulties they foresaw, and which set them in motion as opponents, should not give way to the larger interests of the two companies when united. (Applause.) Well, we have been wretchedly poor for years, and we dared not come to those patient, constant, faithful friends of ours—the shareholders, and impose upon them burdens until it was absolutely necessary. Happily we have been lately a little better off, and we have been enabled now to do what we might have well done several years ago—put upon our railway not only more stock, but greatly improved stock. ("Hear, hear.") We have had an advantage—there is no unmixed evil in the world—and our delay, at all events, gave us this advantage, that we had the benefit of the experience of other people; and I think our new stock which has been put on is the best thing that has been done up to date—not as luxurious or outwardly decorative as some I have seen about the country, with a sort of American flavour about them, but with a solid comfort and security as good as can be found. Well, we have spent 110,000*l.* upon that. We contemplated having a considerable expenditure upon more wagons, as we stated in the report. But this new revelation has exposed certain possibilities. Two sets of plant turned into one plant may make it possible to postpone for a period further expenditure. You certainly can get a great deal more out of two machines worked together for a common object than you can get out of them when the object is only partially common and part of it opposition, and it is very likely, when the admirable stock of the South Eastern circulates freely over the Chatham lines, and the admirable stock of the Chatham—(laughter)—circulates freely over the South Eastern lines, there may be a possibility of the postponement of burdens, which is worth something in yearly interest. ("Hear, hear.") That brings me really to the end of the report, and as I am quite sure you are as anxious to hear, as I am to tell you, what is embodied in No. 10, I may go from that part of the business, proposing, as I shall do presently, the several resolutions relative to the distribution of the dividend, and come to paragraph 10, always premising that if anybody is curious in accounts, and is not satisfied with the general results, I shall be prepared to answer any questions which honourable proprietors think fit to put to me. Now, with regard to paragraph 10, that is a very refreshing paragraph. We are actually in friendly conference with the South Eastern. ("Hear, hear.") When I remember the nine years of litigation which we went through, and what it entailed in labour, responsibility, sleepless nights, trembling as to what might result from legal procedure, I certainly prefer the easier and the wiser course of friendly conference. ("Hear, hear.") Now, what to do? The report says:—"With the view of concluding an arrangement for the more efficient and economical working of the competitive traffic of the two companies." Well, that means exactly what I have told you. One of the radical errors of the old agreement sanctioned years ago by Parliament, confirmed in its details by Parliament, was that a penal clause, which with infinite difficulty I, as one of the negotiators, induced the parties to agree to, was that anybody who carried more than his proportion of traffic should carry it for

15 per cent. of the gross receipts. Well, we must not blame dead men; the men who were weak on that occasion, and who gave way, are in their graves, and therefore *de mortuis*; I have no doubt they acted with the best intentions, but unfortunately they admitted an arbitration clause under which from time to time it was competent for either party to appeal to an arbitrator to award a larger proportion than 15 per cent. to either party for carrying excess traffic. Well, we had one arbitration, and for the sake of peace we, the Chatham, consented to 25 per cent. It referred to a period long past—a period from which the notice had been given, and the second period to which it applied was very soon running out, and it had scarcely run out before there was another appeal to a very competent arbitrator—the greatest arbitrator I have met with in my business or profession, if it be a profession—the great Mr. Thomas Harrison. He, in an evil moment for both of us, awarded 4½ per cent., and therefore you see he gave a premium to each company to tout, compete, and solicit traffic, because at 4½ per cent. it was worth their while. It has cost these two companies hundreds of thousands of pounds. ("Hear, hear.") There it was; and such was the state of things until that happy moment when that chance conversation brought about this agreement if you approve of it—that it is folly to go on, that we must remove this temptation from each other, that we must have such a binding connection between the two concerns, that there can be no possibility of any conflict of interest. Well, that is the object of the agreement. It says here in general terms, guarded terms; because, let me warn you, this arrangement, which is beneficial for the public first and for you, is sure to have enemies out of doors. The suspicion, the unjust suspicion, with which railway companies are viewed, is a case of "benefits forgot;" but we are sure to have that suspicion, and it is necessary to be cautious. After much discussion the terms are practically settled, "and it is hoped they will have been finally determined, and the agreement itself exchanged in time to allow for its submission to the proprietors at the forthcoming meeting." Well, I shall have the pleasure not of reading to you the agreement, for it is so extremely complex and so technical that it would be doing you no injustice to say that I think you would have great difficulty in following it, and therefore if you will allow me I will tell you in simple language and in a comprehensible way what the agreement purports to do, and what it will do if you approve of it; but I shall have to move a separate resolution when I come to that later on, after you have received the report and accounts, and passed the dividend, and so forth. Going along, and subject to taking it up more seriously when I submit the resolution to you, I will now, if you please, end my story, and move:—"That the report of the directors and statements of account be received and adopted, and that the dividends be paid on the 17th inst. as recommended therein."

Sir SYDNEY H. WATERLOW, Bart.—I beg leave to second that resolution. This, of course, is the formal business that we always do, and I, like you, will wait until we hear Mr. Forbes's explanation of the agreement; but, with reference to the agreement, let me say this—that through your kindness I have had a seat at the Chatham board for more than a quarter of a century, and during the whole of that time, as a business man, I have been looking forward to what you will be asked to do to-day—to put a stop to that foolish competition with your neighbour which has been such an injury to both of us. When we can work over their line, and they can work over our line, and when it is one concern, I am perfectly satisfied that it will bring an additional profit both to the South Eastern and to the Chatham, and that the Chatham ordinary shareholders will be nearer to a dividend than ever they were.

After some remarks by Mr. NEWBY,

The resolution was put to the vote and carried unanimously.

The CHAIRMAN—Now we come to the agreement, and this is the resolution which I shall have to propose to you:—"That the agreement between the company and the South Eastern Railway Company for the more efficient and economical working of the competitive traffic of the two companies now submitted be and the same is hereby approved, subject to such alterations and modifications therein as the directors may consider necessary or expedient." Here is the document, and there are twelve pages of printed matter. It has been very carefully prepared by most astute counsel in order to carry out what on the face of it seems to be a very simple thing. Perhaps I had better try to make clear to you exactly what the position is. Under a very old Act of Parliament, we were authorised to deal with the Continental traffic for the purpose of working it efficiently and economically. The principles of that agreement have been in operation for a great many years. The only thing which made it less useful than it might have been was the fact that I have already adverted to—viz., that the competitive element was left in at an unsettled figure as regards the allowance to the company which carried more than their proportion. Of course, that agreement, as this one, has to determine beforehand what proportion of the gross profits, that is to say the difference between all the money we take in connection with the traffic, and all the money we spend to earn it—what proportion of that balance of profit is to be handed over to the one company or the other to be by them again distributed to their shareholders or debenture-holders. Now, all that has been recognised and worked upon, and then we went a little further. We found the Continental traffic, important as it is, was not all our traffic, in fact it was only a small proportion relatively to the rest of the traffic of the two railways, and in a subsequent Act of Parliament we got very specific power that the companies should be entitled in respect of the competitive traffic to do what they had already done in respect of the Continental traffic, that is to combine their forces in order that that traffic might be worked more efficiently, which means in the interest of the public, and more economically, which means in the interest of the shareholders. Upon these two agreements we proceeded, and the whole of this document which I now hold turns upon the application of those two principles to the competitive traffic of the company, whatever that may be, and to the division of the profits made upon that traffic when, having been worked more efficiently in the interest of the public, and more economically in the interest of the proprietors, there is presumably a profit, and a larger profit than under the present extremely wasteful state of things. But this simple proposition required a great deal of

language, and language of a character so very complex and technical that even I, having been in this business a good many years, and interpreted all sorts of agreements and Acts of Parliament, if I were pressed by some learned friend, for instance, with a searching mind, to reconcile myself to every word in this paper, I should not be able to do it. But what I do know, and give you my assurance of, is that this document contains safely and certainly those principles that we are to combine, that we are to render efficient service, which means of course to the public, because the greater efficiency must mean public benefit, and that we must work it economically, as economically as is consistent with efficiency in the interests of our shareholders. ("Hear, hear.") Then comes the definition of what is competitive traffic. Well, that is where this agreement is ticklish. I cannot explain it to you. I know what it means, but perhaps you would not. Such of our traffic as can reasonably and fairly be defined to be competitive traffic is the subject of this agreement, and that means terrible schedules, the study of a vast number of details, all of which have to be worked out with great labour by the official staff before they can be embodied in a document of this sort. Therefore, with this agreement are a number of schedules which must exceed it in bulk two or three times by the time we have got them ready; but we cannot wait another year, or even six months, while that mechanism is being worked out and submitted for the approval of our shareholders. Thus we have to draw on your confidence for your authority to bring within the scope of that agreement all the traffic which can by reasonable interpretation be called competitive traffic. It involves enormous labour, but it has to be undergone, and as this agreement is proposed to come into operation on January 1st next year, I am quite certain that the consequences of it, if you approve it, will involve very diligent application, very serious responsibility on the directors and officers and the establishment of both companies to get it ready in time. Having determined what this traffic is, it is to be relegated to the administration of a joint committee; in fact, the very same machinery as was sanctioned by Parliament in detail, the very language of it, in the Continental agreement, and the principles underlying that agreement, are to be applied to this enlargement of it. This is nothing in the world, in principle, but the enlargement of the Continental agreement—that is to say, each company appoints certain members, those members form a managing committee, that managing committee is paramount, and takes possession of the whole establishment—railways, carriages, engines, stations, steamboats, and all appurtenances connected with the conduct of the traffic of these two great companies, and treats it as if it were the property of one company acting under a board of that character. They take all the money, they pay all the expenses, and they make up their minds beforehand—a very tough job, I can assure you—as to, out of every 100l. of profit, how much is to be attributable to one partner and how much to the other. It is astonishing when we are comparing our respective merits with each other what differences of opinion arise; when I am trying to persuade some other gentlemen that, altogether, my claims to his consideration are so and so, perhaps he may not see it; he may not take quite the same view of me as I do of myself. I have my own doubts about his own valuation; but if you have got to be united you must come to a conclusion. That is the process that is going on. Our colleagues have been kind enough to impose on two men a fearful responsibility, but in virtue of our position as chairmen—you cannot be chairman of a board unless you can enlist the confidence of your colleagues, and that involves very serious obligations—obligations both of duty and of honour not only to the shareholders, but to your colleagues. Well, this has been remitted to Mr. Bonsor, a very competent man, not quite so old at this game as myself, but I venture to say a most promising pupil, and we have got to determine one or two knotty points which are not quite determined, because until you have made up your mind as to the class of thing which is to come into the pot, and had an opportunity by accurate inquiry and analogy, much deeper than the mere surface as presented in the report and accounts involved, it takes some time and some patience. We are engaged in ascertaining these schedules and what is attaching to them, when they are ascertained in the nature of money-earning power by our past experience; what the probabilities are, looking at the relative progress of the companies during a term of years, and that one company is doing a little better single-handed comparatively than the other, and to sum up all these things into a common denominator, that common denominator being not yet determined—it is very nearly ascertained, but not quite. That is left also to Mr. Bonsor and myself by the confidence and courtesy of our colleagues, and I am not in a position to say more than I believe that, in all particulars, we are so near agreement that I scarcely know on which side of the balance I must declare the advantage to be. I know that it must result in a great common advantage on both sides, and I trust that, inasmuch as a strong man is always generous, my weak arguments and impoverished position have given me some access to the heart and generosity of my opponent. I can promise you that better terms for you will be conceded and assured than the absolute figures justify. ("Hear, hear.") Mr. Bonsor, at the South Eastern meeting, was kind enough to enlarge upon this. I think he told you all about it, and admitted that to the South Eastern Company the alliance was worth something more than the absolute book value of the Chatham Company. He is a very wise man to appreciate that, and, therefore, in virtue of that and the great advantages which, in any case, must accrue to the South Eastern, he was willing to be not only just, but generous. (Applause.) Now, I wish to say this—you must take it for what it is worth—that my impression is that when this agreement, after your confirmation, is sealed, the result to the Chatham proprietors will be very satisfactory. (Applause.) I think the second preference-holders will not have to wait long for the balance of their dividend, and, unless all forecasts are disappointed, unless there is some great, sudden, unforeseen change attending the administration and results of these great companies, the ordinary shareholder is in a position of great comfort compared with any he has been in ever since I have had the honour of his acquaintance. Looking forward five or ten years, well, I should be sorry to estimate what the advantages will be. We shall not have to look forward so long as that, because this agreement is only the

prelude to another more important one, in which, perhaps, when we come to a deal it is possible the Chatham ordinary shareholder will have another chance, because we are both satisfied—both boards, I think, and certainly both chairmen—that the wise and politic thing will be in due season, not too rapidly, perhaps, not without some addition to our experience, not without great deliberation and consideration and preparing the way, to go to Parliament for an absolute amalgamation of the capitals and properties of these companies. (Applause.) In our negotiations with the South Eastern we made it a point—although we had absolute power under the Acts of Parliament to enter into an agreement of this sort without any reference to the proprietors—that we would go into nothing without the entire sanction of a general meeting of the company. That is why we bring it to you to-day. If you like I will read you the agreement. (Cries of "No, no.") It may not be palatable to everybody; I dare say some of our neighbours do not like the idea of these two companies being combined, and I know there are certain philanthropic and philosophic members of Parliament who do not like the idea of any railway company doing anything they can to help themselves. I want to warn you about that. Need I, after being before you for so many years, appeal to you for your confidence? (Cries of "No.") Do you doubt for a moment the wisdom of leaving a matter so intricate and important to my colleagues and myself? We request you to trust us. We know your trust heretofore has been so unbounded and constant that we feel in a matter of this delicacy we can ask you to trust us further in a matter so near to our hearts. The moment this document is sealed a terrible weight of anxiety which has rested upon the shoulders of every man at this table, and of myself not least of all, will be greatly lightened and your interest will be greatly secured.

Sir SYDNEY WATERLOW seconded the resolution, which, after a few words from Mr. ST. CEDD and Mr. NEWBY, was put to the meeting and carried unanimously.

The CHAIRMAN expressed his pleasure at the unanimity with which the resolution had been passed, remarking that it was an echo of the vote passed at the South Eastern, and under the circumstances the wisdom and justice of the proposal were apparent. He also acknowledged the great courtesy, consideration, and generous treatment he had received at the hands of Mr. Bonsor. He pointed out that the two companies would remain separate entities, and remarked that, although he would not, perhaps, meet the proprietors for very long, or as a member of the joint committee to which they had now committed their interest so fully, the directors remained, of course, for the present charged with the administration of the company in those essentials which were not traffic, and he would, as usual, have the pleasure, he trusted, so long as he was favoured with the confidence of the shareholders, of addressing them from time to time as their chairman, or, at all events, as one of the directors of the company, so long as the two undertakings were not further fused. He hoped it would fall to his lot, instead of having nothing to distribute to the ordinary shareholder, to tell him, "Here is a plum for you." However, the crowning of the edifice would be the absolute fusion and amalgamation of the two companies—the vesting of all the property in the hands of one great company.

On the motion of Mr. ST. CEDD, seconded by Mr. E. CHAPMAN, a vote of thanks was accorded the chairman and directors, secretary, and staff, and the proceedings then terminated.

### METROPOLITAN DISTRICT RAILWAY.

The half-yearly general meeting was held yesterday at the Westminster Palace Hotel; Mr. J. S. FORBES presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that in total receipts there had been a decrease, as compared with the corresponding half of last year, of 1,738l., although the working expenses had increased by 1,615l. The reasons underlying these two figures were quite apparent, and, according to the view of those on his side of the table, fairly satisfactory. In comparing the receipts of the half-year with those of the corresponding half of 1897, it must be remembered that in June, 1897, the abnormal traffic consequent on the Jubilee brought about 8,000l. into the coffers of the company. It should, therefore, be considered satisfactory that the volume of receipts had been so well maintained. Let them make comparison with the June half of 1896, and they would find an increase of 8,408l. The increase of 1,615l. in working expenses was due in a considerable measure to the increased cost of coal. The revenue account showed a profit of 122,000l., against 125,000l., being a decrease. Naturally a diminution of receipts and an increase of working expenses produced on the net revenue account a double result. After paying the interest on debentures and debenture stock, and the several rent-charges, there was a balance of 59,011l., which admitted the full interest on the guaranteed stock and 4 per cent. on the preference stock, leaving 4,735l. to be carried forward. That was really the substance of the whole matter. They then came to new works, which were a very material element in the calculations of the board. They had entered, with the shareholders' full sanction, upon a course of extension, west and east. The results of their extension westward had been the salvation—as far as they had been saved—of the company, because from them came that money which made up their dividend; and when he told them that all the money they had spent on these extensions returned to them 5 per cent. of net income in support of the earnings of the main line, they would see how important that was. They were committed to a further progress in that direction. As they knew, after great deliberations and exhaustive conferences, they were going to extend from Ealing to Harrow and from Harrow to Uxbridge. And then there was the extension from Whitechapel to Bow. Parliament had sanctioned each of these schemes. One of them was in active progress. The Whitechapel and Bow, which was delayed a year ago in consequence of the Tilbury Company not having acquired Parliamentary powers, would be started almost immediately, and the Uxbridge line was being surveyed. The earliest opportunity would be taken of proceeding with it. There were other works of interest. They were fortunate enough to be able to defeat a project for a railway from Shepherd's-bush, or some neighbourhood beyond Hammersmith

and under Piccadilly, in direct competition with themselves. They induced the committee to agree to a Bill for a branch line from South Kensington to Regent-circus. There was one other matter—the application of electrical power to their railway. The shareholders had sanctioned in a Bill the acquisition of powers to apply electricity to their railway, and now in accord with the Metropolitan Company, they had authorised two perfectly competent people, Sir J. Wolff Barry and Mr. W. H. Price, the electrician to the Post office, to study the matter specifically and experimentally. Their railway was of a totally different character from that which was being made down Oxford-street, for it was part in tunnel, part on girders, and part on arches, involving very difficult questions of structure. It was also necessary to remember that for a time at least they would be under the obligation to admit other trains upon their railway, which would be driven by steam, so that the question was not so easily settled. They could not afford to be in a hurry over a matter of that sort. There was another very ambitious scheme, and that was the duplicate railway under the District line between Earl's-court and the Mansion-house. That involved serious financial liabilities, which it was perhaps advisable to think over for a term of years. When the electrical question was solved they might be able to turn their minds to the bigger questions, and then perhaps it would be more easy to raise a million and a half of money than it was at present. They had no doubt received circulars from Mr. Pond. What the shareholders had to do was to make up their minds whether they were going to support him or the directors. The board had received 708 proxies, with 13,665 votes. Mr. Pond had 302 proxies, with 5,067 votes. If any issue was raised the directors would use their proxies.

Viscount GORT seconded the resolution.

Mr. POND defended the action he had taken. He was not in antagonism to the board, but he thought that if new blood were introduced it would be beneficial to the interests of the shareholders, to promote which was his sole object. He had advocated the appointment of Mr. Murray-Griffiths and Mr. Spike to the board, and he would demand that a poll be taken and that he should appoint one scrutineer.

The CHAIRMAN said Mr. Pond should have all his legal rights.

Mr. DONKIN was not satisfied with the administration of the line, and thought some of the directors should have retired years ago. If a committee were formed to meet the debenture-holders they might succeed in getting the 6 per cent. interest reduced to 4 per cent. He moved that they should adjourn the meeting for a month, and that a committee partly of directors and partly of shareholders should be formed to consider what had better be done to get them out of their difficulties. They might approach the Metropolitan with a view to amalgamation.

Mr. WRIGHTMAN seconded Mr. Donkin's motion. He urged the advisability of not falling out, and that this was a most unfortunate moment for raising any difficulties.

Mr. R. W. PERKS, M.P., said he held 100,000l. of the ordinary stock of the company. He had studied their business for a long time, because for fifteen years he was the legal adviser of their great opponents, the Metropolitan. In his circular Mr. Pond suggested an amalgamation, or fusion, with the Metropolitan Railway Company. He thought the present a most unfortunate moment to commence any negotiation with the Metropolitan Company, because now that company was abnormally strong and they were weak. Again, at the present time they were about to go on with a line of policy which had resulted in the prosperity of the Metropolitan line. Mr. Pond and his friends did not seem inclined to give the board fair credit for what they had accomplished during the past few years. The eastward extension would result in their obtaining a connection with the docks, and thus provide a large amount of remunerative goods traffic.

Mr. LOVERIDGE pointed out that the stations should be made more attractive, and that some efforts should be made to attract public attention to the position of the stations by means of large boards conspicuously placed in the main thoroughfares.

After further discussion, the resolution was put to the meeting and carried, only six voting in opposition.

A motion agreeing to the preference dividend recommended in the report was also carried.

Mr. POND demanded a poll, and in reply the CHAIRMAN promised that he should have his full legal rights. He had conducted the business of the meeting in conformity with the requirements of the law.

Mr. POND—If you want me to go to Westminster Police-court, I go there. I demand a poll.

The CHAIRMAN—A poll on what?

Mr. POND—On the accounts. I oppose the passing of the accounts.

The CHAIRMAN—They have been decided and carried. I declare the meeting dissolved.

### BEIRA RAILWAY.

The second ordinary general meeting of the Beira Railway Company, Limited, was held yesterday at Winchester House, E.C.; Mr. H. T. VAN LAUN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which will be found in another column), pointed out that the company was registered in 1882, so that the figures covered a period of five and a half years. The directors were unable for many reasons to meet the shareholders earlier, but the chief thing was the difficulty in obtaining correct figures from Africa during the construction of the line. He thought the shareholders would not consider the cost of construction in any way heavy when the difficulties of the country through which the line was constructed were considered. Hundreds of Kaffirs had to be employed in cutting away the undergrowth and trees to make paths for the surveyors and to permit a rough survey to be made, no human being ever having walked over the ground where now the line had been made. In some cases the jungle was full of wild beasts, and several lions had been shot. As it was thought advisable to commence the construction of the line as high up the River Pangwe as possible, so as to make it as short as possible, it was begun at Fontesville, 55 miles up the river. After-

wards, when the traffic showed signs of increasing, it was found necessary to arrange for the construction of a line from Port Beira to Fontesville. Every effort had been made to improve the line when necessary, and the railway had now been completed from the sea to the British frontier, some 223 miles. It was now in process of being connected with a railway which would run from the head of their line to Salisbury. The directors had had many difficulties to contend with, their work having been really to carry out that of a cabinet of diplomatists. Agreements had, however, been come to with the Mozambique Company, while Mr. Cecil Rhodes had helped them in many ways. He (the chairman) hoped he would be able to report at some future meeting that through traffic had been established from Beira to Cape Town, and that a dividend was in the course of being earned. He considered the shareholders had every reason to congratulate themselves on the report, especially on the fact that the line was being energetically extended to Salisbury. That meant, of course, a very large increase of traffic to the line. At present they were earning by the working arrangement with Messrs. Pauling 60,000l. a year on the joint lines.

Mr. L. R. C. BOYLE seconded the motion, which was agreed to.

The directors were subsequently voted 3,000l. for the 5½ years' services to the end of 1897.

## Directors' Reports.

### NORTH LONDON RAILWAY.

#### CAPITAL.

June 30th, 1898.—The expenditure on capital account to date amounts to 4,026,165l., whilst the receipts have been 3,973,057l., viz.:—

Ordinary stock .....	£1,975,000
Preference stocks .....	995,400
Debenture stock .....	970,866
Sundries .....	31,791

Balance at debit of capital account, 53,108l. The expenditure during the past half-year amounted to 6,257l. The estimate of further expenditure is 9,500l. in the current half-year, and 20,000l. in subsequent half-years; together, 29,500l. The capital powers and other assets are 345,450l.

#### REVENUE.

The revenue account for the half-year ending June 30th shows the following results:—

	1897.	1898.
Passengers, parcels, &c. ....	£167,012	£162,475
Goods, minerals, &c. ....	80,954	84,763
Sundries .....	16,842	17,930
<b>Total receipts .....</b>	<b>£264,808</b>	<b>£265,168</b>
<b>Total expenditure .....</b>	<b>136,801</b>	<b>141,922</b>
<b>Net earnings .....</b>	<b>£128,007</b>	<b>£123,246</b>
Balance from previous account .....	4,714	7,061
General interest .....	587	923
<b>Total .....</b>	<b>£133,308</b>	<b>£131,230</b>
Prior charges .....	£29,954	£26,982
Preference dividends .....	21,375	21,375
Dividend on ordinary stock .....	75,765	75,765
Balance to next half-year .....	6,214	7,108

**Total .....** £133,308 ... £131,230

\* At the rate of 7½ per cent. per annum. † At 7½ per cent. per annum.

The gross receipts for the past half-year show an increase of 360l., the expenses an increase of 5,121l., and the net receipts a decrease of 4,761l. The ratio of expenses to receipts is 53·52 per cent. (as against 51·86 per cent.).

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers (total number) .....	23,877,175	23,456,243
Season-tickets .....	37,464	38,096
Mileage—Lines owned .....	12	12
" Joint lines (leased).....	5	5
" Foreign lines worked over .....	98	98
" Total .....	115	115
Train mileage*—Passengers .....	1,000,967	1,000,957
" Goods .....	238,225	212,775
" Total .....	1,239,192	1,213,732

\* Including miles run by trains of other companies.

The report states:—

"The passenger receipts for the June half-year of 1897 were increased by traffic in connection with the Jubilee celebrations; and in the half-year under review have to some extent been adversely affected by competition, and also by the exceptional weather experienced during the six months.

"The increased expenditure is largely due to the enhanced cost of coal consequent on the strike in South Wales, and to revision in the scale of wages of the staff.

"The 'Workmen's Compensation Act, 1897,' having been operative since July 1st, provision will in future half-yearly accounts be made for the obligations of the company under the Act.

"Rapid progress has been made with the works for widening the lock entrance to Poplar Docks, and it is anticipated that it will be ready for opening at the end of the current year."

### VALE OF GLAMORGAN RAILWAY.

The accounts for the half-year ending June 30th, 1898, show the revenue to have been as follows:—40 per cent. of gross receipts,

1,730*l.*; amount payable by Barry Railway Company under agreement, 2,594*l.*; total, 4,324*l.* General charges, &c., amounted to 450*l.*, leaving a net revenue of 3,874*l.*, of which interest to bankers absorbed 1,616*l.*, and debenture interest 1,960*l.*, leaving a balance of 298*l.* to be carried forward. The capital account showed an expenditure of 554,368*l.*, whilst the receipts have been 483,025*l.*—viz., ordinary stock, 360,000*l.*; 3 per cent. debenture stock, 112,000*l.*; premiums, 11,025*l.* The report states:—

"The amount of capital expended during the half-year is 5,332*l.* In the last half-yearly report mention was made of the failure of a part of the Porthkerry Viaduct. In order to make good the defects which have been discovered, works of a somewhat extensive character have been put in hand and are being vigorously carried on. Until the question of liability for the giving way of the viaduct has been ascertained the amount expended on the works above-mentioned has been carried to a suspense account. Pending the restoration of the viaduct, a temporary diversion of the line, 2 miles 44 chains in length, between the east and west ends of that structure, has been made, and after having been inspected on behalf of the Board of Trade, was brought into use on April 25th. The other portions of the line have been reinspected by Colonel Yorke, and favourably reported upon. A strike of the colliers in the neighbourhood, which began on April 1st, and still unfortunately continues, has interfered most seriously with your revenue receipts. Your directors regret that in consequence there is no balance available for dividend."

### GREAT WESTERN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure on this account amounts to 87,571,353*l.*, and the receipts to 88,613,327*l.*, viz.:—

Ordinary stock .....	£25,195,675
Preference and guaranteed stocks .....	37,194,969
Loans .....	3,950
Debenture stock .....	19,942,400
Premiums, &c. ....	6,276,333

Balance at credit on capital account, 1,041,974*l.* The receipts on capital account during the half-year amounted to 1,245,909*l.* The expenditure during the half-year amounted to 608,154*l.*, of which 279,949*l.* was on lines open for traffic, 176,057*l.* on working stock, and 150,603*l.* on lines in course of construction, 300*l.* on docks—together 608,909*l.*, less a credit 755*l.* on subscriptions to other companies. Estimated further expenditure—In the current half-year, 850,000*l.*; in subsequent half-years, 3,674,157*l.*; total, 4,524,157*l.* Capital powers and other available assets, 7,830,917*l.*

#### REVENUE.

The revenue account shows the receipts for the half-year ending June 30th to have been as follows:—

	1897.	1898.
Passengers—First-class .....	£128,322	£127,334
" Second-class .....	209,237	237,474
" Third-class .....	1,246,078	1,266,991
" Season-tickets .....	77,340	81,471
Parcels, horses, carriages, &c. ....	355,105	362,565
Mails .....	65,527	65,725
Merchandise (less coll. and delivery) ..	1,205,246	1,224,001
Live stock .....	62,622	65,027
Minerals .....	1,256,053	1,117,881
Dock and harbour dues, wharfage, &c. ..	23,054	19,718
Canal traffic .....	7,244	7,471
Rents of property, cottages, &c. ....	53,697	53,440
Transfer fees .....	771	834
Mileage and demurrage of rolling stock ..	Dr. 3,331	Dr. 3,392

Total receipts .....

The expenditure on revenue account for the same period was as under:—

Maintenance of way, works, &c. ....	£555,376	£639,242
Locomotive power .....	721,313	759,733
Carriage and wagon repairs .....	239,411	240,772
Traffic expenses .....	790,073	824,916
General charges .....	93,978	97,914
Law charges .....	14,348	9,548
Parliamentary expenses .....	1,681	2,792
Compensation—Personal injury .....	1,944	2,443
" Damage to goods .....	18,412	26,113
Rates and taxes .....	176,143	182,356
Government duty .....	19,568	20,768
Steamboat charges .....	49,647	64,790
Canal expenses .....	9,337	10,036

Total expenditure .....

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance from previous half-year .....	£42,884	£31,351
Net earnings .....	1,995,734	1,745,117
Sundry credits .....	27,141	7,578
Total .....	£2,065,759	£2,174,046
Prior charges .....	£752,193	£744,378
Preference dividends .....	732,133	739,083
Dividend on ordinary stock .....	*565,160	*276,145
Balance to next half-year .....	16,273	24,440

Total .....

\* At 4½ per cent. per annum. † At 2½ per cent. per annum.

The gross receipts for the past half-year show a decrease of 60,425*l.*

the expenses an increase of 190,192*l.*, and the net receipts a decrease of 250,617*l.* The ratio of expenditure to receipts is 62.28 per cent., as against 57.41 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers—First-class .....	675,705	705,623
" Second-class .....	2,659,208	2,935,001
" Third-class .....	31,221,596	32,319,562
" Total .....	34,556,509	35,960,186
Season-tickets .....	23,520	24,909
Mileage—Lines owned .....	2,053½	2,173½
" Partly owned .....	230½	232½
" Leased, rented, or worked ..	404½	304
" Foreign lines worked over ..	102½	101½
" Total operated .....	2,790½	2,812
Train mileage—Passenger .....	10,256,907	10,441,879
" Goods .....	10,264,391	9,951,829
" Total .....	20,521,298	20,393,708

The report states:—

"It will be seen that the receipts of the company have suffered materially in consequence of the coal strike which has prevailed in South Wales for the last few months.

"The various works in hand referred to in previous reports have made good progress during the half-year, notably, the construction of the South Wales and Bristol Direct Railway and of the Stert and Westbury, Avonmouth and East Usk lines; the doubling of the Ely Valley line and of sections of the Cornwall Railway; the extension of the Pennar Branch, the widening of the Berks and Hants Extension Railway, and the erection of new stations at Windsor, Reading, Truro, and Plymouth. The doubling of the Vale of Llangollen line has practically been completed, and contracts have been let for the widening of a further portion of the Monmouthshire Railway and for the new works authorised at the Plymouth Great Western Docks. The construction of the lines between Acton and Wycombe and between Truro and Newquay will shortly be commenced. A valuable site has been secured in contiguity to the Royal Albert Docks for the purpose of establishing a goods depot in that district.

"The course to be adopted in connection with the Workmen's Compensation Act, 1897, which came into operation on the 1st ult., has received the careful consideration of the directors, and they have come to the conclusion that for the present the company should out of their own funds meet the obligations which it imposes.

"To meet the expenditure involved in the construction of the several works referred to in previous reports it became necessary to provide an amount of capital in excess of the ordinary requirements of the company. The directors, considering that this could be done most advantageously by an allotment of stock to the proprietors, determined to make an offer to them of new ordinary stock at the rate of 10*l.* of such stock for every 100*l.* of consolidated ordinary stock held by them, at the price of 150*l.* per 100*l.* of new ordinary stock, payable by instalments, the stock to carry dividend as regards 50 per cent. from January 1st, 1899, and as regards the remaining 50 per cent. from July 1st, 1899. The offer was made in June last, and practically the whole of the stock offered, amounting to about 2,450,000*l.*, has been accepted.

"In order to facilitate the construction and opening at an early date of the railway from Byfield to Banbury authorised by the Great Central Railway Act, 1897, it has been agreed that this company shall in exercise of the powers conferred upon them by the Act apply their capital for the purpose of constructing the line, the Great Central Company paying interest at the rate of 3½ per cent. per annum on the amount so expended and being entitled to repay the principal amount at any time on giving six months' notice.

"Pursuant to notice which has been given to that effect, resolutions will be submitted to the proprietors to sanction the creation and the issue of the capital authorised by 'The Great Western Railway (General Powers) Act, 1898,' and 'The Great Western Railway (New Works) Act, 1899,' and for the exercise of the borrowing powers and the creation and issue of the debenture stock which the company are empowered to create and issue.

"Pursuant to notice which has been given to that effect, the following agreements will be submitted to the proprietors for their approval:—(1) An agreement between the Easton and Church Hope Railway Company and the Great Western and London and South Western railway companies. The Easton and Church Hope Railway is a line in the Isle of Portland about 5 miles in length extending from the Weymouth and Portland Railway, which is worked jointly by the Great Western and London and South Western railway companies, to Church Hope. The agreement provides for the working of the line by the same companies jointly in consideration of the payment to them out of the gross receipts of 2s. 6d. per train mile run. (2) An agreement with the North Pembrokehire and Fishguard Railway Company. This agreement provides for the working by this company at 70 per cent. of the gross receipts of the undertaking of the North Pembrokehire and Fishguard Company, which is completed and open for traffic between Clynderwen and Letterston, and is in course of construction from the latter place to Goodwic, near Fishguard.

#### PARLIAMENTARY.

"The General Powers Bill of the company has received the Royal Assent in substantially the same form as when submitted to the proprietors in February last with the exception that the powers for vesting in this company the undertaking of the Golden Valley Railway Company have been struck out. Under the Bill the undertakings of the Helston Railway Company and the Leominster and Kington Railway Company are transferred to this company as from July 1st last. The Company's New Works Bill has passed through the Committees of both Houses of Parliament and is awaiting the Royal Assent. As submitted to the proprietors in February last the Bill sought power amongst other things to construct a line from Marlow to Henley, but owing to the strong local opposition to the construction of a railway

through this portion of the Thames Valley it was determined to withdraw the provisions relating to the line from the Bill. The remaining railways and works, including the deviation of the authorised Castle Cary and Langport Railway, the Clabeston-road and Letterston Railway and the Weymouth Harbour and railways, have been sanctioned.

"The circumstances relating to the Fishguard and Rosslare Railways and Harbours Bill were set out in the notice to the proprietors convening the special meeting held on the 18th ult. The Bill, together with the clauses introduced into it, giving power to the company to subscribe a sum not exceeding 250,000*l.* towards the undertaking of the Fishguard Company, was approved, and a resolution will be submitted to the proprietors to authorise the company to make the subscription referred to.

"The Windsor and Ascot Railway Bill, which was approved by the proprietors in February last, awaits the Royal Assent. An arrangement was come to with the promoters for the working of the line by this company at 55 per cent. of the gross receipts, and an agreement to give effect thereto has been sanctioned by Parliament. The Bill provides that in the event of the Windsor and Ascot Company failing to raise the capital for the construction of their line, this company may apply its capital for the purpose, receiving interest at the rate of 3 per cent. per annum during construction, and 3½ per cent. from the opening of the line on the capital so applied—the Windsor and Ascot Company having power to repay the principal amount on giving six months' notice.

"The Andoversford and Stratford-upon-Avon, and the Llanelly and Pontardulais Railway Bills which it was found necessary to oppose in the interests of this company have been rejected. Various other Bills and provisional orders, which would have injuriously affected this company's undertaking, and which have been opposed, were rejected, withdrawn, or amended in their progress through Parliament.

"The Board of Trade has confirmed the order for the construction of a light railway between Congresbury and Blagdon, and plans and estimates for the construction of the line are in course of preparation. The order for the construction of a light railway from Pewsey to Salisbury has in consequence of the opposition of the War Department been restricted, unless with their consent, to the portions of the proposed line between Pewsey and the northern boundary of their property on the one hand and Salisbury and the southern boundary of such property on the other, and is now awaiting confirmation by the Board of Trade.

"In conformity with the rules made by the Board of Trade with respect to applications for orders authorising light railways, and in pursuance of notice to that effect, the following order will be submitted for the consideration of the proprietors at a special meeting to be held immediately after the conclusion of the business of the ordinary meeting:—Order authorising the construction of a light railway in the parish of Pewsey in the county of Wilts. Power is sought by this order to authorise, in pursuance of an undertaking given to the Town Council of Devizes when the Pewsey and Salisbury Light Railway order was before the Light Railway Commissioners, the construction of a short loop to connect the proposed Pewsey and Salisbury Light Railway with the Berks and Hants Extension Railway to the west of Pewsey, to permit of the running of through trains over the light railway to and from Devizes.

#### GENERAL.

"A vote of the proprietors will be asked for the following expenditure:—Railway between Byfield and Banbury (on account), 150,000*l.*; Truro and Newquay Railway (on account), 50,000*l.*; Pewsey and Salisbury Light Railway (on account), 50,000*l.*; Wrington Vale Light Railway, 30,000*l.*; branch to Canal Basin, Halesowen, 12,000*l.*; Llanguollen lines (widening, &c.), 10,000*l.*; Shrewsbury Station (on account), 50,000*l.*; Windsor Station, 12,000*l.*; Westbury Station, 30,000*l.*; goods depot at Royal Albert Docks, 50,000*l.*; land and compensation, 50,000*l.*; carriage shed at Swindon, 11,000*l.*; rolling stock (passenger engines, 45,000*l.*; ballast wagons, 10,000*l.*), 55,000*l.*—Total, 560,000*l.*

"It is with much regret that the directors have to record the lamented deaths of two of their colleagues, viz.:—Mr. Henry Rose and Mr. C. T. Murdoch, M.P. Mr. Rose joined the board in 1891, and Mr. Murdoch, who had formerly been chairman of the Llanelly Railway and Dock Company, in 1889. Both of them possessed business qualifications and experience which were of great value in the conduct of the affairs of the company. The vacancies have been filled by the appointments of Mr. Evan Henry Llewellyn, M.P., and Mr. Samuel Ernest Palmer, respectively."

#### BELFAST AND COUNTY DOWN RAILWAY.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 60,804*l.* (as against 60,991*l.*), and a gross expenditure of 35,489*l.* (as against 34,402*l.*). The net revenue (including 5,466*l.* balance from previous account and 880*l.* sundries) amounts to 31,661*l.* Of this prior charges will absorb 7,526*l.*; preference dividends, 10,204*l.*; dividend on ordinary shares at the rate of 6½ per cent. per annum, 12,403*l.*; balance carried forward, 1,528*l.* Length of railway, 76½ miles. The capital account shows a total expenditure of 1,321,402*l.*; whilst the receipts have been 1,292,208*l.*, as follows:—Ordinary stock, 381,650*l.*; preference 5 per cent. stock, 248,141*l.*; preference 4½ per cent. A stock, 50,000*l.*; preference 4 per cent. stock, 200,000*l.*; 3 per cent. baronial guaranteed shares, 17,000*l.*; debenture stock, 319,686*l.*; sundries, 75,731*l.* Reserve fund, 22,958*l.*; steamboat depreciation fund, 11,023*l.* The report states:—

"During the half-year 23,700*l.* of ordinary stock, and 3,520*l.* of 4 per cent. debenture stock, were issued, and the premiums thereon placed to the credit of capital account. The Slieve Donard Hotel, Newcastle, was formally opened by the Countess of Annesley on June 21st. It has since enjoyed a satisfactory share of public patronage, and appears to be giving every satisfaction to visitors. When it becomes more widely known, your directors trust it will prove a valuable addition to the company's property. The doubling of the line between Bangor and Carnalea was completed, and the new line opened for traffic on June 1st, and has proved a great convenience. A further length from Carnalea to Helen's Bay is now in progress. Electric train tablet apparatus has

been introduced between Holywood and Helen's Bay. Additional passenger and goods accommodation is being provided at Newcastle. A new goods store and siding have been commenced at Ballygowan."

#### HULL BARNESLEY & CO. RAILWAY AND DOCK.

##### CAPITAL.

June 30th, 1898.—The expenditure amounts to 7,012,606*l.*, the receipts have been 7,181,983*l.*, viz.:—

Ordinary stock .....	£3,300,000
Preference stock .....	300,000
Debenture stock .....	3,578,947
Premiums .....	3,036

Balance at credit of capital account, 169,377*l.* The capital expenditure in the past half-year amounted to 32,757*l.* Estimated further expenditure—In the current half-year, 88,778*l.*; in subsequent half-years, uncertain. Capital powers and other available assets, 1,569,377*l.*

##### REVENUE.

This account for the half-year ending June 30th shows the receipts to have been as follows:—

	1897.	1898.
Passengers, parcels, &c. ....	£13,639	£14,753
Goods, minerals, and live stock .....	117,986	138,987
Dock receipts .....	38,395	36,491
Miscellaneous .....	7,461	7,639
Total receipts .....	£177,481	£197,870
Total expenditure .....	108,644	112,004

Net receipts .....

The prior charges for the half-year amount to 68,694*l.*, leaving a surplus balance of 42,267*l.* to be carried forward.

The gross receipts show an increase for the past half-year of 20,389*l.*, the expenditure an increase of 3,360*l.*, and the net receipts an increase of 17,029*l.* The ratio of expenses to receipts is 56·60 per cent., as against 61·21 per cent.

##### TRAFFIC, &C.

Half-year ending June 30th.	1897.	1898.
Passengers carried .....	199,006	199,464
Season-tickets .....	173	184
Tonnage entering docks—steamships .....	404,326	502,127
" " sailing ships .....	104,031	78,236

" " Lines worked .....	11½	11½
" " Foreign lines run over .....	7½	7½
" " Total operated .....	84½	84½
Train mileage—Passengers .....	213,511	214,210
" " Goods .....	500,566	563,513
" " Total .....	714,077	777,723

The report states:—

"The company's Act of 1889 provides that an extra ½ per cent. per annum (amounting to 10,000*l.*) shall be paid to the second debenture-holders at the close of the whole year if earned during the year, and your directors are therefore at present precluded from payment of a dividend for the half-year on the preference and consolidated stocks until the results are ascertained at the end of the financial year ending December 31st.

"Ships of a total tonnage of 580,413 tons have entered the Alexandra Dock during the half-year in the following proportions (exclusive of vessels entering for use of dry docks only), viz.:—Steam ships, 502,127 tons; sailing ships, 78,286 tons—being an increase of 72,056 tons over the corresponding half-year of 1897.

"The directors view with satisfaction the improvement as shown by the results of the half-year. The increased receipts arise principally from the coal traffic, partly due to the coal strike in South Wales; but it is anticipated that when the dock extension works are completed the additional coal shipping appliances will enable them to further increase the export of coal, which will arise both from the present connections with collieries and the proposed extensions to other collieries, and to deal with it more promptly.

##### GENERAL.

"In order to meet the requirements of the goods traffic, the directors have arranged for a further supply of wagons, and the delivery of them has already commenced and will shortly be completed.

"The works at the extension of the dock have been proceeded with during the half-year, and every effort is being made by the directors to get the works pushed forward. Until they are completed a large portion of the preference capital raised for that purpose will remain relatively unremunerative.

##### PARLIAMENTARY.

"The company's Bill for extending the time for constructing the dock and works authorised in 1882, and for taking over the Hull and South Yorkshire Extension Railway, has passed through Parliament unopposed and has received the Royal Assent. Proposals will shortly be submitted to the proprietors to provide for the construction of this railway without delay, and thus put the company in direct connection with the important collieries of Hickleton, Wath, and Manvers Main.

"The Bill which had again been deposited in Parliament by the North Eastern Railway Company was withdrawn by that company, so far as regards that portion which provided for the increase of the dock accommodation in Hull, and a Parliamentary contest which would have been expensive to your company was thereby avoided. An agreement has been entered into between this company and the North Eastern Railway Company to deposit a Bill in the next session of Parliament for powers to construct a joint dock to the east of your Alexandra Dock, in accordance with the provision of the clauses which were inserted for the protection of this company in the North Eastern (Hull Docks) Act of 1833."

**BELFAST AND NORTHERN COUNTIES RAILWAY.****CAPITAL.**

June 30th, 1898.—The total expenditure amounts to 2,783,181*l.*, whilst the receipts have been 2,701,576*l.*, viz.:—

Ordinary stock .....	£872,763
Preference stocks .....	1,021,450
Debenture stocks .....	739,502
Sundries .....	67,861

Debit balance, 81,605*l.* Estimated further expenditure—In the current half-year, 10,500*l.*; in subsequent half-years, 6,200*l.*; total, 16,700*l.* Capital powers and other available assets, 111,762*l.*

The capital expenditure for the past half-year amounted to 16,996*l.*, of which 12,459*l.* was on lines open for traffic, and 4,537*l.* on working stock.

**REVENUE.**

Subjoined is an abstract of the revenue account for the half-year ending June 30th:—

	1897.	1898.
Passengers, parcels, &c. ....	£61,834	£62,727
Goods, minerals, and live stock ..	67,239	70,356
Miscellaneous .....	1,241	1,696
<b>Total receipts</b> .....	<b>£130,314</b>	<b>£134,779</b>
<b>Total expenses</b> .....	<b>78,276</b>	<b>83,071</b>
<b>Net receipts</b> .....	<b>£52,038</b>	<b>£51,708</b>
Balance from last half-year .....	10,081	10,584
Sundry credits .....	2,643	4,193
<b>Total net revenue</b> .....	<b>£64,762</b>	<b>£66,485</b>
Prior charges .....	£15,778	£15,392
Preference dividends .....	20,760	21,120
Dividend on ordinary stock .....	*23,562	†24,001
Reserve fund .....	—	1,000
Balance to next half-year .....	4,662	4,972
<b>Total</b> .....	<b>£64,762</b>	<b>£66,485</b>

The gross receipts for the past half-year show an increase of 4,465*l.*, the expenses an increase of 4,795*l.*, and the net receipts a decrease of 330*l.* The ratio of expenses to receipts is 61·63 per cent., against 60·06 per cent.

**TRAFFIC, &c.**

Half-year ending June 30th.	1897.	1898.
Passengers (total number carried) ..	1,098,231	1,106,384
Season-tickets .....	2,471	2,798
Merchandise (tons) .....	205,373	224,846
Minerals (tons) .....	90,524	89,588
Iron ore (tons) .....	31,689	39,579
Mileage—Lines owned .....	209½	209½
“ Lines worked .....	41½	41½
“ Total operated .....	250½	250½
Train mileage*—Passengers .....	492,597	502,173
“ Goods .....	233,597	242,623
“ Total .....	726,194	744,796

\* Including train mileage of lines worked.

**The report states:—**

“The comparative statement of receipts for the half-years ended June 30th, 1897 and 1898, shows an increase of 4,465*l.* The increase in mails represents a payment, with arrears, for adjustment of the train service—involving additional mileage—consequent upon an earlier arrival and departure of mails from and to Dublin, which came into operation last year.

“The working expenses are 61½ per cent. of receipts, including Port-stewart Tramway, and after taking credit for the amount received for working other lines there is an increase of 4,794*l.*, attributable to enhanced prices of coal and materials generally, to larger outlay on the permanent way, increased rates and taxes, and to the expenses necessarily incurred in working the additional traffic.

**GENERAL.**

“During the past six months the sum of 15,950*l.* ordinary stock was issued, and the premium thereon placed to credit of capital account. Under the head of capital expenditure the outlay for the half-year was 16,996*l.* Sanction will be asked for further expenditure for new works, &c., amounting to 16,700*l.* The directors contemplate the provision of carriage shed accommodation, a subject which has been under consideration for a considerable time.

“The expanding merchandise traffic necessitates a further supply of wagons, but it is intended to put them in hand only as the traffic demands. Pending the building of the luncheon and dining car, included in estimate for new rolling stock, arrangements were made early in June for the comfort of travellers to and from Portrush. This accommodation has been largely availed of.”

**BARRY RAILWAY.****CAPITAL.**

June 30th, 1898.—The expenditure to date amounts to 4,596,386*l.*, and the receipts to 4,221,499*l.*, viz.:—

Ordinary stock .....	£981,240
New stock .....	92,696
Preference stocks .....	1,678,760
Debenture stock .....	1,021,233
Premiums, &c. ....	447,570

Balance to debit of capital account, 274,887*l.* The expenditure during the half-year amounted to 230,861*l.*, of which 85,710*l.* was on lines open for traffic, 145,151*l.* on works in course of construction. Estimated further expenditure—In the current half-year, 264,666*l.*; in subsequent

half-years, uncertain. Capital powers and other available assets, 595,184*l.*

**REVENUE.**

The account for the half-year ending June 30th shows the receipts and disbursements to have been as follows:—

	1897.	1898.
Passengers, parcels, &c. ....	£14,097	£14,174
Goods, minerals, and live stock ..	91,127	63,827
Shipping receipts .....	34,175	21,183
Dock receipts .....	87,706	57,042
Miscellaneous .....	1,454	1,400
<b>Total receipts</b> .....	<b>£223,559</b>	<b>£157,626</b>
<b>Total expenditure</b> .....	<b>108,003</b>	<b>90,748</b>
<b>Net receipts</b> .....	<b>£120,556</b>	<b>£66,878</b>
Balance from last half-year .....	1,977	2,703
<b>Total</b> .....	<b>£122,533</b>	<b>£69,586</b>
Prior charges .....	£23,097	£26,458
Reserve fund .....	7,000	—
Preference dividends .....	36,569	36,569
Ordinary dividend .....	*49,062	—
Balance to next half-year .....	6,805	6,559
<b>Total</b> .....	<b>£122,533</b>	<b>£69,586</b>

\* At 10 per cent. per annum.

The gross receipts show a decrease for the past half-year of 70,933*l.*, the expenditure a decrease of 17,255*l.*, and the net receipts a decrease of 53,678*l.* The ratio of expenses to receipts is 57·57 per cent., as against 47·25 per cent.

**TRAFFIC, &c.**

Half-year ending June 30th.	1897.	1898.
Passengers carried—total number ..	897,833	868,867
Season-tickets .....	422	892
Mileage—Lines owned .....	31½	31½
“ Lines worked .....	—	20½
“ Foreign lines worked over ..	9	9
“ Total operated .....	40½	61½
Train mileage*—Passengers .....	80,193	154,160
“ Goods .....	349,897	243,181
“ Total .....	430,095	397,341

\* Exclusive of piloting, shunting, and assistant engine mileage, which is almost equal to the train mileage here given.

**The report states:—**

“Your directors much regret having to inform you of the death of Mr. James Walter Insole, who had been a member of the board since the formation of the company. His brother, Mr. George Frederick Insole, has been appointed as his successor.

“The amount expended during the half-year on capital account is 230,861*l.*

“The revenue receipts for the half-year are less by 70,932*l.* than those of the first six months of 1897. Up to the end of March the receipts showed an increase of 5,510*l.*, but, as a consequence of the calamitous strike, which began on April 1st, that increase has disappeared, and the above-mentioned falling off has taken its place. It has been found impossible to keep down the expenditure to the usual per-centage, and the result is a greatly diminished revenue balance. The available balance is 43,127*l.* The interest on the preference stocks will absorb 36,569*l.*, leaving a balance of 6,558*l.* to be carried to the credit of the current half-year.

“Having regard to the continuance of the strike your directors regret that they are unable to recommend the payment of any dividend upon the ordinary stock.

“Advantage has been taken of the strike to thoroughly overhaul and repair the outer gates of the basin. The cost of this work, amounting to 1,017*l.*, has been charged to the fund reserved for the repairs of works, machinery, &c.

“It was stated in the last half-yearly report that the passenger traffic of the Vale of Glamorgan Company was being conducted by coach between Barry and Rhooose, and by rail between Rhooose and Bridgend. This continued to be done until April 25th, when a temporary railway between the east and west ends of the Porthkerry Viaduct was opened. Dock No. 2 has not yet been completed, as had been anticipated; but the engineer reports that the dam between it and the existing dock will shortly be removed.

“Good progress continues to be made with the works on the Rhymney branch, and the low water landing-stage and pontoons.

“The Bill of the company for new lines to connect the company's Rhymney branch railways authorised in 1896 with the system of the Brecon and Merthyr Company, and also to connect that system with the Rhymney Railway and for other purposes, has received the approval of both Houses of Parliament. Other Parliamentary contests of great importance are taking place, and your directors are using every endeavour to safeguard the interests of the shareholders.

“At the close of the half-yearly meeting an extraordinary meeting will be held to authorise the creation and issue of debenture stock under the company's Act of 1894, and of stock and shares under the Acts of 1895 and 1896.”

**STRONGEST LIFE OFFICE IN THE WORLD.****THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.**

ASSETS .....	£49,349,231 Sterling.
SURPLUS .....	10,508,095 Sterling.
TOTAL INCOME .....	10,089,909 Sterling.

Paid to Policy-holders during 1897 over £4,390,000 sterling.

Paid to Policy-holders in less than thirty-nine years over £57,290,000 sterling.

AUGUST 6, 1898.

## MORE RAILWAY RESULTS.

In examining the railway reports for the past half-year one cannot fail to be struck with the enormous rise in expenses. In view of the results shown in this respect it becomes clearer than ever that had the majority of companies not secured magnificent additions to their gross receipts, the dividend outcome would have been dismal indeed. As it is, only one unimportant increase in dividend was shown, against a considerable number of marked decreases. The moral to be drawn from the reports is that without a continuance of the large growth in gross receipts dividends must decline still more seriously, for even the splendid additions to gross earnings secured by most lines last half-year were hardly sufficient to stave off this result. The prospect is that, in spite of the very large increase in working expenses, in both the second half of 1897 and the first half of 1898, this feature will continue to be very much in evidence. Charges for wages and for coal and materials are advancing; the public is continually securing more advantages from the companies without any increased payments in return, and capital charges are advancing in an unpleasant way. In fact, the change in the direction of railway profits which we have discussed for months past is now upon us, and the only question is to what extent it will affect the surpluses available for dividend on the ordinary stocks.

Three companies which were in the comparatively fortunate position of being able to maintain their dividends last half-year were the Midland, North Eastern, and Lancashire and Yorkshire. That they were able to maintain their dividends is due to the fact that all three were exceptionally favoured in having secured a very large increase in gross receipts. In the case of the Midland and North Eastern this result was in part due to the stoppage of coal traffic in South Wales, which diverted to their systems revenue from the railways serving those districts. The Midland Company, for example, has added no less than 97,000*l.* to its mineral receipts for last half-year out of a total increase of 218,000*l.* Similarly the North Eastern had an increase of 55,000*l.* in mineral receipts out of a total addition to its receipts last half-year of 110,000*l.* In this respect the losses of the South Wales railways and of the Great Western have been partially gains to the Midland and North Eastern companies. The advantage, such as it is, has, however, been limited to the aid it has given in maintaining dividends in a half-year which has been characterised by a very large growth in working expenses. As regards the three companies referred to the increases in gross receipts and working expenses last half-year were as follows:—

Company.	Addition to gross receipts.	Addition to working expenses.
Lancashire and Yorkshire.....	£90,842 .....	£62,914 .....
Midland .....	218,340 .....	196,096 .....
North Eastern.....	110,132 .....	94,270 .....

In the case of the Midland the addition to gross receipts was even larger than in the second half of 1897, the figure then having been 160,670*l.* As might be expected the wages bill is the item which accounts for most of the increase in expenses. When examining in February last the wages payments for the second half of 1897, we found the Midland had paid 150,000*l.* more than for the second half of 1896, and that the North Eastern had paid 58,000*l.* more. For last

half-year the amounts paid for wages in the various departments by these two companies are shown below:—

Department.	Midland.	
	First half, 1897.	First half, 1898.
Maintenance of way .....	£128,717	£135,634
Locomotive running .....	356,284	382,345
Locomotive repairs .....	128,903	138,554
Carriage repairs .....	43,142	47,723
Wagon repairs .....	47,195	48,823
Traffic .....	890,309	961,052
Total .....	£1,594,550	£1,714,131

Department.	North Eastern.	
	First half, 1897.	First half, 1898.
Maintenance of way .....	£105,479	£104,986
Locomotive running .....	229,445	239,457
Locomotive repairs .....	123,541	127,644
Carriage repairs .....	38,989	38,336
Wagon repairs .....	66,176	69,275
Traffic .....	535,443	557,611
Total .....	£1,099,073	£1,137,309

Thus the additional wages paid by the Midland last half-year came to 120,000*l.*, making the increase for the year to June 30th last for that company alone come to the large total of 270,000*l.* In the case of the North Eastern, the addition to the wages bill is not so heavy relatively, having been only 38,000*l.*; but the Midland has been conspicuous for some time past in this respect. For the second half of 1897, for example, the Midland Company paid about 12,000*l.* more away in wages than the North Western, though its gross revenue for the period was nearly 1½ millions less than that of our premier railway.

The Great Western dividend was announced on Thursday last at the rate of only 2¼ per cent., with 24,000*l.* forward. This compares with 4½ per cent. and 16,273*l.* forward for the first half of 1897. When discussing a week ago the effects of the coal strike in South Wales, we said the "Great Western dividend is likely to suffer seriously from the same causes, and it is almost inevitable that its pending dividend will show the largest decline of any of the leading railways for the past half-year." The general expectation was that the drop in the "Western" dividend would not be more than 1½ to 1¼ per cent., and the actual declaration caused the price of the ordinary stock to decline two points, and it now stands at the lowest figure since March, 1896. The loss in its gross receipts as published was 79,770*l.*, but as the decline in the dividend represents a sum of about 305,000*l.* on the basis of the amount of ordinary stock outstanding on December 31st last, it seems that expenses have risen very largely, as well as capital charges. There was an addition of 22 miles to the system last half-year, and that, with the extra cost of coal, would account for some of the large advance in expenses; but clearly there has been an abnormally large addition to train mileage. This, coming after the addition of 332,000*l.* to Great Western expenditure last year, is very disturbing to the shareholders. The outlook for the immediate future is also rather gloomy. With the continuance of the coal trade dispute in South Wales, the traffics of the line to date show a decline for only four weeks of 61,240*l.* Then dividend will accrue on 50 per cent. of the new issue of ordinary stock from January 1st, 1899, and on the whole issue from July 1st, 1899. Under the circumstances it would seem that, although the stock has this year fallen from 179 to 165, it must inevitably fall further.

The North Western dividend, also announced on Thursday, completes the results of English railways for last half-year. It is at the rate of 6¼ per cent., against 6½ per cent., and whilst not quite so good as the North Eastern and Midland results, it looks excellent beside that of the Great Western. At the meeting next Friday the authority of the shareholders for the creation of a further million of ordinary stock—or, to be exact, 935,000*l.*—is to be asked. This

represents, of course, about 2 millions sterling in cash, and is further evidence of the way in which capital charges are being piled up just now—a not very reassuring feature which we have repeatedly had occasion to draw attention to during the last six months.

### THE CHATHAM MEETING.

The Chatham meeting has come and gone, and yet there is no announcement that the agreement embodying the contemplated arrangement between it and the South Eastern has been actually settled. In the South Eastern report it was "hoped" that the agreement would have been settled in time for submission to the shareholders of that company at the meeting on the 28th ult. But the wish was not gratified, and instead of formally sanctioning the final agreement, the South Eastern shareholders passed a resolution approving it "subject to such alterations and modifications therein as the directors may consider necessary or expedient." In the Chatham report it was also "hoped" that the agreement would be settled in time for submission at the meeting on Wednesday last; but again a resolution, identical in terms with that passed at the South Eastern meeting, was submitted and approved instead of the agreement itself. Apparently Mr. Forbes and Mr. Bonsor, who are delegated by the Chatham and South Eastern boards respectively to settle what is competitive traffic, and in what proportions the gross profit under the contemplated agreement is to be apportioned have not yet come to an agreement, though Mr. Forbes says they are very near it. These two points are obviously the two most important of those involved in the pending agreement, and we can quite understand that a good deal of higgling has been proceeding regarding the fixed proportions to be embodied in the agreement. But what is also clear is that until these vital matters are settled there exists the danger that the whole scheme may fall to the ground, and that would be a bitter disappointment to all concerned. Mr. Forbes, of course, lays stress upon the immediate advantage which the Chatham will get, as was admitted by the South Eastern chairman last week. Mr. Forbes pointed out that better terms would be conceded for the Chatham Company "than the absolute figures justify." This is what we pointed out a week ago, and on the strength of it the Chatham chairman anticipates that the second preference-holders will not have to wait long for the balance of their dividend, and even went on to remark that the "ordinary shareholder" is in a position of great comfort compared with any he has "been in ever since I have had the honour of his acquaintance." The standard of comparison is obviously a low one; but does the above statement really square with the facts? We seem to remember an obligation laid on the Chatham Company by the House of Lords to reduce the nominal amount of the ordinary stock to something approximating its market value, and also a further obligation to redeem a million of arbitration preference stock by May, 1900. These surely do not make for the "comfort" of Chatham ordinary shareholders? The legislation under which the new agreement is being carried out is apparently the South Eastern Act of 1893, which authorised the extension of similar powers to those of the Continental agreement to all competitive traffic. Mr. Forbes hinted that amalgamation of the two capitals was kept ultimately in view. This idea was also thrown out in the joint reply given by the two companies, and read by Mr. Ritchie in answer to Mr. Bryce's suggestion that the Board of Trade should intervene. But of course an application to Parliament would be necessary for complete fusion, and there are other formidable difficulties as well.

## ANGLO-CHILIAN RAILWAYS.

## III.—ANTOFAGASTA (CHILI) AND BOLIVIA RAILWAY COMPANY, LIMITED.

Unlike the Anglo-Chilian—its next-door neighbour—and the Arauco, both of which lead a dual existence, the Antofagasta Company has no separate existence at all, even if, *pace* its full-blown London board of eminent directors and trustees, it can be said to possess a soul of its own. It is leased to, run by, and dependent on, the *Compañía Huanchaca de Bolivia*—a Chilian company owning the notorious silver mine of that name, once a phenomenally successful, now, alas! a practically insolvent concern. We willingly acknowledge the soft impeachment of having on several occasions criticised the Antofagasta Railway, for we are not in the habit of shirking the duty of drawing attention to the weak points of companies in which readers of THE RAILWAY TIMES may be interested, and at the risk of remaining on the “index expurgatorius” of Mr. Underdown, Q.C., the hypersensitive chairman of the meeting, reported in our issue of June 25th, we must confess that the accounts then dealt with in no way modified our unfavourable opinion of the company's prospects. Thanks to the windfall of 2,491*l.*, in the shape of compensation for damage sustained in the Chilian civil war (received through the Huanchaca Company, and not a red centavo of which would have been recovered if the English company had claimed “on its own”), the receipts in 1897 exceeded by 1,836*l.* those of the previous year, and the Antofagasta Company was able to reduce by 14,718*l.* the outstanding indebtedness to its guarantor. So far so good; but the uncomfortable item still stands at 73,699*l.*, plus 3,615*l.* on waterworks account, and a *mauvais quart d'heure* is in store five years hence, when the balance falls due, together with the formidable amount payable to the Huanchaca Company at the expiration of the working agreement for additions made to the line, buildings, rolling stock, &c., as per footnote to the balance-sheet. Of the gross receipts last year, the per-centage derived from Huanchaca traffic was 43·37 (representing, it seems, half the present dividend on Antofagasta stock), but the remaining 56·63 per cent. consisted, to a considerable extent, of nitrate traffic carried at a very minute (if any) profit. It is probably not generally known that the Antofagasta line was originally constructed by the Chilian Company of that name to bring down “caliche” (raw nitrate of soda) to the port where the refining works are situated, this being the only instance in which the manufacture takes place on the sea-board instead of in the interior. When the company disposed of the railway it stipulated that its “caliche” should be carried *in perpetuity* at the rate of 17 cents (currency) per 100 kilogrammes for a distance not exceeding 150 kilometres. At the exchange of 18*d.* this is equal to barely 1½*d.* per quintal for 80 miles, or one-fourth of the Nitrate Railways' charge for half the distance! The Antofagasta Nitrate Company produces on an average 600,000 quintals per annum, requiring over 3 millions of quintals of raw material on account of the extremely low quality of the latter (about 15 per cent. against 35 to 50 per cent. in Tarapaca). The up traffic, charged at 51 cents, is comparatively trifling, consisting, as it does, merely of provisions for the workmen on the “calicheras,” situated about 140 kilometres from the port. There are other extensive nitrate deposits in the province, but the low grade will prevent their being opened up for many years to come, and even then shipment will probably be effected not from Antofagasta, but from Blanco Encalada or Paposo. The terminus of the line at Oruro being considerably to the north of Iquique, the natural outlet for the

trade of Central Bolivia is manifestly not Antofagasta; as it is, much of it (including the product of the Coro Coro copper mines) goes down the river Desaguadero to lake Titicaca, and thence by the Southern Railway of Peru to Mollendo. The connection of Oruro by rail with the waterway is only a question of time (a line to the capital La Paz is already sanctioned), and the traffic from that part of the country will eventually find its way to the coast by a route half as short again as the Antofagasta Company's, into the sphere of whose calculations this factor does not appear to have entered. Another and a more immediately threatening feature is “exchange,” every penny of fall in which represents 20,000*l.* in the sterling equivalent of the gross receipts; these, by the way, show a decrease of \$263,000 in the first six months of the current compared with the past year. Where will the accounts be with a return to “rag money” in Chili and a collapse of exchange to 12*d.* or even 6*d.*? The Antofagasta Company rejoices in a veritable “embarras de richesses” in the shape of “guarantees,” but numbers do not in this case imply safety, for who would guarantee the guarantors? The once famous Huanchaca mine has fallen on evil days, and although with Messrs. Schröder's financial assistance it may for some time longer keep its head above water, even though its workings keep under water, the end cannot be far off, despite the recent important find of payable ore. Was the announcement of a “rich strike” ever known to fail at the psychological moment? The Chilian Government guarantee is a negligible quantity, as Chili finds it difficult enough to make ends meet by continual borrowing, without coming to the help of foreign investors. As to the Bolivian guarantee, specially referred to in the Antofagasta Company's report, it is, in our opinion, not worth a row of pins; and, read between the lines, the Chairman's statement at the meeting seems to confirm our valuation. Mr. Underdown may possibly have seen the leader in the *Telegrafo* of La Paz, of January 13th, on the agreement entered into between the Bolivian Government and the Huanchaca Company. Our distant contemporary, after recapitulating the numerous concessions wrung from the Chilian Company (acting on behalf of its English co-partner), congratulates the Government on having thereby saved the Republic from bankruptcy! Not only was the amount of the capital for the purposes of the guarantee reduced from 833,000*l.* to 650,000*l.*, and all arrears wiped out, but it was stipulated that the paying section of the line from Ollague to Uyuni should contribute 300,000 bolivianos (dollars) per annum towards the subsidy on the non-remunerative section from Uyuni to Oruro, thus again whittling down the precious guarantee from 45,000*l.* to 18,300*l.* The whole thing, in fact, is a mere farce. The glories of Huanchaca, now departed, have hitherto cast a fictitious glamour over the Antofagasta Railway, but the latter will be thrown on its own resources, if not on its beam ends, when the working agreement expires in 1903. If silver rises to 36 pence, if exchange does not fall, and if no political complications arise in that mercurial part of the world, matters may go well with the company for another year or two, but holders of its securities will eventually realise that their property is only of the South American common or garden variety. At the present juncture the silver key to the position is weak at about 27*d.*; the Chilian exchange is unquotable pending the expiry of the general moratorium, and the least said of the political situation the better for the peace of mind of all interested in Chilian and Anglo-Chilian securities. Antofagasta debentures may be tolerably safe; as to the ordinary stock, for all its fancy yield, to use Mr. Underdown's own words, “there is nothing to justify the present price.”

### ARGENTINE RAILS.

So far as outward conditions go the market in Argentine rails should be an advancing one just now, instead of which stocks have been steadily falling. The half-year recently concluded yielded satisfactory increases to the larger companies; the gold premium is 11 points lower than it was a year ago, and recent traffic results have shown improvement. Notwithstanding these favourable points in the situation prices have relapsed to nearly the lowest of the current year, from which fact we may deduct yet another "bull" point—namely, that prices are low. The only explanation of the curious position here indicated is the general listlessness of the stock markets, added to which there is still a fear in some quarters that the Argentine Republic will go to war with Chili—and that is by no means a new story. First of all, as regards prices, the following table, showing the highest quotations of 1898 and current values, will show how considerable the reaction has been:—

Stock.	Highest 1898.	Present price.
Argentine Great Western second debenture...	92½	88
Buenos Ayres Great Southern preferred .....	140½	136
Buenos Ayres ordinary .....	158	137
Buenos Ayres new shares .....	4½	4½
Buenos Ayres and Ensenada ordinary .....	69½	65
Buenos Ayres and Pacific preferred .....	106½	89
Buenos Ayres second debenture .....	94½	89
Buenos Ayres and Rosario ordinary .....	79	69½
Buenos Ayres Western ordinary .....	12½	10
Buenos Ayres Western deferred .....	8½	6
Central Argentine ordinary .....	87½	78
Cordoba Central (Central section) 4 per cent. debenture .....	95½	87
Cordoba Central income debenture .....	62	45½
North West Argentine 6 per cent. debenture .....	114½	106
Santa Fé and Cordoba Great Southern 6 per cent. debenture .....	125½	114

In every case there has been a considerable fall, and only in a few cases can the decline be regarded as justified. In Buenos Ayres Great Southern ordinary, Buenos Ayres and Rosario ordinary, and Central Argentine ordinary, the falls are 21, 9½, and 9¼ respectively; yet the increases shown by these three companies for the period to June 30th were as follows:—

Company.	Increase in receipts to June 30th, 1898.
Buenos Ayres Great Southern .....	£133,039
Buenos Ayres and Rosario .....	100,069
Central Argentine .....	127,062

In the first case the figure represents the increase for the whole year to June 30th, the addition to gross earnings for the half-year having been about 90,000*l.* Nevertheless, it would not be surprising to see an increase in the final dividend to be paid in October next, for though there has been an addition of 30 miles to the system, the recent issue of capital will entail no addition to current charges. The interim dividend for the period to June 30th last was increased from 5 to 5½ per cent. A corresponding increase in the final dividend from 6 to 6½ per cent. would make the distribution 6 per cent. for the year, and to do this would only require a sum of 22,500*l.* At this rate the yield on the stock at the present time would come to 4*l.* 8s. per cent. As the company earned more than 6 per cent. for the year 1896-7, allowing for the transfer to reserve fund then made, there can be no doubt about its ability to pay more than 6 for the period ended June 30th last. The increases shown above in the cases of the Buenos Ayres and Rosario and the Central Argentine are for the half-year only, and though the former has to provide for a substantial addition to its capital charges this year on account of the conversion of its new shares into ordinary stock and Sunchales stock, both should be able to increase their dividends for the period. Companies which did not show such good

results to June 30th last are the Buenos Ayres and Pacific, the Buenos Ayres Western, and the Cordoba Central, and to some extent, at least, the depreciation shown in their stocks is justified. Generally speaking, however, this market seems to have touched bottom for the moment, and the present thus appears to be a fitting opportunity for purchases to be made. Particularly we would name Buenos Ayres Great Southern ordinary and the new shares of that company, and Buenos Ayres and Rosario ordinary stock as likely to show advances at no distant date. The declines shown are due to nothing more than the neglect which has overtaken the market for South American securities generally, and which has assisted to bring about a reaction in values from the considerably higher prices to which they were carried earlier in the year.

### PASSING NOTES.

The traffic receipts for the week ending July 31st, on thirty-three of the principal lines of the United Kingdom amounted to 2,133,905*l.*, which was earned on 19,233½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 2,079,521*l.*, with 19,034½ miles open. There was thus an increase of 54,384*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for five weeks to date amounted on the same thirty-three lines to 9,280,197*l.*, in comparison with 9,104,025*l.* for the corresponding period last year; increase, 176,172*l.*

Our Whitefriars-street contemporary has been making a rather laboured defence of the "administration" of the Taff Vale Railway under the present board, and argues that in the June half of 1891, the last under the old board, only 2½ per cent. was paid; whilst for the year 1897 3½ per cent. was paid. But surely it is going a little too far to make such an impudent comparison as this. For the June half of 1898, the ordinary stock gets no dividend at all, for the June half of last year it got 3½ per cent., and for the seven years of the new administration it has averaged less than 2½ per cent. Or if we take the dividend paid by the new board for their seven whole years we get an average of less than 7¼ per cent., as compared with an average of over 11½ per cent. paid by the old board for the last seven years of their régime—assuming the ordinary stock as undivided throughout the entire period.

With a view to still further developing the cargo and passenger traffic between Holyhead and Greenore, the London and North Western Railway Company has had built a new fast twin-screw steamship named the *Gallea More*, 284ft. long, and capable of accommodating 400 saloon and 600 steerage passengers. The *Gallea More*, *Rosstrevor*, and *Connaught* (the two latter being already on the station) will form a trio of fast screw steamers which may do something to develop this route to the North of Ireland. The trial trip of the latest addition to the fleet took place on Wednesday from Holyhead to Greenore at an average of 18½ knots per hour.

At the half-yearly meeting of the Midland Railway Company yesterday, the chairman (Sir George Paget) stated that, in view of the coming into operation of the Workmen's Compensation Act, the company had decided to alter their contributions to the Midland Railway Friendly Society from 12s. to 10s. per member per annum. The rate of the working expenses was still steadily on the increase, and, but for the misfortune of their neighbours over the Welsh coal strike, the Midland dividend could not have been maintained. A full report of the proceedings will appear in our next issue.

Mr. Robert L. G. Vassall, deputy-chairman of the Taff Vale Railway Company, has been appointed chairman, in succession to the late Mr. Guest, and Mr. Russell Rea has been elected vice-chairman. Mr. Vassall, like the former chairman, Mr. Inskip, is a Bristol solicitor, being a partner in the firm of Osborne, Ward, Vassall, Parr, and Co., who do a good deal of work for the Great Western Railway Company in the Bristol district. Mr. Vassall joined the directorate of the Taff Vale at the time when the new board came into office about eight years ago.

Sir Edward Watkin has retired from the board of the Neath and Brecon Railway Company "owing to advancing years." It might be well for Sir Edward's advisers to point out to him that this is an excellent reason for retiring from the Metropolitan, Great Central, and South Eastern boards, as it is obvious that he can render little or no service to those companies now, and his past services are scarcely such as to call for more remuneration than he has already received.

In dealing with the South Wales railways last week we pointed out that the loss to their shareholders by the passing of the ordinary dividends for last half-year was 174,000*l*. Now the Great Western has announced a dividend of 2½ per cent. lower than a year ago, due mainly to the same distressing influence. This brings the total loss to railway shareholders up to well nigh half a million, apart from the disastrous depreciation in their stocks.

Sir John Jones Jenkins, M.P., chairman of the Rhondda and Swansea Bay Railway, has intimated to his co-directors that it is not his intention to seek re-election at the general meeting of shareholders next week. Sir John's state of health has been very indifferent for some months, and, in accordance with the advice of a specialist in London, he purposes to take a sea voyage.

Proceedings are to be taken against some of the directors of that unsavoury Hooley promotion Simpson's Lever Chain Company, Limited. It has always been a subject of wonderment to us that Sir Ernest Paget, the chairman of the Midland Railway Company, should have allowed himself to be associated with this concern.

The new line of electric railway between Laxey and Ramsey was opened on Tuesday by the Lieutenant-Governor of the Isle of Man, Lord Henniker. The first car conveyed a numerous company from Douglas to Ramsey, a distance of 18 miles, in one hour and a quarter.

The London and South Western Railway Company announces that the new line from Holsworthy to Bude will, subject to the approval of the Board of Trade, be opened for traffic on the 11th inst., and that tourist tickets from London to Bude, &c., will be issued.

The South Eastern Railway Company has contracted with Messrs. Laird Brothers, Birkenhead, for the construction of a fast steamer for the extra traffic expected by the company in connection with the Paris Exhibition of 1900.

Mr. Thomas Norrington, for many years divisional superintendent of the Yorkshire section of Lancashire and Yorkshire Railway, has compiled an interesting work on the rise and progress of that undertaking.

An order was made on Wednesday for the winding up of the General Railway Syndicate, Limited, the petitioning creditors being Messrs. Brown, Janson, and Co., Limited.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 10th inst.*

CITY, FRIDAY EVENING.

There is no further change in the MONEY MARKET this week. Three months' bills are quoted 1 9-16 per cent. Loans are ¼ to ½ per cent. The demand for gold continues. The Bank Return issued yesterday shows some considerable changes, as usual at the beginning of August. A large amount of cash has been withdrawn for the country in coin and notes, and the Government has disbursed freely, the public deposits being reduced by 830,000*l*. The reserve is now 22,872,000*l*, a decrease of 1,295,000*l*, but its proportion to current liabilities is only ⅔ lower at 44½, owing to the total deposits being much diminished. The "other securi-

ties" show a decrease of 759,000*l*, owing to bills falling due and other causes. The private deposits are 1,086,000*l*. less. The only bullion movement since the issue of the Return has been an influx of 7,000*l*. in foreign gold coin.

Silver bars are now quoted at 27 3-16d. per oz., being 3-16d. higher on the week. A year ago the price was 25½d.

Eastern exchanges are telegraphed as follows:—Bombay, 1s. 3 27-32d.; Calcutta, 1s. 3 27-32d.; Hong Kong, 1s. 10½d.; Shanghai, 2s. 6½d.; Singapore, 1s. 11½d.

The premium on gold at Buenos Ayres has risen during the week from 173-60 to 177-70 per cent., making the paper dollar (nominally worth 4s. 2d.) now actually worth 1s. 5-14d. A year ago the premium was 194 per cent., and the value of the paper dollar 1s. 4-19d.

The Valparaiso exchange comes over to-day at 17½d., being unaltered on the week. A year ago it was 17½d.

The Rio de Janeiro exchange on London is 7 11-32d., being ½d. higher on the week. A year ago it was 7 7-32d.

The Bankers' Clearing-house return for the week ending August 3rd, 1898, shows a total of 146,426,000*l*., as compared with 146,667,000*l*. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£34,479,098	£35,986,308
Total Reserve .....	£22,572,293	£24,290,923
Proportion of Reserve to Liabilities...	44½ per cent.	49½ per cent.
Notes in Circulation .....	£28,406,805	£28,495,385
Bank Rate of Discount .....	2½ per cent.	2 per cent.
Open Market ditto .....	1½ per cent.	½ per cent.
Consols (account) .....	110½	113½
French Rentes (account) .....	103 <i>l</i> . 52 <i>c</i> .	105 <i>l</i> . 25 <i>c</i> .
Paris Cheque Exchange .....	25 <i>l</i> . 23½ <i>c</i> .	25 <i>l</i> . 10½ <i>c</i> .
New York 60 days ditto .....	\$48½	\$48½

The STOCK MARKETS, under the influence of rumours of strained relations between Russia and England, show a rather weak tendency to-day, Consols opening flat, and the other markets giving way in sympathy. British Railway stocks also continued depressed, as a result of the Great Western and London and North Western dividends, and the uncertainty still attaching to the South Eastern-Chatham agreement. On the day, North Western fell 1½, Chatham second preference and Great Western 1, North Eastern ¾, Hull and Barnsley ¼, Midland deferred ¼, ditto preferred ¼, Caledonian deferred ⅓, Brighton deferred, Great Central deferred, Great Eastern and Great Northern deferred ¼, North British deferred ⅓, and ditto preferred ¼. Yankee rails were somewhat dull, and suffered a reaction from the substantial rise established earlier in the week. On the day, Louisville fell ½, Wabash debenture ½, ditto preferred ¼, Central Pacific and Norfolk and Western preferred ⅓, Erie Ordinary, Illinois, New York Central, and Northern Pacific preferred ¼, Atchison preferred ¼, ditto ordinary ½, Union Pacific ordinary ¼, ditto preferred, Denver ordinary and preferred, Missouri and Texas, and Ontario ½. Canadians were flat on the strong line adopted by the American representatives before the Interstate Commerce Commission at Chicago. On the day Canadian Pacific fell ⅓, Grand Trunk guaranteed ½, ditto first preference ¼, ditto second ⅓, and ditto third ⅓.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>			<i>Do. A</i>		
Consols, 2½ per cent. ....	—	—	Great Western .....	—	3

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Central London Railway—further issue of 12,356 ordinary shares of 10l. each, fully paid; 49,124 ordinary shares of 10l. each, 6l. paid; 1,779 preferred half-shares of 5l. each, 1l. paid; and 3,767 deferred half-shares of 5l. each, fully paid. Illinois Central Railroad Company—\$4,939,000 St. Louis Division and Terminal Mortgage 3 per cent. gold coupon bonds, Nos. 1 to 4,399, of \$1,000 each; \$6,321,000 St. Louis Division and Terminal Mortgage 3 1/2 per cent. gold coupon bonds, Nos. 5,001 to 11,145 of \$1,000 each, and Nos. 14,001 to 14,352 of \$500 each; and \$14,320,000 Louisville Division and Terminal Mortgage 3 1/2 per cent. gold coupon bonds, Nos. 1 to 12,320 of \$1,000 each, and Nos. 18,001 to 22,000 of \$500 each. United Railways of the Havana and Regla Warehouses, Limited—\$67,500l. 5 per cent. consolidated irredeemable debenture stock; and 350,000l. 5 per cent. A irredeemable debenture stock.

Application has been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Chesapeake and Ohio Railway Company—\$879,000 additional first consolidated mortgage fifty-year 5 per cent. gold coupon bonds, Nos. 24,980 to 25,858.

It is officially announced that Mr. Henry Claude Fuller has been declared a defaulter upon the Stock Exchange.

Messrs. Thackeray and Co., of Cardiff, under date August 4th, report as follows:—Barry undivided, 285 1/2 (a rise of 1); ditto preferred, 125 (unchanged); ditto deferred, 159 (unchanged); Cardiff preferred, 114 1/2 (unchanged); Port Talbot ordinary, 9 1/4 (a fall of 1/2); Rhondda and Swansea Bay, 4 1/2 (unchanged); Rhymney undivided, 262 1/2 (a fall of 2); ditto preferred, 122 (a fall of 1); ditto deferred, 142 (a fall of 3); Taff Vale, 76 1/2 (unchanged); Vale of Glamorgan, 126 (unchanged). Business has again been of a very restricted character. Taff Vales have again been accorded a fair amount of support, though sellers preponderate. The Cardiff Railway recommend payment of the 4 per cent. dividend on the preferred—very comforting when compared with the passing of the dividend by so many of the local railways.

## Directors' Reports.

### BEIRA RAILWAY.

The report of the directors covering the period from the incorporation of the company to December 31st last states that the funds for carrying out the operations of the company—namely, constructing and equipping the line, &c.—have been entirely raised by the issue of debentures, and these debentures, as shown in the balance-sheet, amount to a total of 794,761l. The construction of the first section of the railway, 75 miles in length, was unavoidably delayed, mainly on account of the difficulty of making the survey through an unexplored and unknown country, but the line was eventually completed and opened for traffic on October 10th, 1893. The contract for this section was 167,000l.; but it was found necessary to expend a further 2,200l. on stations, bringing the total up to 169,200l. The contractors undertook to work the traffic of the first section on the company's account until the end of October, 1894, up to which date they maintained the railway. This twelve months' working resulted in a loss of 8,220l. The second section of the line, embracing 43 1/2 miles—viz., from the 75-mile peg to Chimoio—was made for a sum of 188,178l. It was commenced in June, 1894, and completed by the end of the year, when

the company took over the line so far completed, and commenced to work it on its own account. In April, 1895, the company granted a concession to the London and Paris Exploitation Company Limited, to construct the section from Beira to Fontesville and a pier at Beira. The London and Paris Company formed the Beira Junction Railway, Limited, to execute the work stipulated for by the concession. An agreement, dated September 15th, 1896, was made with the Beira Junction Railway, Limited, under which the Beira Railway Company works the line and pier as part of its entire system. The length of this section is 35 1/2 miles. In April, 1896, the construction of the third section of the line was commenced, and by September 30th, 1897, was completed. This section is 51 miles long, and extends from Chimoio to the old frontier. The cost of this section was 261,657l. The delimitation award extended the boundary between the British and Portuguese sphere of influence westward, and necessitated the construction of a further 17 miles, which will cost the company about 150,000l. This section was opened in February, 1898. On September 30th, 1897, the whole line from Beira to the British frontier was leased to Pauling and Co., Limited, for a term of two years at 60,000l. per annum. Since the commencement of the line many additions and improvements have been effected, and a large sum of money expended in equipment. On January 5th, 1898, a contract was signed with Pauling and Co., Limited, for the erection of a new steel bridge across the Pungwe River, the temporary wooden one not being considered sufficiently strong for the increased traffic. This and all other bridges will be wide enough for a 3ft. 6in. gauge line. Large supplies of machinery for the workshops have been sent out, men's cottages and extra stations built, a hospital erected, and a staff of nurses and doctor appointed for the use and benefit of the employees of the line. From the foregoing it will be observed that the total length of the line, including the Beira Junction Railway, is, together with a pier, 222 miles. This line is now completed and fully equipped for present requirements. Although for the first few years, and during the process of construction, the railway failed to pay more than its working expenses, the directors believe from the continual increase in the goods and merchandise landed at Beira, as taken from official reports, that the traffic on the railway between Beira and Mashonaland must rapidly increase. The Mashonaland Railway Company has been formed to construct a line from the western terminus of the line to Salisbury, the capital of Rhodesia, indicating the obvious advantages which its directors consider would be derived from direct communication between Beira and Rhodesia, and proving the benefits already conferred on the country generally by the construction of the Beira Railway.

### LIVERPOOL OVERHEAD RAILWAY.

The gross receipts for the half-year ending June 30th, 1898, amounted to 37,220l. (against 36,026l.), the expenditure to 23,376l. (against 22,759l.), and the net receipts to 13,844l. Adding balance from previous half-year (2,878l.) the total net revenue was 17,013l., which is appropriated as follows:—Prior charges, 3,400l.; dividend on preference shares, 3,000l.; dividend on ordinary shares, at the rate of 3 (against 3) per cent. per annum, 6,750l.; balance carried forward, 3,863l. Length of line open, 6 miles 57 chains. The number of passengers carried was:—First-class, 637,547; second-class, 2,686,651; workmen (special return-tickets), 1,148,743; total, 4,472,941 (against 4,269,260). The number of train miles run was 362,690 (against 363,399). The expenditure on capital account has been 745,405l., whilst the receipts have been 744,471l.—viz., ordinary 10l. shares, 450,000l.; preference 10l. shares, 5 per cent., 120,000l.; mortgage debentures, 4 per cent., 170,000l.; premiums, 4,471l.

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Lord Welby's Committee of the House of Lords has reported that the Windsor Dock Bill ought not to be allowed to proceed. This Bill, which is practically promoted by the Taff Vale Railway Company, has now for the third year been rejected. The scheme was sanctioned this session by the House of Commons after a most prolonged and costly inquiry. In the two previous sessions the Bill was thrown out in the first House.

The Unopposed Bill Committee of the House of Commons met on Wednesday for the purpose of considering the Bill promoted by the Mersey Railway Company for the main purpose of making financial arrangements, in order to provide funds for redeeming their first debenture stock. The committee decided to pass the Bill in the form in which it recently received the sanction of the House of Lords. The financial scheme now sanctioned is practically the same which was inserted in the deposited Bill last December.

Third Readings, House of Lords.—St. David's Railway Bill; Knott End Railway Bill; Great Western Railway (New Works) Bill; Great Central Railway Bill; London United Tramways Bill; Fishguard and Rosslare Railways and Harbours Bill; Whitechapel and Bow Railway Bill.

Third Readings, House of Commons.—Great North of Scotland Railway Bill; Manchester Carriage and Tramways Company Bill; North Eastern Railway Bill; North British Railway Bill; Exeter Teign Valley and Chagford Railway Bill; Seaham Harbour Bill.

### THE SOUTH EASTERN—CHATHAM AGREEMENT.

In the House of Commons on the 29th ult., on the vote for 125,544l. for the Board of Trade,

Mr. BRYCE called attention to the preliminary agreement recently announced between the London Chatham and Dover Railway Company and the South Eastern Railway Company. He disclaimed any hostility to the idea of fusion between the companies; it might be best both for the shareholders and the general public. But he questioned whether an agreement like that recently come to ought to be allowed without Parliament being fully informed with regard to the terms of the agreement. They should be laid before the House and carefully examined by the Board of Trade in order to see whether the interests of the public were properly safeguarded as regarded rates of freight, passenger fares, and the convenience of the services to be given. If the Board of Trade concluded that they could not compel the agreement to be laid before them, they should at least represent to the companies that it would be in accordance with the spirit of the relations between Parliament and the railway interests that the agreement should be produced, otherwise it might become necessary to strengthen the law in this respect. He complained that railway companies generally did not consider the convenience of the public in the matter of the conveyance and storage of bicycles. In this matter this country was far behind many of its foreign neighbours. ("Hear, hear.") He asked for an assurance from the Government that they would deal next session with the Company Law.

Mr. BRIGG expressed a hope that the Government would give attention to the question of workmen's trains.

Mr. MADDISON called attention to the large number of accidents in shunting on railways.

Mr. RITCHIE said with regard to the accidents to railway servants which had been alluded to, the powers of the Board of Trade were in these matters of an extremely limited character, but the Department took every opportunity that presented itself of making representations to railway companies in regard to occurrences of that kind, and these representations were, as a rule, well received, and efforts were made on behalf of the companies to meet them. He agreed that some further inquiry was necessary to see whether the number of accidents could be reduced, and he had sent an inspector to the United States to see whether it was possible to recommend the adoption in this country of methods employed in America. With respect to the agreement between the London Chatham and Dover and the South Eastern railway companies, he thought it ought to lead to an improvement in the existing state of things. The arrangement probably could not be brought to a final conclusion without application to Parliament, and then the Board of Trade would do their best to see that the interests of those concerned were duly considered. With regard to cycles, the companies were moving in the matter, and additional facilities for cyclists were likely to result. These and other points which had been brought to the notice of the Board of Trade would receive the best attention of the Department.

Ultimately Mr. BALFOUR temporarily withdrew the Vote.

#### FRAUDULENT COMPANY-PROMOTING.

In the House of Commons, on Tuesday,

Mr. FIELD asked the President of the Board of Trade whether his attention had been called to the recent revelations as to the promotion of limited liability companies, whether the Government would introduce the Companies Act early next session, whether in the meantime any action could be taken by the Government to protect investors, and whether the Public Prosecutor would be instructed to act in cases where fraudulent promotion had been proved.

Mr. AKERS-DOUGLAS, for Mr. Ritchie, said that the Board of Trade had seen statements in the newspapers. The President of the Board of Trade could give no pledge as to legislation next year. It was desirable that information should be given to the Public Prosecutor, as the Board of Trade had no power to initiate prosecutions.

#### MEMBERS OF PARLIAMENT AS COMPANY DIRECTORS.

In the House of Commons on Tuesday Mr. S. MacNeill gave notice that on the earliest available day he would call attention to the position of Ministers of the Crown who were directors of public companies, and move a resolution declaring that it was incompatible with the public interest that Ministers of the Crown should undertake the duties of company directors, and that the union of such offices was calculated to lower the dignity of public life.

#### NEW IRISH MAIL SERVICE.

In the House of Commons, on the 29th ult., in answer to Mr. PATRICK O'BRIEN,

Mr. HANBURY said—All the Post-office arrangements are complete for the accelerated service for the Irish day mails between

London and Dublin to come into operation on August 1st. The down Irish day mail will depart from Euston at 8.30 a.m., and will arrive at Dublin (Westland-row) at 5.22 p.m. (Irish time). In the reverse direction the departure from Dublin (Westland-row) for passengers will provisionally be fixed at 8 a.m. (Irish time), the mails being sent down to Kingstown in advance of the passengers, and the arrival at London will be at 5.45 p.m., as at present. The passenger train for Cork in connection with the down day mail will leave Kingsbridge at 6.20 p.m., and arrive at Cork at 11.25 p.m., and that for Belfast will leave Amiens-street at 5.40 p.m. (instead of 5.30 p.m.), and reach Belfast at 9 p.m. as at present. There will, as now, be no passenger train from Dublin to Galway until the night mail train at 8.20 p.m., reaching Galway at 1.15 a.m., while for Wexford passengers will travel by the train leaving Harcourt-street at 6.10 p.m., and arriving at Wexford at 9.45 p.m.

#### GREAT NORTHERN (IRELAND) RAILWAY.

In the House of Commons on Tuesday,

Mr. T. M. HEALY asked the Secretary to the Treasury was he aware that the Irish Great Northern Railway Company refused to take third-class passengers on their morning mail train from Dublin, although all the other Irish companies fell in with the suggestions of the Post-office on the subject, and could the department make a representation to the company as to this?

Mr. HANBURY said it was the fact that third-class passengers were not conveyed by the mail train referred to, and he would be very glad if the company could see its way to make this reasonable concession. The Post-office department had no right to interfere with the discretion of the company in the matter.

Mr. HEALY asked if it was not at the invitation of that department that the other Irish railway companies made this concession, and if so would the right hon. gentleman make a representation to the company who so often came to that House for Bills?

Mr. HANBURY—Yes, I will undertake that representation shall be made.

#### OFOTEN BAY RAILWAY.

In the House of Commons on Tuesday,

Mr. DRAGE asked the Under-Secretary for Foreign Affairs whether the Bill for the promotion of the Ofoten Bay Railway had now passed the Norwegian Parliament; whether the new trade route from Russia to the Atlantic thus sanctioned would seriously affect the Baltic shipping trade so far as the carriage of fish, butter, groceries, worked stone, and machinery was concerned; and whether any report had been received from her Majesty's Consul-General at Christiania, stating at what date it was now expected that the railway in question would be completed to the ice-free harbour at Port Victoria.

Mr. CURZON—The answer to the first question is in the affirmative. It is difficult to give an answer to the second question until the railway has been constructed and has come into operation. No report has been received as to the probable date of the completion of the railway.

#### RAILWAY CONCESSIONS IN CHINA.

In the House of Lords on Monday,

Lord KIMBERLEY asked the Prime Minister what steps her Majesty's Government proposed to take to safeguard British interests as regarded railways in the provinces bordering on the Yang-tsze-kiang. There could, he thought, be no doubt that Russia and other Powers were now making the most strenuous and determined efforts to establish and obtain exclusive control over a network of railways throughout the Chinese empire, and that if we did not exert ourselves energetically we should be excluded from our fair share in these great enterprises. The matter was one of the greatest gravity as affecting our commercial interests in the far East; and it might tend to relieve the public anxiety on the subject if the Prime Minister would indicate in some clear way the policy which the Government were pursuing and intended to pursue with reference to it.

Lord SALISBURY regarded it as the duty of the Government to give protection and, as far as lay in their power, assistance to British subjects in China who had commercial or other enterprises to conduct, and to take care that they were not treated with injustice; but in his view it was no part of their duty to trace out plans for railways in foreign countries, to construct such railways, or to find the capital for their construction. Some commercial bodies had urged that the Government should lose no time in insisting on a concession for a railway running from the Burmese frontier to the Yang-tsze river with a branch to Canton and a line connecting Canton with Han-kau, and the China Association had ventured to suggest that Parliament should be invited to guarantee the capital of that line extending over 2,000

miles. That would involve an entire reversal of the traditional policy of this country, which would require the sanction of Parliament, and hitherto there had been no vote of Parliament, no avowal of policy from any person of political authority or position, which would justify the adoption of such a line of action. We had, however, in China in Sir C. MacDonald a diplomatist of singular ability and success, who would do all that could be done to obtain justice and equal treatment for British capitalists seeking concessions for making railways, but until the applications were made and the concessions were asked for his intervention would, of course, be of no use. About a fortnight ago the Government had instructed Sir C. MacDonald that he was authorised to inform the Chinese Government that her Majesty's Government would support them in resisting any Power which committed an act of aggression on China on account of her having granted permission to any British subject to make a railway or other public work. He believed that our capitalists would get their full share of those railway enterprises, but as they were shrewd men they would probably hesitate to risk their money in making a line from Burmah to the Yang-tze, which would pass through much impracticable and very sparsely inhabited country. He failed to see how the liberty to make a railway in a foreign country could give them political power in that country, but if the concession was allowed to run in such a form as to tamper with or exclude our trade it would be a substantial breach of our treaty rights which would be firmly resisted. Whether, however, capital would be found to make railways in China and whether that capital would be found by Englishmen or by the subjects of other nations was a matter which would depend on others than her Majesty's Government, and one for which they were not responsible.

In the House of Commons on Monday, Sir E. ASHMEAD BARTLETT asked the Under-Secretary for Foreign Affairs whether the Belgian Syndicate, which had obtained the concession for the Pekin-Hankow Railway, had sold its rights to the Russo-Chinese Bank, whose capital had been mainly subscribed by the Russian Government.

Mr. CURZON—Her Majesty's Minister at Peking telegraphs this morning that he has no information to show that the Belgian Syndicate has parted with its rights to the Russo-Chinese Bank. The bank is acting as agent for the syndicate in Shanghai.

Dr. TANNER asked the Under-Secretary for Foreign Affairs whether any further information had been received from Sir Claude Macdonald relative to M. Pavloff's objections to the Hong Kong and Shanghai Bank loan for the projected Niu-chang Railway extension; and whether the Tsung-li-Yamen had given their decision that, in case of Dr. Yung-Hung's failure to find the capital for the Peking-Ching-kiang Railway, the concession would go to German capitalists.

Mr. CURZON—No further information has been received from Sir C. MacDonald on the first point. We have not heard of any such decision on the part of the Tsung-li-Yamen as is referred to in the second paragraph of the question.

### WORKMEN'S TRAINS.

In the House of Commons on Tuesday,

Mr. LOUGH asked the President of the Board of Trade whether he had yet received replies from the London railway companies with regard to the improved service of workmen's trains; whether he had decided in what localities the proposed local inquiries should be held; and whether these local inquiries could be arranged so as to take place in the autumn, after sufficient notice of the intention of the Board of Trade to order the inquiries had been given to the localities, so that evidence might be prepared to substantiate each separate requirement,

Mr. AKERS DOUGLAS—No, Sir; all the companies have not replied, and the Board of Trade have not decided where inquiries will be held. My right hon. friend sees no objection to the suggestion that any inquiries which may be found to be desirable should take place in the autumn. The Board of Trade will give sufficient notice of the intention to hold any inquiry.

### RAILWAY AND CANAL COMMISSION.

In the House of Commons on Thursday, on the vote to complete the sum of £8,800. for miscellaneous legal expenses,

Mr. LEWIS drew attention to the expenses of the Railway and Canal Commission. The Commission, he said, was a very expensive one, and the fact that so few cases were heard by it showed that it was extremely difficult for the trading world to approach it. It was most important that the commercial classes should have easy access to the Commission, and he suggested the appointment of a number of sub-commissioners, paid at a considerably lower rate than the present Commissioners, who should deal with the small cases arising all over the country. At present there was a very inadequate return for the money which was spent.

Sir A. ROLLIT did not think the Commission met the commercial wants of the day, and he trusted that at no distant day the conditions under which the tribunal existed would be revised.

Dr. CLARK was of opinion that the money spent upon the Commission was absolutely wasted, and

Mr. LOYD approved of the suggestion that there should be appointed Assistant Commissioners—men acquainted with local needs, and who would give satisfaction to the traders in the different districts.

The ATTORNEY-GENERAL said it was perfectly true that very often there were a great many cases pending, but he was informed that it not infrequently happened that one case governed a number of cases and that therefore it was not necessary to take many cases. He was quite aware that, in comparison with the actual work done in court, the expenses of the tribunal were considerable. He was satisfied, however, that services of men like Sir Frederick Peel and Viscount Cobham could not be obtained for less money. There was a great deal of work done by the Commission which was not represented by contentious cases. There were agreements arranged between railway companies, and other matters of a very useful character, and which required to be settled by some tribunal, transacted. One year when complaint was made he inquired into the question, and he was informed that Sir Frederick Peel had attended at the office of the Commission on every working day except during the vacation. Therefore the work of the Commission was not represented solely by the contentious cases. Still he admitted that the expenses were high having regard to the number of cases. He stated last year, and he was ready to repeat, that he thought that in the interest of traders a mistake was made in 1894 when the Government—the late Mr. Mundella was President of the Board of Trade—were induced to pass an Act whereby traders were not to be allowed to have their costs unless the Commissioners were of opinion that the claim was frivolous, or that the defence was frivolous and vexatious. Traders thought they were going to get some advantage, but such had not been the case. He was perfectly satisfied that that section ought to be repealed. He hoped that with the view of making this tribunal successful a Bill might be brought in to cheapen the procedure and to make the unsuccessful party pay the costs in the ordinary way. The hon. member for the Flint Boroughs had suggested the appointment of sub-commissioners, but he did not think that would be a satisfactory arrangement.

Mr. LEWIS said he was glad of the influential support his remarks had received from both sides of the House. He intended moving the reduction of the vote by 1,000£, but if the Attorney-General would say the Government would introduce legislation—

The ATTORNEY-GENERAL—That is for the Board of Trade, not for me.

Mr. LEWIS said that, to give hon. members who had the interests of traders in their constituencies at heart an opportunity of expressing their opinion on the matter, he moved to reduce the vote by 1,000£.

The Committee divided—

For the reduction.....	28
Against it .....	118
Majority against .....	—90

The vote was then agreed to.

## American & Canadian Railways.

### INTERSTATE COMMERCE COMMISSION.

The Interstate Commerce Commission, sitting at Chicago, has this week held an investigation into the charges made by the American roads that the Canadian Pacific was persistently violating the Interstate law. The Canadian Pacific is represented at the meeting by Attorney Raymond and Traffic Manager McNichols. Mr. Raymond on Monday addressed the Commission at great length, disclaiming any violation of the law, and expressing his willingness to go into any investigation the Commissioners desired. General Passenger Agent Eustace, of the Burlington and Quincy, followed with a long address, claiming that the Canadian Pacific was violating the law. He also urged that the Canadian Pacific was under no necessity to figure out where its dividends should come from, as it is being subsidised, while the American lines are obliged in duty to their stockholders to do so, thus placing the American lines at a disadvantage. On Tuesday General Passenger Agent Whitney, of the Great Northern, claimed that the Canadian Pacific has no right to come into American territory and demand a differential rate, which American lines must accept if they are to have peace without heavy losses. He said the United States was a fruitful field for the Canadian Pacific to prey upon, as the American lines could not get into Canada to fight back. He added that the Canadian Pacific pays

50 per cent. commissions to passenger agents and refuses to regulate rates; it makes rates on Alaska business cheaper than any American line. The Canadian Pacific, he said, never had differentials on Alaska traffic, as the agreement with the old Transcontinental Association never included Alaska. He asserted that the Canadian Pacific refused to submit all its rates to arbitration. If the Great Northern had decided to arbitrate when the Canadian Pacific desired, it would only have meant cutting the differential rate in two. On Wednesday Manager McNichol, of the Canadian Pacific, refuted the statements by the officials of the Great Northern and the Northern Pacific on the previous day. He showed that of the Canadian Pacific's business from New York during the year ended October there were only 388 passengers to Klondyke, or one passenger per day throughout the year. He said the Canadian Pacific gave a differential rate of \$50 first-class on through traffic from Hong Kong to Montreal, and did not object to granting the Northern Pacific and the Great Northern a small differential rate—say of \$30 or \$40 first class. The Great Northern demanded \$60. As showing the extent of the Canadian Pacific's American business, he said it did not amount to \$1,300,000, of which 25 per cent. was profit on net earnings. As an offset to this the Canadian Pacific spent \$3,500,000 yearly for supplies in this country. He said he would gladly exchange all the American business for the Canadian traffic secured by the American lines. The gross earnings of the Canadian Pacific last year were \$50,000,000, of which 6 per cent. only was American business. The American roads feel sure that the Commission will recommend Congress to pass a law placing the Canadian roads under the same restrictions as the American roads are under. Vice-President Clough of the Great Northern, in his arraignment of the Canadian Pacific, said that the amount of discrimination against American roads was stupendous, and was constantly growing. Statistics showed that the freight traffic diverted to the Canadian Pacific amounts to nearly 10,000,000 tons a year, and represents a loss of earnings to the American roads of not less than \$20,000,000 to \$25,000,000 every year. Statistics of the passenger traffic are not so complete, but the volume is known to be large. The American lines have not lost a pound of traffic on account of lack of facilities for handling it nor of unwillingness to handle it at fair rates. In this country nearly two-thirds of the gross earnings are paid out in operating expenses. Practically the whole of this expense is wages, and it is obvious that every time the foreign roads divert from American \$21,000,000 of traffic they take \$14,000,000 directly out of the pockets of American workmen. Mr. Clough said that foreign cars should be taxed the minute they entered this country, the same as foreign goods. On Thursday, Mr. Eustis closed the argument for the American lines, saying that the Commission was not to investigate the time or the extent of the rate-cutting, but the cause of it. He said he did not know who cut rates first. Commissioner Clements asked if the Canadian Pacific did not cut the rates first, why the American lines did? This brought out the admission that they were equally guilty with the Canadian Pacific. Attorney Raymond closed for the Canadian Pacific. The briefs are to be filed by both sides within ten days. Chairman Knapp, of the Commission, stated that it was not within the power of the Commission to compel any certain course on the part of any road represented. The Commission would make an early report, hoping that it would have some influence towards bringing the war to an end.

#### BALTIMORE AND OHIO.

The reorganisation managers of the Baltimore and Ohio Railroad Company announce that over 93½ per cent. of the outstanding bonds and over 73 per cent. of the stocks affected having been deposited, the plan is declared operative. The time for further deposit of bonds and stock without additional charge has been extended to and including August 20th, 1898, after which date, but only for such time as the managers may fix by notice, deposits of bonds and stocks will be accepted only upon a cash payment of 2 per cent. on the par value of bonds and \$2 per share on stock deposited.

Notice is given to the holders of Messrs. J. P. Morgan and Co.'s certificates of deposit for bonds of the Baltimore and Ohio Railroad 5 per cent. sterling loan, 1877 (Chicago division), Baltimore and Ohio 6 per cent. sterling loan, 1874, and Pittsburgh and Connellsville 6 per cent. consolidated mortgage loan that Messrs. J. S. Morgan and Co. are now prepared to pay the amount received by them for the overdue coupons on the above-named bonds deposited with them—viz., the face value of the coupons, with interest thereon at 5 per cent. to August 1st, 1898, less income-tax.

Messrs. Brown, Shipley, and Co. remind holders of the Baltimore Belt Railroad Company first mortgage 5 per cent. gold bonds that, antecedently to the issuance of the plan of reorgani-

sation of the Baltimore and Ohio Railroad Company, they requested a deposit of bonds to be held under the terms of a bondholders' agreement of November 1st, 1897. Under this request a deposit of such bonds has been made with them, representing over three-fourths of the total issue which Messrs. Brown, Shipley, and Co. are now prepared to deposit with the depository, to be stamped as assenting to the proposed plan. If that plan be declared operative it will, "unless by consent of the reorganisation managers and upon such terms as they may impose," only inure to the benefit of those holders who assent prior to August 16th, 1898, and thereafter it will be necessary for those who have not assented to protect their interest without any aid from those who have assented. Until and including August 15th Messrs. Brown, Shipley, and Co. will accept deposits of bonds under the terms of the said bondholders' agreement, and will add such bonds to the number of those deposited as assenting to the plan of reorganisation; but after that date they will receive no more bonds for deposit.

A petition has been filed in the United States Court by the first preferred stockholders of the Baltimore and Ohio Railroad to restrain holders of the several issues of bonds secured by mortgage from the consummation of the proposed plan of reorganisation.

#### CENTRAL PACIFIC.

The following letter has been sent to Messrs. Speyer, Brothers, by "the Central Pacific Shareholders' Combined Protection Committees of 1894 and 1898:"—"Albany, Piccadilly, London, W., July 28th, 1898. Gentlemen—Being advised from San Francisco that you propose 'to plaster' or charge the Central Pacific Railroad with a blanket mortgage and an issue of bonds in London on the authority of the present board, and that you 'have undertaken the task' of inducing the English holders of Central Pacific stock to believe that such mortgage and bond issue would be for their benefit, I beg, as vice-chairman of the Shareholders' Combined Protection Committees of 1894 and 1898, and the owner of an investment in Central Pacific stock for which upwards of 30,000l. sterling was paid through you to Mr. Huntington and his associates a few years since, to give you notice that if any attempt is made to carry this project into effect an application to the courts will be made for an injunction, on the ground that the board is an illegally constituted body elected *ultra vires* by the Banbury Committee formed by yourselves and Mr. Bretherton, whose right to pledge the property of the Central Pacific shareholders, or to re-elect Mr. Huntington's nominees, is absolutely denied. A similar notice was mailed yesterday to Mr. Isaac L. Requa at San Francisco, and similar notices will be sent to his co-director, Mr. Bretherton, Mr. Banbury, and Mr. Huntington.—I am, gentlemen, your obedient servant," "W. MORSHEAD."

#### LATEST EARNINGS.

Fourth week of July.—Chesapeake and Ohio, \$359,000—increase, \$52,000; Chicago Great Western, \$130,000—decrease, \$11,000; Mexican Central, \$350,000—increase, \$44,000; Missouri Pacific, \$777,000—increase, \$2,000; New York Ontario and Western, \$127,000—decrease, \$13,000; Wabash, \$376,000—increase, \$22,000; Denver and Rio Grande, \$246,000—increase, \$24,000; Kansas City Pittsburg and Gulf, \$85,000—increase, \$1,000; Chicago Milwaukee and St. Paul, \$828,000—decrease, \$75,000.

Third week of July.—Cleveland Cincinnati Chicago and St. Louis, \$258,000—increase, \$4,000; Northern Pacific, \$434,000—increase, \$22,000; Norfolk and Western, \$209,000—decrease, \$26,000. The gross earnings of seventy-four roads in the third week of July show an increase of 3·36 per cent.

Month of June.—Chicago Burlington and Quincy, gross \$3,193,000—increase, \$181,000; net, \$899,000—decrease, \$52,000. Chicago Rock Island and Pacific, gross, \$1,581,000—increase, \$192,000; net, \$394,000—increase, \$7,000. Central Railroad of New Jersey, gross, \$1,054,000—increase, \$28,000; net, \$441,000—increase, \$67,000. Baltimore and Ohio, gross, \$2,328,000—increase, \$119,000. Denver and Rio Grande, gross, \$712,000—increase, \$95,000; net, \$289,000—increase, \$12,000. Mexican Central, gross, \$1,104,000—increase, \$23,000; net, \$382,000—increase, \$66,000. Lehigh Valley Railroad, gross, \$1,493,000—increase, \$74,000; net, \$311,000—increase, \$66,000. ditto Coal Company, gross, \$1,156,000—decrease, \$78,000; net loss on month's working, \$110,000—increase, \$107,000. Atchison Topeka and Santa Fe, gross, \$3,000,000—increase, \$282,000; net, \$692,000—increase, \$255,000; total net income from operating, \$545,000—increase, \$265,000. Baltimore and Ohio South Western, gross, \$523,000—decrease, \$8,000; net, \$105,000—decrease, \$85,000. Union Pacific, gross, \$1,385,000—increase, \$125,000; net, \$623,000—increase, \$241,000.

### RAILROAD NOTES.

The report of the Chicago Great Western for the year ended June 30th shows:—Gross earnings, \$5,386,000—increase, \$705,000; net earnings, \$1,609,000—increase, \$509,000; net surplus over all payments, \$212,000—increase, \$151,000. The report states that the operating expenses included many cars bought to replace all vacant numbers resulting from equipment destroyed since the organisation of the company.

The advance statement of results for the year ended June 30th issued by the Norfolk and Western Railway shows:—Gross earnings of \$11,236,000; net earnings of \$3,350,000; net surplus available for dividend, \$1,138,000, from which 3 per cent. has been paid on the preferred stock for the year. This being the first complete year of the new company, no comparisons are available.

Including the amount brought forward, the net revenue of the Buffalo and Lake Huron Railway Company for the past half-year amounted to 14,145*l.*, which will allow of a dividend of 5*s.* 3*d.* per share and the carrying forward of 360*l.*

It is believed that the Interstate Commerce Commission will as a result of the present investigation, recommend legislation which shall place the Canadian roads on the same basis as the American lines in any through business.

Last week's east-bound all-rail tonnage from Chicago amounted to 45,000 tons, the Lake Shore road leading with 7,000. Last year in the corresponding week 48,000 tons were forwarded.

The Atchison Topeka and Santa Fé has elected President Jobes, of the Bank of Commerce of Kansas City, to a seat at the board of directors, in place of Mr. Osborn, deceased.

The Chicago Great Western Railway has been compelled by the increase of the business offering to order 300 new freight cars.

The Chicago and Alton has declared the usual quarterly dividend of 1½ per cent. on the common stock.

The Canadian Pacific announces as from Monday last 1½c. per 100*lb.* reduction in grain and flour rates.

## General News.

### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

London and North Western Railway (August 4th).—At the rate of 6¼ per cent. per annum, against 6½ for the corresponding half-year. The dividends for the June half of the last twelve years have been as follows:—

1898 ... 6¼ p. cent.	1895 ... 5½ p. cent.	1892 ... 5½ p. cent.	1889 ... 6½ p. cent.
1897 ... 6¼ "	1894 ... 5½ "	1891 ... 6½ "	1888 ... 6 "
1896 ... 6¼ "	1893 ... 5½ "	1890 ... 6½ "	1887 ... 6 "

Great Western Railway (August 4th).—At the rate of 2¼ per cent. per annum, with a balance of 24,400*l.*, against 4½ per cent., with a balance of 16,200*l.* For the corresponding half of the previous twelve years the dividends were shown as hereunder:—

1898 ... 2¼ p. cent.	1895 ... 3½ p. cent.	1892 ... 4½ p. cent.	1889 ... 5½ p. cent.
1897 ... 4½ "	1894 ... 4½ "	1891 ... 5½ "	1888 ... 4½ "
1896 ... 4½ "	1893 ... 4½ "	1890 ... 5½ "	1887 ... 4½ "

Dublin Wicklow and Wexford Railway.—Dividends will be paid on the 6 per cent. preference and the 5 per cent. preference stocks, under the Acts, 1859-60, being the same as were paid for the corresponding half of last year.

Cardiff Railway.—At the rate of 4 per cent. per annum on the preferred ordinary stock, carrying forward 5,993*l.*

Cambrian Railways.—Full interest of 4 per cent. on A, B, and C debenture stocks, with 2,203*l.* carried forward.

East and West Yorkshire Union Railways.—At the rate of 4 (against 3) per cent. per annum.

Isle of Wight Railway.—At the rate of 3 (against 3) per cent. per annum on the deferred ordinary stock.

Cork and Macroom Railway.—At the rate of 2½ (against 2) per cent. per annum.

Grand Canal (Ireland).—At the rate of 4 (against 3½) per cent. per annum.

British and Irish Steam Packet.—At the rate of 2 (against 2) per cent. per annum.

Stock Conversion and Investment Trust (London and North Western deferred charge stock) at the rate of 1*l.* 7*s.* 6*d.* (against 1*l.* 12*s.* 6*d.*) per cent. for the year.

Lima Railways.—At the rate of 1 (against 1) per cent. for the year.

Bala and Festiniog Railway.—At the rate of 2 (against 1½) per cent. per annum.

We yesterday (Friday) received the following telegram, handed in at "Broad Sanctuary," at 4.17 p.m.:—"Directors recommend no dividend for half-year ended June 30th, but carry forward balance of 66,328*l.*—Surname." Whether the thing is a practical joke, or whether it emanates from some company secretary who thinks that the whole world must know who "Surname, London," is, we cannot say. Reference to the "Directory of Telegraphic Addresses" gives "Surname" as that of a gentleman in Chandos-street, Cavendish-square. Nor does the princely "balance of 66,328*l.*" seem applicable to any railway company which had not already announced its dividend prior to yesterday.

### RAILWAY LAW CASES.

In the House of Lords, on Tuesday, before the Lord Chancellor and Lords Macnaghten, Morris, and Shand, judgment was given in an appeal from a decision of the Court of Appeal discharging a judgment of Mr. Justice Romer's. The action was brought by Mr. Vyner against the North Eastern Railway Company for not having maintained and kept in repair about 8 miles of the bank of the river Ure, which flows through an estate in Yorkshire of which he is the owner. The railway company are the successors of the Ure Navigation Corporation, whose undertaking they have acquired. Mr. Justice Romer gave judgment for the plaintiff. The Appeal Court reversed his finding; but their lordships now restored it, with costs to the appellant in that court and below.

The Recorder at the Dublin City Sessions on the 28th ult. granted a decree for nineteen guineas in an action brought by Mr. G. V. Briscoe, her Majesty's Lieutenant of County Meath, against the London and North Western Railway Company. The plaintiff left Euston for Holyhead by the mail train, but was left behind at Crewe, the carriage in which he was travelling being detached there. The carriage, it afterwards turned out, was for Glasgow, but plaintiff, although his ticket was checked three times on the journey, was not informed of the fact. Having to attend Meath Assizes next day, the plaintiff was obliged to charter a special train. The company contended that the plaintiff was guilty of negligence in entering a carriage which was marked "Glasgow." The Recorder, in giving judgment, said it would be a most dangerous thing to lay down as the law that travellers were bound to search out for themselves the part of the train labelled for their destination.

In the Queen's Bench Division, on Wednesday, Mr. Justice Hawkins delivered judgment in the case of "Vickery v. the Great Eastern Railway Company," which had previously been tried before him at Norwich Assizes without a jury. His lordship said that the plaintiff was the widow of Thomas Vickery, who during his life was in the service of defendants at Norwich. She claimed to recover an amount of compensation from an insurance fund established by the company under an Act of Parliament. This fund was to be applied only to cases in which the workman met his injury or death whilst he was in discharge of his duty to the defendants. In this case the accident occurred at Norwich, where the practice was for the workmen to obtain each a ticket at the office before he commenced his day's work. In the case in question the deceased was on his way to the office to get the ticket, and was crossing the railway lines, where there was a warning notice against persons crossing. Under these circumstances, the only question was whether at the time of the accident the deceased was in the course of discharging his duty to the company; and he (Mr. Justice Hawkins) came to the conclusion that he was not. He thought, however, that if his decision upon that matter was acquiesced in all round, the company might perhaps, out of good feeling, and not as a matter of right at all, consider whether they should make the widow an allowance out of the fund.—Judgment for the defendants.

At the Greenwich Police-court yesterday there was a summons against the London Brighton and South Coast Railway Company, at the instance of the Lewisham District Board of Works, for using in an engine at Forest-hill, on July 22nd, coal or other similar fuel emitting smoke, and not constructed on the principle of consuming its own smoke. Mr. Young appeared for the board, and Mr. George Elliott was counsel for the railway company. Mr. Young said the proceedings were taken by the board in consequence of numerous complaints received of dense, black smoke being emitted from the company's engines between Sydenham and Forest-hill. In a correspondence between the board and the company the latter stated that there had been extra smoke in consequence of the coal strike rendering it impossible to get Welsh coal. The Electric Light Company, who were summoned a few

months ago for a smoke nuisance, raised the same defence, but had now been able to abate the nuisance. An inspector under the board gave formal evidence of seeing black smoke emitted from the engine "Arlington" on the day in question. Mr. Elliott said that the company were unable to get Welsh smokeless coal, which they had been in the habit of using, and had, in the circumstances, done the very best they could by using the next best coal. The engines were constructed on the best principle, and consuming their own smoke, and special instructions had been given to the company's servants to cause as little nuisance as possible. Mr. R. J. Billinton, locomotive superintendent, said it was impossible to get Welsh coal in any quantities. Mr. Elliott said the smoke was more noticeable in consequence of a steep gradient between Sydenham and Forest hill. Mr. Paul Taylor said he must find, as a fact, that the company were unable to obtain smokeless coal in sufficient quantities to abate the nuisance, which would consequently not be caused by the defendant company's default. He suggested the adjournment of the summons *sine die*, to which Mr. Young assented; but Mr. Elliott pressed for the dismissal of the summons. Mr. Taylor said he was entitled to ask for it to be dismissed, and acceded to Mr. Elliott's request.

### UGANDA RAILWAY.

A report on the progress of the Uganda Railway during the year ending March 31st last was issued as a Parliamentary paper last night. It states, first, concerning the survey:—"The total work done up to March, 1898, was 263 miles of completed survey, the progress during the year being 148½ miles. Of the entire length of 263 miles surveyed it may be said that at least 200 is through difficult country. It is waterless, except for small rivers, met with at long intervals, and covered with dense, impenetrable thorny scrub, while the surface is much broken and intersected with ravines. This belt of country, extending inland 200 miles, is therefore one through which survey operations could only be carried out under circumstances of considerable difficulty and hardship. Beyond the belt the country is more open." The report continues:—"The boundaries of the unoccupied land for a distance of 1 mile on each side of the line which has been assigned to the railway is demarcated as the rails advance. At the beginning of the year under review the cuttings and embankments had been completed as far as mile 41, and during the year were finished up to mile 139—a progress of 98 miles. A few additional miles were undertaken with indigenous labour near Kibwezi. The progress, however, was much retarded by abnormally heavy rainfall during April and May, 1897, 40in. having fallen in these two months. The fresh embankments were much damaged, and a further advance temporarily checked, as all available labour was required for repairing them. This exceptional season, combined with freshly turned-up earthworks, caused much sickness and mortality among the coolies and others employed. The railway hospitals were crowded, 10 per cent. of the total number engaged being in-patients, and the medical staff, several of whom were themselves ill with fever, found it almost impossible to efficiently cope with the sickness. With the advent of the comparatively cool dry weather in July the general health gradually improved. As regards platelaying, the want of adequate engine power was greatly felt, and was due to the engineering strike in England, by which the supply of locomotives arranged for was much delayed. When it is remembered that the ruling gradient is 1 in 50 and the general grade elsewhere 1 in 66, the serious effect of the insufficiency of engine power can be appreciated. The necessity for transporting troops and Government stores during December, January, February, and March also necessarily impeded construction work. During the early part of December last the section from Kilindini (Mombasa) to the Voi river (100 miles) was inspected, and was passed as fit for the carriage of passengers. This section was opened to the public for good traffic on December 15th, but owing to pressure of troop traffic and the conveyance of other Government stores the opening for passengers was delayed until February 1st, 1898. Previous to December, 1897, Government caravans and stores to the extent of 2,600 porters and 300 tons of goods were carried for an average distance of 80 miles. For the first three months of 1898 the traffic earnings were as follows:—From coaching (parcels and mails), Rs.64,570; from goods, Rs.32,170; from railway stores, Rs.29,720; total, Rs.126,460, giving an average of Rs.88 per mile per week, or, excluding the earnings from the carriage of railway stores, Rs.67·6 per mile per week. There has also been a large saving to the Protectorates through the cheap carriage of troops and stores over the long, waterless track between the coast and the river Voi." The original estimate for the line for 1897-8 was 714,000l. On revision this estimate was reduced to 589,600l. The estimate for 1898-9 is 625,000l. A schedule of expenditure up to March 31st last shows a total of 1,005,390l.

### PARIS METROPOLITAN RAILWAY.

The Paris correspondent of the *Financial Times* writes:—"So much interest is being taken just now in London in the construction of electric railways that a few words on the subject of the coming Paris Metropolitan line may not be out of place. The line has been recognised by Government as one of public utility, and work will very shortly be commenced on the construction of the railway. There will be seven or eight lines traversing the city in all directions and tapping the principal arteries. The main plan, however, will consist of two lines running north and south, one east and west, and another one starting west and following the outer boulevards to the east end of Paris. It is proposed that the line shall be on the electric trolley system, and it is most likely that the gauge will be a normal one of 1·44 metre. The longest line will be that running by the outer boulevards, which will have a total length of 23,290 metres. The total mileage of the line when completed will be 62 kilometres. The fares are to be the same any distance—that is, 2½d. first-class and 1½d. second class. Most of the lines will be entirely underground, the remainder will be partly through excavations, partly under tunnels, and partly over viaducts. The railway will belong to the municipal authorities, and the City of Paris has been authorised to contract a loan of 6,600,000l. to start the enterprise. It is now, however, becoming evident that this sum will not suffice, and that the cost of the line, according to present indications, will be considerably over 12,000,000l. From the official report of the chief engineer, M. Boutillier, it appears that it would be impossible to construct a normal gauge line in Paris for less than 224,000l. per kilometre, which, for a total length of 62 kilometres, means an outlay of 13,888,000l., but the cost, large as it is, is, perhaps, not excessive having regard to the vast character of the enterprise and to the immense traffic that may be expected to accrue to the line. It is thought that the city loan of 6,600,000l. would be covered in less than a couple of years by a deduction of one penny on every first-class and one halfpenny on every second-class ticket, to be made by the city authorities from the concessionaire company's receipts. It is estimated that not less than 120,000,000 passengers will be carried per annum; but it is, of course, difficult to say what importance to attach to these estimates, the calculations upon which they are based being necessarily, to a great extent, guesswork. The concession has been granted to the Compagnie Générale de Traction, who, in accordance with their agreement, are at once to set about forming a subsidiary company, to be called the Paris Metropolitan Railway Company."

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### GREAT NORTHERN AND CITY RAILWAY.

It is officially announced that the directors of the Great Northern and City Railway Company, at their meeting on the 29th ult., allotted upwards of two-thirds of the entire share capital, including the whole of the preferred ordinary shares.

[This announcement is decidedly vague, and we think the directors would have done better to state definitely the amount of capital allotted of each class. According to our computation the amount allotted is 780,000l. of preferred ordinary shares and 260,000l. (out of a total of 780,000l. offered) of deferred ordinary shares, leaving 520,000l. of the deferred shares still unissued, and we are disposed to question the wisdom of launching the undertaking under these conditions.]

#### BENGAL NAGPUR RAILWAY.

Tenders for the issue of 400,000l. 3 per cent. debentures of the Bengal Nagpur Railway Company, Limited, guaranteed by the Secretary of State for India in Council, were opened on Wednesday at the offices of the company, 132, Gresham-house, E.C., and amounted to 641,200l., at prices varying from the minimum of 100l. to 100l. 9s. Tenders at 100l. 1s. will receive about 14 per cent. of the amount applied for, and those above that price in full, the average price obtained for the stock being 100l. 4s. 10d.

#### EAST AND WEST INDIA DOCK.

The East and West India Dock Company announces an issue at 101½ of 110,000l. 3 per cent. irredeemable prior lien debenture stock "for the purpose of enlarging and adding to the docks."

#### WHITE PASS AND YUKON RAILWAY COMPANY, LIMITED.

This company announces the issue at par of 250,000l. 6 per cent. first mortgage debenture stock. The company was formed to carry out and develop the charter rights and concessions of three companies for the construction and equipment of a railway extending about 325 miles from Skagway Harbour, an ocean port at the head of the Lynn Canal, which is open for navigation all the year round, to Fort Selkirk, on the Yukon. The first division of the railway, about 50 miles, over the White Pass,

2,800ft. high, to the head waters of the navigation of the Yukon River at or near Lake Bennett, is now being constructed, and the funds realised by this issue of debenture stock are intended to be applied towards the completion and equipment of the undertaking to that point. The company has a share capital of 1,000,000*l.* in 10*l.* shares. The Pacific Contract Company, Limited, from which this company acquires the right to carry out and develop the charters, is now constructing the first division of the railway of a gauge of 3ft. from Skagway Harbour to Lake Bennett, and has contracted to complete and equip that division of the railway to the satisfaction of this company's engineer for 500,000*l.*, payable as to 250,000*l.* in cash, and as to 250,000*l.* in shares, and not to take any money on account from the trustees for the holders of debenture stock until it has expended at least 100,000*l.* on the line in manner above stated. The balance of the share capital, 750,000*l.*, will be issued to the contractors in consideration of their handing over all the charter rights and concessions over the 325 miles above mentioned, and providing the company with necessary working cash capital. The contractors guarantee the payment of interest for two years upon this issue of debenture stock. The directors of the company are:—Hon. Sydney Carr Glyn, director of the North London Railway, chairman; Sir Allen Sarle, director of the London Brighton and South Coast Railway, vice-chairman; Joseph Price, vice-president of the Grand Trunk Railway of Canada; Edwin Hanson, of Hanson Brothers, of Montreal; William Brooks Close, of Close Brothers and Co., London and Chicago.

[Although this concern is launched under thoroughly respectable auspices, it is one which in our opinion should not be supported with English capital. It is almost as great a gamble as the mines in the district which it is intended to serve, but whereas a successful mine may return its capital many times over in a few years, the most that can accrue to the subscribers for these debentures, even if the railway be a success, is 6 per cent. per annum. The present issue of debentures is in respect only of a small section of about 50 miles, and if the remaining 275 miles are capitalised at the same rate the debenture capital of the company alone will be no less than 6,500,000*l.*.]

#### GREAT INDIAN PENINSULA RAILWAY.

Tenders were opened yesterday for the issue by this company of 250,000*l.* 3 per cent. debenture stock redeemable at par on June 30th, 1905, and guaranteed by the Indian Government. The total sum tendered for was 475,200*l.* Tenders at 100*l.* 1*s.* 6*d.* will receive about 45 per cent. of the amount applied for, and above that price allotments will be made in full. The average price obtained was 100*l.* 2*s.* 2*d.*

#### RAILWAYS IN ARGENTINA.

The *Review of the River Plate* states that several deputies and senators have held a meeting at which it was generally decided not to report on any petitions for new railways, and not to grant any new concessions during the current year, no matter how pressing the case might be. There appears to be a dearth of railway concessionaries during the present year, as, so far, no project has been presented to Congress for new lines. The attention of would-be concessionaries appears to be centred for the present on electric tramways in the city, although during the past few weeks there have been but few applications made, probably because there can now remain but few streets vacant, as almost every street in the city has been applied for, and several, such as the Paseo de Julio, figure in nearly every concession.

The following appears in a recent number of the *Times* of Argentina:—"The Rural Tramway Company, in reply to the communication from the Railway Board that a fine of \$1,000 had been imposed on the company for not having remitted free passes for the Railway Board inspectors, explains that the passes were not sent because the line is under provincial jurisdiction, as declared by the Department of Engineers of the Province of Buenos Ayres in La Plata. The Railway Board, however, seems to think that this is not good enough, and replies to the Tramway Rural that there will be a standing fine of \$500 a week against it until the passes have been received. Leaving aside the question of the fine altogether, it is time that something finite should be arrived at regarding the jurisdiction over railways. At the present moment, it would appear that both the Railway Board and the Provincial Department of Engineers are trying to manage the railways. One of the departments says a given railway is to do one thing, and the other, probably just out of sheer spite, tells it to do the other thing, with the result that the managers really do not know what to do; meanwhile, just to keep things moving, both departments levy fines for disobedience to orders! It is of little use to take cases to the law courts, for the provincial Judges naturally back up their own friends, while if the matter comes to the Federal

Courts things take the other course. The matter is, however, before the Supreme Court for decision. It has been there for some months past, and it looks very much as if it would remain in the same condition for some months to come."

#### MR. JAMES PURKISS.

The *South Western Gazette* says:—"We have much pleasure in informing our readers that the directors have appointed Mr. James Purkiss, of the general manager's office, Waterloo Station, to fill the vacancy caused by the retirement of Mr. Henry Liddell, and we are sure that our pleasure will be shared by the company's staff in all parts of the London and South Western system, amongst whom he is widely known and respected. Mr. Purkiss entered the company's service in May, 1873, as junior clerk in the storekeeper's office, Nine Elms, under the late Mr. W. H. Stratton, who entertained a very high opinion of his qualifications, and much of his success in later years is no doubt due to that gentleman's kind tuition and example. In October, 1878, upon Mr. Stratton's recommendation, Mr. Purkiss was selected by Mr. Macaulay, then assistant-secretary, for a clerkship in the secretary's office. Upon Mr. Macaulay succeeding to the secretaryship of the company in the year 1880, Mr. Purkiss became his amanuensis, and remained so for the next twelve years, during which time, as is pretty well known, he was intrusted with most important duties. The satisfaction he gave in the secretary's department was certain to obtain for him still further advancement in the service, and this was a special appointment in the general manager's office in March, 1892, which he has filled with great ability to the present time. Having had the inestimable advantage of close association not only with Sir Charles Scotter, but also with our present general manager (Mr. Charles J. Owens), Mr. Purkiss has had a practical experience of the duties appertaining to the higher and more responsible position to which he has now attained, and there is not the slightest doubt he will fill it with credit to himself and advantage to the company. The numerous congratulations bestowed upon Mr. Purkiss by the directors and officials and by all grades of the staff testify to his popularity and to the gratification with which his promotion has been hailed, and we trust he may be spared for many years to enjoy his well-earned promotion."

#### RAILWAY CONCESSIONS IN CHINA.

The *Journal de Bruxelles* declares that the report that a Belgian syndicate had sold to the Russo-Chinese Bank a railway concession in China is altogether incorrect.

A Hong Kong telegram of the 29th ult. states that the Taotai Sheng has memorialised the Tsung-li-Yamen in favour of the projected construction of a railway between Kau Lung and Canton by Messrs. Jardine, Matheson, and Company, representing a British syndicate. The granting of the concession is impeded by strong protests made by the French Minister at Peking.

Reuter's Agency is informed that a letter has been received from Dr. Yung Win, the concessionaire of the Tientsin Chinkiang Line, expressing his anxiety for the scheme to be financed in London, and asking the terms on which the capital could be furnished. Telegraphic communications are in progress with Peking on the subject, with a view to securing this line, with its terminus on the Yang-tse, to British capitalists. The terms suggested are confidential, but they are stated to be of such a nature as possibly to induce the Tsung-li-Yamen to extend the time within which the capital for this undertaking has to be found.

The Peking correspondent of the *Times*, telegraphing on Wednesday, says:—"Under the terms of the preliminary contract signed with the Hong Kong and Shanghai Bank for the Niu-chwang extension railway loan, the issue raised by the Russian protest must be faced within a few weeks. The issue is clear and definite. Sir Claude Macdonald, on July 24th, made a strongly worded declaration to the Tsung-li-Yamen, which he subsequently confirmed in writing, to the effect that England will not tolerate any interference of another Power with the British loan contract freely entered into by the Chinese for the purpose of building on the most favourable commercial terms possible a railway completing the connection between Tien-tsin and Niu-chwang, both treaty ports where British commercial interests are predominant. Withdrawal after this declaration is impossible with any regard for national honour and rights. On the following day, however, M. Pavloff again reiterated and emphasised his protest of June 11th, endeavouring to dictate conditions to the Tsung-li-Yamen which, if accepted, would be equivalent to an abrogation of the British-signed contract. There the matter stands. Unfortunately, the Chinese, reminded by M. Pavloff of recent British vacillation, appear to regard his protest as more formidable than the British declaration."

## FOREIGN AND COLONIAL ITEMS.

The Government of Uruguay has paid the guarantees due to the several railway companies in respect of the quarter to June 30th, 1898.

Mr. Goddard, who has been in charge of the gas and electric light plant of the Buenos Ayres Western Railway, has been appointed locomotive superintendent of the Leopoldina Railway of Brazil.

The directors of the Costa Rica Railway Company, Limited, notify that they will make an interim payment of interest of 3 per cent. on the second debentures, being at the rate of 6 per cent. per annum on September 1st next.

The Council of Foreign Bondholders announce that they are prepared to pay the half-yearly dividend in arrear due July 1st, 1897 (less a charge of  $\frac{1}{2}$  per cent. on account of expenses), on the debentures of the Ituana Railway Company represented by the certificates issued by the council.

For the convenience of passengers travelling to and from North Germany, Norway, Denmark, and Sweden, *viâ* Harwich and the Hook of Holland, arrangements have been made for a dining-car to run between the Hook and the Rhine, thus enabling passengers to breakfast and dine *en route*. By this service passengers leaving London in the evening arrive at Hamburg the next afternoon, Berlin in the evening, and Copenhagen the following morning.

Meetings of the holders of the 5 and 6 per cent. debentures of the Midland Railway of Western Australia, Limited and Reduced, will be held August 12th, "to consider and, if approved, to pass as special resolutions, as defined by the same deeds, resolutions assenting to a scheme for issuing prior lien bonds, converting each class of debentures into income bonds, funding overdue interest, providing for the floating debt of the company, altering each of the said trust-deeds, and other purposes."

The New Zealand Government recently called for tenders in England for ten locomotives. The lowest tender was 2,050*l.* each c.i.f., but it was stated that the engines could not be forwarded for thirteen or fifteen months. The Government then invited offers from Baldwin, the American maker, who offered to supply the engines in three months for 2,675*l.* each c.i.f. As it is absolutely necessary to have the engines for next season, the Government has decided, in spite of the additional expenses, to do business with America.

According to Mr. Consul Parminter's report on Lourenço Marques the total receipts of the Delagoa Bay and East African Railway from all sources during the year 1897 reached 161,576*l.* (727,092,179 reis), as against 148,350*l.* (667,573,301 reis) for 1896. The exchange is reckoned in this comparison at 4,500 reis to the pound sterling, the average for 1896; but in 1897 the rate was from 6,000 reis to 7,000 reis. Mr. Parminter reports that the line is good, the carriages comfortable, the trains run well up to time, and no serious accidents have occurred.

The *Journal des Débats* is disinclined to credit an announcement from Cairo of the sale of the Egyptian railways to an English syndicate for 25,000,000*l.* A country under financial tutelage, it urges, cannot alienate any of its resources without the assent of those guardians. The Egyptian railways, moreover, form, together with the port of Alexandria, the guarantee of the privileged debt, which cannot be paid off till 1905. Nor can the railways be farmed out, for the decree of 1890 stipulates for the maintenance of the present system. All attempts to elude these difficulties by more or less ingenious devices would be contrary to the convention between Egypt and the Powers.

The report of the Mogyana Railway Company for the year 1897 shows a gross revenue of \$16,476,145, being \$913,198 in excess of that for the previous year. Traffic receipts amounted to \$16,383,446, and working expenses to \$10,367,730, or 63.30 of the former, leaving a balance of \$6,014,715. The number of passengers carried was 1,351,913 (against 1,259,627), the quantity of luggage and parcels 10,847,038 kilos. (against 11,763,965 kilos.), the number of cattle carried 5,269 (against 2,204), and the quantity of goods 407,780 tons (against 376,707 tons). The total length of the lines of the company, on December 31st, 1897, was 1,116 kilos. (nearly 998 miles). The amount of coffee carried over the trunk line in 1897 was 134,552 tons, or 21,670 tons more than the previous year.

## CAPITAL COST OF SOUTH AMERICAN RAILWAYS.

Mr. Juan José Castro, of Montevideo, has written a book on the railways of South America, from which we take the following data relating to Uruguayan railways:—

	Length, kil.	Capital.
Central Uruguay .....	321,640	£2,790,210
Central Uruguay Northern Extension...	293,325	1,637,961
North Eastern of Uruguay .....	124,300	800,000
Central Uruguay Eastern Extension ..	581,200	3,041,435
Eastern .....	419,463	2,067,315
Midland Uruguay .....	317,036	1,585,180
North Western of Montevideo .....	178,800	1,015,535
Uruguay Northern .....	114,157	570,775
Branch to San Eugenio .....	3,000	15,000
Western .....	520,085	2,500,000
Uruguay Northern .....	23,000	138,000
Interior .....	617,662	3,088,310

The total capital of all the lines when completed will amount to 19,279,721*l.*, and the total length to 3,514 kilometres, which is equivalent to 5,486*l.* per kilometre. Compared with the above, on January 1st, 1897, Argentina had 14,550 kilometres of line, representing 98,773,076*l.* capital, or 6,830*l.* per kilometre. Brazil had 13,523 kilometres of line, with 99,433,219*l.* capital, or 7,353*l.* per kilometre. Chili in 1895 had 4,003 kilometres, with a capital of about 22,000,000*l.* The cost per kilometre in the different countries has been:—Uruguay, 5,486*l.*; Argentina, 6,830*l.*; Brazil, 7,353*l.*; Chili (Government), 6,444*l.*; Chili (private), 5,000*l.*; Peru, 20,000*l.*

**Brecon and Merthyr Railway Prospects.**—We recently called attention to the early preference stocks of the Brecon and Merthyr Railway as securities which should some day be worth much higher prices than those now ruling. Investors may not perhaps look favourably on such stocks just now, but an increase of traffic would soon alter the position of these stocks and bring them into the dividend paying list, and we see it is stated in the report of the Tredegar Iron and Coal Company, that a tramway capable of carrying 1,200 tons of coal a day is about to be made to connect their colliery with the Brecon and Merthyr Railway. Further new traffic will also be put on this line at an early date, and its prospects, therefore, are improving, and the stocks named and the debenture stocks are worth buying, we think.—*Lyddon and Co.'s Circular.*

**Great Southern and Western Railway.**—A special general meeting is called for August 13th. (1) For the purpose of considering and, if so determined, of passing resolutions approving of the proposed amalgamation of the undertakings of the Waterford Limerick and Western Railway Company and the Waterford and Central Ireland Railway Company with the undertaking of the Great Southern and Western Railway Company upon the terms agreed between the respective boards of these companies. (2) For authorising the directors to subscribe to and take shares in the undertaking of the Fishguard and Rosslare Railways and Harbours Company in a sum of 250,000*l.*, and for the purpose of creating 250,000*l.* ordinary stock of the company in pursuance of the powers of the Fishguard and Rosslare Railways and Harbours Act, 1898, and for authorising the issue of such new stock at such times, in such amounts and manner, on such terms, and subject to such conditions as the meeting shall think fit.

**Breakfast Cars—What Next?**—The Great Eastern Railway Company is now building, at its shops at Stratford, some new bogie carriages, in which passengers will be able to get their breakfasts on the way to London by certain morning trains from Norfolk and Suffolk. The breakfast car will be 55ft. in length, and be provided with accommodation for first and third class passengers. Attached, and communicating with the breakfast car at one end will be a first-class vestibule saloon carriage, and at the other a third-class vestibule saloon carriage. These vestibule carriages will be fitted with tables, and passengers so desiring it may have breakfasts served in them. The charge for breakfast will be fixed on a moderate scale, to meet the requirements of all classes of passengers, and, in the event of a full breakfast not being required, a pot of tea or coffee, with roll and butter, will be obtainable for a small charge. Other refreshments will be served at reasonable prices.

**Railways on the Gold Coast.**—On Thursday several railway officials left Liverpool in Elder Dempster's steamer *Niger* for Sekondi, under the direction of Mr. T. R. Shelley and Mr. A. Knights. This is practically the first step taken in connection with the real laying down of the railway line to Tarquah and Kumassi. First of all the members of the expedition will survey to Tarquah, which is the gold mining district of the colony, and where most of the concessions granted are situated. After the survey the construction of the line will be commenced, and then they have instructions to survey to Kumassi, the line going, it is said, through a further gold region. From Sekondi to Tarquah

the distance is 40 miles, and it is expected the line will be completed in three years. From Tarqual to Kumassi is a further 170 miles, but no estimate has so far been formed as to when the line will reach the Ashanti capital. A large quantity of railway material has already gone to Sekondi, so that the *Niger* has only on board the surveying and other instruments belonging to the officials.

**Threatened French Railway Strike.**—A Dalziel telegram of the 3rd inst. says:—"A general strike of railway employés throughout France is threatened. The officials of the men recently decided to make a final effort to settle their differences with the various railway companies, and to appeal to the trades unions throughout the country to make common cause with them. The directors of the railway companies have replied to the men's officials that each company is willing to treat directly with its own employés, but they refuse to recognise any committee or syndicate, because they consider railwaymen are not permitted to form themselves into unions on the ground that they are really soldiers, all the railways of France having been militarised. Upon the second point the men have obtained the promise of support from forty-five trades unions, while 105 desire to remain neutral. The railway men say that it is impossible to come to any satisfactory arrangement with the companies, and they have decided to hold a mass meeting at once in order to discuss the question as to whether the moment for a general strike has now arrived."

**Nitrate Railway Directors and their Associates.**—We beg to call the attention of Messrs. Robert Harvey, J. J. Smith, R. R. Lockett, and A. R. Robertson to the following question which was asked in the House of Commons on Thursday, the individual referred to therein (commonly known as "Broadley Pasha") having played a somewhat interesting part about a year ago in connection with certain legal proceedings to which some of the directors and ex-directors of the Nitrate Railways Company were parties:—

Mr. DUNCOMBE asked the Home Secretary whether his attention had been called to the allegation that certain payments had been made in this country by a Mr. Hooley to one A. M. Broadley, with a view to influencing a section of the Press; whether this person was the same A. M. Broadley against whom a warrant was issued some years ago in India on a charge of committing a criminal offence; whether such a warrant runs in England; if so, why the warrant had never been executed; and what steps, if any, he proposed to take to vindicate the law of the land?

The HOME SECRETARY said that a warrant of arrest issued in India for an offence coming under the Fugitive Offenders Act would run in England if endorsed in the manner provided in the Act. It would not, however, come under his notice till executed. He was afraid that he had no further information to give.

## THE REORGANIZATION MANAGERS of the BALTIMORE and OHIO RAILROAD COMPANY announce that over 93½ per Cent. of the outstanding Bonds and over 73 per Cent. of the Stocks affected by the Plan and Agreement having been deposited, the PLAN is declared OPERATIVE.

The time for further deposits of Bonds and Stock without additional charge has been extended to and including August 20th, 1898, after which date, but only for such time as the Managers may fix by notice, deposits of Bonds and Stocks will be accepted only upon a cash payment of Two per Cent. of the par value of Bonds and an additional cash payment of \$2 per Share of Stock deposited. Unpaid Coupons and Claims for Interest on Registered Bonds, matured prior to July 1st, 1898, must be deposited on or before August 20th, 1898. After that date deposits of such Coupons or Claims for Interest will be accepted, if at all, only upon such terms as the Managers may impose.

## TO the HOLDERS of the following BONDS, STOCKS, and COUPONS.

Baltimore and Ohio Railroad Company Bonds, Loan of 1853, extended to 1935 at Four per Cent.  
 Baltimore and Ohio Railroad Company 100-year Five per Cent. Consolidated Mortgage Bonds of 1888.  
 Baltimore and Ohio Railroad Company Sterling Six per Cent. Loan of 1872, due March 1, 1902.  
 Baltimore and Ohio Railroad Company Sterling Six per Cent. Loan of 1874, due May 1, 1910.  
 Baltimore and Ohio Railroad Company Six per Cent. Loan of 1879, due April 1, 1919 (Account Parkersburg Branch Railroad Company).  
 Baltimore and Ohio Railroad Company Five per Cent. Bonds, Loan of 1885 (Account Pittsburgh and Connellsville Railroad Company).  
 Baltimore and Ohio Railroad Company Four-and-One-half per Cent. Terminal Mortgage Bonds of 1894.  
 Baltimore and Ohio Railroad Company Sterling Four-and-One-half per Cent. Loan of 1883, Philadelphia Branch.  
 Baltimore and Ohio Railroad Company Sterling Five per Cent. Loan of 1877, due June 1, 1927 (Account Baltimore and Ohio and Chicago Railroad Company).  
 Baltimore and Ohio Railroad Company First Preferred Stock.  
 Baltimore and Ohio Railroad Company Second Preferred Stock.  
 Baltimore and Ohio Railroad Company Common Stock.  
 Pittsburgh and Connellsville Railroad Company First Mortgage Bonds, extended to 1946 at Four per Cent.  
 Pittsburgh and Connellsville Railroad Company First Mortgage Seven per Cent. Bonds, due July 1, 1898.  
 Pittsburgh and Connellsville Railroad Company Six per Cent. Consolidated Mortgage Bonds.  
 Akron and Chicago Junction Railroad Company First Mortgage Five per Cent. Bonds.  
 Akron and Chicago Junction Railroad Company Preferred Stock.  
 Washington City and Point Look-out Railroad Company Six per Cent. Bonds.  
 Unpaid Coupons and claims for Interest on Registered Bonds matured prior to July 1st, 1898, appertaining to any of the above-named Bonds, except those of the Washington City and Point Look-out Railroad Company.

Over 93½ per cent. of the above-named outstanding Bonds, and over 73 per cent. of the above-named Stocks, having been deposited under the Plan and Agreement for the reorganization of the Baltimore and Ohio Railroad Company, dated June 22, 1898, the undersigned hereby give notice that the said Plan is Declared Operative.

The time for further deposits of the above-named Bonds and Stocks without additional charge has been extended to and including August 20th, 1898, after which date, but only for such time as the Managers may fix by notice, deposits of said Bonds and Stocks will be accepted only upon a cash payment of 2 per Cent. of the par value of Bonds and an additional cash payment of \$2 per Share of Stock deposited.

Unpaid Coupons and claims for Interest on Registered Bonds matured prior to July 1st, 1898, must be deposited on or before August 20th, 1898.

After that date deposits of such Coupons or claims for Interest will be accepted, if at all, only upon such terms as the undersigned may impose.

## LONDON and SOUTH WESTERN RAILWAY COMPANY.

At the ONE HUNDRED and TWENTY-EIGHTH HALF-YEARLY GENERAL MEETING of the Proprietors, held at the Waterloo Station, London, on Thursday, the 4th day of August, 1898,

W. S. PORTAL, Esq., in the Chair,

The Notice convening the Meeting was read.

The printed Statement of the Accounts for the Half-year ended 30th June, 1898, and the Report of the Directors, which had been transmitted to each Proprietor, were taken as read.

### Resolved—

That the Report of the Directors and Statement of Accounts for the Half-year ended 30th June, 1898, be, and the same are hereby, received and adopted.

### Resolved—

That the following Dividends be, and the same are hereby, declared, namely:—

At the rate of £4 per cent. per annum on the Consolidated Guaranteed Stock.

At the rate of £4 per cent. per annum on the Consolidated Preference Stock.

At the rate of £4 per cent. per annum on the Perpetual Preference Stock, 1894.

At the rate of £3 10s. per cent. per annum on the 3½ per Cent. Preference Stock.

At the rate of £5 per cent. per annum on the Ordinary Stock, and that the amounts payable in respect thereof be at the aforesaid rate on the Unconverted Ordinary Stock, and at the rate of £4 per cent. per annum on the Preferred Converted Ordinary Stock.

And that all such Dividends be payable (subject to Income-tax) on the 15th August, 1898.

### Resolved—

That the thanks of the Meeting be given to the Directors and Officers, and the whole of the Staff of the Company, for their services during the past Half-year.

FRED. J. MACAULAY, Secretary.

## RHONDDA and SWANSEA BAY RAILWAY COMPANY.

NOTICE is hereby given, that the THIRTY-SECOND HALF-YEARLY ORDINARY GENERAL MEETING of the Proprietors of the Rhondda and Swansea Bay Railway Company will be held at the Royal Metal Exchange, Fisher-street, Swansea, on SATURDAY, the 13th day of August, 1898, at Twelve o'clock Noon, for the General Purposes of the Undertaking.

The Transfer Books will be Closed from the 3rd August to the 13th August, both days inclusive.

JOHN J. JENKINS, Chairman.

H. S. LUDLOW, Secretary.

Swansea, 27th July, 1898.

## LANCASHIRE and YORKSHIRE RAILWAY.

NOTICE is hereby given, that the next HALF-YEARLY GENERAL MEETING of the Lancashire and Yorkshire Railway Company will be held at the Company's Offices, Hunt's Bank, in the City of Manchester, on WEDNESDAY, the Tenth day of August, (One Thousand Eight Hundred and Ninety-eight, at Twelve o'clock at Noon precisely, for the transaction of the ordinary business of the Company.

And Notice is hereby further given, that after the ordinary business of the said Meeting has been concluded, such Meeting will be made SPECIAL or EXTRAORDINARY for the purpose of—

"Authorising the Directors to borrow on Mortgage such sum or sums of money as the said Meeting shall determine, not exceeding in the whole the sum of £482,000, being as to £132,000, the amount which the Company is authorised to borrow under the 'Lancashire and Yorkshire Railway (Various Powers) Act, 1862,' as to £200,000, the amount which the Company is authorised to borrow under the 'Lancashire and Yorkshire Railway Act, 1893,' and as to £150,000, the amount which the Company is authorised to borrow under the 'Lancashire and Yorkshire Railway Act, 1894,' and to authorise the Company to raise, from time to time, all or any part of the said sum of £482,000 by the creation and issue of Debenture Stock, in accordance with the provisions of Part 3 of the 'Companies' Clauses Act, 1863.'"

Dated this Twenty-second day of July, One Thousand Eight Hundred and Ninety-eight.

GEO. J. ARMYTAGE, Chairman.  
 C. W. BAYLEY, Secretary.

## GREAT CENTRAL RAILWAY.

SAILINGS TO AND FROM THE CONTINENT VIA GRIMSBY.

Weather and other circumstances permitting, the Company's vessels sail DAILY TO and FROM HAMBURG (Sundays excepted).

To ROTTERDAM EVERY WEDNESDAY and SATURDAY.

Returning every Tuesday and Saturday.

To ANTWERP EVERY MONDAY, WEDNESDAY, and SATURDAY.

Returning every Tuesday, Thursday, and Saturday.

Trains run in connection with the above steamers at convenient times from all important centres in Lancashire and Yorkshire and the Midland Counties.

Every information as to goods rates, &c., will be given on application to the Shipping Agents, Messrs. John Sutcliffe and Son, Grimsby; or to Mr. C. T. Smith, Goods Manager, Great Central Railway, Manchester. Particulars as to fares, &c., can be obtained from Mr. R. Haig Brown, Superintendent of the Line, Manchester.

## Meetings.

### LONDON AND SOUTH WESTERN RAILWAY.

The half-yearly general meeting was held on Thursday, at Waterloo Station; Mr. WYNDHAM S. PORTAL presiding.

The SECRETARY (Mr. Fred. J. Macaulay) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN then said—Ladies and gentlemen, I hope you will allow me to commence my remarks by referring to paragraph 15 in our report, which announces the death of our valued colleague, Mr. Arthur Edward Guest. Mr. Guest was a most practical and energetic railway man in the truest sense of the word, and that fact and his social qualities combined make his loss to the board a severe one, and I am sure the regret felt by the board will be participated in by the shareholders very generally. With your permission, I will now make one or two cursory remarks upon the various paragraphs in the report, and having done that I will proceed in the usual course to deal with the accounts a little more in detail. Paragraph 2 of the report says that the capital account of the company now stands at 39,474,505*l.* Paragraph 3 tells you that on capital account we expended 313,754*l.* during the half-year, and when I come to the accounts I will explain to you the mode in which this sum has been expended. Your interest naturally centres at once in paragraph 4, which gives you a statement of the revenue account. Our gross revenue was 2,099,479*l.*, as compared with 2,069,195*l.* in the corresponding period of last year, showing an increase, roughly, of 30,000*l.* The expenditure was 1,289,007*l.*, as compared with 1,222,885*l.*, or an increase, roughly, of 66,000*l.* Deducting revenue expenditure from the revenue receipts leaves us this half-year with 810,474*l.*, as compared with 846,310*l.* at this time last year. The debenture interest, preference dividends, and other prior charges stand at 519,588*l.*, or, roughly, 4,000*l.* more than last half-year. The net revenue is thus 290,884*l.* at June, 1898, as compared with 322,491*l.* at June, 1897. Then we brought in a surplus from the previous half-year of 23,088*l.*, or about 1,800*l.* less than in the corresponding half-year. The result of all this is that the amount available for dividend is 313,922*l.*, as against the figure at the end of June, 1897, of 347,296*l.* The next paragraph tells you that the amount available for dividend will admit of a payment at the rate of 5 per cent. per annum on the original ordinary stock of the company, and my remarks will conclude with a resolution that such a dividend be declared. This dividend of 5 per cent. compares with 5½ per cent. at June, 1897, and 5 per cent. at June, 1896. Then we have, as a balance to carry forward to the current half-year, 15,287*l.*, which compares with 23,525*l.* at June, 1897, and 18,485*l.* at June, 1896. The revenue receipts, you will see by paragraph 6 (exclusive of steamboats and Southampton Docks receipts), were 1,929,057*l.*, being an increase on the half-year as compared with the half-year to June, 1897, of 29,690*l.* The revenue expenditure shown in paragraph 7 (also exclusive of steamboats and docks) was 1,132,042*l.*, or an increase of 69,665*l.* on the figures for the corresponding half-year. The result of this was an increase in the working expenditure of 58·69 per cent., as compared with 55·93 at June, 1897. Of course, I shall have something more to say on the subject matter of these two paragraphs (Nos. 6 and 7) when I come to deal with the accounts. You will observe with satisfaction that paragraph 8 tells us that we have derived increased net receipts of 1,421*l.* from our docks at Southampton. We think this is a very satisfactory feature, especially when we consider that the large vessels of the American Line have not been running. You are no doubt aware of the fact that the fine mail steamers of the Castle Line are now calling at Southampton Docks on their homeward journeys, and that some of the vessels owned by the important firm of Messrs. Elder, Dempster, and Co., and by the Wilson Furness line are now visiting Southampton. Then the service between Southampton and New York by the North German Lloyd and the Hamburg American line, showing an increase of thirteen sailings over those in the corresponding half-year. We are very well satisfied with our position in the docks, and look forward with confidence to future developments. Paragraph 9 deals with steamboats, and tells you that there has been a decrease in the receipts of 2,657*l.*, but this is more than neutralised by the fact that the expenditure has been reduced by 5,374*l.* The decrease in the receipts arises partly from the American war and partly from a later season for certain classes of produce. Paragraph 10 deals with new lines and widening works. The first line mentioned is an extension of our railway from Holsworthy to Bude, and I hope next week to have the pleasure of going down to Holsworthy formally to open that extension. We have every confidence that when Bude is directly connected with our railway it will, owing to the natural beauties of the coast and its very healthy and bracing climate, rapidly develop and become one of the most important holiday resorts on our system. Then you will observe that contracts have been let for the construction of the Meon Valley Railway from Alton to Fareham, for the light railway from Basingstoke to Alton, and also the widening of the line between Alton and Farnham. I am sure you will join with me in the satisfaction we felt at the courtesy shown to us by the Right Hon. C. T. Ritchie, the President of the Board of Trade, in coming down from London to Basingstoke in order to cut the first sod of the first light railway to be constructed under the powers of the Light Railways Act, in the passing of which he played so important a part. The next points of interest are the important widenings which are going on between

Waterloo and Clapham Junction and from Woking to Basingstoke. You know our traffic has increased so rapidly that additional accommodation is absolutely necessary between Waterloo and Clapham Junction, and I am sure those of you who travel up day by day will have noticed with great satisfaction the progress which is being made at various points with these widenings. Here let me say one word as to an important piece of work which has been carried out between Vauxhall and Clapham Junction by our engineers during the past half-year. We came under an obligation some time since to widen the bridges carrying our railway over several streets, and this work has involved slewing and alterations of lines, and the fact that these bridges have been widened without accident and without anything more than a slight delay to trains reflects, I think, the greatest possible credit upon our engineering staff. True it is that the trains having to run over temporary roads involved a slackening which meant a loss of sometimes three or four minutes to every up and down train; but that we were able to maintain the running without intermission was to us a matter of great satisfaction. Paragraph 11 refers to the Waterloo and City Railway, and with reference to this I must confess frankly to a little feeling of disappointment. "Hope deferred makes the heart sick," and we have had a great deal of deferred hope in connection with the Waterloo and City Railway, but there is nothing whatever either in the railway itself or in its future prospects which causes us the least depression. We have every confidence in both, but in dealing with a somewhat new mode of traction some unexpected developments have taken place which have required the careful attention of our electricians, and this, coupled with the delay caused by the engineers' strike, has rendered us unable to open the railway at an earlier date. Here, however, I have another interesting ceremony to mention, and you will join with me I am sure in the great pleasure which the directors felt at the extreme kindness of H.R.H. the Duke of Cambridge in coming to formally open the line on July 11th. From the experimental trips which we have made from time to time over this railway we are quite satisfied that it will answer in every respect the reasonable requirements of the public. The line is so complete for opening to the public that after this meeting if any of the shareholders would like to travel by it to the Mansion-house and back again they can do so. ("Hear, hear.") Paragraph 12 refers to the North Cornwall Railway. As you are aware, the North Cornwall Company are making an important extension of their line from Wadebridge along the banks of the Camel to Padstow. Padstow is such a convenient place for fishing and general trading purposes that it seems almost a matter of surprise that it has not had railway connection long ere this. We believe a large development of business will result when the line is open, and I need hardly say we hope for this not only for our own benefit, but for the benefit of the North Cornwall Company who are making the line, and also for the general public. We are able to announce to you in paragraph 13 that the company's application for powers to construct the light railway from a point near Grateley to Amesbury, and the new military camp on Salisbury Plain has been sanctioned by the Light Railway Commissioners and now awaits the necessary order of the Board of Trade. The very large concentration of troops which is arranged to take place during this autumn in the district to be served by this light railway shows the necessity in the public interest for its construction, and I have only to say on behalf of this company that so soon as we get the necessary order from the Board of Trade we shall set our solicitors and engineers to work so that it may be constructed with the utmost possible dispatch. Paragraph 14 tells you that the company's Bill has passed through Parliament and now awaits the Royal Assent. As you are aware that Bill included many important powers for the acquisition of property for the widening of our railway and also for the making of a railway from Budleigh Salterton to Exmouth, &c. We were, however, unfortunately opposed by the London County Council with reference to the proposed enlargement of the Waterloo Station, and Parliament in its wisdom decided that we must wait for the powers sought until next session. We are so impressed with the necessity for increasing the accommodation at Waterloo Station that we are giving our best attention to the preparation of revised plans, and certainly no effort will be spared by the officers of our company to secure for us the powers so necessary to enable us to give the accommodation to the public which we think they may reasonably ask at our hands. I have now dealt fully with the report and will turn to the accounts. Perhaps it will be most convenient if I ask your attention to Table 5, which gives you the details of the capital expenditure during the past half-year. Perhaps not many comments on my part are necessary, but I will refer to one or two of the larger items. The first figure I would mention is the sum of 33,946*l.* spent on the widenings of our railway from Waterloo to Clapham Junction, and from Woking to Basingstoke, &c. Then follows the sum of 8,869*l.* expended in the extension of the telegraph block system, interlocking, and other signalling improvements. I am glad to say we keep ourselves well up to date as regards signalling, and introduce as promptly as possible all modern improvements tending to increase the safety of the public. Then you will see that we expended 19,428*l.* in Waterloo and Nine Elms improvements. Relatively a small portion of this refers to Waterloo, the greater expenditure being at Nine Elms, where we are putting up, and hope to complete by October, one of the largest goods sheds to be found in the country. We have been much hampered for some years past by lack of accommodation at Nine Elms, and we have reason to hope that the new shed will be of benefit

not only to the company, but also to the staff who are called upon to deal with our traffic at Nine Elms. Then you will see a sum of 5,330*l.* spent in improvements at Salisbury, Templecombe, and Exeter, and I am sure, expenditure at these important junction stations will always meet with your cordial approval. On "lines in course of construction" we have expended 39,000*l.* on the Holsworthy and Bude Railway about to be opened, and there has been certain preliminary expenditure in connection with the Meon Valley Railway and Basingstoke and Alton Light Railway. Then we have expended 67,669*l.* on an increase of carriage stock, and the constantly increasing volume of traffic justifies this expenditure. At the Southampton Docks we have expended practically 51,000*l.*, and, as I have already told you, the developments there during the past half-year have been such as to justify our so doing. Table No. 7 tells you what we estimate as our capital expenditure in the current and subsequent half-years, and Table No. 8 shows that our capital powers more than suffice for these requirements. I think we can now turn our attention to the summary of revenue receipts and expenditure on page 2. This gives the total receipts from all sources, and I will, if you will allow me, go through them item by item. We start with passenger traffic, and let me at once say that it is difficult to institute any fair comparison between the receipts for the past half-year and the corresponding half-year of 1897. In the first place, as you are aware, the receipts for the half-year ended June, 1897, included very large sums received by this company in respect of traffic, very largely first-class, carried in connection with the Jubilee celebrations; while in the past half-year we had no such exceptional traffic to help our receipts. There have been two distinctly unfavourable features. The first of these is the fact that owing to the unfortunate war between America and Spain, which we all hope will terminate very shortly, the American line was compelled temporarily to withdraw their large steamers which were running regularly between Southampton and New York, and in connection with which we conveyed a very large passenger traffic, an important portion of which was first-class. As an illustration of the effect of inclement weather, you may probably be surprised to hear that we estimate that our loss in gross receipts from the bad weather which preceded and attended the University Boat-race in March last was not less than 1,500*l.* We can hardly over-estimate what conditions such as these mean to our railway, which serves so many important pleasure resorts; but I may say at once that, in view of the exceptionally favourable features in 1897, and also the exceptionally unfavourable features in the past half-year, we do not consider the comparison we present upon our passenger traffic to be at all an unfavourable one. There is a decrease in receipts from first-class passengers of 13,320*l.*, and a decrease in numbers carried of 25,626, as set out in the statement immediately below. There is an increase of 10,665*l.* and 112,335 in numbers in our second-class passenger traffic, which I am sure you will regard with as much pleasure as we do. We feel sure that these figures will convey to your minds, as they do to our own, an ample justification of the policy we adopted some time since with respect to the maintenance of the second-class, while at the same time making a reasonable reduction in the fares. Our receipts from third-class show an increase of 2,268*l.*, while the increase in numbers reaches the relatively much higher figure of 795,759. It may interest you to note that out of this increase in numbers about 300,000 is represented by an increase in the issue of what are called workmen's tickets, which tickets we know are very largely availed of by classes which cannot by any possible means rightly claim the title of "working" men. It will also probably further interest you to know that the average receipts from passengers during the past half-year worked out as follows:—First-class, 2*s.* 3*d.*, as compared with 2*s.* 5*d.* in 1897; second-class, 1*s.* 3*d.*, as compared with 1*s.* 2*d.* in 1897; third-class, 6*d.*, as compared with 7*d.* in 1897. These, you will see, again show an improvement in our second-class traffic, which alone gives us an increased receipt on an average per passenger. The total result of passenger traffic, exclusive of season-tickets, is a decrease of 387*l.*, but when we come to the season-ticket traffic—a traffic not affected by the exceptional circumstances I have already alluded to as affecting other classes of passenger traffic, we see the steady progress of our company clearly manifesting itself. We have had an increase in our season-ticket receipts of 4,951*l.*, and an increase in season-ticket holders of 1,139. Then our parcel and mail receipts show an increase of 2,876*l.*, giving a total increase in coaching traffic of 7,420*l.* The next column deals with goods, minerals, and live stock, which gives a total increased receipt of 16,537*l.*, the tonnage (as you will see by the statement immediately below) having increased by 115,767 tons, while the number of livestock conveyed decreased to the extent of 8,816. The goods traffic shows an increase of 6,875*l.*; livestock a decrease of 578*l.*; minerals the very satisfactory increase of 10,240*l.* Now for a word or two on each of these: the goods traffic was, of course, very adversely affected by the loss of the traffic which under normal circumstances would have been conveyed in connection with the large steamers of the American Line, and I think, under the circumstances, we may regard the increase of nearly 7,000*l.* as a very satisfactory one. Our line is largely agricultural, and, therefore, it is a matter of interest to us to know that the quantity of English hay conveyed during the past half-year was 35 per cent. over that of the corresponding half-year of 1897, and we also find that the English timber conveyed has shown an increase of 34 per cent. The decrease in live stock is a thing we especially regret. We have spared no pains to foster this traffic both by quoting the lowest possible rates and giving the best possible service. We find the decrease is almost entirely in the traffic in sheep, and there is no doubt that the enormous importation of frozen mutton into this country very seriously affects home sheep-breeding. I am very glad to say that although the sheep traffic to and from the fairs held on this company's system decreased during the past half-year, the reports I have already received this half-year show a slightly more satisfactory condition of affairs. Then, on turning to mineral traffic, our receipts have increased by 11,239*l.*, and it is a source of gratification to find that the increase arises very largely indeed through the increased carriage of building materials such as stones, bricks, &c. There is also, I am glad to say, an increase in the slate traffic from Delabole. We were somewhat disappointed with that traffic when the line was first opened, but I am glad to say it is still increasing, and, no doubt, when the railway

is open to Padstow, and water connection thus secured, this traffic will be still further augmented. Those who travel upon our system must always be struck with the large amount of building which is going on, and while this continues we may reasonably infer that the traffic of the line will continue to increase also. The next item is rents, which you will see has increased by the very satisfactory sum of 5,733*l.* Steamboat and docks receipts increased 594*l.* The gross increase of revenue receipts is thus 30,284*l.* We now come to the expenditure, and here, I think, it would be most satisfactory if I asked you to turn to the detailed abstracts of expenditure, which you will find on page 6. You will see one common feature in these abstracts—i.e., the increased expenditure in wages. We have very generally improved the condition of our staff in all departments by a reduction in the hours of labour and increase in wages. In addition to this we have granted Sunday pay practically to every servant of the company receiving a weekly wage. The greater portion of these ameliorations in the condition of our staff were agreed to during the year 1897, and certain of them took effect only as from the beginning of the year 1898. I do not say that, had we known all, we should not have granted them, but I do say that when we granted them we had no reason to anticipate a withdrawal of the American Line steamers nor the unfortunately indifferent weather for traffic which we have had during the past half-year, nor the coal strike. With these few general remarks I will ask you to refer to abstract "A," which shows the expenditure in the maintenance of way, works, &c. This shows an increase of 8,478*l.*, but we have renewed  $1\frac{1}{2}$  miles more than we renewed in 1897, and we have had to pay higher prices for materials. You will also observe that the miles maintained show an increase of  $\frac{1}{2}$ , and, therefore, I think we must admit the increase is fully accounted for, and is quite reasonable. Then we come to abstract "B," which deals with locomotive power, and shows an increased expenditure of 40,550*l.* Here we have had to face the very serious contingency of the coal strike in South Wales. It is probably known to you generally that, for some time past, we have obtained the whole of our locomotive coal supply from South Wales, and the result has been, on the whole, satisfactory, but when the coal strike was declared in South Wales our supply from that source ceased and our contracts, which contained the usual strike clause, became of no effect. The result is that we have had to purchase in the market other coal at a higher rate per ton, which at the same time involved a larger consumption per train mile than the coal we had previously been using. You will observe our coal bill has gone up during the half-year to the extent of 29,000*l.*, and of this by far the greater portion is to be attributed to the coal strike. I may here refer to statement No. 15, and draw your attention to the fact that in the past half-year the train miles run were 8,153,046, as against 7,864,723 in the corresponding half-year of 1897, or an increase of 288,323. Abstract "C" calls for little remark, as the net result is a decrease of 473*l.* You will observe we expended some 1,600*l.* more in the repair and renewal of carriages, and about 2,100*l.* less in the repair and renewal of our wagons, and I am very glad to say, while we have decreased our expenditure to this small extent, the whole of the stock has been maintained in a very satisfactory condition. Abstract "D" gives the details of the traffic expenses, and shows an increase of 22,863*l.* Practically the whole of this increase was in salaries and wages, which show an increase of 21,000*l.* Will you now kindly turn to the revenue account set out on page 5? I have already dealt in detail with the first five items of expenditure. Law charges, which is the next item, shows a satisfactory decrease, as we have had the good fortune not to be called upon to defend your interests before the Railway Commissioners' Court during the past half-year. The Parliamentary expenses are commendably low, and practically the same as last year. Compensation for passengers shows an increase of 462*l.*, and goods 524*l.* We have hopes that the increase in the figure for goods compensation may be somewhat checked when our work at Nine Elms is conducted under more favourable conditions in our new goods-shed. Rates and taxes continue their upward course notwithstanding that everything is done in our power to protect your interests. This makes the total railway expenditure 1,132,041*l.* 12*s.*, and, adding the steamboat working expenses and steamboat renewal and insurance charges, and the docks working expenses, gives the total expenditure of 1,289,007*l.* 4*s.* 1*d.* Then, turning to the receipts, you will remember that in dealing with the summary I went through the whole of the items, which gave a total of 2,099,478*l.* 4*s.* 11*d.* The difference between the receipts and expenditure—viz., 810,472*l.* 0*s.* 10*d.*—is the balance carried to the net revenue account, which is set out in statement No. 10. With these remarks I may refer you to the credit side of the net revenue account, the items of which call for no comment, but which show a total of 837,198*l.* 3*s.*, from which, if we deduct the items shown on the debit side, 235,792*l.* 16*s.* 4*d.*, leaves us a balance available for dividend of 601,405*l.* 6*s.* 8*d.* This sum enables us to provide for the interest upon our guaranteed and preference stocks, and to recommend to you a dividend at the rate of 5 per cent. per annum on the ordinary stock, carrying forward a balance of 15,287*l.* 12*s.* 8*d.* I would specifically draw your attention to the comparison between this dividend and balance carried forward and the corresponding figures for the half-year ended June 30th, 1896, with which we think we may far more reasonably compare than with those for the corresponding half-year of 1897. We are not in any sense discouraged by not maintaining the abnormal dividend of last year, but we have every confidence in the continued and increased prosperity of our company, and are satisfied to have been able to maintain the dividend of 1896 in spite of drawbacks over which neither we nor our officers have had any control. I have now the pleasure formally to move:—"That the report of the directors and the statement of accounts for the half-year ending June 30th, 1898, be and the same are hereby received and adopted."

Lieut.-Colonel the Hon. H. W. CAMPBELL seconded the motion.

Mr. BEAVIS proceeded, as usual, to advocate the abolition of the second-class passenger traffic, remarking that it did not pay, and that it was only kept from dying a natural death by offering low fares to the travelling public, which were in some cases lower than those for the third-class. The steamboats and the docks he also considered were onerous burdens upon the South Western Company. In conclusion, he

suggested that the time-table should be published at 1d. instead of 2d. Mr. NEWBY endorsed the remarks of the previous speaker in regard to steamboats, and, alluding to the recent fire at Waterloo, deprecated the letting of railway arches for the storage of straw, which, he said, was "as bad as gunpowder." (Laughter.) Amid much impatience, he advocated the resuscitation of live shell-fish—(renewed laughter)—and urged upon the board the importance of greater despatch in the delivery of perishable goods from Billingsgate, from which market he himself hailed. The speaker was eventually ruled out of order by the CHAIRMAN.

Mr. P. WATSON pointed out that the reduction in the dividend was almost entirely caused by the increased outlay on coal, necessitated by the strike of colliers in South Wales.

Mr. J. JONES asked whether it was true that a cargo of anthracite coal had reached the Thames from America, and said that if it was it would be doing good service to publish the fact in the Cardiff district so as to disillusionise the minds of the colliers there in regard to the subject of competition. Referring to the Waterloo and City Railway, he desired to know how the dynamos applied the motive-power to the rotation of the carriage-wheels.

The CHAIRMAN, in reply, said he had over and over again informed Mr. Beavis that so long as several millions of persons used the second-class carriages every year, the board would not be prepared to discontinue the running of those carriages, even if it entailed a loss. With regard to steamboats and docks, it was perfectly true that steamboats *per se* were not remunerative, but they acted as important feeders to the railway, and were therefore one of the main sources of supply and of indirect profit. "A penny time-table" did not come within the sphere of his operations, and he would remit it to the consideration of the general manager. (Laughter.) The "resuscitation of live shell-fish" also was a subject which he did not desire to tackle. (Renewed laughter.) The board were not to blame for the recent fire under Waterloo Station, as the arch in which the straw was stored was let to a stonemason. They would, however, take care in future that the arches were not used for the storage of inflammable goods. The motive power to the carriages on the Waterloo and City Railway was supplied by means of a third rail in connection with dynamos of about 1,500 horse-power.

The resolution, on being put to the vote, was carried unanimously.

The dividends recommended in the report, including one at the rate of 5 per cent. per annum on the original ordinary stock, were also agreed to.

A vote of thanks to the chairman and directors, the general manager, secretary, and the staff generally for their past services brought the proceedings to a close.

#### CENTRAL LONDON RAILWAY.

The sixth ordinary general meeting of this company was held on Wednesday, at the offices, 16, Great George-street, S.W.; Sir HENRY OAKLEY (the chairman) presiding.

The SECRETARY (Mr. R. O. Graham) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—My first duty is to affix the seal of the company to the register of shareholders. They now number 1,564, there having been an addition to their number during the past half-year of 521. Before asking you to adopt the report and accounts it is customary, I think, to say a few words to you upon the progress of the work during the past half-year; but, first of all, I must refer to a matter personal to myself. I think it right to express my acknowledgment to the proprietors for the trust they have reposed in me by electing me as a director and to my colleagues on the board, and to Mr. Tennant especially, for my election as chairman. I appreciate and recognise the obligations of the trust, and I hope I shall be able to fulfil them.

Passing from this personal matter, I have much pleasure in being able to say to you without hesitation that the progress of your works during the past six months has been very satisfactory. At all points the work has been pushed on with care, vigour, and success. Commencing from our western extremity at Shepherd's-bush, the buildings necessary for our power, our carriages, and in fact, the whole machinery required to carry on so novel an undertaking are well in hand, and neither there nor at any other point, except the City, have any difficulties been found to impede our progress. Of course, delays have occurred in obtaining possession of property, which are unavoidable in all these undertakings, but, generally speaking, the work has been pushed on with vigour, and from Shepherd's-bush to the Post-office both the running tunnels and the station tunnels—which are larger and wider than the running tunnels—have been completed except at Davies-street, Oxford-street, where there was a diversion of a very large sewer to be made. That has practically been completed, and the work of constructing your railway at that point will be pressed forward. The greatest impediment to rapid progress has been at the Bank Station, where the importance of the centre under which we are burrowing and the immense number of gas, water, and other pipes to be dealt with—some of them very large—render it imperatively necessary that at that point the work should be very carefully and safely done. We have achieved the removal of three enormous gas mains, which were practically the source of supply for the north of London, and we have safely housed them in a subway specially built for the purpose below the public subway, which we had to construct by arrangement with the City. The station tunnels could not, of course, be commenced until that serious part of the work was done. They are now in hand, and we have no reason to doubt that they will be successfully carried out. The shafts to enable the public to reach our stations—five in number—are more or less progressing, and, in fact, there has been no avoidable delay in pushing the work on at all points, practically simultaneously. Our machinery is well advanced, and I am advised by our engineer that we may expect some of the heavier portions to be delivered shortly. Our carriages are contracted for in this country. I have seen those who have undertaken the work, and they have promised that the first carriage will be ready for inspection in a very short time. The lifts, which are a very important part of our business, are also in hand.

We have had one trial experimentally at our Notting-hill Station. I was there myself, and I am glad to say that it worked very satisfactorily, so that, from our fabric to what really may be termed the furnishing, everything is in progress and is going on well and as quickly and as safely as it is possible for reasonable men to expect. ("Hear, hear.") That is the condition of your undertaking. As to the question of time, our engineer, who is a very careful man in his work and appears to be as careful in his promises, is not prepared to say when I can assure the proprietors that the work will be finished, but he hopes to be substantially advanced some time in the spring of next year. Probably at the end of June next year we shall be able to see our undertaking at work. ("Hear, hear.") Commercially, there is very little to say. The accounts show what has been spent. Our contractors—the Electric Traction Company—are keeping up to their work. We are still in their debt, as shown by the accounts, to the amount of 248,000*l.* The expectation of getting that and some other money will, I hope, be an incentive to them to push on with their work. There is nothing further to say about our accounts. The only other point I need refer to is that 6*l.* per share has now been paid upon the whole share capital, and the company are in a position to issue their debenture stock. The board have given the subject careful consideration, and they think that the time has arrived when it is prudent and expedient to ask for authority to issue debenture stock as it may be required. That, however, is a matter for the special meeting; I only mention it now to save speaking twice. I do not think I need say anything more; but if there are any questions which the proprietors would like to ask I am sure the board would be very happy to give any information that is within their power. I now beg to move:—"That the report and accounts as now submitted be received and adopted, and that the payment of interest at the rate of 3 per cent. per annum on the paid-up capital of the company be and the same is hereby approved." (Applause.)

Lord RATHMORE seconded the motion, which was agreed to without discussion.

At an extraordinary general meeting which was subsequently held, it was unanimously resolved:—"That the directors be and they are hereby empowered to create and issue debenture stock amounting to 900,000*l.*, authorised by the Central London Railway Acts, 1891 and 1892, to be created and issued by the company, and which debenture stock shall pay a fixed and perpetual interest of 4 per cent. per annum, payable half-yearly on the 15th day of January and the 15th day of July in each year."

Colonel CALL proposed a vote of thanks to Sir Henry Oakley for his able and courteous conduct in the chair and to the directors for their attention to the interests of the company.

Mr. H. H. M. SMITH, in seconding the motion, remarked that he was very pleased to see Sir Henry Oakley occupying the chair.

The motion was unanimously adopted.

The CHAIRMAN briefly acknowledged the compliment, observing that the directors would do their utmost to bring this novel and most interesting undertaking to a successful issue.

#### NEW ZEALAND MIDLAND RAILWAY.

With the sanction of Mr. Justice Kekewich, a meeting of debenture-holders of the New Zealand Midland Railway was held on the 29th ult., at Winchester-house, for the purpose of enabling Mr. Alexander Young, the receiver and manager appointed by the court, to make a statement as to the affairs of the company.

Mr. YOUNG reminded the meeting that he succeeded Mr. Parker as receiver in February, 1897, and found himself in the peculiar position of being a receiver and manager without a railway to receive anything from or to manage. The Government of New Zealand had already seized the railway, and had remained in possession of it until now. The Government had taken all the receipts arising from the working of it, and, in addition, had spent large sums of money in extending the system, which the Government had asked the company to reimburse. The moneys referred to, amounting to 61,000*l.* odd, were provided to the extent of 12,000*l.* from the earnings of the line, leaving a large sum still to be found in order to prevent the Government from having the right of practically confiscating the property. The balance of the 61,000*l.* had been found, with the exception of 11,000*l.*, which was still claimed by the Government to be due in August next. When, in Jubilee year, Mr. Seddon the Premier, was in London, he discussed the matter with that gentleman, but soon found that his hands were tied. Mr. Seddon expressed the view that the shareholders had no rights whatever, and as regards the debenture-holders, he practically put them in the same position. Mr. Young proceeded to quote several extracts from Acts of the New Zealand Parliament dealing with the matter, and to contend that the rights of the debenture-holders were absolutely clear. They had, he said, nothing whatever to do with what had taken place as between the Government and the company. The fact that the shareholders failed in completing the railway was not the fault of the debenture-holders. The latter had a charge upon the whole undertaking, and he did not see how the Government could possibly take it away from them. Mr. Slaughter, who had examined all the documents, and Mr. Swinfen Eady and Mr. Kirby, eminent counsel, were clear and emphatic upon the point that the undertaking really belonged to the debenture-holders, and that the Government could not take it or hold it except subject to the charge granted to the debenture-holders. He communicated this opinion to Mr. Seddon. In the meantime Mr. Slaughter advised that no time should be lost in going for the appointment of a receiver in the colony. Proceedings were initiated, and news had recently been received to the effect that the court had appointed a receiver there, and that would force the Government at once into the position of declaring its policy. What would it say to its own Act of Parliament? So far as he could make out, the Government was trying to still retain possession of the railway, and the case seemed to be going on as between the two parties for settlement by the court. Mr. Slaughter advised him that if the local courts should give an adverse decision they had the right to come to the Privy Council here, and that in the end they would get their rights. He (the chairman) could not conceive of any circumstances in which

the Government could eventually stick to the railway. He had hoped the Government would come to them, and, acknowledging that the debenture-holders had found the money for the construction of the line, suggested that they might come to terms which would satisfy the debenture-holders, either by arbitration or otherwise. They were interested to the extent of some 900,000*l.* sterling. Mr. Young assured the debenture-holders that he had left no stone unturned in his efforts on their behalf. He would be sorry if they had to go to the great expense of fighting the matter out before the Privy Council; but he saw nothing else left for them to do so long as the Government held the opinion originally expressed by Mr. Seddon.

After some discussion, the following resolution was passed unanimously:—"That this meeting, having heard the statement as to the affairs of the company made by Mr. Alexander Young, hereby approves of the course of action hitherto adopted by him, and the continuation thereof in future."

### WATERLOO AND CITY RAILWAY.

The half-yearly general meeting was held on Thursday, at Waterloo Station; Mr. W. S. PORTAL presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), referred to the unfortunate delay in the opening of the line. He desired to express the regret of the directors at the non-fulfilment of their expectations as expressed at the last meeting in February last. They were greatly disappointed at not being able to declare any dividend at that meeting, consequent obviously on the absence of any revenue earnings during the past half-year. The interest payable during the construction of the railway was 25,000*l.*, and as that amount was reached with the distribution made in January last, there could not now be any further similar payment to the proprietors out of the capital. The present position was easily explained. The works had been examined and passed by the inspecting officer of the Board of Trade. The electrical equipment had been much delayed, owing, it was said by the contractors, to the strike in the engineering trades, first of all, which lasted several months. In consequence of this delay, it had been found impossible to get all the rolling stock into proper working order and make the necessary trials within the time contemplated when the contracts were let. All the boilers in the generating station had now been fixed and were in working order, together with five out of the six steam engines and dynamos. For the working of the line four trains were necessary, and a fifth complete train, with one or two spare carriages, would be held in reserve. The whole of the carriages, including the motors, had been delivered for five trains. The experimental running had been commenced. The heavy permanent way adopted proved thoroughly satisfactory, the running was all that could be desired, and the power was quite adequate. Everything was ready, and so much so that he invited those present to take a trial trip to the City and back. They desired that everything should be thoroughly tested before they commenced carrying the public and running the trains at intervals of five minutes throughout the day. At the Waterloo end all was ready, and at the other end they had temporary but convenient means of access and egress by the two staircases at the end of Queen Victoria-street. When the Central London line was complete the staircases would only be half their present height. He congratulated the shareholders on the almost immediate opening of the line—perhaps within a few hours—and hoped to be able to offer a very satisfactory dividend at the next meeting.

Lieutenant-Colonel H. W. CAMPBELL seconded the motion, which was agreed to.

At the close of the meeting a number of shareholders availed themselves of the chairman's offer to take a trip by one of the trains running to the City.

### EAST ARGENTINE RAILWAY.

The annual general meeting was held at Winchester House on the 29th ult.; Sir G. B. BRUCE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said, with regard to the traffic, that the company's operations during the past year, compared with 1896, showed little difference. There had been a considerable decrease in the receipts, to the amount of 4,155*l.*, but there had been almost an identical decrease in the working expenses. This diminution was not owing to a decreased trade, but, in the main, to a reduction in the expenses of working per train mile, equivalent to over 35 per cent. As there were exceptionally heavy expenses in 1896, they could not claim credit for the whole of the reduction in working expenses; but still he hoped that it was the beginning of better things, as the expenditure had been necessarily high. The fall in the receipts had been due to drought, the war in Cuba, which had diminished the demand for cattle, the revolution in Uruguay, and the locusts. In the first half of the current year the traffic in cattle reached 30,000 head, as compared with 1,450 in 1895. This traffic was comparatively young, and it promised to produce gratifying results. The Argentine North Eastern Railway was expected to have been opened on the 10th inst. It was difficult to prophesy what would be the result on the East Argentine Railway of the working of that line. It was said by some people that the new line would divert some of the company's traffic. Whether this would be so or not, the tendency of the opening of that line would be to increase the cattle traffic of the East Argentine, and also the traffic in other goods, as well as to augment the passenger traffic. In regard to the ratification of the agreement with the Government and the commutation of the guarantee, the court had sanctioned the document, and the liquidation had been stayed, subject to certain formalities. After these had been gone through the company would revert to its old position. The general bond had been exchanged for the 750,000*l.* definitive bonds, and the half-year's interest, due on the 1st inst., on these bonds had been paid, but in respect to the two years' accumulated back interest for 1896 and 1897, amounting to 60,000*l.*, the

board had taken bills, which would be due on January 17th next. This money belonged to the shareholders, and sooner or later would have to be divided among them. It was proposed to make a distribution to the ordinary shareholders of 3 per cent., and a further distribution of 3 per cent. as soon as the Government bills had been paid. The directors could not pay anything until the company was out of liquidation, and this it was anticipated would take place by the 6th prox. As to the account against the Argentine Government, he considered that, on the whole, a fair compromise had been arrived at between the shareholders and the bondholders.

Mr. W. R. GRAHAM seconded the motion.

Mr. VAN RAALTE suggested that an arrangement for unity of working should be come to with the Argentine North Eastern Company. In reply,

The CHAIRMAN said that the matter had not been before the board, but anything which would further the interests of the shareholders the directors would take into consideration.

In reply to Mr. FIELD,

The CHAIRMAN added that under the new arrangement the directors thought that the company would be able to pay to the ordinary shareholders a steady dividend of 3 per cent.

The report was adopted.

### SHEFFIELD DISTRICT RAILWAY.

The half-yearly general meeting was held on Tuesday, at the Westminster Palace Hotel; Mr. W. B. DAVENPORT, M.P., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said they were so clear that he need not say much about them, but there were some items of expenditure that might be below their expectations. This, however, was not owing to their being slack in carrying on their duties, but to the fact that they had been doing practically surface work, which was cheap, and when they came to the more material work of steel and iron these expenses would be materially increased. Their Bill in Parliament had successfully passed, and they had entered upon a very large undertaking, which required capital to back it up. They knew, however, that Sheffield was the centre for producing armour plates and instruments of war generally, for which there was a large demand, and he might say that their future was assured. Their station at Attercliffe, which was one of their principal points, would be open in a very short time, and the exchange of traffic which would result therefrom would give them a large access of business. As for the increase of their capital, it would be fully returned by the increase of their prosperity; for they had applications from coal owners through the rich vale served for continuous connection with their main line; so that the debenture-holders were perfectly assured. Altogether, their prospects were most promising, and when they obtained the further powers they required they would be all right.

Lord CLAUD HAMILTON seconded the motion, which was adopted.

### ISLE OF WIGHT RAILWAY.

The half-yearly general meeting was held on Wednesday, at the Westminster Palace Hotel; Mr. HORACE F. TAHOURDIN presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of 17,821*l.* (in comparison with 18,227*l.* for the corresponding half of 1897), and a total expenditure of 7,781*l.* (in comparison with 8,066*l.*), the net earnings being 10,040*l.* Adding the balance from previous half-year 1,644*l.*, and interest 29*l.*, the total net revenue was 11,713*l.*, of which prior charges absorbed 3,912*l.*; dividend on preference stock, 1,680*l.*; dividend on preferred converted ordinary stock at 4 per cent. per annum, 3,080*l.*; and dividend on deferred converted ordinary stock at 3 per cent. per annum, 2,310*l.*; leaving a balance of 731*l.* to be carried forward. Length of railway:—Lines owned, 12 miles; lines worked, 24 miles; lines worked over, 14 miles. The expenditure on capital account amounted to 621,144*l.*; whilst there had been received 617,752*l.*—viz., 4 per cent. preferred converted ordinary stock, 154,000*l.*; deferred converted ordinary stock, 154,000*l.*; preference stock, 84,012*l.*; debenture stocks, 185,000*l.*; sundries, 37,740*l.* The report stated that the Act for the sale of the Brading Harbour and Railway to this company has passed both Houses of Parliament and is now awaiting the Royal Assent.

On the motion of the CHAIRMAN, which was duly seconded, the report and accounts were adopted.

### JARRAH TIMBER AND WOOD PAVING CORPORATION, LIMITED.

The first ordinary general (statutory) meeting was held recently, at Winchester-house, Old Broad-street, E.C.; Sir EDWARD SULLIVAN, Bart. (chairman of the company), presiding. There was a large attendance of shareholders.

The CHAIRMAN said—This is the statutory meeting of our company which, under the existing law, every company is obliged to hold within four months of its incorporation. Strictly speaking, there is no business to be done at it, but the directors are here to give the shareholders any reasonable information which they may require. I may tell you shortly that everything, to our mind, is going on in a satisfactory way. Of course, as you know, our property is very far away, and naturally in such a case it takes some time before we can get the whole of what we are entitled to under the contracts we have entered into. There are questions of title and matters of that sort which are inseparable from the getting possession of properties such as ours are; but I am glad to tell you that, with the exception of one, we are now in possession of all that is mentioned in the prospectus, and have been for some little time. (Applause.) We went to work from the very start, and Mr. J. C. Port, our local manager in West Australia, has been sending us regularly reports with which we are very well satisfied. According to these reports, although the local trade—that is the trade for

supplying timber for mines, building, and other general requirements—is not so brisk at present as it has been; still, there is every reason to assume that it will not remain so. As against the slackness that exists in the local trade, we have a very fair compensation in the satisfactory fact that the demand which has sprung up in this country and generally throughout Europe for the supply of blocks of Jarrah timber for wood paving purposes is actually unprecedented; in fact, so large that we ourselves are quite unable to cope with the orders which we might undertake. ("Hear, hear.") In addition to that, I may mention that the price of Jarrah timber has increased considerably—a matter which perhaps may strike you with some surprise when you consider that a very large number of West Australian timber companies have been floated within the past year or so. The demand for Jarrah (which is the finest of all the Australian hard woods) is increasing steadily, and one has only, I think, to take a drive through London or any other city which is at present largely paved with wood and to feel the unpleasantness and joltiness which results after a very short time from the use of softer timber to know that it is merely a question of time when Jarrah will be used altogether in place of the softer woods. The utility of Jarrah and its superiority to all other woods that have been used are being more clearly demonstrated every day, and the extensive business connection of Messrs. Palfreman, Foster, and Co., whose Australian business is now incorporated with our company, has been such as to lead, as I mentioned just now, to our having considerably more orders than we are likely to be able to fulfil in England for some time to come. There is not very much else that I have to mention to you. If there are any questions which any of you shareholders would like to ask I shall be pleased to answer them.

Mr. ROBINSON inquired if the whole of the capital was subscribed.

Mr. CALLARD thought the shareholders would perhaps like to have some idea as to what the volume of the trade was.

Mr. HOFFMAN asked the extent of the rise which had taken place in the price of Jarrah timber since the company was incorporated.

Mr. MORTON asked when the preference dividend would be paid.

Mr. MATTHEWS remarked that since the company was formed several other companies carrying on similar businesses had been formed. He did not know whether the chairman was in a position to tell the shareholders how those companies would affect this company.

Other SHAREHOLDERS inquired if an application had been made for a settlement and quotation of the shares, when the members were likely to have their share certificates, whether the attention of the board had been directed to the process of haskinising, when the company would have timber in the London market, and whether the company undertook the laying of the wood blocks, or only the supplying of them.

The CHAIRMAN, in reply, said the volume of the trade up to the present amounted to 1,200,000 blocks, and at the present moment the company had an inquiry for 7,000,000 blocks, which would give the shareholders an idea of what the volume of trade was. The price of the timber had risen from 20s. to 30s. per load (which represented roughly one ton) within the last few months. The price was 5l. 10s. per load a few months ago, and now it was about 7l. With regard to the dividend on the preference shares, of course it could not be paid until it was earned, nor was it possible at the present time to state when it would be paid. The accounts would have to be audited first and the profits ascertained. As to when they could supply timber on the London market, all that they had got so far was taken, and taken for some considerable time, so that he could not answer that question in a more specific way. He could not exactly say how rival companies would affect them; the members must judge of that for themselves. Up to the present time the existence of rival companies had not affected them, because they were overwhelmed with applications for jarrah which they probably could not supply for some considerable time, and, in addition, the price was considerably higher than it was a few months ago. The company did not lay the blocks; they merely supplied them. The process known as haskinising was not required in their case, owing to the hardness of jarrah timber. The share certificates would be ready as soon as the shares were fully paid. The question of applying for a settlement on the Stock Exchange had already been discussed by the directors, and it was now under consideration. He did not think there would be any great delay about the matter. The capital applied for and issued was 245,000 shares out of 250,000 shares, the balance of 5,000 preference shares being held in reserve. The amount of working capital was 30,000l. (Applause.)

Mr. M. H. TEMPLE said the company possessed very large properties with an enormous amount of wood, and they would undoubtedly be able to meet orders even larger than those which were now coming in, but the shareholders must remember that it took some little time to cut the timber and to get it shipped to England. ("Hear, hear.") Of course, the directors could employ steamers to bring over the timber, but that would run away with their profits, and it was customary in the foreign timber trades to employ sailing vessels. Just now there was rather a scarcity of such ships. Those who wanted the timber showed the most gratifying disposition to come to this company for it. Of course, Mr. Palfreman's name stood so high in the trade that perhaps that was not surprising. There was no doubt that the company possessed a thoroughly good sound property. They had immense quantities of timber with which they would be able to meet the orders in the London and Continental markets, but the shareholders should not be in too much of a hurry to get results, because if they were, the directors would not be able to show such good results as they would undoubtedly be able to do if the shareholders gave them time. (Applause.)

A vote of thanks to the chairman and directors brought the proceedings to a close.

## Directors' Reports.

### RHYMNEY RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure to date amounts to 2,053,075l., and the receipts to 2,065,339l., viz.:—Ordinary stock and shares, 644,095l.; preference stocks, 985,080l.; together (1,629,175l., less discounts, premiums, &c., 1,136l.), 1,628,039l.; debenture stock, 437,800l. Credit balance, 12,264l. Estimated further expenditure—In the current half-year, 28,800l.; in subsequent half-years (uncertain). Capital powers and other available assets, 174,567l.

#### REVENUE.

This account for the half-year ending June 30th shows the receipts and disbursements to have been as follows:—

	1897.	1898.
Passengers, parcels, &c. ....	£15,934 ...	£16,130
Merchandise, and live stock .....	20,027 ...	18,805
Minerals .....	91,305 ...	57,978
Miscellaneous .....	1,242 ...	1,176
<b>Total receipts .....</b>	<b>£128,508 ...</b>	<b>£94,089</b>
<b>Total expenses .....</b>	<b>63,666 ...</b>	<b>57,234</b>
<b>Net receipts .....</b>	<b>£64,842 ...</b>	<b>£36,855</b>
Balance from last half-year .....	483 ...	2,237
<b>Total .....</b>	<b>£65,325 ...</b>	<b>£39,092</b>
Prior charges .....	£9,296 ...	£9,394
Preference dividends .....	19,755 ...	19,755
Ordinary dividend .....	*34,632 ...	nil
Balance to next half-year .....	1,642 ...	9,943
<b>Total .....</b>	<b>£65,325 ...</b>	<b>£39,092</b>

\* At 11 per cent. per annum.

The gross receipts for the past half-year show a decrease of 34,419l., the expenses a decrease of 6,432l., and the net receipts a decrease of 27,987l. The ratio of expenses to receipts is 60·83 per cent. (as against 49·54 per cent.).

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers carried (total number) .....	700,607 ...	702,738
Mileage—Lines owned .....	37½ ...	37½
" Partly owned .....	20½ ...	20½
" Leased or rented (jointly) ...	1½ ...	1½
" Foreign lines worked over .....	16½ ...	16½
" Total .....	76½ ...	76½
Train mileage*—Passengers .....	99,769 ...	105,283
" Goods .....	584,965 ...	420,352
" Total .....	684,734 ...	525,635

\* Exclusive of shunting.

The report states:—

"The balance of 9,943l. would be sufficient to pay a dividend of 3 per cent. per annum on the ordinary stock, carrying forward 281l. As, however, the strike of colliers has not been ended, the directors think it prudent to defer payment of any dividend on the ordinary stock, and to carry forward the whole of the balance of 9,943l. to the next half-year. For the first three months of the year the traffic showed a satisfactory increase compared with the corresponding period of 1897, but in consequence of the strike of workmen at the associated collieries of Glamorganshire and Monmouthshire, which has existed since March 31st last, the traffic of the company in coal from that time has ceased, except in the case of the Llanbradach and one or two small collieries. For want of coal the Dowlais and Cyfarthfa iron companies have been obliged to close their furnaces. The large traffics in connection with them have all but disappeared; the general traffic of the line, too, has been diminished from the same cause, and, on the other hand, the price of locomotive coal necessary for keeping the passenger and the remainder of the traffic in motion has been very much increased. The effect of all this upon the revenue of the company has been very serious, as will be seen from the perusal of the foregoing statement of revenue receipts.

#### GENERAL.

"In consequence of the great increase of the company's rolling stock the space and appliances originally reserved by the company at the Bute Docks for maintenance and repairs have become quite inadequate, and the company has been suffering loss accordingly; and, seeing that no more space could be had at Cardiff, the directors have purchased from Lord Windsor at Wernddu, near Caerphilly, an excellent and roomy site upon which an entire set of new works is being erected. The building work has been let to a capable contractor, and is going on satisfactorily.

"The Cardiff Railway Company's Bill has been passed with some modifications by a committee of the House of Commons, notwithstanding the opposition of this and other companies. The opposition will be renewed when the Bill comes before the committee of the House of Lords. The Bill deposited by the Barry Railway Company, though strongly opposed by this company, has been passed by the committees of both Houses. The Bill deposited by the Brecon and Merthyr Tydfil Railway Company was withdrawn by arrangement with the Barry Railway Company, with whom the former company have entered into an agreement as to the traffic destined for Cardiff and Barry. The application of the Taff Vale Railway Company for general running powers over the Taff-Bargoed joint line was withdrawn before their Bill reached the committee stage. The Windsor Dock (Cardiff) Bill has been passed by the committee of the House of Commons. This company was refused a *locus standi* in the House of Commons, but have obtained one and are opposing the Bill in the House of Lords before whom the Bill is now proceeding."

## LANCASHIRE AND YORKSHIRE RAILWAY.

## CAPITAL.

June 30th, 1898.—The total expenditure on this account amounts to 51,627,544*l.*, and the receipts to 51,054,670*l.*, viz. :—

Ordinary stock .....	£16,740,995*
Preference and guaranteed stocks .....	18,997,306
Loans .....	118,100
Debenture stock .....	18,183,610
Sundries .....	2,064,659

Balance at debit of capital account, 572,874*l.*. The receipts on capital account during the half-year amounted to 584,052*l.*. The expenditure during the half-year amounted to 405,654*l.*, of which 178,525*l.* was on lines open for traffic, 123,013*l.* on working stock, and 109,116*l.* on lines in course of construction. Estimated further expenditure—In the current half-year, 491,813*l.*; in subsequent half-years, 4,403,129*l.*; total, 4,894,942*l.* Capital powers and other available assets, 5,034,315*l.*

\* The amount entitled to dividend is—Ordinary stock, 16,740,995*l.*; preference stocks, 28,337,906*l.*; the difference between these sums and the amount actually received being made up by nominal additions on consolidation of various stocks.

## REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as under :—

	1897.	1898.
Passengers—First-class .....	£32,655	£30,658
" Second-class .....	25,906	54,859
" Third-class .....	683,698	677,100
" Season-tickets .....	126,495	129,195
Parcels, horses, carriages, &c. ....	99,664	100,204
Mails .....	9,010	9,112
Merchandise (less coll. and delivery) ..	850,023	878,219
Minerals and coal .....	499,001	534,137
Live stock .....	19,220	18,506
Mileage and demurrage .....	7,560	6,893
Rents .....	27,226	30,894
Fleetwood and Belfast steamers .....	4,784	6,306

Total receipts .....

The expenditure on revenue account during the half-year was as follows :—

	1897.	1898.
Maintenance of way, works, &c. ....	£236,487	£255,506
Locomotive power .....	326,432	334,643
Carriage and wagon repairs .....	112,380	117,507
Traffic expenses .....	505,932	537,685
General charges .....	47,008	44,942
Law charges .....	3,991	4,317
Parliamentary expenses .....	2,500	—
Compensation—Passengers .....	3,705	5,674
" Goods .....	9,517	9,755
Rates and taxes .....	58,489	58,416
Government duty .....	6,060	6,970

Total expenditure .....

The net revenue account and the proposed appropriation of balance available for dividend may be summarised as follows :—

	1897.	1898.
Balance from previous half-year .....	£29,190	£21,495
Net earnings .....	1,072,741	1,100,668
Sundry credits .....	689	—

	1897.	1898.
Total .....	£1,102,620	£1,122,163
Prior charges .....	£260,385	£271,668
Preference dividends .....	402,288	410,363
Dividend on ordinary stock .....	418,525	418,525
Balance to next half-year .....	21,422	21,607

Total .....

\* At 5 per cent. per annum. † At 5 per cent. per annum.

The receipts for the past half-year show an increase of 90,841*l.*, the expenses an increase of 62,914*l.*, and the net receipts an increase of 27,927*l.* The ratio of expenses to receipts is 55·54 per cent., as against 55·02 per cent.

## TRAFFIC, &amp;c.

Half-year ending June 30th.		1897.	1898.
Passengers—First-class .....		477,388 ...	468,395
"    Second-class .....		755,266 ...	1,446,801
"    Third-class .....		24,001,526 ...	25,603,983
"    Total .....		25,234,180 ...	27,519,179
Season-tickets .....		24,968 ...	25,627
Mileage—Lines owned .....		487½ ...	513½
"    Partly owned .....		64½ ...	63½
"    Foreign lines worked over ...		156½ ...	157½
"    Total .....		708½ ...	734½
Train mileage—Passengers .....		5,338,415 ...	5,594,697
"    Goods .....		3,076,677 ...	3,216,837
"    Total .....		8,415,093 ...	8,811,534

The report states :—

"The gross revenue from all sources shows an increase of 90,842*l.*, and the gross working expenses an increase of 62,914*l.*, resulting in a balance on revenue account of 1,100,668*l.*, as compared with 1,072,741*l.* in the corresponding half-year. In the net revenue account there is an increased charge of 5,626*l.* for interest on loans and debenture stock and 2,339*l.* in general interest. The net revenue balance available for distribution is 850,495*l.*, as compared with 842,236*l.* in the corresponding half-year.

## GENERAL.

"The new steamer *Duke of Cornwall*, for the Lancashire and Yorkshire and London and North Western joint service between Fleetwood and Belfast, was placed upon the station on July 18th, and her trial

voyages between the two ports have been eminently satisfactory. The joint fleet now comprises four first-class vessels, unsurpassed in the channel service, which will enable the joint companies to deal efficiently with the important traffic with the north of Ireland.

"The Workmen's Compensation Act came into operation on July 1st, and, after full consideration, the directors have decided to deal direct with their servants in all cases which may arise, and not through any insurance or guarantee society."

## WORKS IN PROGRESS.

The Engineer in his report states :—

"Branch Line to Ship Canal.—The line was opened for goods traffic on March 28th. The provision of a passenger station adjoining the Manchester Racecourse has been commenced. Extension of Carriage Works, Newton-leath.—These works are completed and in use. Widening Line from Deal-street, through Salford Station, to Windsor bridge Junction.—The completion of this contract has been delayed to allow of the strengthening of the old viaduct through Salford Station, with which work good progress has been made. Widening Line, Lostock Junction to Bullfield, Bolton, and Provision of Marshalling Sidings at Bullfield.—About three-fourths of the work is completed. Extension of Goods-yard and Provision of Carriage-sidings and Loop Lines at Daisyfield, Blackburn.—These works are almost completed. New Station at Talbot-road, Blackpool.—These works are completed and in use. Widening Line, Darwen Station to Hollins Sidings, and New Goods-yard at Hollins.—About two-thirds of the widening works have been carried out, and a contract has been let for the warehouse at Hollins. Rose-grove, Marshalling Sidings.—About two-fifths of the earthwork is finished. The engine-shed foundations has been put in, and a contract has been let for the erection of the superstructure. Contracts will be let for the new station buildings as soon as the main works are sufficiently advanced. Connecting Line at Bury.—Of the earthwork two-thirds has been completed, and of the six bridges two are completed and the remainder are in progress. Hoghton, New Passenger Station and Extension of Goods-yard; and Whalley Extension of Passenger Station, erection of Goods-shed, &c.—Contracts for these works have been let."

## GREAT NORTHERN RAILWAY.

## CAPITAL.

June 30th, 1898.—The expenditure on this account amounts to 45,628,886*l.*, whilst the receipts have been 46,201,915*l.*, viz. :—

Ordinary stock .....	£14,544,517*
A stock .....	1,159,275
B stock .....	1,159,275
Preference and guaranteed stocks .....	17,278,321
Debenture stock .....	10,901,326
Premiums .....	1,159,201

\* Converted into 10,908,388*l.* preferred converted ordinary and 7,278,255*l.* deferred converted ordinary.

Balance at credit of capital account, 573,029*l.*. The receipts during the past half-year amounted to 892,234*l.*. The expenditure in the half-year was 773,184*l.*, of which 281,521*l.* was on lines open for traffic, 114,540*l.* on working stock, 335,221*l.* on new lines, 41,902*l.* subscriptions to other companies and contributions to joint lines. Estimated further expenditure—In the current half-year, 700,000*l.*; in subsequent half-years, 2,400,633*l.*; total, 3,100,633*l.* Capital powers and other available assets, 1,364,135*l.*

## REVENUE.

The revenue account shows the receipts for the half-year ending June 30th to have been as follows :—

	1897.	1898.
Passengers—First-class .....	£76,221	£78,982
" Second-class .....	10,412	10,819
" Third-class .....	517,119	537,006
" Season-tickets .....	87,273	90,744
Parcels, horses, carriages, &c. ....	144,628	148,282
Mails .....	19,035	19,067
Merchandise (less coll. and delivery) ..	757,631	798,946
Live stock .....	26,056	23,739
Minerals .....	393,853	429,636
Rents of the company's property .....	31,447	32,157
Transfer fees .....	642	591
Navigation receipts .....	3,349	3,281
Joint & worked lines—G.N. proportion	341,748	354,348

Total receipts .....

The expenditure on revenue account during the same period was as follows :—

	1897.	1898.
Maintenance of way, &c. ....	£179,557	£180,937
Locomotive power .....	384,124	411,840
Carriage and wagon repairs .....	110,215	120,529
Traffic expenses .....	437,449	470,185
General charges .....	62,860	67,085
Law charges .....	2,669	2,984
Parliamentary expenses .....	1,393	1,035
Compensation—Personal injury .....	2,726	2,422
" Goods .....	9,016	11,515
Rates and taxes .....	74,521	76,861
Government duty .....	6,664	7,000
Mileage and demurrage of rolling stock	3,174	5,324
Navigation expenses .....	5,698	6,255
Joint & worked lines—G.N. proportion	228,864	237,647

Total expenditure .....

The gross receipts for the past half-year show an increase of 118,184*l.*, the expenses an increase of 92,749*l.*, and the net receipts an increase of 25,436*l.* The ratio of expenses to receipts is 63·39 per cent., as against 62·82 per cent.

The net revenue for the half-year and the proposed appropriation of balance available for dividend may be summarised as follows:—

Balance from previous half-year	£8,097	£15,004
Net earnings	900,544	925,979
Sundry credits	10,760	9,006
<b>Total</b>	<b>£919,401</b>	<b>£950,079</b>
Prior charges	£291,249	£283,808
Preference dividends	349,530	376,133
Dividend on pref'd. converted ordinary	218,168a	218,168b
" deferred converted ordin.	18,181c	—g
" A stock	2,898d	—g
" B stock	34,779e	34,778f
<b>Balance to next half-year</b>	<b>4,596</b>	<b>16,113</b>
<b>Total</b>	<b>£919,401</b>	<b>£950,079</b>

a At the rate of 4 per cent. per annum; b at the rate of 4 per cent. per annum; c at the rate of 1 per cent. per annum; d at the rate of 1 per cent. per annum; e at the rate of 6 per cent. per annum; f at the rate of 6 per cent. per annum; g a sum of £1,079L, the equivalent of 1 per cent. each on the deferred and A stocks, is held in reserve until the end of the year.

#### TRAFFIC, &c.

<b>Half-year ending June 30th.</b>	<b>1897.</b>	<b>1898.</b>
Passengers—First-class	413,922	440,921
" Second-class	554,449	567,239
" Third-class	15,567,378	16,321,269
<b>Total</b>	<b>16,535,749</b>	<b>17,329,429</b>
Season-tickets	36,589	38,603
Mileage—Lines owned	673	682
" Joint lines—G.N. proportion	127	126
" Branch lines worked	33	33
" Foreign lines worked	121	192
<b>Total</b>	<b>954</b>	<b>1,033</b>
Train mileage*—Passengers	5,311,530	5,463,909
" Goods	5,450,170	5,900,667
<b>Total</b>	<b>10,761,700</b>	<b>11,364,576</b>

\* Including miles run on account of joint lines, for other companies, and for ballasting.

The report states:—

"The traffic receipts for the past half-year show satisfactory progress, and, compared with the corresponding period of 1897, there are increases of 30,211L. in passengers, parcels, &c., 41,315L. in merchandise, and 35,783L. in coal. There has been an increase of 38,030L. in the expenditure of the locomotive department, and of 32,737L. (chiefly wages) in the traffic expenses. The additional train miles run were 568,752.

#### GENERAL.

"A part of the company's new goods depot at Manchester was opened on July 1st, and a considerable proportion of the traffic to and from the Great Northern system is now being dealt with there. The completion of this depot is being pushed forward as rapidly as possible, and there is no reason to doubt that the work will be finished within the time specified in the contract. The company is carrying traffic to and from Manchester in its own trains. Widenings to the extent of 19 miles have been opened for traffic during the last six months, and a further 20 miles will, it is expected, be brought into use before the end of the year. Additional goods shed accommodation is being provided at King's-cross to facilitate the handling of goods, and a part of it will soon be available. The new line to Mundesley, constructed jointly by the Midland and Great Northern companies, was opened for traffic on July 1st last. By an Act of this session this line will be transferred to a new Joint Committee of Midland and Great Northern and Great Eastern companies. The extension of the Leen Valley line from Kirkby, near Annesley, to Sutton-in-Ashfield and Skegby was opened for passenger traffic on April 4th last, and the further extension to Langwith is making good progress. The new line to Hunslet (Leeds) is rapidly progressing, and will, it is hoped, be available for goods traffic early in the coming year. The line connecting the Great Northern Railway with the new Joint Central Station at Nottingham is also approaching completion.

"The Bill promoted by the company in the present session of Parliament has received the Royal Assent. The Bill promoted by the Great Eastern Railway Company, and by the Midland and Great Northern Railways' Joint Committee, constituting a new committee, and transferring to such committee certain railways, between Lowestoft and Yarmouth, between North Walsham and Mundesley, and between Happpisburgh and Cromer, has also received the Royal Assent. Running powers have, in pursuance of agreements, been conferred upon the company over portions of the Great Central, Lancashire and Derbyshire, and Lincoln and East Coast railways, and satisfactory amendments, for the protection of the company, have been made in the Bills and Provisional Orders promoted by other companies in the present session of Parliament affecting Great Northern Railway interests. "Sir Henry Oakley has been duly elected to fill the vacancy at the board caused by the lamented death of Lord Hindlip."

#### WORKS IN PROGRESS.

The Engineer in his report states:—

"Since January 1st last the works in connection with a number of widenings on both sides of the main lines between Stevenage and Abbot's Ripton, in all a length of 19 miles, have been completed and opened for traffic, and a further number of widenings between Hitchin and Little Bytham, a total length of 20 miles, are well in hand, and it is expected that these will be completed and opened for traffic during the current year. The Leen Valley Railway extension from Kirkby South Junction to Skegby was completed and opened for passenger traffic on April 4th last. The works in connection with the contract for a further extension to join the Lancashire Derbyshire and East Coast Railway at Langwith, a distance of 34 miles, are making good progress. Railway at Nottingham and Basford—The works in connection with both these lines are now approaching completion. Railway and Goods Depot, Manchester—The new branch and the western portion

of the sidings and warehouses were completed and brought into use on the 1st instant, and good progress is being made with the remaining portions of the works. Hunslet Railway (Beeston to Hunslet, Leeds)—Satisfactory progress has been made during the past half-year with the works in connection with this railway."

#### MIDLAND GREAT WESTERN RAILWAY.

##### CAPITAL.

June 30th, 1898.—The expenditure to date amounts to 6,898,865L., and the receipts to 6,892,813L., as follows:—

Ordinary stock	£2,370,000
Preference and guaranteed stocks	1,649,040
Debenture stock	2,297,084
Parliamentary grants	440,000
Premiums	136,689

Debit balance 6,051L. The expenditure in the half-year was 7,750L., of which 7,418L. was on lines open for traffic, and 332L. on working stock. Estimated further expenditure—In the current half-year, 3,950L.; in subsequent half-years, uncertain. Capital powers and other available assets, 207,770L.

##### REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as follows:—

<b>Passengers—First-class</b>	<b>1897.</b>	<b>1898.</b>
" Second-class	£11,753	11,389
" Third-class	16,414	15,152
<b>Total</b>	<b>57,234</b>	<b>59,610</b>
Parcels, horses, carriages, &c.	16,724	16,600
Mails	14,692	14,696
Merchandise	96,043	103,623
Live stock	35,025	34,744
Minerals	4,988	4,479
Royal Canal	2,362	2,129
Rents	3,942	3,891
Transfer fees	87	84

**Total receipts** £259,264 £266,397

The expenditure on revenue account for the same period is detailed below:—

Maintenance of way, &c.	£30,255	£32,466
Locomotive power	40,937	42,257
Carriage and wagon repairs	10,832	10,187
Traffic expenses	39,204	40,353
General charges	7,224	7,631
Law charges	626	847
Compensation—Passengers	20	126
" Goods	277	321
Rates and taxes	5,128	5,920
Royal Canal	3,127	3,280

**Total expenditure** £137,630 £143,388

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance from previous account	£10,576	£11,372
Net earnings	121,634	123,009
Sundry credits	2,121	1,337
<b>Total</b>	<b>£134,331</b>	<b>£135,718</b>
Prior charges	£57,631	£57,721
Preference dividends	25,215	25,436
Dividend on ordinary stock	*47,400	†47,400
<b>Balance to next half-year</b>	<b>4,085</b>	<b>5,161</b>

**Total** £134,331 £135,718

\* At 4 per cent. per annum. † At 4 per cent. per annum.

The gross receipts for the past half-year show an increase of 7,133L., the expenses an increase of 5,758L., and the net receipts an increase of 1,375L. The ratio of expenses to receipts was 53·82 per cent., as against 53·08 per cent.

#### TRAFFIC, &c.

<b>Half-year ending June 30th.</b>	<b>1897.</b>	<b>1898.</b>
Passengers—First-class	42,297	40,157
" Second-class	67,960	63,240
" Third-class	491,743	529,660
<b>Total</b>	<b>602,000</b>	<b>633,057</b>
Mileage—Lines owned	516½	516½
" Leased or rented	21½	21½
<b>Total operated</b>	<b>538</b>	<b>538</b>
Train mileage—Passengers	753,331	759,864
" Goods	439,933	440,699
<b>Total</b>	<b>1,193,264</b>	<b>1,200,563</b>

The report states:—

"The increase in working expenses arises chiefly from increase in wages and greater cost of steel rails and coal—the latter mainly due to the strike in South Wales.

"The hotel at Recess, Connemara, was opened on May 15th last, and having regard to the numbers which have visited it since then, your directors anticipate satisfactory results for the ensuing season. The hotel at Mallaranny also seems to be greatly appreciated by the public."

#### CAMBRIAN RAILWAYS.

##### CAPITAL.

June 30th, 1898.—The total expenditure has been 5,034,693L., whilst the receipts have been 4,961,066L., as follows:—Coast ordinary stock, 503,737L.; Inland ordinary stock, 446,121L.; preference stocks, 1,565,617L.; A debenture stock, 925,555L.; B debenture stock, 750,000L.; C debenture

stock, 400,000*l.*; D debenture stock (4 per cent. non-cumulative), 332,158*l.*; sundries, 47,878*l.* Balance at debit of capital account, 73,626*l.* Estimated further expenditure—In the current half-year, 14,500*l.*; in subsequent half-years (not stated). Capital powers and other available assets, 718,160*l.*

## REVENUE.

This account for the half-year ending June 30th may be summarised as follows:—

	1897.	1898.
Passengers, parcels, &c. ....	£261,288	£261,781
Goods, minerals, &c. ....	64,867	69,741
Miscellaneous .....	3,757	3,876
<b>Total receipts .....</b>	<b>£129,912</b>	<b>£135,398</b>
<b>Total expenditure .....</b>	<b>78,982</b>	<b>87,773</b>
<b>Net receipts .....</b>	<b>£59,930</b>	<b>£47,625</b>
Balance from last half-year .....	8,625	10,114
<b>Total net revenue .....</b>	<b>£59,555</b>	<b>£57,739</b>
Land rent-charges .....	£1,004	£298
Interest on A, B, and C debenture stocks .....	41,511	41,511
Mid-Wales Railway—Amount payable under working agreement .....	6,183	5,535
Sundry debits .....	703	1,358
Balance to next half-year .....	10,154	8,337
<b>Total .....</b>	<b>£59,555</b>	<b>£57,739</b>

The gross receipts for the past half-year show an increase of 5,486*l.*, the expenditure an increase of 8,791*l.*, and the net receipts a decrease of 3,805*l.* The ratio of expenses to receipts was 64·82 per cent. (as against 60·79 per cent.).

## TRAFFIC, &amp;c.

Half-year ending June 30th.	1897.	1898.
Passengers (total number carried) .....	927,078	955,740
Season-tickets .....	452	583
Merchandise (tons) .....	93,918	100,106

Train mileage*—Passengers .....	662,575	667,359
“ Goods .....	645,244	663,316
“ Total .....	1,307,819	1,330,675

\* Including mileage run for other companies and ballasting.

## PORT TALBOT RAILWAY AND DOCKS.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 9,051*l.*, and an expenditure of 5,986*l.*, leaving a profit of 3,065*l.* Adding interest received 386*l.*, the total net revenue was 3,451*l.*, of which a dividend on the 1896 preference shares at the rate of 4 per cent. per annum absorbed 2,400*l.*, leaving a balance of 1,051*l.* to be carried forward. Length of line open for traffic 34 miles. The capital account shows a total expenditure of 1,164,863*l.*, whilst the receipts have been 1,155,112*l.*, as follows:—Ordinary shares, 600,000*l.*; 4 per cent. preference shares, 120,000*l.*; ditto (calls paid in advance), 95,802*l.*; temporary loans, 339,310*l.* The report states:—

“It is satisfactory to note that, notwithstanding the strike which has so long prevailed, the revenue is sufficient to pay the interest on the amount called up on the preference shares and to carry forward a balance of 1,051*l.* to the next half-year. The directors are pleased to find that the passenger traffic, which was commenced in February last, has, in spite of the strike, proved a source of considerable revenue, and is likely to be developed still further.

“The directors much regret that owing to the dock not being completed by the contract time (March 12th, 1898) they have lost a considerable amount of traffic both for the railway and dock, and considerable delay has also taken place in the dredging operations. Under the terms of the contracts a penalty is payable by the contractors owing to this default, and the shareholders may rest satisfied that the directors will do everything in their power to protect their interests in this matter. In consequence of these delays the issue of debentures has been necessarily deferred until the revenue is sufficient to pay the interest on the debentures and preference shares. The directors have, therefore, had to arrange the temporary loans which are set out in statement No. 3.

“The new dock has been filled with water, and the removal of the dams is being proceeded with, and it is anticipated that shipping will be admitted within the course of the next two months. Progress with the south pier has been much more satisfactory during the last few months, and with a continuance of fine weather it is hoped that the pier may reach completion by next spring. The Ogmere Valleys Extension Railway and the South Wales Mineral Junction Railway are approaching completion and will shortly be ready for traffic.

“As announced at the last half-yearly meeting, Mr. Edward Knox, who has carried out the duties of secretary since the formation of the company, retired on April 30th, 1898, and has since taken a seat on the board, which was rendered vacant by the death of the late Colonel North, and Mr. Edward Knott, who has given every satisfaction as accountant, has since been appointed by the directors to the office of secretary *pro tem.*, and the directors ask the confirmation of the meeting to this appointment, under the provisions of the Companies' Clauses Act.”

## LIMA RAILWAYS.

## CAPITAL.

The aggregate expenditure on capital account to December 31st, 1897, amounted to 865,872*l.*, whilst the receipts had been as follows:—Shares, 20*l.* each, 800,000*l.*; debenture sinking fund, 27,500*l.*; debentures, 1887, 50,000*l.*; second debentures, 1896, 20,000*l.*; total, 897,500*l.* Credit balance, 31,628*l.*

## REVENUE.

The gross receipts for the year ending December 31st, 1897, amounted to 52,555*l.* (against 49,436*l.* for the previous year), the expenditure to 43,584*l.* (against 40,309*l.*), and the net receipts to 8,971*l.* (against 9,627*l.*). Deducting interest and expenses on debentures, 4,593*l.*; income-tax, 281*l.*; and appropriation to rolling stock renewal fund, 3,500*l.*; and adding 954*l.* brought forward from previous account, 500*l.* exchange account, and 493*l.* interest received, the net revenue of the year amounted to 2,544*l.* From this the directors recommend that a dividend be declared of 1*s.* per share, or ½ per cent., which will absorb 2,000*l.*, and leave 544*l.* to be carried forward. The report states:—

“The board regret having to report a decrease in the average rate of exchange for the year from 23·45*d.* to 22·79*d.* per sol., the earnings of the company being thereby affected to the extent of 2·81 per cent.

“A moderate improvement in traffics has continued throughout the year, showing a gross increase of 42,368 sol., which, owing to the fall in exchange, only represents an increase in sterling of 2,618*l.*, showing a loss on exchange of close upon 1,500*l.*

“The working expenses show an increase of 3,665*l.*; of this amount 1,000*l.* is accounted for by expenditure necessary to repair the damages caused all along the line through the earthquake of September 20th last. However, it is satisfactory to observe that with an increased mileage of 39,090 miles, locomotive power shows a decrease of 623*l.*, and fuel consumption a decrease of 191 per cent. The principal increase is mainly attributable to the unavoidable increase in wages, combined with the cost of carrying out indispensable repairs to rolling stock and permanent way.”

## Meetings.

### GREAT WESTERN RAILWAY.

The half-yearly general meeting was held on Thursday, at the Paddington Station; Earl Cawdor presiding.

The SECRETARY (Mr. G. K. Mills) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—Ladies and gentlemen—Before I pass on to move the first resolution, and to make the statement which I shall have to make to you with regard to the figures, I wish to perform, in the first instance, the duty of calling your attention to what I may call a sad incident which has occurred, and which is especially so to those who are interested in this undertaking. It is the great loss which I—and I may also say you—have sustained in the death of two very able and useful colleagues on the board. It is seldom that we have to record so great a loss. The two gentlemen we have lost—Mr. Charles T. Murdoch, M.P., and Mr. Henry Rose—were men who brought a vast amount of assistance to us as their colleagues, and who did great service to you as shareholders in this company. Mr. Murdoch was appointed a director in 1889, in the place of Sir Daniel Gooch. He had formerly been chairman of the Llanelli Railway and Dock Company, which has since been taken over by this company. Inside the board-room he gave us most able assistance, and he was a most valuable colleague. It was not only inside the board-room that his services were valuable, but he was always ready to take a deep and active interest in anything which concerned the welfare of the staff over the whole system. As far as we, his colleagues, are concerned, we lament his loss very much, and shall feel his loss for many years to come. He rendered very valuable services inside the boardroom to the company and also to the staff, but as an M.P. he also rendered good service. A good M.P. can be of great use on the board of this company, and I am sure we shall remember with deep gratitude the assistance we received from Mr. Murdoch in that direction. ("Hear, hear.") We have also to lament the death of Mr. Henry Rose, an older man than Mr. Murdoch. He was appointed a director in the place of Lord Cobham in 1891, and since then he has brought a very considerable knowledge of a peculiar sort to bear on our affairs, which has been of great value to the board. He has been a business man all his life, and the advice he gave us in your interests was a great assistance to us. We had hoped to have both those gentlemen on this side of the table for many years to come, and it is with deep regret that I have to start to-day's business with a statement such as this. I am sure I shall be carrying the feeling of the proprietors with me in this expression of deep regret at the loss which you and we have sustained. ("Hear, hear.") And now, ladies and gentlemen, I pass on to move the first resolution, which is—"That the report of the directors, circulated among the proprietors, and now presented to the meeting, be received and adopted." It will I think perhaps be convenient that I should adopt the same course which I have adopted for the past few years—that is, go through the figures with you and then go through the various clauses of the report, and at the same time, as I go along, try to deal with the questions which I think need any mention at my hands. You can afterwards raise any other questions which you may wish to bring forward, and I shall then be happy to deal with them to the best of my ability, bearing in mind that we, the board, always desire to keep the proprietors absolutely in touch with all that we are doing, for whilst we are glad to hear their criticisms we also like to feel that we have the proprietors behind us. ("Hear, hear.") The first item I will deal with in the accounts is the receipts on capital account. These amount to 1,245,909*l.*, and for the convenience of the proprietors I may mention that you will find them on page 6 of the report. The amount is made up in the following way: consolidated ordinary stock sold, 150,000*l.*; received on account of allotment to shareholders, 649,473*l.*, making a total of 799,473*l.* Besides these there are—Consolidated preference stock 755*l.*, and premium on stock 445,681*l.*, making a total, as I have already said, of 1,245,909*l.* The expenditure amounted to 606,153*l.*, the details of which proprietors will find set forth in statement No. 5 in the report. The receipts for the half-year being in excess of the expenditure by 639,756*l.*, which, added to the balance of unexpended capital brought from the last account, amounting to 402,218*l.*, leaves to be carried forward to next account 1,041,974*l.* Now I pass on to the question of receipts, and that you will find, ladies and gentlemen, on page 9. I take first of all the passenger receipts. In the first-class the numbers are 705,623, showing an increase of 29,918, in money from the first-class we have received 127,333*l.*, showing a decrease of 989*l.*; so that although we have a large increase in numbers of the first-class, we have a decrease in money. Of course, the first thing we wanted to ascertain on finding that result was, what it meant. As far as I am able to ascertain, we are comparing against the Jubilee year, and apparently the month of June in the Jubilee year is responsible for the difference. At least that is the only explanation I can get; but in the month of June there were a very large number of long-distance first-class passengers who came to London; and therefore the figures you are comparing against are really abnormal figures. That is the explanation of the fact that while you have an increase in numbers you have a small decrease in money. And now I turn to the second-class. The second-class numbers are 2,935,001, showing an increase in numbers of 275,793. In money, the second-class shows 237,475*l.*, or an increase as against 1897 of 28,238*l.* I cannot pause further upon that except to say that I think it justifies the course your board have recommended you to take in regard to the second-class. ("Hear, hear.") In the third-class the numbers are 32,319,562, showing an increase in the half-year of 1,097,966 passengers. In money, we show in the third-class 1,266,991*l.*, or an increase over 1897 of 20,913*l.* And now let me say one word with regard to the receipts per passenger in those three classes. In the first-class we show receipts per passenger of 3*s.* 7308*d.*, as against receipts per passenger in 1897 of 3*s.* 9578*d.* That bears out what I have mentioned, that as far as our researches go the Jubilee is responsible for that. You are comparing against an abnormal figure. The second-class shows a receipt per passenger of 1*s.* 7418*d.* as against 1*s.* 6884*d.*, and that,

again, I think, is a satisfactory figure as far as the second-class passengers are concerned. Then, in the third-class, we show a receipt per passenger of 9'408d., as against 9'579d., a slight decrease per passenger. But that seems to be very much the same story as last time when we met—that apparently this passing from the third-class into the second, due to the reductions in fares which you approved of, consisted chiefly of long-distance passengers. The long-distance passenger likes to be comfortable, and therefore gets into a second-class carriage. On the whole, the receipts per passenger show that we have made 10'89d., as against 10'999d., which is a slight reduction per passenger. But you will bear in mind that by far the larger number of passengers are the third-class passengers, and the reason for that decrease per passenger is the longer distances travelled by persons passing out of the third class into the second. Then I will give the receipts from parcels, horses, and carriages on the same page. The receipts from these show an increase of 7,460l., the total receipts from this traffic being 362,565l. Well, there are one or two things that are of importance and worth looking at. In these parcels, horses, and carriage receipts, parcels are responsible for a good deal of the increase. We have reduced our own rates, and the Post-office parcel rates have also been decreased, therefore it is in the teeth of reductions in our own rates and a reduction in Post-office parcel rates that we still show an increase—one of 7,460l.; so that I think that item is a satisfactory one. I have overlooked in regard to the passenger traffic the season-tickets. I ought to have told you that the season-tickets in number amounted to 24,909, showing an increase of 1,379. The amount of money received was 81,471l., or an increase of 4,131l.; and I think that is also a satisfactory return. The season-ticket traffic seems to be growing steadily, and I hope we shall see it growing still more. ("Hear, hear.") Passing on to the other receipts, I come to the mails. The mails amount to 65,725l., and show an increase of 197l. I do not think I need trouble you with further remarks upon that item. The merchandise, less cartage, shows an increase of 18,755l., and the amount is 1,224,001l. That, I do not think, is an altogether unsatisfactory feature when you bear in mind the half-year through which we have passed. Live stock shows for the first time for several half-years an increase, the amount being 65,027l., or an increase of 2,495l. So far as I am able to ascertain, that is due to an increase in the importation of Irish cattle. For some years past we have had to tell you there has been a decrease in the live-stock traffic, and the only comfort that we could then give you was that it was being replaced to some extent by the dead meat trade. Minerals, which are the most serious item in the half-year, due to causes which we are all acquainted with, amounted to 1,117,881l., and show a decrease of no less than 138,172l. Dock and harbour dues of course followed to a great extent the mineral traffic. They amount to 19,718l., showing a decrease of 3,366l. Under all those heads, therefore, the total amount of receipts is 4,568,187l., showing a decrease of 60,398l. Then the canal traffic amounts to 7,471l., or an increase of 227l. Rents of property, cottages, &c., amount to 53,440l., showing a decrease of 256l. Transfer fees amount to 835l., showing an increase of 64l.; while mileage and demurrage of rolling stock amounts to 3,392l., showing a decrease of 61l. The whole of the receipts under the different heads amount to this—we have received 4,626,541l., a decrease as compared with 1897 of 60,424l. Then I pass on to the train mileage. I shall have to say something more on the question of the whole return presently when I come to the conclusion of the figures. The train mileage shows an increase of 184,972 miles in passenger train mileage, while the goods and mineral trains show a decrease of 312,562 miles. That, of course, would follow the results of the strike in South Wales, and I think it is almost entirely due to the reduction in the train mileage of the mineral trains. As far as the passenger trains are concerned, we have a large increase in the train mileage, and as far as it goes the train mileage put on shows an increase in the receipts. That is satisfactory if you consider that when you put on fresh mileage it takes the public some time to find out that new trains have been put on. Then I come to the other side of the page. On page 9 we give you the expenditure. I come, first of all, to the maintenance of way and works, a very important figure. In that we show that we have spent 639,242l., or an increase of 33,866l. Now the proprietors will want to know the reason of that. ("Hear, hear.") Yes; and my business is always to find out the reason for myself. It is a very heavy cost, and the increased cost of maintenance is attributable mainly to a larger number of miles having had to be relaid than was the case a year ago, and in some measure to the increased price of materials—the heavier weight of rails used—and to concessions to the men. The extra relaying is, to a large extent, due to the fact that it has been necessary to proceed somewhat more rapidly with the conversion of the old longitudinal road into cross-sleeper road than had been contemplated, the life of the old road on the main line having been shortened, no doubt, by the large increase in recent years of the express trains run, and the heavier weight of the rolling stock. We may be told—"You ought to have cut down this item at once when things were going badly." Well, if we had done so we should not have been doing the best we could for the proprietors in this company. ("Hear, hear.") You must bear this in mind, that in the first part of the half-year the strike had not begun. It did not begin till April in South Wales, and we had made our plans and done what we thought was necessary. If it had begun at the beginning of the half-year I should have recommended the board to go by the advice of the engineer and to make our line as safe as we could make it. The best made running line will, in the end, be the cheapest line to maintain. ("Hear, hear.") I, therefore, do not feel the slightest hesitation in saying that that figure is absolutely justified, and that if we had attempted to scrape and pare down the line we should have been doing what was a detriment to the company. I shall be only too glad to give any information in detail upon that if any one wishes for further information. I now pass on to the locomotive power. In locomotive power we have spent 759,733l., showing an increase of 35,429l. That increase is due to extra wages and the higher price of coal. That covers the greater part of it, but we have not only to provide extra wages, but there are shorter hours, and, of course, that means increased cost as far as wages are concerned. Then we

come to the carriage and wagon repairs, which amount to 240,772l., or an increase of 1,361l. I need not say anything on that. The traffic expenses amounted to 824,916l., or an increase of 34,843l. That is due chiefly to extra staff and increased wages—chiefly to increased staff. General charges amounted to 97,913l., or an increase of 3,935l. 1,000l. of that is due to expenses in getting out the allotment of stock, and 1,300l. is due to electric telegraph expenses. The law charges amount to 9,548l., or a decrease of 4,799l. That I do not think you may take as a fair comparison, because we are comparing this year with a year in which we had a heavy arbitration case, so that there is not much in that. We are getting more down to the normal, if you can properly say there is a normal in legal expenses. Then we come to the Parliamentary expenses, which amount to 2,792l., or an increase of 1,110l. Compensation for personal injury amounted to 2,443l., or an increase of 499l. The damage and loss of goods, &c., amounts to 26,114l., or an increase of 7,702l. You may not think that a very satisfactory figure, and I do not think it is, and I have done my best to find out the reason for it, and as far as I have been able to ascertain this increase in damage and loss of goods is due to the blocking of traffic at Paddington, Birmingham, &c. What I want to impress upon you is that sometimes we are told we are spending too much money in improving the accommodation; but all I can say is that I find that in many places where this figure, compensation for damage and delay, occurs, we still have a good deal to do before we can relieve our traffic and work it economically without a loss of this kind. Rates and taxes are 182,356l., showing an increase of 6,213l. That is not so bad as the accounts we have had several times recently as far as rates and taxes are concerned. They have been going up not very far from double that sometimes. The Government duty amounts to 20,768l., or an increase of 1,200l. The second-class is increasing, and therefore the Government duty must increase in so far as it comes out of the third-class. The steamboat charges are 64,790l., or an increase of 15,143l. That is due chiefly, almost entirely, to heavy repairs to some of our steamers, and also to our having extended our fleet and provided for it a depreciation fund, from which we have not yet got the return that we hope to have in the future. The canal expenses were 10,036l., showing an increase of 699l. That shows, as a whole, that the expenses amounted to 2,881,423l., or an increase of 190,192l. Of course, with these figures, the necessary working expenses, which I hope will prove exceptional, amount to 62,854 per cent., as against 57,942 per cent. in 1897. As those figures stand, it is very unsatisfactory, unless there is some explanation of them. The total revenue receipts amounted to 4,626,541l. The total revenue expenditure amounted to 2,881,423l.; leaving a balance to the revenue account of 1,745,118l., to which must be added the balance from last account, amounting to 31,351l., the dividends on shares held by the company, amounting to 12,103l., making in the aggregate 1,788,572l., out of which, after payment of debenture interest, rent-charges, rents of leased lines, dividends on guaranteed and preference stocks, the balance is left of 300,586l. available for dividend on consolidated ordinary stock, which will admit of a payment of 24 per cent. per annum for the six months, amounting to 276,145l., and carrying forward a balance of 24,440l. 8s. 4d. to the next account, as compared with the dividend of 43 per cent. for the corresponding period last year, and carrying forward a balance of 16,273l. 9s. 5d. That, gentlemen, is, of course, a statement of accounts as far as dividend is concerned, worse than any we have had for a great many years. The real fact is, as any one who has watched the papers must see, that it has been due to the coal strike in South Wales. ("No" and "Yes.") I say that the reason of this has been the coal strike in South Wales. The figures here show that, as far as minerals are concerned, you have lost 138,000l., instead of getting, what you may reasonably have supposed—an increase in minerals; but all we can deal with in actual figures are the figures of the loss you have sustained. But any one acquainted with railway work knows perfectly well that a great deal more than that has been lost, and if anybody here can tell me what that amount is he knows more than I do. Of course the loss has been far heavier than that. I should say that, instead of a decrease of 138,000l. on the mineral traffic, we had every reason to suppose, as the figures showed up to April, that there would be a considerable increase in mineral traffic. Then again, it is impossible for a strike of such magnitude from April 1st to continue in a district of that kind without producing heavy loss in other departments. Not only the mineral department, but the merchandise department undoubtedly suffered, and not only that but the passenger traffic suffered. Putting these things together, I have no hesitation in saying that the coal strike is responsible for the statement we have to make to you to-day. There is one other item which you should bear in mind, namely with regard to locomotive expenses. The result of the strike has been that we had to get coal as best we could, and the increased cost of the coal has also been due to the coal strike. Therefore, to whatever extent our expenses have gone up, they are due to the increased cost of coal, which was due to the strike. I admit that we might to some extent have diminished the expenditure. We might if we had listened to some people have discharged some of our permanent servants, but we have tried to avoid doing that as far as we possibly could. We have worked in this way. We have arranged, to some extent, as far as was practicable that more men should be away on leave during the slack time than would naturally be the case. We have arranged that they should take their holidays; we have tried to find work for all permanently employed by you by getting rid of those who were not permanently employed, and giving them work in lower grades of your employ. If some of those men were getting high wages as goods-guards, or engine-drivers, we have dropped them down to another class, but we did not put them to the bottom, but at the top of the porter grade, or whatever it might be. We felt that your wish would be that we should maintain as far as we can by any acts of our own the best possible relations with our employes. We always feel that our great interest is that we should cultivate good relations between ourselves and our staff. That, I agree, has cost us something, and I go so far as to say that if this strike does not terminate shortly we may have to consider to what extent we are justified in carrying out the policy I have told you of; but as far as we are concerned in the present half-year, what we have done in endeavouring to find men wages at a lower, not the lowest, rate, has been in the interests of this great concern, in so far as we have been

endeavouring to keep in touch with the men, and treat them in a time of difficulty as well as we could. Now, turning to the report, I do not think I need refer to clause 1. Clause 2 I think I have already dealt with by what I have just said. To clause 3 the same remark applies. Coming, then, to clause 4, which refers to the works in construction which are going on, I think we are making satisfactory progress. Clause 5 refers to the line between Acton and Wycombe, and between Truro and Newquay, which will shortly be commenced. The Albert Docks site is referred to in clause 6. We are proposing there to establish a goods depôt and from all the information we get we hope to do a good and remunerative work there as soon as it is established. Clause 7 is with regard to the Workmen's Compensation Act of 1897. Your directors gave very great care and consideration to this, and, on the whole, we came to the conclusion that instead of endeavouring to set up any particular scheme for the moment we should out of your own funds meet the obligations under the Act. Then I pass on to No. 8, which refers to the allotment of the stock which the proprietors have made, and all I have to say upon that is that we thought, in view of the heavy expenditure we have in hand, it was the wiser course of policy rather than to put any stock on the market. The offer was made in June last, and practically the whole of the stock, amounting to 2,450,000*l.*, has been taken up and accepted. I understand there is no real modification in that. Practically the whole thing has been taken up to that amount. Then No. 9 points out that in order to facilitate the construction and opening at an early date of the railway from Byfield to Banbury authorised by the Great Central Act, 1897, it has been agreed that this company should, in exercise of the powers conferred upon them by the Act, apply their capital for the purpose of constructing the line, the Great Central Company paying interest at the rate of 3½ per cent. per annum on the amount so expended, and being entitled to repay the principal amount at any time on giving six months' notice. That is to facilitate the junction being carried out and to secure the interest being repaid us by the Great Central Railway Company. The next clause, No. 10, refers to the General Powers Act and our New Works Act, as to both of which we have to submit resolutions to the proprietors, and probably it will be more convenient then to state anything that any one wishes to know on the subject. No. 11 is also a matter which we have to submit to the proprietors afterwards. I can either make any statements now upon it or do so at a later stage. Perhaps when we come to deal with it and vote upon it I can make a statement then. The first thing is an agreement between the Easton and Church Hope Railway Company and the Great Western and London and South Western railway companies. Then there is an agreement with the North Pembroke shire and Fishguard Railway Company. Then there is the General Powers Bill of the company. The chief thing in that is that the powers for vesting in this company the undertaking of the Golden Valley Railway Company have been struck out. Under the Bill the undertakings of the Helston Railway Company and the Leominster and Kington Railway Company are transferred to this company as from July 1st last. The Marlow to Henley line I ought to say a word upon. We were under the impression that we were rather proposing to confer a benefit on that district, but apparently the district did not take the same view, and the opposition was so great that, at all events for the present, we felt it better to withdraw it. With regard to the last paragraph, as to railways and works, including the deviation of the authorised Castle Cary and Langport Railway, we were advised that that line would be better made by this deviation, and would better serve the district that it was proposed to go through. It connects the same points, but is an improvement in the service. The Clarbester-road and Letterston Railway, and the Weymouth Harbour and railways have also been sanctioned. The circumstances relating to the Fishguard and Rosslare Railways and Harbours Bill were set out in the notice to the proprietors convening the special meeting held on the 18th ult. I do not know, therefore, that I need go through those particulars. That being approved, a resolution will be submitted to you to subscribe a sum not exceeding 250,000*l.* The 14th paragraph refers to the Windsor and Ascot Railway Bill, which provides for a working agreement of that line; and also we may, if we think fit, supply capital for the purpose. There is no obligation upon us to do so, but we may, if we think fit. The Andoversford and Stratford-upon-Avon, and the Llanelly and Pontardulais Railway Bills, which we felt it necessary to oppose, have both been rejected. Various other Bills and provisional orders, which would have injuriously affected this company's undertaking, and which have been opposed, were rejected. We have had a very arduous and somewhat lengthy Parliamentary session; but I hope that on the whole your interests have not suffered by what has happened in the course of it. No. 16 mentions the confirmation order for the construction of a light railway between Congresbury and Blagdon, which we hope may be a successful light railway, and the order for the construction of a light railway to Pewsey from Salisbury has in consequence of the opposition of the War Department been restricted, unless with their consent, to the portions of the proposed line between Pewsey and the northern boundary of their property on the one hand, and Salisbury and the southern part of the property on the other. I hope there may be some further developments in that. At present the War-office will not allow us to pass absolutely through their territory; but we may hope for further developments within a reasonable time. Then No. 17 merely deals with one portion of a light railway from Pewsey, in the county of Wilts. That is the loop that has to be made to connect the proposed Pewsey and Salisbury Light Railway with the Berks and Hants Extension Railway to the west of Pewsey, the object being to enable us to run through trains over the light railway to and from Devizes. It is only the alteration of a loop. Then the votes of the proprietors are asked for the railway between Byfield and Banbury 150,000*l.*, between Truro and Newquay 50,000*l.*, Pewsey and Salisbury Light Railway 50,000*l.*, Wroughton Vale Light Railway 30,000*l.*, branch to canal basin (Halesowen) 12,000*l.*, widening Llangollen lines 10,000*l.*, Shrewsbury station, on account, 50,000*l.* Of course, that is a joint matter between ourselves and the London and North Western Railway. That, I am afraid, is a thing that anybody living in the neighbourhood of Shrewsbury knows has been required for a

long while. We have begun the work now, and I hope we shall make a good station of it. Then for Windsor station we ask a vote of 12,000*l.*, for Westbury station 30,000*l.*, for the goods depôt at Royal Albert Docks 50,000*l.*, for land and compensation, 50,000*l.*, and for a carriage-shed at Swindon 11,000*l.* Then we also ask for a vote for rolling stock, for passenger engines 45,000*l.*, and for ballast wagons 10,000*l.*, being 55,000*l.*, making a total of 560,000*l.* Then paragraph 19 refers to the lamented deaths of our colleagues, as to which I have already had to say something, and I only have to add that we filled the vacancies by the appointment of Mr. Evan Hy. Llewellyn, M.P., and Mr. Samuel Ernest Palmer, from both of whom we hope to get valuable service in your interest. In pursuance of the by-law of August 30th, 1897, it will be the duty of the proprietors to appoint the audit committee for the ensuing year, and the gentlemen who are mentioned in paragraph 20 have been nominated for election. The other usual reports are appended. I think that is all I have to say, except, as I have stated already, that I should endeavour to answer any question that any one may ask with regard to the figures and report laid before you. I now move—"That the report of the directors, circulated among the proprietors, and now presented to the meeting, be received and adopted. (Cheers.)"

Mr. ALEXANDER HUBBARD (deputy-chairman) seconded the resolution.

Mr. BEAVIS repeated the assertion which he made last year, that in some instances the directors were carrying second-class passengers at less fares than for third-class. That appeared to him to be bad policy, and it accounted in a great measure for the large increase in the receipts from second-class passenger traffic.

Mr. PHILLIPS, on the other hand, considered the increase in the second class was a matter for congratulation, as it showed that the travelling public appreciated the reductions in fares which had been made. With regard to the strike of colliers in South Wales, it was true that it had resulted in reducing the dividend of this company, but in some other railway undertakings it had had the effect of completely destroying the shareholders' dividend. He proceeded to advocate the provision of more compartments for ladies in second-class carriages.

Mr. C. H. ROBINS asked whether it was not possible to increase in some slight degree the fares and rates for freight, to meet the increased expenditure of the company. Unless something of the kind were done, he thought the shareholders would soon be in the position of the London Chatham and Dover proprietors, who received no dividend at all. The decline in dividend was not entirely owing to the South Wales coal strike, but to the reckless manner in which money had been spent half-year by half-year on improvements, and increased advantages to the company's servants.

Mr. TREGONING thought the reduction in the dividend was a serious matter, especially to small shareholders of limited incomes. The traffic expenses appeared to be very high, and he agreed with a previous speaker that the second-class passenger fares were too low, as compared with those of the first and third class.

The CHAIRMAN, in reply, thanked the various speakers for the temperate manner in which they had spoken, and, alluding to the assertion of Mr. Beavis, said he had on a previous occasion stated, and he was prepared now to adhere to his former statement, that in no case were the second-class ordinary fares lower than those of the third class under similar circumstances. Of course he compared like with like, and did not include excursion fares. With regard to compartments for ladies, he believed they were as a rule not provided in connection with local trains, but only through trains. The directors would be glad if they could see their way to give increased accommodation in the direction indicated. As to the second-class traffic, he thought the increased numbers and receipts fully justified the policy which the board had adopted, and which the shareholders acquiesced in, of reducing the fares. He did not think the second-class fares had been made too low as compared with the other classes. There were a certain number of people who would always travel first-class, whatever were the conditions; and it was not necessary to reduce the first-class fares in order to induce people to travel by that class. On the other hand, they were bound to reduce the second-class fares considerably, otherwise they could not induce people to travel second instead of third-class. He agreed that the decline in dividend was a serious matter, but it was a drop of an exceptional character, and was due to exceptional circumstances in the latter part of the last half-year. The strike in South Wales had not only occasioned a loss to the company in mineral traffic, but in other kinds of traffic. With regard to the suggestion that the company should raise the fares and rates for freight to recoup them for the losses they had sustained through the strike, he was afraid that Parliament would have something to say against such an innovation. The railway companies were compelled to accept the reduced fares and rates which had been thrust upon them by the Legislature. They had to see how under existing circumstances they could meet the demands of the public and at the same time develop their traffic. He had already explained why the traffic expenses had so greatly increased. The increase was chiefly due to extra staff, increased wages, and shortened hours of labour. The increased staff and wages were partly necessitated by the increased traffic, which was fairly good up to April or the middle of May, when the coal strike commenced.

The resolution for the adoption of the report was then put and carried unanimously.

On the motion of the CHAIRMAN, the dividends on the guaranteed and preference stocks were agreed to, and a dividend on the ordinary stock at the rate of 2*l.* 5*s.* per cent. per annum was declared, and ordered to be paid on and after the 18th inst.

The proposed expenditure set forth in the report, on works and rolling stock, amounting in the aggregate to 560,000*l.*, was sanctioned and approved.

On the motion of Mr. PHILLIPS, seconded by Mr. KEEN, the following gentlemen were appointed as members of the Audit Committee for the ensuing year:—Mr. A. Brassey, Lord Hillingdon, Mr. T. Holland, Mr. H. Lambert, and Mr. O. S. Wynne.

Power was given, under the provisions of the Great Western

General Powers Act, 1898, to create a sum not exceeding 300,000*l.* of consolidated ordinary stock, and under the provisions of the Great Western New Works Act, 1898, to create a sum not exceeding 600,000*l.* of like stock, to be issued when deemed expedient. The board were also empowered to borrow by debentures such sums as by their recent acts they were entitled to raise.

Under the provisions of the Fishguard and Rosslare Railways and Harbours Act, 1898, the directors were authorised to subscribe a sum not exceeding 250,000*l.* towards the undertaking of the Fishguard and Rosslare Railways and Harbours Company.

The agreement between the Easton and Church Hope Railway Company, the Great Western, and the London and South Western, for the maintenance, working, and user of the Easton and Church Hope Railway was approved; as was also the agreement between the North Pembrokehire and Fishguard Railway and the Great Western for the working of the North Pembrokehire and Fishguard Railway between Clynderwen and Goodwic, near Fishguard.

At a special general meeting subsequently held the order authorising the construction of a light railway in the parish of Pewsey, in the county of Wilts, was approved.

A vote of thanks to the chairman and directors terminated the proceedings.

### LIMA RAILWAYS.

The annual general meeting was held on Wednesday at Winchester-house, E.C.; Colonel LAWRENCE HAYWORTH, J.P., presiding.

The SECRETARY (Mr. Frederick G. Curtis) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*) were taken as read.

The CHAIRMAN then said—Gentlemen, I have to address a few remarks on the proceedings of the railway during the past year, 1897, and I may preface them by saying that it has been a disappointment to the board that the traffic returns have not been so good as were anticipated. The traffic returns show an increase of 2,000*l.* in gross receipts, but against that, unfortunately, we have had to expend more money in the repairs to our line and stations than we would have expended in ordinary years. For instance, we had an earthquake, which occurred in September last. That did considerable damage to the stations, and also a little damage to the permanent way, which had to be put in repair immediately, and most of the expense comes upon 1897. Then, again, the track had also got slightly worn and out of repair. Strict economy had been enforced in the preceding years, when we had so many different adverse circumstances occurring in Peru—for instance, there were two or three rebellions and even fights upon our line. In 1897, our new manager, like all new managers, wished to put the line in the best possible condition, and he has done so. We have always insisted upon his observing the strictest economy; but, at the same time, we thought it in your interests that the line should be one that could earn a good dividend and carry large traffics expeditiously and well, so as to suit the public in Lima. Then we had another adverse influence in Lima that most railways are free from, and that is we have to be very careful that we did not encourage any competition. It is a short line, as you know; it is really two lines, one from the port at Callao to Lima, and the other to Chorrillos, which I may liken to a small Brighton on the ocean, where people live in the summer time. Our manager tells us there is a permanent population springing up, and that the traffic will improve; but that takes time to develop. With that short line we are very liable to have people start all sorts of competition against it, and we have had to deal with that. We have so far been able to keep competition in abeyance, but it may arise some time hence, and we have to be very careful that the fares are not so high as to encourage it. But with all those disadvantages, that we are more or less always liable to, we believe that the line has a prosperous future before it. I will not say that we expect high prosperity, but that it will gradually improve as it has done in past years in the gross returns. This year the returns are equally good, and we expect quite as large an increase for the current year as we had in 1897. I think the items of the accounts, in most cases, speak for themselves, but I shall be only too happy to afford any explanation that any honourable proprietor may desire. I may call attention to the large increases in the expenditure. One of the principal ones is on the maintenance of way. That was occasioned chiefly by the earthquake. On account of this we had to make considerable repairs. Then with regard to the repairs to stations, the same remark applies to that, perhaps more pointedly than to the permanent way. Some of the stations were cracked, but none thrown down, but there were some houses at Callao and La Punta which were overthrown and which showed that there had been a serious shock. Those are the two principal items where the expenses show an increase. In the other items the increases are only moderate, and they are, no doubt, occasioned by the increase of traffic and by the increase of mileage that our manager found it necessary to run in order to improve the passenger traffic on the line. They were complaining, particularly in Chorrillos, that they had not quite enough train accommodation for the passengers. Well, gentlemen, I think with those few remarks I need not detain you longer, except to say that I shall be very pleased to answer any questions. I beg to move:—“That the report, together with the statement of accounts, now submitted, be approved and adopted.”

Sir HENRY CARTWRIGHT, K.B., J.P.—I have very little to do beyond formally seconding the adoption of the report, because I feel that the sentiment of hopefulness expressed by the chairman is fully warranted. Trade is gradually improving in Lima, and business matters are more in favour of the railway. The only point that I would allude to is in reference to what the chairman has said with regard to the special increased expenses, as to which it may be asked why we did not spread them over a number of years. Well, at the time of the explosion great alarm was taken by people in the locality, and the Government officials took advantage of that to be hypercritical. They came down, no doubt honestly, with a feeling that it was their duty to see that everything was put in apple-pie order. Therefore we could not delay matters, and the company had, without any delay whatever, to put the railway, and particularly the rolling stock, into perfect order. In con-

sequence of this those expenses could not be delayed in the way that they might have been had that circumstance not been against us. The management of the company wished to run the old engines as long as they possibly could with proper safety, and they might have lasted and have done their work for some years; but when the Government officials came down and insisted upon very severe tests being put on those engines we had to confess that they would not stand those tests, and it therefore became absolutely necessary to get new engines. That is the cause of the outlay being apparently so excessive. It could not be helped, and it could not be delayed. However, I think the remarks of the chairman with regard to our prospects are fully warranted, and I beg to second the adoption of the report.

The CHAIRMAN—I might have read the extract from the manager's report referred to by Sir Henry Cartwright. He says:—

The present year has, of course, been an exceptionally expensive one, for, although the Barranco accident occurred in 1896, the consequences of that disaster have really been borne in 1897, as all the reparations to rolling stock, locomotives, line, &c., have been effected within the last twelve months; also the stations, stores, and other dependencies of the railway had been allowed to run down to such an extent that it has required a large sum of money to restore them to a thoroughly efficient condition. Now, however, the majority of these repairs have been effected, and as you say, with the new engines, coaches, and other elements that will be at my disposal for the coming year, material savings can be effected in the expenditure to the benefit of revenue. I can only repeat that it should be my earnest endeavour to carry out your wishes in this respect, and that I will make every economy that is compatible with the safe working of the line and the efficiency of its rolling stock, buildings, and appurtenances. I thought you would like to hear that, as bearing out what Sir Henry Cartwright alluded to.

Mr. CURF expressed his satisfaction that the board had ordered new engines, because they would tend to the more efficient working of the line; but he pointed out that 39,000 extra miles had been run, which had only given a return of about one passenger per mile, which he thought was a very poor result. He concluded by asking what difference in the directors' fees the reduction in the number of the board would make.

Mr. MITCHELL asked whether it would not be possible to sell the railway to the Government and divide the money amongst the shareholders.

The CHAIRMAN, in reply, said that the increased mileage was due to the fact that the manager believed by giving additional facilities to the travelling public the traffic would be greatly increased, and in this view he had been borne out to the extent that he had already mentioned in the gross returns. It was a wise policy on his part, and it was a matter of judgment whether additional trains would or would not pay. That matter must be left to the manager, subject to the warning of the board that he was to keep expenditure down as much as possible, having due regard to efficiency and economy. With regard to the reduction in the board, two years ago, when Mr. Lane was elected, it was understood by the shareholders that the board would not be increased at the first resignation, and it was not proposed to increase the number of directors. As to the remuneration, he did not think they could ask the board to further reduce it, as they had already of their own accord done so. He hardly knew of any company in which the directors received less fees than they did in this case. With reference to the new locomotives, all their reports showed them to be extremely efficient, and they were doing extremely good service. They might now consider that the line was in a thoroughly good condition to take any traffic which might be offered. During the present year ten additional freight-cars of very considerable tonnage had been sent out and had arrived in the country, and there were four large saloon carriages on the way, and they were all paid for. It was expected that this rolling stock would give a very good return. It was found necessary to provide this extra stock in order to secure the holiday traffic. The cost of the new stock had been met by the issue of debentures, and they would now have the line thoroughly well equipped. He did not think that the Government would entertain the idea of buying the line, and if they did he was sure they would never pay for it.

The report and accounts were then adopted.

On the motion of the CHAIRMAN a dividend of 1*s.* per share on the share capital of the company, free of income-tax, for the year 1897, was declared, payable on Friday, September 16th, to the shareholders whose names were on the register on August 10th, 1898.

The retiring directors, Sir Henry Cartwright and Mr. Edward W. Lane, were re-elected, and on the motion of Mr. WATKINSON, seconded by Mr. CURF, the retiring auditors, Mr. W. A. Stone and Mr. H. W. Kirby, were reappointed.

The proceeding terminated with a vote of thanks to the chairman and directors for their past services.

### NORTH LONDON RAILWAY.

The half-yearly general meeting was held on Thursday, at the offices, Euston Station; the Right Hon. Lord BATHURST in the chair.

The SECRETARY (Mr. G. Bolland Newton) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*) were taken as read.

The CHAIRMAN then said—Gentlemen, I have now to move the usual resolution, which is:—“That the report of the directors now read, together with the statements of account, be received and adopted.” This report, which I am sure you have all seen, is so clear, and is, I hope you will agree with me, on the whole so satisfactory, that there is very little left for me to say by way of explanation in recommending it to your adoption. The capital expenditure includes the construction of a new locomotive engine, the expense incurred during the six months for the works connected with the enlargement of the entrance to our docks at Poplar, and some additions to the workshops at Bow, all of which expenditure we hope will be of a remunerative character. Then, as to the revenue account, you will have seen that there is a slight increase, amounting to about 3600*l.*, in the gross receipts, although there is a small decrease in the traffic receipts. That, however, I think, is easily to be understood when we remember that the six months of last year, with which we are now making a comparison, had the advantage of the stimulus which was given to the travelling public by the Jubilee celebrations, while in the six months with which this report deals we have had not

only to meet increased competition, but also we have been confronted by exceptionally unfavourable weather, so that we have, in fact, carried fewer passengers by about 430,000 persons. On the other hand there has been an increase of traffic in parcels, animals, and merchandise, and notably an increase in minerals, so that the total decrease in traffic receipts amounts to about 728 $\frac{1}{2}$ . Then as to the increase in the working expenses, that is mainly due to a cause from which many industries have suffered, and are still suffering—namely, the enhanced cost of coal owing to the deplorable strike in Wales. The increase in working expenses also to some extent is referable to the revision of the scale of wages of our staff; but the net result of the working of the railway for the six months is that after meeting all preferential charges and guaranteed rents and carrying forward a sum of about 7,000 $\frac{1}{2}$ , which is about 1,000 $\frac{1}{2}$  more than we carried forward last year, and after adding 2,000 $\frac{1}{2}$  to the reserve fund, so that it now amounts to the comfortable sum of 100,000 $\frac{1}{2}$ , we still find that there is enough to enable us to recommend to you the distribution of the usual dividend of the North London Railway Company—viz., 7 $\frac{1}{4}$  per cent. for the year. You will be glad to hear that the works for the widening of our entrance to our docks at Poplar have proceeded as reasonably as we could have hoped. The work for the six months under review included excavation and cement and brickwork. We hope the brickwork will be completed within the next six weeks, and that the whole of the undertaking will be finished by the end of the year. I think there is nothing else to which I need call your attention, except, perhaps, I should mention that we have determined that we should make some alteration in the access to our station at Victoria Park. That subject has been under discussion for some time. We lately received a deputation from the authorities of the parish and the inhabitants of the neighbourhood, and we have decided, with a view to the greater comfort of our passengers, and also having regard to the building operations there, that we will make an additional booking-office at the Victoria Park station and a new approach from Riechholme-street. Those works will be at once carried through, and I hope will give satisfaction to the neighbourhood. That is all I have to say, and I now venture to submit to you the resolution which I have read.

Mr. J. P. BICKERSTETH seconded the motion.

Mr. KING asked what the board proposed to do with the Workmen's Compensation Act.

The CHAIRMAN replied that they proposed to give effect to the Act of Parliament which had been passed and to act as their own insurers.

The resolution was then agreed to unanimously. It was further resolved:—

"That the following dividends be now declared out of the net profits of the undertaking for the half-year ending June 30th, 1898, upon the company's capital stock on the above date, viz.:—

"On the 700,000 $\frac{1}{2}$  first preference stock, 1866 (created 1861), a dividend of 2 $\frac{1}{2}$  5s. per cent. for the half-year.

"On the 250,000 $\frac{1}{2}$  second preference stock, 1875 (created 1871), a dividend of 2 $\frac{1}{2}$  5s. per cent. for the half-year.

"On the 2,020,400 $\frac{1}{2}$  ordinary stock a dividend of 3 $\frac{1}{2}$  15s. per cent. for the half-year.

"The dividends to be made payable on Saturday, the 13th instant."

On the motion of Mr. KING, a vote of thanks was passed to the chairman, directors, general manager, and staff, and the proceedings terminated.

## LONDON AND NORTH WESTERN RAILWAY.

The half-yearly general meeting was held yesterday, at Euston Station; Lord STALBRIDGE presiding.

The SECRETARY read the notice convening the meeting, the minutes of the last half-yearly meeting, and of the special meeting held on February 22nd last, which were approved. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—I now lay on the table the half-year's accounts and the report of the directors. There is not very much to be said about them, for you will draw your own inference from the details which I shall give you of the traffic, and so on, as to the causes of the unfortunate decrease of  $\frac{1}{4}$  per cent. in the dividend. You see that the traffic receipts and rents amount to 6,201,916 $\frac{1}{2}$ , less the working expenses of 3 $\frac{1}{2}$  millions, and the profit on the half-year's working is 2,609,921 $\frac{1}{2}$ . Miscellaneous receipts are 92,092 $\frac{1}{2}$ , making altogether 2,701,713 $\frac{1}{2}$ . Then we must deduct from that the interest on debenture stock 530,700 $\frac{1}{2}$  odd, and chief rents and leases 120,584 $\frac{1}{2}$ , leaving a total of 2,050,424 $\frac{1}{2}$ . The balance from the previous half-year being 89,536 $\frac{1}{2}$ , we have available for dividend 2,139,960 $\frac{1}{2}$ . Well, you will see from the increase in the receipts—I am now going to talk entirely of increases—we have the same curious results in the first-class that we had last half-year. We have had more passengers, but we have taken less money, and the only way that it can be accounted for generally is that the first-class passengers have taken shorter journeys. In the first-class we have carried 18,530 more passengers, and we have received 5,468 $\frac{1}{2}$  less in money. The result of the experiment in the second-class has been, as you will see, most successful. We have carried 491,831 more passengers, and we have gained 56,842 $\frac{1}{2}$ . (Applause.) The third-class still keeps doing well, but it has not increased, nor can we expect it to increase by the enormous leaps and bounds which it has taken in the last two years. This half-year we have carried 679,430 more third-class passengers, and we have received 2,630 $\frac{1}{2}$  more money. Season-tickets, I am glad to say, are still doing well. We have issued 3,847 more, and we have received 8,480 $\frac{1}{2}$  more, making the total on that account 62,484 $\frac{1}{2}$ . For parcels we have received 10,744 $\frac{1}{2}$  more, and for mails we have received 1,185 $\frac{1}{2}$  more. Now for the goods and merchandise we have taken 60,094 $\frac{1}{2}$  more, and for minerals—coal and limestone—89,783 $\frac{1}{2}$  more. We have carried 381,354 tons more of both of those commodities. Live stock, I am sorry to say, has decreased. The reason for that it is difficult to give, but one reason that may be given is the enormous increase of foreign meat imported into this country. We have received 3,756 $\frac{1}{2}$  less for carriage of live stock; we have thus a total income of 220,564 $\frac{1}{2}$  more. For rents we have received 21 $\frac{1}{2}$  more, and that makes a total increase in the receipts of 220,585 $\frac{1}{2}$ . Now against this we have to put the expenses. The expenses, as per statement No. 9 in the balance-sheet, show an increase of 492,183 $\frac{1}{2}$ . The balance of sundry increases and decreases as per state-

ment No. 10, is 4,028 $\frac{1}{2}$ , the balance from the previous half-year is 10,243 $\frac{1}{2}$  less, and what is required for dividend on the additional capital is 13,284 $\frac{1}{2}$  more, making a total of 275,734 $\frac{1}{2}$ , against 220,585 $\frac{1}{2}$ , leaving a difference of 55,149 $\frac{1}{2}$ . Well, to meet that, we have to reduce the dividend  $\frac{1}{4}$  per cent., which amounts to 51,403 $\frac{1}{2}$ , and we have to reduce the balance carried forward by 3,746 $\frac{1}{2}$ , making 55,149 $\frac{1}{2}$  our deficiency. I should say that to carry this increase of traffic we have had to run 990,679 more train miles—that is very nearly a million more train miles which we have had to run. Now take the working expenses. In maintenance there is an increase of 44,562 $\frac{1}{2}$ ; in locomotive power there is an increase of 58,305 $\frac{1}{2}$ ; in carriage repairs, 32,666 $\frac{1}{2}$ ; in wagon repairs, 5,769 $\frac{1}{2}$ ; and traffic expenses are no less than 78,983 $\frac{1}{2}$  more. General charges are up 7,500 $\frac{1}{2}$ , and so on with the smaller items. As to compensation, I am glad to say that the increase is not owing to an increase of compensation to passengers but almost entirely for goods. The pressure has been very great; the accommodation in some cases has been limited, but to that we are directing our attention every day and increasing as reasonably and as prudently as we can the accommodation for goods traffic in all our large towns, and we hope that when the increases in the accommodation are completed there will be a diminution in compensation for losses for goods. All the other items are, I am sorry to say, a little up; but that is not to be wondered at, considering the large increase in the total gross volume of traffic. Now, this is a point that I want to call your particular attention to, that the increases in salaries and wages, as shown on the paper which you have before you, amount in maintenance to 5,443 $\frac{1}{2}$ , in the locomotive department to 34,781 $\frac{1}{2}$ , carriage repairs 12,605 $\frac{1}{2}$ , wagon repairs 1,212 $\frac{1}{2}$ , traffic expenses 69,228 $\frac{1}{2}$ , and in the boats 1,228 $\frac{1}{2}$ . The increase in the boats is mainly owing to the increased number of voyages, and therefore increased payments to the crews, and so on. Well, that makes a total of 124,497 $\frac{1}{2}$  actually shown on the paper. Besides, in various other items, such as materials, stores, and so on, there is also an increase in wages which cannot be separated under the particular head in which it is, so that we may fairly say that the large proportion of the increase is due to the increase in wages. If you remember, on the last occasion I had the pleasure of meeting you I told you some of the causes which would account for this. Of course, in the increase in wages there is an increase in the number of men required to carry on the traffic. There is one very important item, the shorter hours which have been forced upon us for the men, and also the increase in the actual amount of wages. From those three causes we have this very large increase in the wages account of the line. Now, the increased expenditure from locomotive power, as I said, is 58,304 $\frac{1}{2}$ . Of this 49,067 $\frac{1}{2}$  is accounted for in this way:—Running expenses in wages, 27,389 $\frac{1}{2}$ ; coal, 17,019 $\frac{1}{2}$ ; water, 1,041 $\frac{1}{2}$ ; oil, tallow, &c., 3,618 $\frac{1}{2}$ ; so that naturally with that increase in wages we cannot be surprised that the locomotive charges go up. Those are the principal items, and I do not think I need go into more detail about them. Of course I shall be glad to answer any questions to the best of my ability that may be put on any point, but we will go on with the other points in the report. The company's Bills and the Bills of other companies submitted to the proprietors at a special general meeting on February 22nd last have received, or are awaiting, the Royal Assent; in fact, at 2.30 this afternoon our last Bill will receive the approbation of her Majesty. The three Bills which we had were the Wales Bill, our Steam Vessels, and the Omnibus Bill. The Steam Vessels Bill is a very important Bill to us, because you may remember we brought this Bill into Parliament with the view of doing away with the obligation that lay upon us of going to Parliament to renew our steamboat powers from time to time. These powers were given to us for a limited time, and the time is nearly up. Now Parliament has given us the right to run these steamboats in perpetuity, so we shall have no more trouble on that score hereafter in Parliament. ("Hear, hear.") Then the next is a very important paragraph:—"The Workmen's Compensation Act came into operation on July 1st last, and the directors have decided to meet the liability under the Act, instead of adopting any scheme for contracting out." You may remember that at our last meeting I told you that, as far as we had gone, the directors had decided that they would accept, as they were bound to do, the Act of Parliament in perfect integrity, that they would abolish the system of contracting out, and that any future arrangements that would be made were then under consideration. I also told you that we should meet the men on the question, and come, as we have done, to an amicable arrangement with them. Upon this Act coming into operation its provisions entirely precluded the continuance of the then existing mutual insurance societies, contributed to both by the company and by the men, which have worked, as you know, so satisfactorily, and have been so much appreciated by the men since the passing of the Employers' Liability Act of 1880. We were very sorry indeed that we were forced to give up our insurance societies, which had worked so amicably and so well, but, at the same time, there was no choice left to us. Under these circumstances the directors decided not to propose any scheme for contracting out of the Act, but to accept the responsibility in each individual case, leaving the men, if they thought fit, to continue or reconstitute the existing societies upon a different basis. This the directors are glad to say the men have decided to do, the poll of the men which was taken showing that a large majority were in favour of some provision being made to continue certain of the benefits which they derive from their existing societies, and which were not given to them by the Act. Of course, membership of the new societies will be entirely voluntary, as the power of compulsion was abolished under the Workmen's Compensation Act. Shortly, the reconstituted societies, of which there are three—one embracing all departments except the locomotive, another the locomotive running department, and the third the locomotive works department—provide for accident pay for the first fortnight after the accident, which, you all know, was left out in the Act, a period for which no provision is made in the Act; secondly, an addition to the accidental allowance which the men will be entitled to receive from the company under the Act; and thirdly, a small "natural death" allowance. It is hoped that the payments made by the men themselves to these societies will prove sufficient to secure the benefits provided for under the rules, and no contribution is made at present by the company, but if experience should show that the

societies require some small measure of assistance, I feel sure that the circumstances will be favourably considered by the proprietors. ("Hear, hear.") In the meantime, of course, the company's liability for accident under the Workmen's Compensation Act will be much larger than the sum they have hitherto contributed to the insurance societies, but I am glad to say that the men met us very fairly, and we have done everything in our power to aid them to start this society. It has started well, and should any assistance be needed I am sure that I shall not ask you in vain for that assistance. We hope, however, that it will be self-supporting. There is one other topic on which I daresay you are interested—you have seen a good deal about it in the papers lately—that is, the communication between the passengers and the guard and the driver. The communication, I am glad to say, on our line, has been very rarely used indeed, and I think these corridor carriages to a certain extent do away with any feeling of isolation which is, as a rule, much preferred by the Englishman, but so much dreaded by some ladies. (Laughter.) There is nothing that the Englishman likes better than to get a first-class compartment to himself and keep everybody else out. (Laughter.) He glares at everybody that comes in, or attempts to come in, and he is never so happy as when he is alone in his first-class compartment, but which does not quite suit our pockets so well. However, the question of communication is being considered by the managers, and our object is not to get into the same mess as we did before about brakes and other things. We hope the general managers—as clever a set of men as you will find in the country—will lay their heads together and settle upon one plan which can be with unanimity adopted by all the railways of this country. We want it cheap, we want it efficient, and we want it to do its work well, and I do not believe it is outside the range of possibility that such a conclusion can be arrived at. Well, those are really all the points to which I need call your attention; but before putting the motion I shall be glad to answer any questions which may be asked. (Applause.)

Mr. BEAVIS asked—inasmuch as the passenger traffic had shown a considerable increase, how it came about that the dividend was  $\frac{1}{2}$  per cent. less than in the corresponding half-year?

The CHAIRMAN, in reply, said that neither he nor, he believed, any shareholder, was satisfied at receiving a less dividend. Mr. Beavis's argument appeared to him to point out this—that because he had moved up, as moved up he had, a large number from the third to the second class, and taken more money in consequence, the directors were to blame. He must confess he did not see that. They had got more money for the same number of passengers than they did before, and that with very little increased, if any, accommodation. If the shareholders were satisfied—and he knew they were—the directors would continue in the same course hitherto pursued, in spite of Mr. Beavis's remarks.

Mr. HORNECK presented a memorial signed by 976 shareholders, praying the directors for a diminution and final abolition of the Sunday light and heavy goods traffic which was not perishable, and for the abandonment of the system of special Sunday passenger trains.

Major MCKINLEY supported the memorial.

Mr. KEEN entirely disagreed with the previous speaker on the Sunday question, and said it was to the interest of the company that the directors should offer all reasonable accommodation for those who required to travel on the Lord's Day. He was satisfied that the directors knew what ought to be given to the public, and he believed the shareholders would do well to leave the matter entirely in their hands. ("Hear, hear.")

The CHAIRMAN, in regard to Mr. Horneck's remarks, said he had only to repeat what he had often said on the same subject. There was not a railway in the country that did less Sunday traffic than the London and North Western. (Applause.) He had always acted up to the resolution which was passed many years ago by the shareholders, that no unnecessary work should be done on their system on the Sunday. They must provide certain trains, but every train that could possibly be knocked off was withheld, and every man who possibly could get Sunday rest did get it on the London and North Western. He would suggest to the gentlemen who had spoken that they should go to other railways, who were far greater sinners in that respect, and leave this company alone. The directors would continue to act upon the resolution passed by the shareholders years ago. ("Hear, hear.")

A SHAREHOLDER suggested that better through accommodation to the main line should be given from Blackpool, St. Anne's, and Lytham.

The CHAIRMAN said the matter would be noted, and the directors would see what could be done in that direction. They were enlarging the lines and building a new line, and great attention was being paid to that traffic; and he hoped they would get for the North Western what their late chairman always described as the "lion's share," which was a little more than he (his lordship) thought they ought to have. He begged now to move:—"That the report, with the half-yearly statement of accounts, be received and adopted."

Mr. BICKERSTETH seconded the motion, which was put to the meeting and unanimously agreed to.

The CHAIRMAN next moved the resolutions recommended in the report, including a dividend at the rate of  $\frac{1}{2}$  per cent. upon the ordinary stock.

Mr. BICKERSTETH seconded the resolutions, which were agreed to.

The recommendations in the report to execute certain works were approved, and the meeting sanctioned an addition to the capital of the company of £315,000 for the purposes indicated.

A further resolution was also approved authorising the directors to exercise the borrowing powers of the company to the extent authorised by their Acts of Parliament.

A special general meeting was subsequently held, at which it was resolved:—

"That, under the powers of the London and North Western Railway Act, 1855; the Lancashire and Yorkshire Railway Act, 1855; and the London and North Western Railway (New Railways) Act, 1892, there be created and issued the sum of £315,000, consolidated stock of the company; that the directors be and they are hereby authorised to issue such consolidated stock at such times, to such persons, on such terms and such conditions, and in such manner as they think advantageous to the company."

"That this meeting authorises the exercise by the company of their borrowing

powers to the extent authorised by the London and North Western Railway Act, 1855; the Lancashire and Yorkshire Railway Act, 1855; and the London and North Western Railway (New Railways) Act, 1892, and also authorises the said company, in accordance with the said Acts, to raise by the creation and issue of debenture stock at such times, in such amounts and manner, on such terms, and subject to such conditions as the directors shall think fit, the whole or any part of the moneys which the company have power to raise by, and to be instead of, such borrowing; and that there be attached to such debenture stock a fixed and perpetual preferential interest at the rate of 3½ per centum per annum, to be payable half-yearly at the same periods as the interest on the debenture stock of the company is payable."

A vote of thanks to the chairman and directors for their past services terminated the proceedings.

## HULL AND BARNESLEY RAILWAY.

The half-yearly general meeting was held at Hull on Thursday; Mr. JOHN FISHER, J.P., presiding.

The register of shareholders showed the number of proprietors at the close of June 30th last to be 5,775, as against 5,818 at the close of the preceding half-year, a decrease of forty-three.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) remarked that it might be said that other people's losses had been their gain; but he hoped that a considerable amount of traffic which had been thrown on their line through the South Wales coal strike would remain with them, feeling sure that an equally good, if not superior quality of steam coal could be obtained from Yorkshire and other districts and shipped at the port of Hull. The accounts of the half-year showed a gross revenue from all sources of 197,869*l.*, as compared with a gross revenue of 177,481*l.* in the corresponding half of 1897, an increase of 20,388*l.* The working expenses had been 112,003*l.*, as against 108,644*l.*, an increase of 3,366*l.*, and the rate was 56.60 per cent., as against 61.20 per cent. He might here say that with the exception of the Lancashire and Yorkshire Railway Company they stood the lowest of all the companies trading northward in the percentage of their working expenses. The net revenue of the company was 85,866*l.*, as against 68,837*l.* in the corresponding half of 1897, an increase of 17,029*l.*, and equal to 24.74 per cent. After paying fixed and other charges there remained a balance on the half year of 33,316*l.*, which, with 8,952*l.* brought forward from the previous half-year, left them with 42,268*l.* to be carried forward this half, as against 24,499*l.* in the same half of 1897, an increase of 17,769*l.* The board had had under full consideration the desirability of paying a dividend for the past half-year; but they found the legal difficulties were almost insurmountable, and therefore they carried forward the full balance, and the shareholders would receive the full benefit thereof at the close of the present half-year. Throughout the thirteen half-years since 1886 the undertaking had been showing satisfactory progress. In the Alexandra Dock this half they had had an increase of 72,000 tons over the corresponding half of 1897, and the company's officials have thrown upon them very considerable pressure to meet the requirements of the past four or five months of the South Wales coal strike. Inevitable delays had occurred through the number of vessels continually arriving, but their appliances and the certainty of deep water had been sufficiently satisfactory to prevent any serious complaints from the shipowners and the shippers using the dock, with the exception of one firm, which appeared to be most difficult to satisfy. He hoped that as soon as the new dock extension, and the appliances it was proposed to erect there, were completed, the extra facilities would be amply sufficient to meet any pressure which might be put upon them for some time to come. The board had thought it necessary to purchase a further supply of wagons for the goods traffic; and he was glad to find the corn merchants and the timber trade continuing to avail themselves of their dock and railway. The Bill promoted by the company in this session of Parliament for the renewal of powers under the Act of 1892, and the transfer of the Hull and South Yorkshire Extension Railway undertaking to the Hull and Barnsley Railway Company had received the Royal Assent, and very shortly they would have to call the proprietors together again to consider a scheme for raising the necessary capital for those works, for locomotive engines, and other requirements of the company. At this point he might be allowed to refer to a circular recently issued by the Denaby and Cadeby Main Collieries Company, Limited, under the hand of their secretary, Mr. George Wilkie, in which they showed their opposition to the enlargement of the Hull and Barnsley undertaking, by the transfer of the proposed Hull and South Yorkshire Extension Railway Company, as it would place other collieries in a better position than their own to compete with the Denaby Company. He did not propose to deal at any length with the circular, because in a recent letter from the Denaby Company they were threatened with legal proceedings in consequence of their company being unable, as they said, during the South Wales coal strike, to deal with their traffics expeditiously as they desired. On Monday thirteen vessels entered the Alexandra Dock for loading coals, to carry upwards of 70,000 tons; and, therefore, they might readily imagine the difficulty of dealing with so large a fleet entering at one time. But their hoist and appliances were working night and day, and he was glad to say, up to the present, most satisfactorily. Up to March 31st last he found the Denaby Company had shipped 8,571 tons of coal less than in the corresponding period of 1897. Since that time they had increased the quantity, and up to June 30th last there was an increase of 20,333 tons over the corresponding period. But this was only a small proportion of the large increase they had had to deal with from other collieries. The total increased shipment had amounted to 155,650 tons. Again, the Denaby Company said that by their unaided efforts they had put upon their railway a traffic equal to 60,000*l.* per annum. But, on appealing to the accountant, he found that the gross traffic for 1896 was only 37,654*l.*, and after deducting the tolls due to the South Yorkshire Junction Railway Company they were left with a balance of 23,545*l.* Even in 1897 the gross amount was only 45,854*l.*, and taking the South Yorkshire tolls there was left a balance of 30,333*l.* Proceeding, the chairman dealt with the paragraph referring to Mr. Forbes, one of the directors of the Hull and Barnsley Company, respecting whom a more unjustifiable libel could not have been published. He had nothing

whatever to do with the promotion of the Hull and South Yorkshire Junction Railway scheme, but certain of the proprietors waited upon the board, and after hearing their views, Mr. Blake Walker, Mr. Poston, and himself were instructed to join the colliery companies in promoting the Parliamentary Bill, as they knew they had succeeded in obtaining the transfer to the Hull and Barnsley, for the purpose of being carried out, and he had no doubt a satisfactory traffic would be obtained from that source as well as from the Dearne Valley. There were other projects on foot in that division of South Yorkshire to which he believed they would have direct access, and in that way get a very large increase of coal traffic to be shipped from the port of Hull in future years. In the report of the North Eastern Railway Company's half-yearly meeting he saw that reference was made to the agreement entered into with the Hull and Barnsley relative to the new joint dock to be constructed on land belonging to the Hull and Barnsley to the eastward of the Alexandra Dock, in which each company would have separate access, the North Eastern for the purpose of using a part of their line in Hull, for which they would pay toll, but with no access to the Alexandra Dock. They might rely upon it when the scheme was formulated the directors would give it their fullest and best consideration. Continuing the Chairman went over the statement of accounts in detail, and concluding, moved the adoption of the balance-sheet and statement of accounts.

Mr. W. TROTTER (deputy-chairman) seconded the resolution.

Councillor COHEN asked the chairman if Mr. Forbes had received no salary since 1888.

The CHAIRMAN said that was so.

Mr. COHEN said he found Mr. Forbes in the position of general adviser to the London Chatham and Dover Railway Company: the board might now see its way clear to relieve him of the position on the board, and appoint in his place a gentleman from South Yorkshire, who might be able to command increased business for the Hull and Barnsley. (Applause.) He complimented the board as to the way in which they had managed the business, and expressed the hope that the North Eastern, in conjunction with that company, would do their best for the advancement of the port.

Alderman MASSEY said the absence of any comment by the corporate representatives upon the agreement for constructing a joint dock, referred to in the report, must not be taken as an acquiescence either in the policy indicated or their agreeing to its bringing any prospective practical benefit to the proprietors of the Hull and Barnsley Company.

The CHAIRMAN said that Alderman Massey would have the opportunity of discussing the question of the joint dock when the plans were formulated. With regard to Mr. Forbes, he differed from Mr. Cohen. Mr. Forbes had been the most valuable adviser in the interests of the company ever since its opening. He had never taken any part in the detailed management or working, but whenever they had to go to Parliament or consider any serious question, he had found Mr. Forbes most valuable, as he was considered the greatest expert in railway matters in the kingdom. With regard to the remuneration, he said a certain amount was voted by the shareholders for the remuneration of the directors, and they settled it among themselves how it should be appropriated. They set apart a certain amount per annum to be applied to charitable purposes. When any man was killed on their line or seriously maimed, they contributed from that fund to the loss sustained by the family. The fund had been so reduced that they could not afford to vote another 1,000*l.* to Mr. Forbes. As to the future of their coal trade, he thought that Hull would become one of the greatest coal shipping ports in the country. Yesterday they had docked a vessel from Calcutta, drawing 24*ft.*, at neap tide. That same vessel had had to lighten when going to Liverpool, and stay two or three days in the Mersey.

The report was then unanimously adopted.

### MANCHESTER SHIP CANAL.

The half-yearly general meeting was held in Manchester on Thursday, Mr. J. K. BYTHELL presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue from the Ship Canal of 106,695*l.* (against 97,330*l.*), an expenditure of 86,122*l.* (against 98,224*l.*), and a profit of 20,573*l.* (against a loss of 894*l.*). From the Bridgewater Canals the gross revenue was 139,734*l.* (against 137,602*l.*), the expenses were 118,029*l.* (against 117,585*l.*), and the profit 21,706*l.* (against 20,017*l.*). Together the profits were 42,279*l.*, and adding general interest, 391*l.*, the total net revenue was 42,670*l.*, applicable towards interest on mortgage debentures for the half-year—viz., 157,242*l.* The accumulated balance at debit of net revenue account is now 707,036*l.* The capital account showed an authorised capital of 15,412,000*l.*—viz., shares, 8,000,000*l.*; loans, 7,412,000*l.* The total expenditure on capital account amounted to 15,179,224*l.*, whilst the receipts have been 15,404,370*l.*, as follows:—Ordinary shares, 3,997,411*l.*; preference shares, 3,999,959*l.*; debentures, 3*l.* per cent., 1,359,000*l.*; ditto 4 per cent., 1,048,000*l.*; ditto 4*½* per cent., 5,000,000*l.* The amount expended on capital account during the half-year was 17,053*l.*, of which 15,489*l.* was on construction of works. The report stated:—“The net revenue from the Ship Canal portion of the undertaking amounted to 20,573*l.*, as compared with a loss of 894*l.* on the working of the corresponding period of 1897. The improvement was caused by increased earnings and reduced expenditure. The weight of toll-paying merchandise which passed over the Ship Canal was:—In sea-going craft, 979,992 tons (against 783,280 tons); in barges, 193,888 tons (against 173,930 tons); total, 1,173,880 tons (against 957,210 tons). The greater portion of the increase of 196,772 tons of sea-borne traffic was in low-class articles; the export of coal, which yields little revenue, showed an increase of 99,000 tons. The imports of grain showed an increase of 21,400 tons. The tank oil trade has made a good beginning, 20,300 tons having been imported, although the installations were not completed. The half-year's traffic and revenue would have been better still had it not been that the imports of timber were delayed by high rates of freight having led merchants to defer chartering steamers, and that floods in Spain injured the crops and caused a serious falling off in the fruit traffic. The effect of the high rates of freight was that, whereas during the first half of 1897 the imports of timber were 17,500 tons larger than during the corresponding period of 1896, the imports this

year were 11,000 tons less than last year. Manchester has not been an exceptional case. The Board of Trade returns show that the total decrease at all ports during the first half of this year amounted to 632,000 tons. Freights having now declined to a much lower level timber chartering has been resumed, and it is hoped that during the latter half of this year the imports of timber will be very large. An extraordinary meeting will be held at the close of the ordinary business, at which the shareholders will be invited to authorise the directors, in pursuance of the Manchester Ship Canal Act, 1897, to borrow any sum or sums not exceeding 100,000*l.* on the security of the company's surplus lands, subject to the consent of the Corporation of Manchester, in accordance with the provisions of the above-mentioned Act. The consent of the Corporation has been given to the borrowing of the sum of 50,000*l.* in the meantime.”

The CHAIRMAN, in moving the adoption of the report and statement of accounts, said the directors were again able to submit a record showing substantial progress. The result of the work in the corresponding half of last year was a debit balance of 804*l.*, whilst this half they had a credit balance of 20,573*l.* Taking the whole of the year 1897, the net revenue amounted to 51,037*l.*, whilst this year it amounted to 84,277*l.*, or an improvement of 33,243*l.* He did not like to prophesy unless he knew, but he might give his opinion, which was that the current half-year would enable them to pay the 44,743*l.* on first and second debenture interest, to recoup the sum of 2,700*l.* odd of which they were short this half-year, and just a little more. He should, indeed, be disappointed if the year 1898 taken as a whole did not enable them to pay the 89,846*l.* interest which would become due on the first and second debentures, and to pay a small amount to the Manchester Corporation. With regard to the traffic progress and prospects, he would draw attention to one simple fact—viz., that during the first half-year the Ship Canal was open the traffic amounted to 261,000 tons, whilst for the last six months the returns showed 920,000 tons. The cotton imports showed an increase again, but in that matter very much depended upon the attitude of the spinners. If they would duly determine that whatever cotton they purchased should come to Manchester by the canal there would be a chance of developing a local market. He appealed to traders of all descriptions both to give the canal their own traffic, and try and induce others to do the same. They had at length succeeded in establishing a line of Manchester steamers which would run only between their own and other ports. The company had been formed with a capital of 350,000*l.*, and he believed it marked the beginning of a movement which would ultimately give Manchester the rank of a first-class shipping port. They had a large fleet on the stocks, and, in the meantime, they had bought two vessels, while Sir Charles Furness had put on two of his own ships to keep together the Canadian trade which was started last summer. In the end he trusted they would have a weekly instead of a fortnightly service to the Dominion. He looked upon the gradual development of the large trade on the canal as one of the most satisfactory features. They trusted to see great things in time from the work which had been done in Trafford Park. He understood that land in the park had been leased or sold to persons who were going to put up large works. They were gaining day by day a very considerable position in the traffic world, and were laying the foundation of a colossal trade, which would eventually make Manchester one of the foremost ports in the kingdom.

Mr. SOUTHERN seconded the motion, which was agreed to.

### MIDLAND GREAT WESTERN RAILWAY OF IRELAND.

The half-yearly general meeting was held on Thursday at Dublin; Sir RALPH CUSACK, D.L., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—The working of the half-year has been in some respects satisfactory, because it is satisfactory to find that there has been an increase in the receipts of 7,133*l.* In passenger receipts there has been a decrease in both first and second class—a decrease of 364*l.* in first and 1,261*l.* in second—and there has been the increase of 2,375*l.* in receipts in third-class. A great deal of the decrease in first and second is, no doubt, due to the fact that we have been running third-class carriages on the limited mail for the last two months. We have done this in order to correspond with all the other companies in the country, and most of those in England. Possibly, it may hereafter turn out well, but at present a large number of the second and some of the first-class passengers are travelling third-class. The entire half-year's receipts show an increase of 2*½* per cent. over the corresponding period of 1897. That is satisfactory, but we now come to what is not so satisfactory—the expenditure in the half-year, and the large increase we have had to bear by laying considerably more steel rails. That, of course, is necessary and very desirable; but we had an increase in our wages of 2,361*l.*; taxes increased 800*l.* in the half-year, while one of the largest items was an increase in coal up to the end of June—1,120*l.* This coal matter is a very serious one not only for this company, but, I take it, for all companies, both in England and Ireland. We had a very favourable contract for about the best coal that can be produced—the best steam coal in South Wales—at 13*s.* 1*d.* per ton, to be delivered at our works at North Wall for that sum. That contract under ordinary circumstances would have lasted us the entire of this year, and up to May in the next year, but there was a strike clause in our contract which was put into all other contracts, and the contract was in abeyance once a strike took place among the miners. So we are now in treaty to buy coal wherever we can best get it; and, instead of 13*s.* 1*d.* being the price, we positively lose from 4*s.* to 6*s.* for every ton of coal we now purchase. The worst of it is that we cannot under any circumstances get good steam coal to buy, hence there is more coal used. Yesterday we tried Lancashire coal, and one of our most experienced drivers, driving the limited mail from this to Galway and back again expended 22*cwt.* of coal more than the normal quantity that he has always been using. So that in addition to the increased sum paid per ton of coal, we have also to bear loss in having to use more coal. This is a very serious matter, and it is my duty to put it before

you, as I am sure the other chairmen will have to put it before their shareholders, when they come to address them. As to our hotels, I may tell you that both our hotels are quite full and packed. Everything has been done to bring these hotels out in the proper manner, and the result is, I believe, that those who visited them are greatly pleased with the manner in which they are conducted. Not only are the hotels full now, and for some weeks back, but persons have been booked in advance for some weeks to come. The hotels are both well furnished and they are lit with electric light. In the Mullaranny Hotel we have been very fortunate, as to that, for the engineer has managed so that the power for the electric light is brought from a neighbouring mountain or hill. Mullaranny Hotel is a very small one compared to the one at Recess, but when it was building it was intended always to increase the number of bedrooms from eighteen to about double that number, so as to make it equal to Recess, with thirty-four, and it is our intention to carry out that original idea. Of course, we have a considerable amount of space there, and it is our intention next year to have that hotel equally large in bedrooms as the other one. A great many people have pressed us about adopting a through carriage from Kingstown Pier down our line, in the same way as the Great Southern and the Great Northern lines. I can only say that we have used every exertion that we could to induce the Dublin Wicklow and Wexford Company, who are, of course, masters of the situation, to allow us to have two carriages on the train, and we have offered to pay a reasonable rate for those. Within the last few days I have had an interview with the chairman of the Wicklow Railway Company, and I can say that I have every hope that before many weeks through carriages will run from Kingstown, as, indeed, they ought to have done long since. You will, no doubt, have seen that it is proposed by the Great Southern and Western Company to amalgamate with the Waterford and Limerick and the Central Company of Ireland, and that it has been the unanimous opinion of the committee of the House of Commons that had been lately sitting that they fear that the interests of that district would be seriously injured, and look upon it with grave apprehension if the Great Southern and Western were allowed to absorb those two lines. At present I shall not say any more on this subject than that your directors are giving this matter their best consideration, and that nothing will be done by this board but what will be necessary to protect your interests, and, if possible, to take care that this Great Southern Company, in their gigantic movement, will not in any way injure the Midland Great Western Company. ("Hear, hear.")

Mr. CHAWORTH J. FERGUSSON, J.P., seconded the motion, which was unanimously adopted.

The dividends were declared, and the retiring directors and auditors re-elected.

Mr. JOHN G. VESSEY PORTER at this stage brought before the meeting the desirability of fitting up Galway as a trans-Atlantic packet station. The shareholders during the past three years had been unanimously in favour of the project. He regretted it had been opposed by the directors; he hoped that it would not be opposed by them any longer, but that they would summon a special meeting to deal with the matter. It was far more than a mere Galway question; it was an all Ireland question; and it was never more wanted than at the present day. To show his sincerity and earnestness in the matter, he was prepared to give 1,000l. to get an estimate and plan from a qualified harbour engineer, leaving only a small balance to be paid by the shareholders.

The CHAIRMAN said they really had no money to spend on such an object, which would cost an enormous amount of money.

### CARDIFF RAILWAY.

The half-yearly general meeting was held on Wednesday at the offices of the company, Queen Anne's-gate, S.W.; Lord EDMUND TALBOT, M.P., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said that there had been expended on new works and extensions during the half-year 27,781l., and the new dock had absorbed 18,098l. and the new railway 2,973l. In consequence of the sliding-scale strike the traffic on the railway and docks had been seriously affected, particularly during the past three months, the total receipts being 159,636l., the balance carried to net revenue account being 44,960l. With a balance of 10,820l. brought from last year and a sum of 3,212l. from the bankers' and general interest account, the total net revenue was 58,993l. After providing for payment of 22,999l. of debenture interest, there remained a balance available for dividend of 35,993l. Out of this the directors recommended the payment of 4 per cent. on the preference shares and 4 per cent. on the preferred ordinary stock (1894), carrying forward a balance to next account of 5,993l. His lordship referred to the fact that the Bill for empowering the company to construct an independent line of railway from Llanishen had passed both Houses of Parliament, and he referred with satisfaction to the successful opposition of this company to the proposed construction of a new dock at Penarth. Operations had been commenced for the construction on the foreshore of a new dock in connection with the company's undertaking.

Sir W. T. Lewis seconded the motion, which was carried.

### STEYNING AND PULBOROUGH RAILWAY PROJECT.

A deputation of Sussex landowners and others recently waited on the directors of the London Brighton and South Coast Railway Company to urge upon them the desirability and importance of constructing a short connecting line between Steyning (near Brighton) and Pulborough, a scheme supported by the Duke of Norfolk, Lord Leconfield, Lord Zouche, Sir Walter Bartelot, the Rev. John Goring, and other landowners on the route of the suggested railway, all of whom promised to give the necessary
